

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

Members of the University Faculty and Other Instructors

1903-1904

WILLIAM OXLEY THOMPSON	University Grounds
President	
THOMAS CORWIN MENDENHALL	Florence, Italy
Emeritus Professor of Physics	
ROBERT WHITE MCFARLAND	Oxford, Ohio
Emeritus Professor of Civil Engineering	
SIDNEY AUGUSTUS NORTON	363 East Town Street
Emeritus Professor of Chemistry	
STILLMAN W. ROBINSON	1353 Highland Street
Emeritus Professor of Mechanical Engineering	
WILLIAM HENRY SCOTT	131 Fifteenth Avenue
Professor of Philosophy	
NATHANIEL WRIGHT LORD	338 West Eighth Avenue
Professor of Mineralogy and Metallurgy, Director of the School of Mines	
†SAMUEL CARROLL DERBY	93 Fifteenth Avenue
Professor of Latin	
WILLIAM RANE LAZENBY	348 West Eighth Avenue
Professor of Horticulture and Forestry	
JOSIAH RENICK SMITH	950 Madison Avenue
Professor of the Greek Language and Literature	
HENRY ADAM WEBER	1342 Forsythe Avenue
Professor of Agricultural Chemistry	
BENJAMIN FRANKLIN THOMAS	University Grounds
Professor of Physics, and State Sealer of Weights and Measures	
GEORGE WELLS KNIGHT	85 Jefferson Avenue
Professor of American History and Political Science and of Law	
ROSSER DANIEL BOHANNAN	Sixteenth and Indianola Avenues
Professor of Mathematics	
ALBERT MARTIN BLEILE	218 King Avenue
Professor of Anatomy and Physiology	
WILLIAM ASHBROOK KELLERMAN	175 Eleventh Avenue
Professor of Botany	
GEORGE BEECHER KAUFFMAN	University Grounds
Professor of Pharmacy, and Dean of the College of Pharmacy	
BENJAMIN LESTER BOWEN	775 East Broad Street
Professor of Romance Languages and Literatures	
JOSEPH VILLIERS DENNEY	230 West Tenth Avenue
Professor of Rhetoric and the English Language, and Dean of the College of Arts, Philosophy and Science	
ALLEN CAMPBELL BARROWS	85 West Tenth Avenue
Professor of English Literature	
EDWARD ORTON, JR	The Normandie
Professor and Director of the Department of Clay-Working and Ceramics and Dean of the College of Engineering	

†Absent on leave.

*WILLIAM FORREST HUNTER	1032 Bryden Road
Professor of Law and Dean of the College of Law	
*JAMES HENRY COLLINS	The Chittenden; New Hayden Building
Professor of Law	
EMILIUS OVIATT RANDALL	257 Woodland Avenue, Supreme Court Building
Professor of Law	
WILLIAM THOMAS MAGRUDER	191 King Avenue
Professor of Mechanical Engineering	
EDGAR BENTON KINKEAD	Wyandotte Avenue; New Hayden Building
Professor of Law	
WILLIAM HERBERT PAGE	1068 Franklin Avenue; 27 Board of Trade
Professor of Law	
WILLIAM McPHERSON	University Campus
Professor of Chemistry	
JOSEPH NELSON BRADFORD	54 West Tenth Avenue
Professor of Architecture and Drawing	
DAVID STUART WHITE	West Fifth Avenue
Professor of Veterinary Medicine, and Dean of the College of Veterinary Medicine.	
HERBERT OSBORN	485 King Avenue
Professor of Zoology and Entomology	
CHRISTOPHER P. LINHART	O. S. U. Gymnasium; The Vendome
Professor of Physical Education and Director of the Gymnasium	
OLIVE B. JONES	95 Eleventh Avenue
Librarian	
HENRY CURWEN LORD	University Grounds
Professor of Astronomy and Director of the Emerson McMillen Observatory	
FRANK EDWIN SANBORN	303 West Eighth Avenue
Professor and Director of the Department of Industrial Arts	
FRANK ARNOLD RAY	137 King Avenue
Professor of Mine Engineering	
*FREDERICK CONVERSE CLARK	1634 Neil Avenue
Professor of Economics and Sociology	
JOHN ALLEN SHAUCK	95 Winner Avenue; Supreme Court Building
Professor of Law	
CAPT. GEORGE L. CONVERSE, U. S. A. (Retired) ..	94 Hoffman Ave., 23 East State St.
Professor of Military Science and Tactics	
JOHN WRIGHT DECKER	325 West Eighth Avenue
Professor of Dairying	
EMBURY ASBURY HITCHCOCK	380 West Eighth Avenue
Professor of Experimental Engineering	
FRANCIS CARY CALDWELL	401 West Sixth Avenue
Professor of Electrical Engineering	
CHARLES SMITH PROSSER	114 West Tenth Avenue
Professor of Geology	
JOHN ADAMS BOWNOCKER	1594 Neil Avenue
Professor of Inorganic Geology and Curator of the Museum	
ALFRED DODGE COLE	237 Eleventh Avenue
Professor of Physics	
MINNIE AVA NELLIE STONER	95 West Eleventh Avenue
Professor of Domestic Science and Head of Department of Domestic Economy	
WILBUR HENRY SIEBERT	182 West Tenth Avenue
Professor of European History and Secretary of the University Faculty	
CHRISTOPHER ELIAS SHERMAN	772 Oak Street
Professor of Civil Engineering	
ALBERT HENRY HELLER	1249 Neil Avenue
Professor of Civil Engineering	

*Died June 15th, 1904.

*Died January 8th, 1904.

*Died September 19th, 1903.

CHARLES SUMNER PLUMB	107 West Eleventh Avenue
Professor of Animal Husbandry	
WILLIAM W. BOYD	29 South Monroe Avenue
High School Visitor	
SEPTIMUS SISSON	1619 Highland Street
Professor of Comparative Anatomy	
HOMER CHARLES PRICE	388 West Eighth Avenue
Professor of Rural Economics and Dean of the College of Agriculture and Domestic Science	
LEWIS ADDISON RHOADES	333 West Eighth Avenue
Professor of Germanic Languages and Literatures	
GEORGE WASHINGTON RIGHTMIRE	1528 Worthington Street
Professor of Law	
SMITH WHITWORTH BENNETT	171 King Avenue
Professor of Law	
GEORGE WASHINGTON McCOARD	797 Park Street
Associate Professor of Mathematics	
*CHARLES WALTER MESLOH	University Grounds
Associate Professor of Germanic Languages and Literatures	
ARTHUR WINFRED HODGMAN	202 West Eighth Avenue
Associate Professor of the Classic Languages	
†CORNELIA PORTER SOUTHER	
Associate Professor of Domestic Art	
†CLARA MAUD BERRYMAN	96 West Eleventh Avenue
Director and Associate Professor of Physical Education for Women	
WILLIAM EDWARDS HENDERSON	182 West Tenth Avenue
Associate Professor of Chemistry	
JOSEPH RUSSELL TAYLOR.....	448 West Seventh Avenue
Associate Professor of English Literature	
JAMES ELLSWORTH BOYD	60 West Maynard Avenue
Associate Professor of Mathematics	
CHARLES A. BRUCE	235 West Tenth Avenue
Associate Professor of the Romance Languages	
THOMAS EWING FRENCH	1458 Worthington Street
Associate Professor of Architecture and Drawing	
DAVID R. MAJOR	387 King Avenue
Associate Professor of Education	
CHARLES WILLIAM FOULK	1656 Neil Avenue
Associate Professor of Chemistry	
JOHN H. SCHAFFNER	40 West Tenth Avenue
Associate Professor of Botany	
CHARLES BRADFIELD MORREY	188 West Tenth Avenue
Associate Professor of Bacteriology	
JAMES STEWART HINE	1340 Hunter Avenue
Associate Professor of Zoology and Entomology	
FRANCIS LEROY LANDACRE	299 West Sixth Avenue
Associate Professor in Zoology and Entomology	
WALLACE S. ELDEN	55 West Ninth Avenue
Associate Professor of Classic Languages	
FRANK HARVEY ENO	251 West Ninth Avenue
Associate Professor of Civil Engineering	
ALFRED VIVIAN	244 West Tenth Avenue
Associate Professor of Agricultural Chemistry	
DENNIS HAMMOND UDALL	198 West Ninth Avenue
Associate Professor of Veterinary Surgery and Obstetrics	
MAY SECREST	162 West Tenth Avenue
Associate Professor of Domestic Art	

*Died March 15th, 1904.

†Resigned.

J. WARREN SMITH	1422 Oak Street
Lecturer on Meteorology

STATE SEALER OF WEIGHTS AND MEASURES.

THE PROFESSOR OF PHYSICS, *Ex-Officio*.

COLUMBUS, O., October 1, 1904.

His Excellency, HON. MYRON T. HERRICK, Governor of Ohio:

DEAR SIR:—I have the honor to transmit herewith the thirty-fourth annual report of the Board of Trustees, Ohio State University.

Very respectfully,

Your obedient servant.

ALEXIS COPE *Secretary*

REPORT OF BOARD OF TRUSTEES

OFFICE OF THE BOARD OF TRUSTEES,

OHIO STATE UNIVERSITY,

June 30, 1904.

HON. MYRON T. HERRICK, *Governor of Ohio*:

SIR:—In accordance with law, the Board of Trustees respectfully submits the thirty-fourth annual report of the Ohio State University, it being for the fiscal year ending June 30, 1904.

ENDOWMENTS.

The part of the irreducible debt of the State which forms the principal endowment of the University, at the date of the last annual report, June 30, 1903, was \$568,906.46, upon which the annual interest was \$34,132.58.

Under the operations of an act of the General Assembly entitled, "An act to quiet title to unpatented lands in the Virginia Military District of Ohio," passed March 14, 1889, the following sums were added thereto: November 19, 1903, \$105.60; December 23, 1903, \$1,302.43; January 7, 1904, \$408.74; February 10, 1904, \$870.80; March 2, 1904, \$699.50; March 4, 1904, \$187.50; March 25, 1904, \$113.94; April 13, 1904, \$1,101.31; April 25, 1904, \$338.11; May 6, 1904, \$53.75; May 14, 1904, \$310.65; June 21, 1904, \$2,847.68. Total additions during the year, \$8,340.01, making the principal endowment fund June 30, 1904, \$577,246.47, on which the annual interest is \$34,634.79.

THE WILLIAM JENNINGS BRYAN PRIZE FUND.

The principal of the original sum of two hundred and fifty dollars, which was given to the University by Hon. William Jennings Bryan, in 1898, on condition that the annual interest thereon should be awarded as a prize for the best essay discussing the principles which underlie our form of government, and which was added to the irreducible debt of the State, under the provisions of section 4105-15, Revised Statutes of Ohio, under the operations of section 4105-47, said statutes, was augmented by additions of interest so that on June 30, 1903, as stated in the last annual report it had reached the sum of \$308.69. There having been no award of said prize during the year just closed under the operations of the section

of the Revised Statutes last above mentioned, said sum has been further augmented by additions of interest until the principal sum June 30, 1904, is \$327.48.

THE ROBINSON FELLOWSHIP IN ENGINEERING.

The fellowship endowed by Professor S. W. Robinson in the sum of \$5,000.00 as stated in the last annual report was not awarded during the year just closed. As was stated in the last annual report, the principal sum above named has been paid into the State treasury, and under the operations of the sections of the statutes above mentioned on June 30, 1903, had reached the sum of \$5,125.00.

Further additions under the operations of said laws during the year just closed have increased said principal sum so that on June 30, 1904, it is \$5,439.75.

THE C. NEWTON BROWN SCHOLARSHIP FUND.

The C. Newton Brown Scholarship Fund, whose history was given in the last annual report, was also made a part of the irreducible debt of the State. The original sum was \$1,000.00 and was paid into the State treasury May 18, 1903. Under the provisions of law aforementioned said principal sum has also been increased by additions of interest and at this date, June 30, 1904, is \$1,068.33.

RECEIPTS AND DISBURSEMENTS.

The receipts and disbursements for the year ending June 30, 1904, are as follows:

RECEIPTS.

Balance in treasury June 30, 1903.....	\$ 6,910 28
Interest on endowment.....	34,257 37
State levy.....	341,380 92

Equipment law building.....	801 50
New boiler	5,933 13
Dials tower clock	360 00
Veterinary clinic	376 75
Miscellaneous	617 03
<hr/>	
Total disbursements.....	\$570,325 58
Balance in treasury June 30, 1904.....	12,035 00

The treasurer's report herewith filed contains a complete itemized statement of such receipts and disbursements.

RECEIPTS AND DISBURSEMENTS.

FARM.

The dean of the college of agriculture has entire charge of that portion of the grounds devoted to farm crops and experiments, and also of the dairy. He receives and disburses all moneys arising from sales of farm and dairy products, and submits his books of account and vouchers for each month for inspection by the Board of Trustees.

RECEIPTS AND DISBURSEMENTS.

The balance of cash on hand June 30, 1903, was.....	\$ 1,533 00
The receipts from sales of farm and dairy products during the year.	11,782 20
<hr/>	
Total	\$13,315 20
And the disbursements	12,453 74
<hr/>	
Leaving a balance June 30, 1904.....	\$861 46

HORTICULTURAL GARDENS.

The same plan prevails in regard to that part of the grounds used by the professor of horticulture in the production of fruit and garden products. He also presents his books of account and vouchers monthly for examination by the Board of Trustees.

During the year ending June 30, 1904, his receipts from sales of such products were	\$1,901 34
And the disbursements	2,069 34
<hr/>	
Leaving a deficiency to be provided for of.....	\$168 00

ADDITIONS TO GENERAL ENDOWMENT.

Up to June 30, 1903, the additions to the general endowment fund, under operations of an act of the General Assembly, passed March 14, 1889, entitled, "An act to quiet title to unpatented lands in the Virginia

Military District of Ohio" (O. L. 96, p. 92), an act passed April 21, 1893, entitled "An act for the relief of certain persons who formerly held lands in the Virginia Military District of Ohio" (O. L. 90, p. 20), an act amendatory to said last mentioned act passed May 21, 1894 (O. L. 91, p. 375), an act passed April 25, 1898, entitled, "An act making appropriations for the relief of certain persons who formerly held lands in the Virginia Military District of Ohio" (O. L. 93, p. 257), and an act passed April 10, 1900, entitled "An act making appropriations for the relief of certain persons who formerly held lands in the Virginia Military District of Ohio" (O. L. 94, p. 117), were \$31,065.04.

During the year ending June 30, 1904, under the operations of said first mentioned act there was added to said general endowment the sum of \$8,340.01, making the total additions under the operations of said several acts \$39,405.05.

NEW MORRILL FUND.

The following are the receipts and disbursements for the year ending June 30, 1904, of the appropriations made by act of Congress, of August 30, 1890, and known as the "New Morrill Fund."

RECEIPTS.

Balance in treasury June 30, 1903.....	\$192 15
Appropriation for year ending June 30, 1904.....	25,000 00
Total.....	<u>\$25,192 15</u>

DISBURSEMENTS.

For instruction and facilities in agriculture.....	\$6,047 36
For instruction and facilities in mechanic arts.....	6,542 75
For instruction and facilities in English language.....	1,770 00
For instruction and facilities in mathematical science.....	2,250 00
For instruction and facilities in natural science.....	7,520 43
For instruction and facilities in economic science.....	650 00
Total	<u>\$25,080 54</u>
Balance in treasury June 30, 1904.....	\$111 61

Said receipts and disbursements are included in the preceding general statement of aggregate receipts and disbursements.

The act of Congress making this annual appropriation requires that a detailed statement of the receipts and disbursements thereof, showing specifically the purposes to which the funds have been applied, shall be made to the Secretary of the Interior. This report for the year ending June 30, 1904, is appended to the report of the treasurer, filed herewith.

BONDED INDEBTEDNESS.

The bonded indebtedness of the university June 30, 1903, was \$255,000 due and payable as follows: \$55,000.00 December 1, 1903; \$10,000.00 June 1, 1904; \$15,000.00 December 1, 1904; \$10,000.00 June 1, 1905; \$15,000.00 December 1, 1905; \$25,000.00 December 1, 1906; \$25,000.00 December 1, 1907; \$25,000.00 December 1, 1908; \$25,000.00 December 1, 1909; \$25,000.00 December 1, 1910; \$25,000.00 December 1, 1911. Of this indebtedness \$20,000.00 bore interest at 6% and \$235,000.00 at 4% per annum, payable semi-annually.

Under and pursuant to the provisions of an act of the general assembly entitled "An act to authorize the board of trustees of the Ohio State State University, to refund and extend the time of payment of portions of the bonded indebtedness as the same becomes due," passed April 23, 1898, (O. L. 93, p. 221), \$30,000.00 of the 4% certificates of indebtedness falling due December 1, 1903, were taken up by an issue of the same amount of 4½% refunding bonds, falling due December 1, 1912.

Said refunding bonds brought a premium of \$1,135.80. The remaining \$25,000.00 falling due December 1, 1903, were paid, as was also the \$10,000.00 6% certificates of indebtedness falling due June 1, 1904.

Such reductions of the former indebtedness of the University left the amount remaining \$220,000.00, which is due and payable as follows:

\$15,000.00 December 1, 1904; \$10,000.00 June 1, 1905; \$15,000.00 December 1, 1905; \$25,000.00 December 1, 1906; \$25,000.00 December 1, 1907; \$25,000.00 December 1, 1908; \$25,000.00 December 1, 1909; \$25,000.00 December 1, 1910; \$25,000.00 December 1, 1911; and \$30,000.00 December 1, 1912.

NEW INDEBTEDNESS.

On May 10, 1902, the general assembly passed an act authorizing the Board of Trustees of the Ohio State University to issue certificates of indebtedness to an amount not exceeding two hundred thousand dollars, for the purpose of providing for the erection of needed buildings and equipment, said certificates of indebtedness were to bear interest not in excess of four per cent. per annum, payable semi-annually, and were to be issued in anticipation of the state levies for the support of the University. The Board of Trustees were reluctant to increase the indebtedness of the University, if it could be avoided, but the financial exigencies were such that on the 21st day of December, 1903, \$30,000.00 certificates of indebtedness were issued in pursuance of the act aforementioned and were bid in by the treasurer of the university, as an investment for that amount of the rents received from the Page will lands. Said certificates are dated December 15, 1903, and are payable December 15, 1904.

BURNING OF CHEMICAL HALL.

In the last annual report mention was made of the fact that an addition to chemical hall was just being completed at a cost of about \$20,000.00. On the evening of February 19, 1904, this building caught fire and was consumed, together with the greater part of its valuable equipment, entailing a loss of about \$100,000.00. The fire caught in a hood where an assistant had carelessly left a gas burner lighted, and was soon beyond control. The night was very cold, the temperature ten degrees below zero. The city fire department was slow in reaching the building, and slow in getting the fire engines started after they arrived. The firemen fearing explosions were kept outside the building, and did little to check the flames. The departments of chemistry, metallurgy, mine engineering and pharmacy were housed in this building, and suddenly found themselves homeless.

Fortunately the General Assembly was in session, and at once made an appropriation of \$15,000.00 for the purpose of temporarily providing for these departments, in other buildings.

The funds were immediately available and the work of providing and furnishing the necessary chemical store room and laboratories and other facilities for the burned out departments was pushed so rapidly, that their work though materially interfered with was not suspended.

NEW BUILDINGS.

The provisions made for the burned out departments were of course only temporary. The General Assembly was prompt to realize the necessity for new buildings in which to house them and after full examination and consideration of the situation appropriated the sum of \$100,000.00 for a new chemical building, in which to house the departments of chemistry and pharmacy, and the sum of \$85,000.00 for a building for the departments of metallurgy and mineralogy, mine engineering and ceramics.

Architects have been employed to prepare plans for these buildings and it is hoped to have them well under way during the present building season.

THE ENGINEERING BUILDING.

(Brown Hall.)

The Engineering Building described in the last annual report was so far completed at the opening of the last fall term that it was occupied by the departments of architecture, drawing and civil engineering. It has since been completed at a cost of \$80,717.17. It has been named "Brown Hall" in honor of the late C. Newton Brown, professor of civil engineering.

THE VETERINARY BUILDING.

The Veterinary Building, also described in the last annual report, was also finished in time for occupancy at the fall term 1903, and was occupied by the departments of veterinary medicine and bacteriology. The building is devoted exclusively to lectures and laboratory work, and when the chemical building was burned space was found in it for the temporary accommodation of the department of pharmacy.

It was completed at a cost of \$37,007.85.

BUILDING FOR DEPARTMENT OF PHYSICS.

The plans, specifications and estimates for a building for the department of physics, to cost when completed \$120,000.00, that portion to be constructed at present to cost not exceeding \$80,000.00, were completed and approved by the Governor, Auditor of State and Secretary of State. Due advertisement for sealed proposals for its construction was made and on the 21st day of December, 1903, the contract for the same was awarded to D. W. McGrath of Columbus, O., at his bid of \$69,773.00. The Board of Trustees reserved from the contract the electric wiring, estimated cost \$2,000.00, and the tunnel for steam water and gas pipes and electric wires, estimated to cost \$1,800.00, believing that this work could be better and more economically done by the University itself. The contract provides that the building shall be completed by September 20, 1904, but the lateness of the season and the bad weather have so retarded the work that it is not likely the building will be ready for occupancy at that time.

LAKE LABORATORY.

The Lake laboratory building at Cedar Point on Lake Erie, mention of which was made in the last annual report, was completed early in the year at a cost of \$3,386.78, and was occupied during a part of the summer vacation of 1903. It offers a fine opportunity for scientific study of fresh water forms and is attracting students from all parts of the country. It will doubtless prove a most valuable addition to the equipment of the University.

The laboratory was formally opened on the 2nd day of July, 1903, when addresses were made by Professors Herbert Osborn and Jos. V. Denney of the Ohio State University, Hon. John Mack of Sandusky, and others. Professor Herbert Osborn has been made the director of the laboratory.

THE CAMPUS.

During the past year there was expended on the campus the sum of \$2,431.18. A large portion of this money was expended in grading about

the new buildings and the balance in keeping the lawns, roads and walks in repair.

When the buildings now under construction, and for which plans are preparing, are completed, a much larger expenditure will be required to put the grounds in proper order.

Steps have been taken to have perfected a complete plan of the grounds, showing the location of all the buildings necessary for a complete plan. Until this plan is completed it is not likely that extensive improvements will be undertaken.

The committee to consider the matter of an independent water supply, of which Professor Ray is chairman, whose preliminary work was mentioned in the last annual report, has submitted an exhaustive and valuable report giving the results of its investigations in detail, together with plans, specifications and estimates for an independent plant.

Said committee recommends procuring the water supply for the University from shallow wells, and the softening of that portion used in the boilers, and finds that the cost will be a little more than is now paid for city water.

Said report has been referred to a committee of the Board of Trustees for examination and report.

THE PAGE WILL CASES.

Since the last annual report the cases pending in the Supreme Courts of Ohio and Illinois in which it was sought to set aside the devises to the University in the will of the late Hon. Henry F. Page, of about 870 acres of land in Ohio and 960 acres in the state of Illinois, have both been decided in favor of the University. There remains only the case pending in the United States Circuit Court of Appeals and the question of jurisdiction certified by that Court to the United States Supreme Court. The last named case only concerns the Ohio lands. As the litigation involving the Illinois lands is now closed, it becomes the duty of the Board of Trustees to sell such lands and pay the proceeds into the state treasury as a part of the endowment fund. This will be done as soon as a purchaser or purchasers can be secured to take the lands on favorable terms.

A favorable decision of the cases in the United States Circuit Court of Appeals is confidently expected in a few months at furthest, when the Ohio lands will also be disposed of in the same manner.

The University has been in possession of these lands for more than a year and the rents and profits therefrom since the death of the widow of Mr. Page have been received by the University. The amount of such rents and profits to June 30, 1903, were \$27,711.74. On July 28, 1903, the further sum of \$3,990.78 was received and on September 4, 1903, the entire sum of such rents and profits, to-wit, \$31,702.52, was invested pending the determination of the aforesaid suits. On June 29, 1904, the further sum

of \$5,443.43 was received, making the gross amount of such rents and profits received including accumulations of interest to June 30, 1904, \$38,012.74.

THE LIBRARY.

The expenditures for the library for the year ending June 30, 1904, exclusive of the salaries of the librarian and regular assistants were \$6,968.69. Of this sum there was paid for binding, \$1,162.29; for current supplies, \$411.41; for student assistants, \$1,060.36, and for books, \$4,334.63.

The number of books in the library June 30, 1903, was 48,223. The librarian's report filed herewith shows that there were added during the year 5,160 volumes, making the number accessioned June 30, 1904, 53,383. Of the number added 2,547 were purchased, 2,598 were donated and 15 received by way of exchange.

The more noteworthy gifts to the library were the library of the late Professor C. W. Mesloh, consisting of 355 volumes, which was generously donated by his widow; a collection of works on geology from the library of the late Doctor Edward Orton, which were presented by his son Professor Edward Orton, Jr.; a set of Appleton's Annual presented by Mr. George T. Spahr, of Columbus, Ohio; a complete set of the National Encyclopedia of American Biography, presented by General C. M. Spitzer, of Toledo, Ohio, and a complete set of the Druggist's Circular, presented by Mr. Henry J. Eady, of Elyria, Ohio.

Messrs. John and Louis Seibert, of Columbus, Ohio, have continued their annual gift of \$200.00 for the purchase of books for the Seibert collection of works on German History, making their total donations to this date \$1,000.00.

Quite a number of gifts of lesser note were also received. To these generous donors the Board of Trustees tenders the thanks of the University.

The very able report of the librarian presents the organization and work of the library in a very interesting and instructive manner, which is well worth the careful reading of those who are interested in modern library economy and administration.

LIBRARY OF THE STATE GEOLOGICAL SURVEY.

Through the efforts of Professor Edward Orton, Jr., an arrangement has been entered into whereby the library of the state geological survey is to be deposited in the university library for the free use of the faculty and students of the University.

Professor Orton took the initiative in this matter and is entitled to

the thanks of the University and the public for an arrangement which will be of great and lasting benefit to all concerned.

STUDENTS.

The number of students in attendance during the year just closed was as follows:

COLLEGE OF LAW.

First Semester 139.

Second Semester 138.

Other Colleges.

First Term 1,555.

Second Term 1,481.

Third Term 1,296.

The total number enrolled during the year as shown by the catalogue and president's report was 1,827.

The number in the several departments and classes and the courses of study pursued in each are set forth in the report of the President filed herewith.

FACULTY.

The instructional force of the University for the past year was made up as follows: Presidents 1; emeritus professors 4; professors 48; associate professors 19; assistant professors 20; lecturers 1; instructors 20; assistants 13; curators 1; high school visitors 1; fellows 13.

The library staff consists of the librarian, five assistants and one fellow.

The positions and compensation of members of the faculty and of other officers and employes of the University are given in the treasurer's report.

The changes in the faculty since the last annual report are given in the report of the president which accompanies this report.

DEGREES CONFERRED.

At the commencement in June, 1904, the following degrees were conferred:

BACHELOR OF SCIENCE IN AGRICULTURE.

Morris Oliver Bugby, Kingsville, Ohio; Clifford Christian Hatfield, Lebanon, Ohio; Alvin Scott Neale, Rock, Ohio; Modesto Quiroga, San Luis, Argentina; Frank D. Rubins, Kenton, Ohio.

BACHELOR OF SCIENCE IN HORTICULTURE AND FORESTRY.

James Herbert Beattie, Zanesville, Ohio; Frank D. Rubins, Kenton, Ohio.

BACHELOR OF SCIENCE IN DOMESTIC SCIENCE.

Annie Elizabeth Batterson, Grand View, Ohio; Ruth Amanda Hollister, Galion, Ohio; Adah Lucile Meyers, Columbus, Ohio; Francis Augusta Sullivan, New Carlisle, Ohio; Clara Margaret Tangeman, New Bremen, Ohio.

BACHELOR OF ARTS.

Mary Louise Arnold, Columbus, Ohio; David Clifton Bryant, Columbus, Ohio; Ralph William Buck, Cardington, Ohio; Sarah L. Burns, Columbus, Ohio; Robert Campbell, Toledo, Ohio; Caroline Martha Carmack, Columbus, Ohio; Jerry Riley Clements, Waverly, Ohio; Elmer William Coates, Pomeroy, Ohio; William Barney Cockley, Lexington, Ohio; Ray Durand Crout, Columbus, Ohio; Franklin Levi Davis, Columbus, Ohio; William Edgar Davis, Columbus, Ohio; Ernest Stewart Dillin, Coshocton, Ohio; Katherine Belle Early, Columbus, Ohio; Lenore Carrel Echols, Columbus, Ohio; Theresa Erb, Columbus, Ohio; Ralph Akin Foster, Columbus, Ohio; Frank Williams Gardner, London, Ohio; Melle Wilson Glass, Columbus, Ohio; Ira Garfield Gorham, Perrysville, Ohio; Ruth Matilda Grant, Columbus, Ohio; Helen Tuttle Greenwood, Columbus, Ohio; Anna M. Haesler, Springfield, Ohio; John Burnett Harshman, Xenia, Ohio; James McCleery Hengst, Lancaster, Ohio; Bertha Hite, Columbus, Ohio; John Hoffine, Columbus, Ohio; George Thomas Hoffman, Columbus, Ohio; William Gleason Holmes, Pittsburg, Pa.; Clifford Webster Jackson, Columbus, Ohio; Gertrude See Jackson, Columbus, Ohio; William Silver Jennings, Eaton, Ohio; Forest LeGrand Keiser, Bryan, Ohio; Blanch May Kern, Columbus, Ohio; John Dorsey Knox, Homeworth, Ohio; Charles C. Kochkeiser, Belleville, Ohio; Clarence Dewey Laylin, Columbus, Ohio; George Herbert Lewis, Leo, Ohio; Elsa Loechler, Columbus, Ohio; Homer Leslie Lewis, Columbus, Ohio; David Lorbach, Jr., Waverly, Ohio; James Bernard Malone, S. Charleston, Ohio; Robert Mathew Mark, Milo, Ohio; Roston Medbery, Columbus, Ohio; Maud A. McAlpine, Columbus, Ohio; Cloys Peter, McClelland, Rawson, Ohio; Roy Donaldson McClure, Columbus, Ohio; Mary Ann McKinley, Trinway, Ohio; Clarence Githens McPherson, Xenia, Ohio; Caroline Clemence Norton, Columbus, Ohio; Earl Hill Ortman, New Salem, Ohio; Alva Kendall, Overturf, Columbus, Ohio; Frank Coffman Parrett, Washington, C. H., Ohio; Paul Washington Pludemann, Columbus, Ohio; Edna Stuart Pratt, Columbus, Ohio; Rita Randall, Columbus, Ohio; Edith Athey Seymour, Columbus, Ohio; Nellie

Florence Sheets, Columbus, Ohio; Carl David Shoemaker, Napoleon, Ohio; Annie Elizabeth Smead, Columbus, Ohio; Homer F. Staley, Columbus, Ohio; Frank Macy Surface, Eaton, Ohio; Bessie Agnes Thompson, Columbus, Ohio; Laura Amelia Tressel, Columbus, Ohio; Alma Henrietta Wacker, Columbus, Ohio; Mary Isabelle Weber, N. Broadway, Ohio; John Clark Williams, Walnut Grove, Ohio; Carl Houseman Young, Columbus, Ohio.

BACHELOR OF SCIENCE.

Chauncey Brandt Baker, Washington, D. C.; James Harry Birnie, Marietta, Ohio; Ralph H. Demorest, Marysville, Ohio; Charles Searing Mead, Columbus, Ohio; Sigismund Ornstein, Sofia, Bulgaria; Phillips Thomas, Columbus, Ohio; Wilbert Babb Skimming, Wilmington, Ohio.

MASTER OF ARTS.

Ernestine Faye Ball, B. A., Columbus, Ohio; May Cummings, B. A., (Antioch College) Xenia, Ohio; Max Withrow Morse, B. Sc., Columbus, Ohio; Marion Wilson Mumma, B. Sc., Columbus, Ohio; Gilbert Lee Pennock, B. A., (Antioch College), Yellow Springs, Ohio; Charles Boyd Sayre, B. A., Columbus, Ohio; Edward Nathan Webb, B. Sc., (Pharmacy), Rome, Ohio.

DOCTOR OF PHILOSOPHY.

Melville Thurston Cook, M. A., (DePauw University.)

CIVIL ENGINEER IN ARCHITECTURE.

Charles St. John Chubb, Jr., Columbus, Ohio; Florence Elizabeth Hite, Columbus, Ohio.

CIVIL ENGINEER.

Benjamin Lonnie Bridgeman, Syracuse, Ohio; Benjamin Francis Dupuy, Ironton, Ohio; James Reed Marker, Versailles, Ohio; Guy Britton, Simons, Ohio; James Williamson Hunter, Zanesville, Ohio; Glenn Smith Burrell, New Lexington, Ohio; Ray Howard Rice, Portsmouth, Ohio; Joseph Horace Chubb, Columbus, Ohio; Lucian Shaw, W. Lafayette, Ohio.

ENGINEER OF MINES IN CERAMICS.

Thomas Walter Clark, Shawnee, Ohio; Leonard Burnside Coulter, Oxford, Ohio; Harold Phelps Humphreys, Elkland, Pa.; Leroy Himes Minton, Covington, Ohio.

ENGINEER OF MINES.

Oliver Perry Doty, Jr., Gervais, Ohio; Charles William Fuller, N. Madison, Ohio; Paul Hardy, Columbus, Ohio; Roy Edwin Howe, Lodi, Ohio; Hoyt Sherman McComb, Columbus, Ohio.

MECHANICAL ENGINEER IN ELECTRICAL ENGINEERING.

Howard Lindsley Beach, Glen Ridge, N. J.; Eric Wilson Benedict, Columbus, Ohio; Edgar Townsend Sill, Fostoria, Ohio; Herbert Lee Bostater, Ney, Ohio; Charles Franklin Kettering, Loudonville, Ohio; Carl Peter Leibold, Worthington, Ohio; Gaylor Malcolm Cameron, Jeromeville, Ohio; Theodore Doane Crocker, Cleveland, Ohio; John Scott Riddile, Barnesville, Ohio; Josiah Walker Gwynne, Wellsburg, W. Va.; William Arthur Schertz, Hamilton, Ohio; Warren Cornelius Kalb, Beavercreek, Ohio; Leo Sylvester McGarey, Junction City, Ohio; William Oliver Taylor, Urbana, Ohio; Forest Bertram Pelton, Chargin Falls, Ohio; Ivan Elnor Powell, Alliance, Ohio; Alton Leroy Stewart, Findlay, Ohio; Antonio Ribot y Colomer, San Juan, De Puerto Rico.

MECHANICAL ENGINEER.

Robert Clyde Alsdorf, Utica, Ohio; William Royal Chambers, Damascus, Ohio; Walter Alfred Dorsey, Newark, Ohio; Edouard Donald Royan, Houston, Ohio; Thomas Elliott Crooks, Van Wert, Ohio; Ray Morton Martin, Richwood, Ohio; Samuel Edwin Ward, Greenspring, Ohio; Edward Rall Feicht, Dayton, Ohio; Fred Singleton, Columbus, Ohio; Roy Brooke Smith, Columbus, Ohio; Burr Sells Waters, Columbus, Ohio; William Stewart Gould, Wyoming, Ohio; Thurman Welford Holloway, Zanesville, Ohio; Willard J. Hood, Cambridge, Ohio; Robert Meiklejohn, Columbus, Ohio.

BACHELOR OF SCIENCE IN CHEMISTRY.

Charles Edward Nesbitt, Columbus, Ohio; Grovey Otterbein Spitler, Findlay, Ohio; Frederick Moses Stanton, Waynesville, Ohio; Edward Thomas, Navarre, Ohio.

BACHELOR OF LAWS.

William Ariel Blair, B. Sc., (Ohio Northern University), Hillsboro, Ohio; Thomas Jefferson Corkery, Toledo, Ohio; John Helvey Eagleson, B. A., Columbus, Ohio; Charles R. Frankham, B. A., (Otterbein University), Columbus, Ohio; Francis Harvey Game, Canal Winchester, Ohio; William McGirr, B. A., (Ohio Normal University), Columbus,

Ohio; Simeon Nash, B. A., Zanesville, Ohio; Orville Raudabaugh, B. A., (National Normal University), Celina, Ohio; Earnest T. Schneider, Dayton, Ohio; Alonzo Herbert Tuttle, A. B., A. M., (University of Michigan), Columbus, Ohio; William Burroughs Woods, B. Ph., Garrettsville, Ohio.

MASTER OF LAWS.

Frank Craig Ainos, LL. B., Columbus, Ohio; Hanby R. Jones, B. Ph., (Otterbein University) LL. B., Columbus, Ohio; Edward C. Turner, LL. B., Columbus, Ohio.

BACHELOR OF SCIENCE IN PHARMACY.

Graham Burt Ackerman, Columbus, Ohio; Herbert Barr Henderson, Columbus, Ohio.

DOCTOR OF VETERINARY MEDICINE.

William Thomas Atherton, Carrollton, Ohio; Ernest Henry Baumann, Dundee Lake, N. J.; Howard Shannon Boggs, Kingston, Ohio; William Kemper Breckenridge, Watertown, Ohio; Alfred Davis Bullock, Milwaukee, Wisconsin; James Clyde Butcher, Wapakoneta, Ohio; Claude Henry Case, Hudson, Ohio; Charles Ray Dilts, Thornville, Ohio; Tomas S. Funes, Buenos Ayres, Argentine Republic; Luis Gonsebatt, Entre Rios, Argentine Republic; Robert Edwin Holm, Welshfield, Ohio; Eduardo B. Ibanez, Catamarca, Argentine Republic; Elmer Langdon, Sabina, Ohio; Horace Wade Laughlin, Belle Center, Ohio; Samuel Jacob Marquardt, Monroeville, Indiana; Victor Michael, Farmersville, Ohio; Robert Claude Musser, Buckland, Ohio; George W. Oden, Akron, Ohio; John Frank Planz, Akron, Ohio; Frederick William Porter, Augusta, Ga.; Wyatt Elgin Ralston, Findlay, Ohio; Howard Capwell Reynolds, Factorville, Pa.; Ernesto Sola, Salta, Argentine Republic; John Dudley Thrower, Mayhew, Miss.; Lynn J. Way, Youngstown, Ohio; Luther Dawson Whitwood, Canister, N. Y.

Also on the recommendation of the faculty, certificates were granted to the following members of the law class who had satisfactorily completed the course of studies in the college of law, but on account of deficient previous preparation were not entitled to a degree, said persons having passed the state examination for admission to the bar:

Wesley Richard Aldrich, Station B, Columbus, Ohio; Harry Daniel Baker, Newark, Ohio; Carl H. Bates, Nelsonville, Ohio; Charles Homer Durand, Toledo, Ohio; Frank Xavier Frebis, Ripley, Ohio; George Lewis Hoppes, Eher, Ohio; Floyd Ellis Kerr, Tippecanoe City, Ohio; Thomas

W. Lang, Findlay, Ohio; Frank E. Ruth, Columbus, Ohio; Roy C. Taylor, Washington C. H., Ohio; Herbert Spencer Thomas, Wheeling, W. Va.; Oscar Cecil Wagner, Kingston, Ohio; Benjamin Jacob Wolf, Gnadenhutten, Ohio; William J. Housel, Columbus, Ohio.

On the recommendation of the faculty certificates were granted to the following named persons, showing that they had completed the studies in the shorter courses named, to-wit:

SHORT COURSE IN AGRICULTURE.

Otto Clarence Alleshouse, New Bedford, Ohio; William T. Atherton, Carrollton, Ohio; Walton Ellis Groves, Egypt, Ohio; John Chester McNutt, N. Kingsville, Ohio; Brisben Otto Stingel, Coshocton, Ohio.

SHORT COURSE IN DAIRYING.

Saile Echegaray, Argentine Republic.

SHORT COURSE IN PHARMACY.

Hugh Gibson Beatty, Washington, C. H., Ohio; Albert Bolenbaugh, Canal Winchester, Ohio; Lee F. Chaney, Princetown, Ohio; Nelson C. Dysart, Reynoldsburg, Ohio; Columbus Johnson, Corning, W. Va.; Clarence Minor McClure, Hillsboro, Ohio; Mabel Elsie Smith, Columbus, Ohio; William M. Whitacre, Springfield, Ohio; Carl Winter, Youngstown, Ohio; Otto Sauerbrun, Shelby, Ohio.

SHORT COURSE IN VETERINARY MEDICINE.

Peyton D. Atkins, Hallsville, Ohio; J. Eldoras Bard, Sodom, Ohio; Ivan Brobeck, LaRue, Ohio; Edgar Lee Burke, Bethel, Ohio; Charles Hoyt Herrold, Starr, Ohio; Carl Arthur Johnson, Akron, Ohio; George Arthur Lipp, Middletown, Ohio; Lee Maynard, Ross, Ohio; William H. Redhead, Glenville, Ohio; Henry Glen Shepard, Sulphur Grove, Ohio; Don I. Skidmore, W. Mansfield, Ohio; Samuel Elza Springer, Lake Fork, Ohio; William D. Worthington, Pleasant Corner, Ohio.

ESTIMATES.

Following are the estimates for the year ending June 30, 1905:

Bonds and interest.....	\$ 34,712 50
Repairs building and plants.....	10,000 00
Fuel and light	22,000 00
Printing and advertising	1,000 00
Roads and grounds	2,100 00

Water rates	3,200 00
Expenses of trustees	500 00
Chemical store room	8,000 00
Salaries	211,450 00
Department apparatus and supplies.....	11,180 00
Library books	2,500 00
Incidentals	8,000 00
Page will bonds and interest.....	31,200 00
To complete physics building	66,173 33
New Chemical building	50,000 00
School of Mines building	50,000 00

PROGRESS OF THE UNIVERSITY.

In the report of the president, which is made a part hereof, the progress for the last year is set forth, showing that there has been an increase in the number of students and in the facilities for instruction.

A retrospective view covering the twenty-one years last past shows an increase of students every succeeding year but one, when the falling off was one student less than the preceding year. Happily the increase in the income for current expenses has more than kept pace with the increase in the number of students. The whole number of students in 1884 was 298. The number in 1904 was 1,827. The total income applicable to current expenses in 1884 was \$41,965.01. In 1904 it was \$302,012.75. These sums do not include the moneys received and expended for buildings and permanent improvements, which during the same period of twenty-one years reached the sum of \$978,530.71.

The growth has been steady and conservative and is the result of a wise conservative policy and a constant adherence to the letter and spirit of the land grant upon which the institution was founded. A continuance of such policy will make sure the continued growth of the university.

Respectfully submitted,

ALEXIS COPE, *Secretary.*

ANNUAL REPORT OF THE PRESIDENT TO THE BOARD OF TRUSTEES—JULY, 1904.

*To the Honorable PAUL JONES, President of the Board of Trustees of the
Ohio State University.*

DEAR SIR:—I have the honor to present, through you, to the Board of Trustees of the Ohio State University, the thirty-fourth annual report of the President of the University for the year ending June 30th, 1904.

THE FACULTY

During the year the faculty has had the unusual experience of losing four members by death.

Professor Frederick Converse Clark, Ph. D., head of the Department of Economics and Sociology, died on September 19th, 1903. Professor Clark was a graduate of the University of Michigan, class of 1887, and later received the Master's degree in 1888 and the Doctorate in Philosophy in 1891. He was for some time a student at Halle, Leipzig, and Berlin, and a teacher in the high school at Ann Arbor and at the Leland Stanford Jr. University. In June, 1895, he was called to the Ohio State University and later became head of the Department of Economics and Sociology, in which position he served until his death. Professor Clark was an enthusiastic student of economics and carried his enthusiasm into his work of teaching. His death coming at the bloom of mature manhood seemed most untimely and was sincerely mourned by a large circle of friends.

James Henry Collins died January 8th, 1904. Judge Collins had been identified with the College of Law since 1891. For more than thirty years he had been actively engaged in the practice, and during the latter years of his life his practice was almost entirely confined to the Federal courts. In this practice he was recognized as one of the most successful attorneys in Ohio. He served with great distinction for the Baltimore & Ohio Railroad Company as general counsel for a number of years, and was admirably equipped to teach the subject of Federal Practice in the College of Law.

Associate Professor Charles Walter Mesloh, died March 15th, 1904. Associate Professor Mesloh was a graduate of the Ohio State University in the class of 1889, and received the Master's degree in 1895. He had been a student in the University of Chicago and also in the University of Berlin. He served as Assistant in German from the time of his

graduation until 1895 and at the time of his death held the rank of Associate Professor. Professor Mesloh was a rare example of diligence and persistence in his work. He commanded the attention and confidence of his associates and of the teachers under whom he studied. His experience in the University gave promise of large usefulness.

William Forrest Hunter, Dean of the College of Law, died on June 15th, 1904. Judge Hunter was a graduate of the Law School of the University of Michigan and admitted to the bar in 1861. He went as a soldier in the late war, and began the practice of law in 1866 at his home in Woodsfield, Ohio. After a successful career as an attorney Judge Hunter came to Columbus, and in 1892 became identified with the College of Law, in which position he served until his death. Judge Hunter was a high grade teacher and in his office as Dean was much beloved and respected by all the students of the College of Law. Few men devote themselves with greater fidelity to the details of the office or to the interests of the students. He enjoyed the confidence and esteem of all his associates in the University and his death is a great loss to the College of Law. He served with distinction and honored the institution to which he gave unreservedly his best energy.

During the year Professor Samuel Carroll Derby has been absent on leave. Mention is made of this fact here for the reason that it is worthy of attention, and ought to establish a precedent which might well be followed every year. The men who have served a series of years in the University have earned the right for an occasional opportunity to spend some time in study and in examining the work of other institutions while in active operation. Some objection has arisen in the minds of public officials with reference to the payment of salaries to men on leave of absence on the ground that the State cannot pay for men not actively engaged in the service to which they have been elected. In my judgment this technical objection is a mere technicality. As a matter of fact men who have served a series of years in an institution of learning have more than earned such recognition and I express the hope that the precedent of the current year may be frequently followed in the years that are to come. Such a custom would be of decided benefit to the State and to the University.

The University during the current year has lost through resignation a number of the teaching force. These resignations usually occur for the reason that teachers are given better salaries or larger opportunities elsewhere. It is to be remarked also that first class teachers are in demand and that the younger portion of the faculty is liable to receive promotion at the hands of other institutions. This is not altogether an evil, but it creates more or less embarrassment and in some instances places are made vacant which cannot be readily and efficiently filled. During the year a few changes in title have oc-

curred and some men have been advanced in rank. The details of this can be seen by reference to the statistical tables accompanying this report. Some additions have been made to the teaching force in order to meet the growing demand occasioned by the steadily increasing attendance.

ENROLLMENT.

The enrollment for the current year has reached the total of 1,827 as against a total of 1,735 for the year preceding. A general summary of attendance will be found appended to this report. It is proper to add in this connection, that every one of the six colleges of the University shows some increase in attendance. This healthy condition emphasizes the fact that the University is serving in all the lines of work now organized a real demand. The apparent exception to the statement as to increase is explained by the fact that admissions to the Graduate Department have been more carefully guarded. It is interesting to note again that the current year has shown an enrollment from every county in the State. The number of students will vary from year to year from the counties, but it is interesting to observe that the counties having the largest population are rapidly and steadily increasing in the numbers sent to the University. Some of the states west of Ohio are beginning to send students to the University, doubtless through the influence of former students, in some instances the students being the sons and daughters of alumni. More interesting than this fact is the statement that our graduates are finding their way into every portion of the State. Those having technical education are apt to find location in the cities where the demand for such service is constantly increasing. Outside of Ohio the largest cities in the country are already receiving a considerable number of the alumni.

The steady and healthful growth in numbers at the University for the past ten years indicates that a larger usefulness awaits the University, and that its greatest problem will be an adequate equipment. The University has outgrown the expectation of its most enthusiastic friends and must rely upon the quality of its work to commend it to the favorable consideration of the State.

The general summary of attendance for the year is as follows:

College of Agriculture and Domestic Science—			
Graduate students.....	2		
Undergraduates.....	253		
	—		255
College of Arts, Philosophy, and Science—			
Graduate students.....	25		
Undergraduates.....	496		
	—		521
College of Engineering—			
Undergraduates.....	744		744
College of Law.....	171		171

College of Pharmacy.....	47	47
College of Veterinary Medicine.....	91	91
Lake Laboratory, summer of 1903.....	23	23
Civil Engineering, summer 1903.....	9	9
Shop work, summer 1903.....	72	72
Total.....		1,933
Names counted twice.....		106
Net Total.....		1,827

DEGREES.

At the Commencement held on June 22, 1904, the University granted a total of one hundred and ninety-four degrees. These were distributed as follows:

College of Agriculture and Domestic Science.....	12
College of Arts, Philosophy and Science.....	83
College of Engineering.....	57
College of Law.....	14
College of Pharmacy.....	2
College of Veterinary Medicine.....	26
Total.....	194

In addition to the degrees granted, the College of Law granted certificates to sixteen persons, the College of Pharmacy to eleven persons and the College of Veterinary Medicine to twelve persons who had completed the course of study but were without the educational requirements for the degree. The certificates in these three colleges are professional in their character. Certificates were also granted for the short courses covering a period of two years in the College of Agriculture and Domestic Science to six persons and in the College of Engineering to six persons.

THE UNIVERSITY AND THE HIGH SCHOOLS.

During the year the work of visiting the high schools has been continued until practically all of the first grade high schools of the State have been visited. Hereafter students will not be accepted for entrance to the University unless they are graduates of accredited schools, or pass satisfactory entrance examinations.

The University has made the first serious attempt ever made in Ohio to visit the entire State. The work has been arduous and not without its difficult problems. There is the tendency on the part of university faculties to insist upon the specific requirements they name as entrance requirements. It is possible that in some instances these requirements have been unnecessarily technical. On the other hand there is a manifest tendency in the high schools to assume that the quality of their work is always standard. The work of visitation

is apt to bring these two theories into conflict and much patience is needed in order to bring about a satisfactory adjustment. The results of visitation have in the main been very satisfactory and are a comment upon the efficiency of our high schools. Nearly everywhere in the State is manifested a keen interest in making the high schools as efficient as the communities can afford. In some communities a lack of interest is manifested, but fortunately these are the exceptions and the condition is temporary. In cases where schools have not been found entirely satisfactory there has been manifested a willingness to improve the grade promptly. The University desires to lend its aid for the betterment of education wherever possible. The closer relation of the University and the high schools will, it is believed, stimulate many students to continue their education beyond the high school. It is not the thought of the University that the work of visitation shall be carried on with a view to increasing the number of students at the State University. That number is already quite up to the facilities afforded. There is a greater work for the University than the mere securing of students. It is hoped, however, that the cause of higher education may not be divorced from the high schools of the State, and that the University may serve a good purpose in emphasizing the continuity of educational work.

SUMMER SCHOOL WORK.

For some years the University has maintained the Lake Laboratory at Cedar Point near Sandusky, Ohio. A suitable building has now been erected and unusual facilities are afforded for the study of science during the summer. The departments of Biology and Botany are the most directly interested in this work. The enrollment for recent years shows that advanced students and teachers of biology and botany in the high schools avail themselves of these opportunities. The work at first was regarded as an experiment, but has so firmly established itself that a permanent usefulness is assured.

The University, as announced in the catalogues, requires four weeks of summer work from students in Civil Engineering and from all engineering students in the shops. The work in Civil Engineering is usually done under the supervision of the Professor of Civil Engineering at some point selected during the year. The work in the shops at the University is carried on seven hours a day for the entire period of four weeks including Saturdays. This gives to each student a valuable supplement to the shopwork done during the year. In addition to the work done by the University some of the teachers have offered courses at the University for the summer term in special departments. The increasing demand for work of this kind raises the question whether the University ought not to carry a summer

term. The chief objection to such a proposition arises from the lack of funds at the command of the University. It is hoped that in the future some such provision may be made, and that adequate funds will be provided.

THE PROGRESS OF THE YEAR.

The year just closed has been in many ways one of the most remarkable in the history of the University. The Legislature was most cordial in its support and provided the largest amount of money ever given to the University.

On the evening of February 19th, the Chemical Building was burned entailing a loss of approximately \$100,000.00. The Legislature promptly provided a fund of \$15,000.00 with which to make temporary provision for such laboratories as could be promptly established in the several buildings on the campus. Later an appropriation of \$100,000.00 was made to restore the building. The burning of the Chemical Building forced upon the University the consideration of the needs, in fact a building, for the School of Mines. That need was presented and \$85,000.00 was appropriated by the Legislature for a building for the School of Mines in which will be located the departments of Metallurgy and Mineralogy, of Mine Engineering, and of Ceramics. The sum total of the appropriations by the Legislature amounted in round numbers to \$925,000.00. Seventy-five thousand dollars of this was designated for the College of Agriculture and Domestic Science. The Governor in the exercise of his veto power cut out the item for the College of Agriculture and Domestic Science. This was a serious disappointment to the interests involved, and will delay for two years longer some very much needed improvements. During the year the erection of a building for the Department of Physics has been in progress, but cannot be completed in time for use the next academic year.

Since the last annual report was submitted the building for the College of Veterinary Medicine has been completed at a cost of practically \$35,000.00, and has proved a very satisfactory building for the use of the College of Veterinary Medicine. Brown Hall for the departments of Architecture and Drawing and of Civil Engineering was completed in time to be used September, 1903, and has abundantly justified the expectations of the departments. The building is commodious and well adapted to the purposes for which it was designed. Except for the temporary inconvenience caused by the destruction of Chemical Hall, the University is now better equipped from the standpoint of buildings and facilities than it has ever been. With the new buildings immediately in prospect this condition will be still further improved. The progress of the University for the

year, therefore, may be said to have been along the following lines:

First, increased facilities in the way of buildings; second, increased revenue; third, the increase of students; fourth, the general increase in the efficiency of the work done within the departments.

The Ohio State University has now reached such proportions that it is the greatest enterprise in which the State of Ohio is concerned. The enterprise cannot grow smaller as the years go by. The importance of the work in which it is engaged will reveal itself to those who are familiar with what is accomplished. The aim of those in charge is to operate the trust in such manner as to bring through the results reached a sufficient justification for the confidence reposed in the institution.

CONCLUSION.

In closing the report it is proper to state that the faculty and students have worked together harmoniously; that the spirit of the institution is commendable; and that the constant aim of the University will be to bring to the State the highest possible service.

The President desires to make public recognition of the uniform courtesy on the part of Trustees, Faculty, and students, and of the very generous support given him by all associated with the University.

The report of the Librarian, the several tables of statistics and the itemized report as required by law are herewith submitted and made a part of this report.

Respectfully submitted,

W. O. THOMPSON,

President.

REPORT OF LIBRARIAN.

DR. W. O. THOMPSON, *President of the Ohio State University.*

DEAR SIR:—I have the honor to submit herewith my report as Librarian for the year ending June 30, 1904.

The number of books recorded on the accession books of the Library is 53,383, being an increase of 5,160 over the number reported last year. Of this increase, 2,547 have been secured by purchase, 2,598 by gift and 15 by exchange.

PURCHASES.

Purchases of special interest have been:

1. Poggendorf's *Annalen der Physik und Chemie*. This is a notable set, the possession of which does much to place the Library upon a high scientific basis and to make it a center for scientific research in this part of the State. It is complete from 1824 with the exception of volumes 57-66, new series. These volumes, with the exception of volume 63, have been deposited in the Library by Professor Cole, with the understanding that they are to be used whenever needed.

2. Pfluger's *Archiv für die gesammte Physiologie des Menschen und der Thiere*, volumes 1-92, 1868-1902. This is a set of the highest scientific value and importance to the psychologist as well as the physiologist.

3. Books on economics and sociology belonging to the private library of Dr. F. C. Clark. These were purchased on a special order and with a special appropriation of the Board of Trustees.

GIFTS.

Appended to this report is a list of donors to the University Library. From this list it will be seen that we are still receiving valuable contributions from the Federal and State governments, from foreign governments and from learned societies. There have been also many gifts from individuals. Each gift is acknowledged when received, but grateful mention is hereby made of the generosity of all the friends of the University.

A gift of peculiar interest is the professional library of Professor Mesloh. With a beautiful spirit of appreciation of the close relationship which exists between a man and his books, Mrs. Mesloh has felt that Mr. Mesloh's books belong to the institution to which his professional services had been given, and with a like appreciation of the kindness of the University especially shown through Dr. Thompson, she has presented these books to the University. They consist of 355 volumes and 178 pamphlets, being dictionaries, grammars and texts in German, French, Sanskrit and other languages.

Of special value and interest is the gift of Professor Edward Orton of books belonging to the library of his father, Dr. Edward Orton. A portion of these were received last summer and have been incorporated in the University Library. The books treating mainly of geology are to be cared for during this coming summer.

The Siebert Fund has been continued by the annual gift of \$100 each from Mr. John and Mr. Louis Siebert. The \$200 just received completes the first \$1,000 given by these gentlemen.

The Outhwaite Collection of Works on the Civil War has not grown

largely during the year owing to the poor health of Mr. Outwaite, but that he has not forgotten it is shown by gifts lately received.

Incorporated in the Outhwaite Collection by the wish of the donor, Captain Alexis Cope, is the set of the annual volumes of the Society of the Army of the Cumberland. To this set Captain Cope has just added a collection of maps used by the officers during the active campaigns of the War of 1861. These are unique and have special value.

Mr. Henry J. Eady of Elyria, Ohio, has given to the University a valuable gift in a complete set of the Druggists' Circular.

From Mr. George T. Spahr have come the volumes of the Appleton's Annual from 1861-1875. This is a set which the Library has long desired and has often thought of purchasing. It contains specially good accounts of affairs during the time of the Civil War.

Through the efforts of Mr. H. W. Linen, General Cellan M. Spitzer, of Toledo, has presented a complete set of the National Cyclopaedia of American Biography.

The current volumes of many Herd Registers are being received and through the efforts of Professor Plumb several complete sets have been donated by the associations. It will not be long until this collection is one of the finest in the country.

Through the efforts of Professor Price we have received a complete set of the Rothamsted Memoirs on Agricultural Chemistry and Physiology.

EXCHANGES.

There have been received from the University of Wisconsin a number of volumes heretofore lacking in the Congressional set.

LOSS.

In the burning of the Chemical Building, the Library suffered to the extent of about \$1,000. This loss was in Pharmacy and Mining, the loss in Pharmacy being especially great. In Chemistry almost all of the books were saved in good condition. The books in Metallurgy were saved, but were badly water-soaked and had to be rebound.

There was also burned a collection of duplicate Government Documents and periodicals, which had been stored in the basement of the Chemical Building. These were all of intrinsic worth, but of not much money value to the Library.

ROOM.

At the beginning of this year there was a decided change made in the arrangement of the main room of the General Library. A door was cut between the small office formerly used by the Ohio Archaeological and Historical Society and the balcony. This new room was called the Annex, and it was decided to use it and the balcony entirely for stack purposes. Accordingly, all tables were removed from the balcony and it was as closely filled with cases as a convenient arrangement of the floor space would allow. There were then taken upstairs all books except the bound volumes of those periodicals indexed in Poole, and those of a similar general nature, and the reference books. These remained on the main floor. The northeast corner of this floor was converted into a periodical alcove and the current numbers of periodicals were brought up from the first floor so that all unbound numbers of the periodicals could be found in one place. The northwest corner

was enclosed, making a convenient though small catalogue room. By this arrangement, room has been secured for shelving which will probably make it possible to provide book space for the next year without serious inconvenience. The arrangement, however, made necessary the loss of three reading room tables. These have been kindly stored for the Library by Professor Price in Townshend Hall.

USE.

In spite of the loss of table room, the attendance at the General Library remains about the same this year as it was last. The average attendance as reported to the Faculty last year was 311. This year it is 318. The largest attendance on any one day last year was in November when it reached the number of 525. This year it is in April and it reached the number of 531. The average evening attendance is 33 this year as against 32 last year. The attendance at the Law Library seems to be increasing. The largest recorded attendance this year was 184 as against 116 of last year, and the average being 81 as against 65 of last year.

Of the reference work it is impossible to keep statistics, but that it is increasing is evident. The value of duplicate copies of the books used for required reading by professors has been demonstrated this year. A special fund was given last year for the purchase of such duplicates in the Department of American History and Political Science. Had it not been for this, it would have been impossible to have carried on the work along the lines on which it has been done during the present year.

HOURS.

The hours of the Library have been as usual during the term time, 14 hours each day (7:30 a. m. to 9:30 p. m.) excepting on Saturday when the Library is closed at 4 for the convenience of the janitor. Sunday opening will not be recommended until a library building is erected. During July and August the Library is open three hours each day.

STAFF.

At the beginning of the year there were two resignations from the Library Staff. Mr. C. B. Guittard resigned to accept a position in the Library of Congress and Mr. J. C. Cone resigned the position of Library Fellow to begin teaching.

The resignation of Mr. Guittard was a great loss to the Library. To his expert knowledge of Government Documents he had added a peculiar gift for library work, and during his years of service in the University Library he had done much to bring our collection of documents, both those issued by governments and by learned societies, to a high degree of excellence.

It was not thought advisable to continue the position which had been filled by Mr. Guittard and the Accession Department was reorganized to meet the existing conditions. Miss Getrude Kellicott, who had been in charge of all accessions received by purchase, was made head of the Accession Department with responsibility for all accessions, whether received by purchase, exchange or gift. This move was intended to separate as much as possible the responsibility and expert work from the clerical work of which a great amount is required in the Accession Department. A regular clerk was, however, not appointed for this year, but it is the intention that when conditions are favorable that such an appointment will be recommended.

The place of Library Fellow was filled by Mr. Max D. Morton, a graduate of the Ohio State University of 1903. Mr. Morton has given most efficient and conscientious service.

Complete knowledge of books is a varied knowledge, as many-sided as are the points of view from which books may be regarded.

1. Books may be regarded as "the final product of several allied trades which are not only among the oldest of our mechanical crafts, but which also stand for a peculiar admixture of great manual skill and high artistic attainment." To know them as such one must understand the history and present status of these trades, paper-making, printing, illustration and book-binding.

2. Books may be considered as manufactures put upon the market and subject to all economic conditions. Knowledge of them as such presupposes a business knowledge of the methods and conditions of publishing, jobbing and retail book-selling, in all countries and of all times.

3. Books may be considered as tools for the prosecution of search after a knowledge whether general or specific. Knowledge of them as each requires a knowledge of bibliography in general. It supposes a knowledge, more or less complete, of everything which has been published on a subject, a knowledge which labels each book according to its date, according to its format, according to its author, according to its content and according to the point of view of such content.

4. Books may be considered as vital helps, not simply as tools to be used, but as living ideas to be assimilated. Such knowledge presupposes a mind educated to the best, and responsive to the highest influences.

5. Books may be looked upon as objects to be housed and listed. To understand such handling of them involves knowledge of the rules of cataloguing and of all methods used in care of books.

To a greater or less degree all five varieties of knowledge are necessary for that particular class of book workers known as librarians, and in order to satisfy the requirements for a modern librarian to this knowledge must be added the gift of bringing the book to the people. In a small library, one worker can often unite in himself sufficient knowledge and sufficient power in all these directions to make his library of service to his community, but as the library grows larger there must be differentiation of work and differentiation of expert knowledge. Some knowledge in all these lines is necessary for every worker no matter in what line he may specialize, but in a large library specialization becomes as necessary as in the teaching profession.

Such professional knowledge can be built only on a foundation of a broad education. Books have been published in all languages; therefore, to thoroughly know books, there must be knowledge of all languages. Books have been published on all subjects, therefore, to know books, there must be some knowledge of all subjects with a broad knowledge of at least one. A college degree is now being required for admission to the older library schools, and in the University Library a college education is found to be essential as a preparation for much of the work.

Professional training is now being given in the library schools, of which there is a constantly increasing number in this country; yet, it can also be gained by work and study in a library. Undoubtedly, the ideal way is that which is now considered best in the engineering professions, a technical course in a school, then practical experience. But, however, the training may be secured, these two things are necessary for a library worker, a general education and a technical or professional education. The time has gone by when it is thought that "anyone can be a librarian," and the time is rapidly going

by when it is thought that the work is not worth in money value the same as other occupations requiring even less preparation.

One fact which has probably tended to maintain the idea that library work has not the same money value as teaching or as other professional pursuits is that connected with all lines of library work there is much manual and clerical labor. The problem confronting the profession is how to differentiate the expert work from the clerical. On this subject, Mr. Hodges, Librarian of the Public Library of Cincinnati, in his last report, says: "There is much of a clerical nature in the cataloguing department" (and this is true of every department) "which can be done by anyone of good education and having a reading knowledge of French and German. . . . The time of trained cataloguers should be expended only on such work as no others can do." Attention is called to the fact that for this clerical work Mr. Hodges requires the first of the two requirements for a librarian, i. e., a good education.

The Library of the Ohio State University is confronted with the necessity of attempting to do its work with an inadequate number of trained assistants paid an inadequate price. In order to make the number of trained people of the greatest service to the University, it has been the endeavor to relieve them as much as possible of all clerical work. There being no money to secure good clerks (that is, people of college education who in almost any other line of work could be getting good salaries), the expedient of using student help has been adopted. In the University the average rate of payment for student help is 12½ cents per hour, or \$1.00 per day for a day of 8 hours. For this small sum a person of approximately "good education" is secured and one acquainted with University customs and needs, but the business habits of application and continuity of work cannot be expected. At present in the University Library student help is employed:

1. In the Law Library. All technical work with the law books, the ordering, accessioning, cataloguing and shelf-listing, is done in the General Library and the books are taken to the Law Library ready to be put upon the shelves. That a trained reference librarian would be an advantage in the Law Library is not for one minute to be doubted, but up to this time there has not been money to secure such a person; it seeming more desirable to put the money into books which the law students can use for themselves than to put it into a helper trained to assist in the use of books. Accordingly, the work in the Law Library has been reduced to charge of the room, care of the shelves and the very elementary reference work of showing students where to find books. This work is done by law students. Their time not being all occupied in this work, they are paid but 10 cents per hour.

2. At the charging desk. The charging desk is placed by the "reserved book shelves" on which are kept the books which classes are required to read. All records of home circulation of books, the use of the reserved books, and the check sheet of the attendance at the Library are kept at the charging desk. This work not requiring full time and not having the responsibility of the Law work is paid but 5 cents an hour excepting in the evening, when, because of the burden of night work, it is paid 10 cents per hour. We have found students well able to do this work, but because of the changes required at various hours there is sometimes a lapse in the accuracy of keeping the records.

3. In the mechanical work of collating, cutting, opening, stamping and plating books.

4. For messenger service, that is, bringing books from the stack and replacing books on the shelves.

5. Because of the lack of money to have regular assistants and because of the opportunity of securing the work of two young women, graduates of the University and private students in Library Science with the Librarian, much of the work of accessioning and cataloguing has this year been done by the hour at the rate of 20 cents per hour. The same work next year will be paid at the rate of 25 cents per hour. In other libraries for such work 30 and 35 cents per hour is paid regularly to library students.

For the work of (3) and (4) student labor is as good as any we could secure, but for (1), (2) and (5) regular assistants would be better.

The sum total of the amounts paid to different people and chargeable to the student assistance account seems large. The amount appropriated for next year is \$800.00 which is less than the amount paid during the year which has just closed, yet to have this same work done by regular clerks or assistants would take at least double the amount. Of course, the Library loses in continuity and application.

As has been said before, the Library has had to face the condition of an inadequate number of trained assistants inadequately paid. The inadequacy of the number has been remedied as much as possible by securing student help as outlined above. The inadequacy of the pay cannot be remedied. That some of the assistants prefer to stay at home to hunting larger salaries in other places is a personal matter, and the University is simply taking advantage of personal conditions in using their services at a low figure. That those not so held will not stay for the salaries paid at the Ohio State University was evidenced:

1. In the fall of 1902, when Mr. Frank Bohn resigned to go to the University of Michigan. Mr. Bohn resigned to accept a fellowship which has just resulted in his doctor's degree; however, had his salary been such as he had hoped it would be, he would have undoubtedly continued to give the Library valuable service for a number of years.

2. In the summer of 1903, when Mr. C. B. Guittard was called from the University Library to the Library of Congress at a material increase in salary.

These two instances bring out plainly two facts. One has been already mentioned. It is that a person free to go will not stay for small salary unless held by love of the work and by love of the institution. The other fact is that to keep men in a library the compensation must equal that given for teaching. This brings up an important fact, i. e., the increasing number of women entering the library profession; not as I take it, the decreasing number of men, but the decreasing proportion of men. To a man academically inclined the library profession holds out as many inducements as teaching, and in the large public libraries is satisfying even to a man with business talents, but a man at all able must have material compensation for his work and he will have it even if it means taking up another line of work.

It is not too early to sound in the library profession the warning which at this late day is being sounded in the teaching profession, that the profession is becoming feminized. This means nothing disparaging to womanly influence, but it does emphasize the need of the virile element. There can be no question but that all educational forces should combine the work of men and women.

That there should be this combination in the Staff of the University Library has been often mentioned by me before, but I beg leave to call it to your attention again and to respectfully urge that conditions be such that it will be possible to secure and retain the services of educated men in the University Library.

Respectfully submitted,

OLIVE JONES, *Librarian.*

ANNUAL REPORT

OF

L. F. KIESEWETTER, Treasurer

OF THE

OHIO STATE UNIVERSITY

YEAR ENDING JUNE 30, 1904

REPORT OF THE TREASURER.

COLUMBUS, OHIO, June 30, 1904.

To the President of the Board of Trustees of the Ohio State University:

SIR:—I hand you herewith my annual report for the fiscal year ending June 30, 1904, accompanied by duly receipted vouchers for all disbursements.

Very respectfully,

L. F. KIESEWETTER,
Treasurer.

DETAILED
STATEMENT OF RECEIPTS

—BY—

L. F. KIESEWETTER, Treasurer.

STATEMENT No. I

DETAILED STATEMENT OF RECEIPTS BY L. F. KIESEWETTER, TREASURER, DURING FISCAL YEAR ENDING JUNE 30, 1904.

Date.	From whom received.	From what source.	Amount.
1903			
July	1 Alexis Cope, secy.....	Balance in hands of F. W. Prentiss, Treas., June 30, '03.	6,910 28
	3 Auditor of State.....	Requisition No. 101, O. S. U. fund.....	24,957 00
	8 U. S. Government.....	Appropriation Act of August 30, 1890.....	25,000 00
	8 W. A. Landacre.....	Account cash sales store-room.....	900 00
	30 John G. Haas.....	Rents Page will lands.....	3,990 78
Aug.	7 Auditor of State.....	Req. No. 44, building levy...	10,467 50
Sept.	4 Auditor of State.....	Req. No. 103, building levy..	12,867 70
	4 Commrs. of Sinking Fund..	Interest on endowment.....	5,500 00
	4 Auditor of State.....	Req. No. 104, levy.....	31,702 52
	25 Auditor of State.....	Req. No. 105, O. S. U. levy..	20,042 69
	25 Wm. T. Magruder.....	Labor, etc.....	13 31
	25 C. W. Foulk.....	Fees summer laboratory.....	4 00
	25 Herbert Osborn.....	Fees lake laboratory.....	300 00
	25 Onyx Paint Co.....	Goods returned.....	9 25
	25 Frank R. Shinn, admr....	Rent Eggers lot.....	37 50
Oct.	3 Auditor of State.....	Req. No. 106, building levy..	10,338 87

15	J. G. Sanders	June salary	4546	25 00

DETAILED STATEMENT OF DISBURSEMENTS—Concluded.

Date.	To whom paid.	For what purpose.	No.	Amount.
June 15	Mildred Waters.....	June salary.....	4547	35 00
15	Metta Seymour.....	June salary.....	4548	5 00
15	Elsa Jane Loechler....	Return fees.....	4549	6 00
15	Ernest F. Shade.....	Labor.....	4550	3 00
17	Helen E. Burgess.....	Labor.....	4551	4 12
17	A. D. Bullock.....	Vet. Clinic services.....	4552	28 34
17	R. M. Mark.....	Labor.....	4553	6 75
18	A. B. Welty.....	Labor.....	4554	5 63
18	W. O. Thompson.....	Honorariums.....	4555	200 00
18	H. G. Weinland.....	Labor.....	4556	5 00
23	J. N. Frank.....	Labor.....	4557	5 87
23	H. N. Lucas.....	Labor.....	4558	9 00
23	The Ohio Nat'l Bank..	M. O. to G. Folk for books..	4559	319 00
24	Jos. A. Stiver.....	Guide work.....	4560	15 68
24	R. H. Hohn.....	Labor.....	4561	13 80
14	J. V. Denney.....	Cash advanced.....	4562	1 50
24	J. McLain Smith.....	Expenses Trustee.....	4563	20 25
25	C. A. Dye.....	Supplies.....	4564	8 77
25	T. J. Corkery.....	Labor.....	4565	10 50
25	A. R. Barrington.....	Music Commencement.....	4566	35 00
25	J. T. Mack.....	Expenses Trustee.....	4567	12 95
25	Lafayette Jones.....	Services.....	4568	5 80
28	Gilbert H. Stewart....	Salary.....	4569	290 00
30	D. M. Massie.....	Expenses Trustee.....	4570	20 70
30	Balance in hands of L. F. Kiesewetter, Treas.....			\$ 12,035 00
	Grand total.....			\$ 582,360 58

STATEMENT No. III.

In compliance with Section 7 of the Organic Act, passed by the Legislature of Ohio, May 1, 1878 (Bates' Annotated Statutes, Sec. 4105-41), which requires the list of "the number of professors officers and teachers and other employes, and the compensation of each, to be annually reported," I submit the following :

Name of Employee.	Position.	Salary.
Wm. Oxley Thompson....	President.....	\$5,000 00
William Henry Scott.....	Professor of Philosophy.....	2,250 00
Sidney A. Norton.....	Emeritus Professor and Lecturer in General..	
	Chemistry.....	1,250 00
Nathaniel W. Lord.....	Professor of Metallurgy and Mineralogy.....	2,000 00
Samuel C. Derby (1).....	Professor of Latin.....	1,650 00
William R. Lazenby.....	Professor of Horticulture and Forestry.....	2,250 00
Josiah R. Smith.....	Professor of Greek.....	2,250 00
Henry A. Weber.....	Professor of Agricultural chemistry.....	2,250 00
Benjamin F. Thomas.....	Professor of Physics.....	2,250 00
Geo. W. Knight.....	Professor of American History and Political	
	Science.....	2,500 00
Rosser D. Bohannon.....	Professor of Mathematics.....	2,250 00
Albert M. Bleile.....	Professor of Anatomy and Physiology.....	2,250 00
William A. Kellerman.....	Professor of Botany.....	2,475 00
Homer C. Price.....	Professor of Rural Economics and Dean of the	
	College of Agriculture.....	2,250 00
George B. Kauffman.....	Professor of Pharmacy.....	2,000 00
Benjamin L. Bowen.....	Professor of Romance Languages.....	2,250 00
Joseph V. Denney.....	Professor of Rhetoric and English Language..	2,250 00
Allen C. Barrows.....	Professor of English Literature.....	2,250 00
Edward Orton, Jr.....	Professor and Director of Clay Working and	
	Ceramics.....	2,000 00
William F. Hunter (2)....	Professor of Law and Dean of the College of	
	Law.....	2,500 00
Charles W. Foulk.....	Associate Professor of Chemistry.....	1,200 00
John H. Shaffner.....	Associate Professor of Botany.....	1,300 00
Charles B. Morrey.....	Professor of Bacteriology.....	1,400 00
James S. Hine.....	Associate Professor of Zoology and Entomol-	
	ogy.....	1,300 00
Karl D. Swartzel.....	Assistant Professor of Mathematics.....	1,500 00
George H. McKnight.....	Assistant Professor of Rhetoric and English	
	Language.....	1,300 00
Francis L. Landacre.....	Associate Professor of Zoology and Entomol-	
	ogy.....	1,300 00
Wallace S. Elden.....	Associate Professor of Classical Languages...	1 600 00
Fred A. Fish.....	Assistant Professor of Electrical Engineering.	1,100 00
William A. Knight.....	Assistant Professor of Machine Shop Practice	1,320 00
James E. Hagerty.....	Assistant Professor of Economics and Sociol-	
	ogy.....	1,600 00
Harry W. Kuhn.....	Assistant Professor of Mathematics.....	1,100 00
E. S. Ingraham.....	Assistant Professor of Romance Languages...	1,200 00
Thomas H. Haines.....	Assistant Professor of Philosophy.....	1,300 00
B. B. Herrick.....	Instructor in Cheese-making.....	200 00
William H. Renck.....	Instructor in Pattern-making and founding...	1,270 00
Charles P. Crowe.....	Instructor in Forging.....	1,100 00
Alonzo H. Tuttle.....	Instructor in American History and Political	
	Science.....	1,200 00

(1). Granted leave of absence on part pay from November 1, 1903, to close of University year.

(2). Died June 15, 1904.

STATEMENT III—Continued.

Name of Employee.	Position.	Salary.
Arthur E. Davies.....	Instructor in Philosophy and Education.....	900 00
Thomas K. Lewis.....	Instructor in Drawing.....	1,200 00
Silas Martin.....	Instructor in Drawing.....	1,000 00
Joseph H. Vosskuehler.....	Instructor in Drawing.....	1,200 00
Albert V. Bleininger.....	Instructor in Ceramics.....	1,000 00
Berthold A. Eisenlohr.....	Instructor in Germanic Languages.....	900 00
Samuel E. Rasor.....	Instructor in Mathematics.....	1,000 00
Edward E. Somermeier.....	Instructor in Metallurgy and Mineralogy.....	1,100 00
Don Carlos Huddleson.....	Instructor in Physical Education.....	800 00
Meritt F. Miller.....	Assistant Professor of Agronomy.....	1,000 00
Frank Ruhlen.....	Instructor in Zootechny.....	450 00
A. H. Heller.....	Professor of Civil Engineering.....	1,800 00
Emilius O. Randall.....	Professor of Law.....	800 00
William T. Magruder.....	Professor of Mechanical Engineering.....	2,250 00
Edgar B. Kinkead.....	Professor of Law.....	1,300 00
William H. Page.....	Professor of Law.....	2,250 00
William McPherson, Jr.....	Professor of Chemistry.....	2,250 00
Joseph N. Bradford.....	Professor of Architecture and Drawing.....	2,000 00
David S. White.....	Professor and Dean of College of Veterinary Medicine.....	1,800 00
Herbert Osborn.....	Professor of Zoology and Entomology.....	2,250 00
Christopher P. Linhart.....	Professor of Physical Education.....	1,600 00
Olive B. Jones.....	Librarian.....	1,450 00
Henry C. Lord.....	Professor of Astronomy and Director of Emer- son-McMillin Observatory.....	2,250 00
Frank E. Sanborn.....	Professor and Director of Department of In- dustrial Arts.....	2,200 00
Frank A. Ray.....	Professor of Mine Engineering.....	2,000 00
John A. Schauck.....	Professor of Law.....	1,000 00
John W. Decker.....	Professor of Dairying.....	1,700 00
Embury A. Hitchcock.....	Professor of Experimental Engineering.....	1,750 00
Francis C. Caldwell.....	Professor of Electrical Engineering.....	1,900 00
Charles S. Prosser.....	Professor of Geology.....	1,900 00
John A. Bownocker.....	Professor of Inorganic Geology and Curator of Museum.....	1,600 00
Alfred D. Cole.....	Professor of Physics.....	2,000 00
Minnie A. Stoner.....	Professor of Domestic Science.....	1,800 00
Wilbur H. Siebert.....	Professor of European History.....	1,800 00
George W. McCoard.....	Associate Professor of Mathematics.....	1,600 00
Charles W. Mesloh (1).....	Associate Professor of Germanic Languages.....	1,400 00
Arthur W. Hodgman.....	Associate Professor of Classical Languages.....	1,600 00
Cornelia P. Souther.....	Associate Professor of Domestic Art.....	480 00
Maude W. Martin.....	Associate Professor of Physical Education.....	800 00
William E. Henderson.....	Associate Professor of Chemistry.....	1,400 00
Christopher E. Sherman.....	Professor of Civil Engineering.....	1,980 00
Joseph R. Taylor.....	Associate Professor of English Literature.....	1,500 00
James E. Boyd.....	Associate Professor of Mathematics.....	1,500 00
Charles A. Bruce.....	Associate Professor of Romance Languages.....	1,500 00
Septimus Sisson.....	Professor of Comparative Anatomy.....	1,700 00
Thomas E. French.....	Associate Professor Architecture and Drawing.....	1,500 00
David R. Major.....	Associate Professor of Education.....	1,600 00
J. Warren Smith.....	Lecturer on Meteorology.....	100 00
William L. Graves.....	Assistant Professor of Rhetoric and English Language.....	1,300 00
Clair A. Dye.....	Assistant Professor of Pharmacy.....	1,100 00
F. H. Eno.....	Associate Professor of Civil Engineering.....	1,650 00
Albert F. Hall.....	Machinist in Mechanical Engineering.....	880 00
Harriett Townshend.....	Assistant in Library.....	600 00

(1). Died March 15, 1904.

STATEMENT III—Continued.

Name of Employee.	Position.	Salary.
Maude D. Jeffrey.....	Assistant in Library.....	\$ 770 00
Gertrude S. Kellicott.....	Assistant in Library.....	770 00
Martha Hartford.....	Assistant in Library.....	470 00
Oliver V. Brumley.....	Assistant Professor of Veterinary Medicine...	1,000 00
D. A. Crowner.....	Assistant in Butter-making.....	200 00
Melvin Dresbach.....	Instructor in Anatomy and Physiology.....	800 00
William L. Davies.....	Assistant in Civil Engineering.....	495 00
Vernon H. Davis.....	Assistant Professor of Horticulture and For- estry.....	1,000 00
Rudolph Hirsch.....	Instructor in Agricultural Chemistry.....	600 00

To the Board of Trustees of the Ohio State University:

The undersigned, the Finance Committee, have in obedience to your instructions examined the accounts and vouchers of L. F. Kiesewetter, the treasurer of the University, for the period from July 1st., 1903, to June 30th, 1904, and carefully compared them with the records and vouchers in possession of the secretary and hereby certify that the report of the treasurer submitted to the Board for the period named, which is the last fiscal year, is correct.

Columbus, Ohio, September 7th, 1904.

GUY W. MALLON,
D. M. MASSIE,
PAUL JONES,
Finance Committee.

Report of Treasurer of the Ohio State University to the Secretary of Agriculture and the Secretary of the Interior, of amount received under act of Congress of August 30, 1890, in aid of Colleges of Agriculture and the Mechanic Arts, and of the disbursements thereof, to and including June 30, 1904.

	Amount.
Balance on hand July 1, 1903.....	\$ 192 15
Date of receipt of installment for 1903-4.....	25,000 00
Total available for year ended June 30, 1904.....	25,192 15
Disbursements thereof for and during the year ended June 30, 1904:—	
Agriculture, as per Schedule A.....	6,047 36
Mechanic Arts, as per Schedule B.....	6,542 75
English Language, as per Schedule C.....	1,770 00
Mathematical Science, as per Schedule D.....	2,550 00
Natural or Physical Science, as per Schedule E.....	7,520 43
Economic Science, as per Schedule F.....	650 00
Total expended during the year.....	\$25,080 54
Balance remaining unexpended July 1 1904.....	111 61

I hereby certify that the above account is correct and true, and, together with the schedules hereunto attached, truly represents the details of expenditures for the period and by the institution named; that said expenditures were applied only to instruction in agriculture, the mechanic arts, the English language, and the various branches or mathematical, physical, natural, and economic science, with special reference to their applications in the industries of life, and to the facilities for such instruction, and that no part of these funds was expended for the erection, preservation, or repair of any building or buildings.

L. F. KIESEWETTER.
Treasurer.

The fact that it has already been necessary to require several institutions to replace sums of money erroneously expended from this fund makes it advisable to call attention again to the limitations placed by the act of Congress of August 30, 1890, upon the use of money appropriated by it, which is "TO BE APPLIED ONLY TO INSTRUCTION IN AGRICULTURE, THE MECHANIC ARTS, THE ENGLISH LANGUAGE, AND THE VARIOUS BRANCHES OF MATHEMATICAL, PHYSICAL, NATURAL, AND ECONOMIC SCIENCE, WITH SPECIAL REFERENCE TO THEIR APPLICATIONS IN THE INDUSTRIES OF LIFE, AND TO THE FACILITIES FOR SUCH INSTRUCTION." It is held that this language authorizes the purchase from this money of apparatus, machinery, text-books, reference books, stock, and material used in instruction, or for the purpose of illustration IN CONNECTION WITH ANY OF THE BRANCHES ENUMERATED, and the payment of salaries of INSTRUCTORS IN SAID BRANCHES ONLY. The erection of buildings is specifically prohibited by the act, and the Assistant Attorney-General has decided that the purchase of land is not allowable. It should not be expended for heating or lighting buildings, repairs, furniture, cases, shelving, desks, musical instruments, the salaries of instructors in philosophy, psychology, ethics, logic, his-political science, civics, pedagogy, ancient and modern languages (except English), or for the salaries of presidents, treasurers, secretaries, book-keepers, janitors, watchmen, etc. Neither can charges for cashing the checks of the United States Government be paid out of this fund. In short, THE PLANT—the land, buildings, and ordinary appliances of a school—must be provided from other sources, and this particular fund must be applied exclusively to the subjects named in the act and the facilities especially required for those subjects.

SCHEDULE A.

Disbursements for instruction in Agriculture and for facilities for such instruction during the year ended June 30, 1904.

I.—FOR SALARIES OF INSTRUCTORS.

Names of Instructors.	Subjects Taught for Which Paid from "Morrill Fund."	Amount.
H. C. Price, Professor of Agriculture....	Agriculture & Rural Economics.	\$450 00
Jno. W. Decker, Professor of Dairying..	Dairy Husbandry.....	340 00
C. S. Plumb, Prof. of Am. Husbandry....	Animal Husbandry.....	400 00
Frank Ruhlen, Instructor.....	Zootechny.....	90 00
M. F. Miller, Instructor.....	Agronomy.....	200 00
E. F. Mangold, Instructor.....	Cheese-making.....	50 00
Henry A. Weber, Professor.....	Agricultural Chemistry.....	450 00
Alfred Vivian, Associate Professor.....	Agricultural Chemistry.....	300 00
Rudolph Hirsch, Instructor.....	Agricultural Chemistry.....	60 00
W. R. Lazenby, Professor.....	Horticulture and Forestry.....	450 00
V. H. Davis, Assistant Professor.....	Horticulture and Forestry.....	166 66
D. S. White, Professor.....	Veterinary Medicine.....	400 00
S. Sisson, Associate Professor.....	Veterinary Medicine.....	340 00
O. V. Brumley, Assistant Professor.....	Veterinary Medicine.....	200 00
D. H. Udall, Associate Professor.....	Veterinary Medicine.....	290 00
II.—For facilities as follows:		
Harness, \$171.15; One bull, \$200; Cow, \$40.....		411 15
Cow, \$135; Cows, \$635; Bull, \$500; Cow, \$120.....		1,390 00
Repairs farm machinery.....		59 55
Total.....		\$6,047 36

SCHEDULE B.

Disbursements for instruction in Mechanic Arts and for facilities for such instruction during the year ended June 30, 1904.

I.—FOR SALARIES OF INSTRUCTORS.

Names of Instructors.	Subjects Taught for Which paid from "Morrill Fund."	Amount.
Jos. N. Bradford, Professor.....	Architecture and Drawing.	\$420 00
Thos. E. French, Associate Professor...	Architecture and Drawing.	300 00
Thos. K. Lewis, Instructor.....	Architecture and Drawing.	200 00
Silas Martin, Instructor.....	Architecture and Drawing.....	200 00
J. H. Vosskuehler, Instructor.....	Architecture and Drawing.	240 00
J. S. Tidball, Instructor.....	Architecture and Drawing.	80 00
C. E. Sherman, Professor.....	Civil Engineering.....	360 00
A. H. Heller, Professor.....	Civil Engineering.....	360 00
F. H. Eno, Associate Professor.....	Civil Engineering.....	300 00
H. D. Brunning, Instructor.....	Civil Engineering.....	250 00
Edw. Orton, Professor.....	Ceramics.....	400 00
A. V. Bleininger, Instructor.....	Ceramics.....	200 00
F. C. Caldwell, Professor.....	Elec. Engineering.....	380 00
F. A. Fish, Assistant Professor.....	Electrical Engineering.....	220 00
F. E. Sanborn, Professor.....	Industrial Arts.....	400 00
W. A. Knight, Assistant Professor.....	Machine Shop Practice.....	240 00

SCHEDULE B—Concluded.

W. H. Renck, Instructor.....	Pattern Making and Founding .	\$220 00
C. P. Crowe, Instructor.....	Forging.....	200 00
Allando Case, Machinist.....	Machine Work.....	66 00
W. F. Magruder, Professor.....	Mechanical Engineering.....	450 00
E. A. Hitchcock, Professor.....	Experimental Engineering.....	350 00
H. P. Judd, Assistant Professor.....	Experimental Engineering.....	240 00
Frank A. Ray, Professor.....	Mine Engineering.....	400 00
II.—For facilities as follows:		
Department of Industrial Arts—Iron for shop work.....		66 75
Total.....		\$6,542 75

SCHEDULE C.

Disbursements for instruction in English Language and for facilities for such instruction during the year ended June 30, 1904.

I.—FOR SALARIES OF INSTRUCTORS.

Names of Instructors.	Subjects Taught for Which Paid from "Morrill Fund."	Amount.
A. C. Barrows, Professor.....	English Literature.....	\$450 00
J. R. Taylor, Associate Professor.....	English Literature.....	300 00
J. V. Denny, Professor.....	English Language and Rhetoric	500 00
W. L. Graves, Assistant Professor.....	English Language and Rhetoric	260 00
Geo. H. McKnight, Assistant Professor..	English Language and Rhetoric	260 00
Total.....		\$1,770 00

SCHEDULE D.

Disbursements for instruction in Mathematical Science and for facilities for such instruction during the year ended June 30, 1904.

I.—FOR SALARIES OF INSTRUCTORS.

Names of Instructors.	Subjects Taught for Which Paid from "Morrill Fund."	Amount.
H. C. Lord, Professor.....	Astronomy.....	\$450 00
B. F. Maag, Assistant.....	Astronomy.....	200 00
R. D. Bohanan, Professor.....	Mathematics.....	450 00
Geo. W. McCoard, Associate Professor..	Mathematics.....	320 00
Jas. E. Boyd, Associate Professor.....	Mathematics.....	300 00
K. D. Swartzel, Associate Professor. ...	Mathematics.....	300 00
H. W. Kuhn, Assistant Professor.....	Mathematics.....	220 00
S. E. Rasor, Instructor.....	Mathematics.....	200 00
E. F. Coddington, Assistant Professor..	Mathematics.....	110 00
Total.....		\$2,550 00

SCHEDULE E.

Disbursements for instruction in Natural or Physical Science and for facilities for such instruction during the year ended June 30, 1904.

I.—FOR SALARIES OF INSTRUCTORS.

Name of Instructors.	Subjects Taught for Which Paid from "Morrill Fund."	Amount.
A. M. Bleile, Professor.....	Anatomy and Physiology.....	\$450 00
M. Dresbach, Instructor.....	Anatomy and Physiology.....	80 00
R. J. Seymour, Fellow.....	Anatomy and Physiology.....	25 00
C. B. Morrey, Associate Professor.....	Bacteriology.....	280 00
W. A. Kellerman, Professor.....	Botany.....	450 00
J. H. Schaffner, Associate Professor.....	Botany.....	260 00
O. E. Jennings, Assistant.....	Botany.....	50 00
S. A. Norton, E. Professor.....	Chemistry.....	250 00
W. McPherson, Professor.....	Chemistry.....	450 00
W. E. Henderson, Associate Professor.....	Chemistry.....	280 00
C. W. Foulk, Associate Professor.....	Chemistry.....	240 00
M. Mumma, Assistant.....	Chemistry.....	70 00
E. N. Webb, Assistant.....	Chemistry.....	60 00
Cath. Andrews, Assistant.....	Chemistry.....	60 00
C. S. Prosser, Professor.....	Geology.....	380 00
Jno. A. Bownocker, Professor.....	Geology.....	320 00
N. W. Lord, Professor.....	Metallurgy and Mineralogy.....	400 00
E. E. Somermeier, Instructor.....	Metallurgy and Mineralogy.....	220 00
Geo. B. Kauffman, Professor.....	Pharmacy.....	400 00
C. A. Dye, Assistant Professor.....	Pharmacy.....	110 00
B. F. Thomas, Professor.....	Physics.....	450 00
A. D. Cole, Professor.....	Physics.....	400 00
R. F. Earhart, Assistant Professor.....	Physics.....	200 00
L. B. Tuckerman, Assistant.....	Physics.....	70 00
H. Osborn, Professor.....	Zoology and Entomology.....	450 00
J. S. Hine, Associate Professor.....	Zoology and Entomology.....	120 00
F. L. Landacre, Associate Professor.....	Zoology and Entomology.....	120 00
II.—For facilities as follows:		
Objectives, \$53.20; Chemical Supplies, \$639.79.....		692 99
Instruments, \$126.84; Weights, \$55.60.....		182 44
Total.....		\$7,520 43

SCHEDULE F.

Disbursements for instruction in Economic Science and for facilities for such instruction during the year ended June 30, 1904.

I.—FOR SALARIES OF INSTRUCTORS.

Names of Instructors.	Subjects Taught for Which Paid from "Morrill Fund."	Amount.
Minnie A. Stoner, Professor.....	Domestic Science.....	\$360 00
Cornelia P. Souther, Associate Professor.....	Domestic Art.....	120 00
J. E. Hagerty, Associate Professor.....	Economic Science.....	120 00
W. E. Miller, Instructor.....	Economic Science.....	50 00
Total.....		\$650 00

The State has no material resources at all comparable with its citizens and no hope of perpetuity except in the intelligence and integrity of its people.

FACULTY AND COURSES OF STUDY.

JOHN T. MACK	OSCAR T. CORSON	GUY W. MALLON
--------------	-----------------	---------------

DAYS AND DATES

1904

Summer Session, Lake Laboratory, Sandusky....	June 15 to September 15.
Summer Courses in Surveying.....	June 20 to July 18.
Summer Courses in Shopwork.....	June 22 to July 18.
Entrance Examinations (8 a. m.).....	{ Monday, September 19.
	{ Tuesday, September 20.
First Term begins—Registration Day.....	Tuesday, September 20.
Lectures and Class-work begin.....	Wednesday, September 21.
President's Annual Address (11 a. m.).....	Friday, September 23.
Meeting of Trustees.....	Wednesday, September 21.
Latest Date of Admission to candidacy for a de- gree at the Commencement of June, 1904.....	Saturday, October 1.
Thanksgiving Recess	{ Thursday, November 24.
	{ Friday, November 25.
Latest date for filing Thesis subjects.....	Thursday, December 15.
First Term ends.....	Wednesday, December 21.
Christmas Vacation.	

1905

Second Term begins—Registration Day.....	Tuesday, January 3.
Washington's Birthday	Wednesday, February 22.
Second Term ends.....	Friday, March 31.
Spring Recess.	
Third Term begins—Registration Day.....	Wednesday, April 5.
Meeting of Trustees.....	Wednesday, April 5.
Field Day—Athletic Association.....	Saturday, May 13.
Senior Vacation begins.....	Saturday, May 27.
Competitive Drill—Cadet Battalion.....	Saturday, May 27.
Memorial Day	Tuesday, May 30.
Latest Date for Presenting Thesis.....	Friday, June 9.
Final Examinations	{ Friday, June 9.
	{ to
	{ Thursday, June 15.
Latest Date for Filing bound Copy of Thesis.....	Friday, June 15.
Baccalaureate Sermon	Sunday, June 18.
Entrance Examinations (8 a. m.).....	{ Monday, June 19.
	{ Tuesday, June 20.
Class Day	Monday, June 19.
Meeting of Trustees.....	Tuesday, June 20.
Alumni Day	Tuesday, June 20.
COMMENCEMENT	Wednesday, June 21.
Summer Vacation.	
Summer Session, Lake Laboratory, Sandusky....	June 15 to September 15.
Summer Courses in Surveying.....	June 16 to July 14.
Summer Courses in Shopwork.....	June 19 to July 15.
Entrance Examinations (8 a. m.).....	Monday, September 18.
First Term begins—Registration Day.....	Tuesday, September 19.
Lectures and Class-work begin (all Colleges).....	Wednesday, September 20.
Meeting of Trustees.....	Wednesday, September 20.
Annual Address by the President (11 a. m.).....	Friday, September 22.

ADMINISTRATIVE OFFICERS

THE UNIVERSITY

- WILLIAM OXLEY THOMPSON, D. D. LL. D.....President
Office, University Hall, Campus.
- ALEXIS COPE.....Secretary to Board of Trustees and Bursar
Office, University Hall; office hours 8 to 12 a. m.; 2 to 5 p. m.
- WILBUR H. SIEBERT, M. A.....Secretary of the General Faculty
Office, University Hall.
- EDITH D. COCKINS, B. A.....Registrar
Office, University Hall; office hours 8 to 11:45 a. m.; 1:30 to 4 p. m., except Saturday.
- KATHARINE H. DUNCAN.....Executive Clerk
Office, University Hall; office hours 8 to 11 a. m.; 1 to 4 p. m.; Saturday 9 to 11 a. m.
- CARL E. STEEB, B. Ph.....Accountant
Office, University Hall; office hours 8 to 12 a. m.; 2 to 5 p. m.

COLLEGE OF ARTS, PHILOSOPHY AND SCIENCE.

- JOSEPH V. DENNEY, B. A.....Dean
Office, Registrar's office, University Hall; office hours 11 a. m., Monday and Friday, and at 12 m. Tuesdays and Thursdays.
- ALFRED D. COLE, M. A.....Secretary
Office, Registrar's office, University Hall; office hours 9 a. m. Monday and Wednesday; 10 a. m. Friday.
- GEORGE W. KNIGHT, Ph. D.....Chairman of the Administrative Board of the Graduate School.
Office, Room 15, University Hall; office hours 9 a. m. Monday, Tuesday and Thursday.
- BENJAMIN F. THOMAS, Ph. D.....Chairman of the Committee on Admission to Advanced Standing.
Office, Room 13, University Hall.

COLLEGE OF AGRICULTURE AND DOMESTIC SCIENCE.

- HOMER C. PRICE, M. Sc.....Dean
Office, Townshend Hall.
- WILLIAM R. LAZENBY, M. Agr.....Secretary
Office, Horticultural Hall.

COLLEGE OF ENGINEERING.

- EDWARD ORTON, JR., E. M.....Dean
Office, Room 4, Orton Hall.
- FRANK E. SANBORN, S. B.....Secretary
Office, Brown Hall; office hours 9 to 10 a. m. daily, except Saturday.

OHIO STATE UNIVERSITY

7

COLLEGE OF LAW.

***WILLIAM F. HUNTER**Dean
Office, Page Hall.
WILLIAM H. PAGE, B. A., LL. M......Secretary
Office, Page Hall.

COLLEGE OF PHARMACY.

GEORGE B. KAUFFMAN, B. S......Dean
Office, Veterinary Laboratory.
WILLIAM McPHERSON, Ph. D......Secretary
Office, Townshend Hall.

COLLEGE OF VETERINARY MEDICINE.

DAVID S. WHITE, D. V. M......Dean
Office, 1b Veterinary Laboratory; office hours 1 p. m. daily.
SEPTIMUS SISSON, S. B., V. S......Secretary
Office, 6b Veterinary Laboratory; office hours 1 p. m. daily.

OTHER OFFICERS.

WILLIAM W. BOYD, M. A......High School Visitor
WILLIAM C. McCRACKEN.....Chief Engineer
Office, Power House.
JOHN A. BOWNOCKER, D. Sc......Curator of Geological Museum
WILLIAM C. MILLS, B. Sc......Curator of Archæological Museum

* Died June 15, 1904.

UNIVERSITY FACULTY

Members of the University Faculty and Other Instructors

1902-1903

WILLIAM OXLEY THOMPSON.....University Grounds
President

A. B., Muskingum College, 1878; A. M., *ibid.*, 1881; D. D., *ibid.*, 1891; LL. D., Western University of Pennsylvania, 1897. Licensed by the Presbytery of Zanesville, Dresden, Ohio, April, 1881; Ordained by Presbytery of Fort Dodge, Iowa, July, 1882; Pastor Odebolt, Iowa, 1882-1885; Pastor Longmont, Colorado, 1885-'91; President Longmont College, 1885-89; President Miami University, 1891-99; present position since 1899.

THOMAS CORWIN MENDENHALL Florence, Italy
Emeritus Professor of Physics

Ph. D., Ohio State University, 1878; D. Sc. Rose Polytechnic Institute; LL. D., University of Michigan, 1887; Professor of Physics and Mechanics, Ohio State University, 1873-1878; Professor of Physics, Imperial University of Japan, 1878-1881; Professor of Physics, Ohio State University, 1881-1884; Professor U. S. Signal Corps, 1884-1886; President Rose Polytechnic Institute, 1886-1889; Superintendent U. S. Coast and Geodetic Survey, 1889-1894; President Worcester Polytechnic Institute, 1894-1901.

ROBERT WHITE McFARLAND.....Oxford, Ohio
Emeritus Professor of Civil Engineering

A. B., Ohio Wesleyan University, 1847; A. M., the same, 1850; LL. D., the same, 1881; Teacher in Academies, 1847-'51; Chillicothe Public Schools, 1852-'53; Professor of Mathematics and Astronomy, Madison College, 1853-'56; Professor, same chair, Miami University, 1856-'73; Captain 86th O. V. I., 1862; Lieutenant-Colonel of the same, 1863-64; Professor of Mathematics, Astronomy and Civil Engineering, Ohio State University, 1873-85; State Inspector of Railroads 1881-85; President of Miami University 1885-88; Civil and Mining Engineer 1888-99.

SIDNEY AUGUSTUS NORTON.....363 East Town Street
Emeritus Professor of Chemistry

A. B., Union, 1856; A. M., Union, 1859; M. D., Miami Medical College, 1867; Ph. D., Kenyon, 1878; LL. D., Wooster, 1881; LL. D., Union, 1889; Student at Bonn, Leipzig, Heidelberg; Teacher, Poughkeepsie Collegiate Academy, 1856; Tutor, Union, 1857; Principal Hamilton (Ohio) High School, 1858; Instructor of Natural Science, Cleveland High Schools, 1859-'66; Teacher of Natural Science, Mt. Auburn, 1866-'72; Professor of Chemistry, Miami, 1867-'72; Acting Professor of Physics, Union, 1872-'73; Professor of Chemistry, Ohio State University, 1873-'95; Lecturer in Chemistry, 1895-'99; present position since 1899.

STILLMAN W. ROBINSON.....1353 Highland Street
Emeritus Professor of Mechanical Engineering

C. E., University of Michigan, 1863; D. Sc., Ohio State University, 1896; Assistant Engineer U. S. Lake Survey, 1863-'66; Instructor in Engineering, University of Michigan, 1866-'67; Assistant Professor Mining Engineering and Geodesy, University of Michigan, 1867-'70; Professor Mechanical Engineering and Physics, University of Illinois, 1870-'78; Professor Mechanical Engineering and Physics, Ohio State University, 1878-'81; Professor Mechanical Engineering, Ohio State University, 1881-'95 (Resigned in 1895); Consulting Mechanical Engineer and Inventor for Wire Grip and McKay Shoe Machinery Companies, 1884-'98; Elected Emeritus Professor of Mechanical Engineering, Ohio State University, 1899; State Inspector of Railroads and Bridges, 1880-'84; Consulting Engineer Santa Fe R. R., 1887-'90; Consulting Engineer Lick Telescope and Mountings, 1887.

WILLIAM HENRY SCOTT.....131 Fifteenth Avenue
Professor of Philosophy

B. A., Ohio University, 1862; M. A., Ohio University, 1865; LL. D., Ohio University and Ohio Wesleyan, 1884; Superintendent of Public Schools, Athens, Ohio, 1862-'64; Principal of the Preparatory Department of Ohio University, 1864-'65; Pastor of Main Street (now Trinity) M. E. Church, Chillicothe, Ohio, 1865-'67; Pastor of Town Street (now First) M. E. Church, Columbus, Ohio, 1867-'69; Professor of Greek, Ohio Univer-

sity, 1869-'72; President and Professor of Philosophy, Ohio University, 1872-'83; President and Professor of Philosophy, Ohio State University, 1883-'95; present position since 1895.

NATHANIEL WRIGHT LORD.....338 West Eighth Avenue
Professor of Mineralogy and Metallurgy, Director of the School of Mines.

E. M., Columbia, 1876; Assistant Engineer, Cincinnati, 1877; Engineer and Metallurgist Monte Grande Gold Mining Co., Nicaragua, 1878; Assistant School of Mines, O. S. U., 1879; Chemist Ohio Geological Survey, 1880-'88; Assistant Professor of Mining and Metallurgy, O. S. U., 1880-'87; Professor Mining and Metallurgy, O. S. U., 1887-'91; Professor Metallurgy and Mineralogy, O. S. U., 1896; Chemist State Board of Agriculture, 1881-'99; Chemist State Board of Health, 1896-'98; present position since 1896.

†**SAMUEL CARROLL DERBY**93 Fifteenth Avenue
Professor of Latin

A. B., Harvard, 1866; A. M., Harvard, 1869 (in course), 1877 (by examination); Principal of Schools, Ilion, N. Y., 1866-'67; Assistant in Dixwell's Classical School, Boston, 1867-'70; Professor of Latin, Antioch, 1870-'81; President, Antioch, 1877-'81; Student, Latin and History, Harvard, 1876-'77; Student, Latin and History, Johns Hopkins, 1880-'81; Student, Latin, Harvard, 1892-'93; present position since 1881.

WILLIAM RANE LAZENBY.....348 West Eighth Avenue
Professor of Horticulture and Forestry

B. Agr., Cornell, 1874; M. Agr., Iowa Agricultural College, 1887; Instructor Horticulture and Botany, Cornell, 1874-'77; Assistant Professor of Horticulture, Cornell, 1877-'81; Lecturer, N. Y. State Grange, 1874-'81; Director Ohio U. S. Experiment Station, 1882-'87; Professor of Botany and Horticulture, Ohio State University, 1881-'92; Collaborator United States Bureau of Forestry, 1901-'04; present position since 1892.

JOSIAH RENICK SMITH.....950 Madison Avenue
Professor of the Greek Language and Literature

A. B., Amherst, 1871; A. M., Amherst, 1883; Principal, Mound Street School, Columbus, 1871-'73; Teacher, Columbus High School, 1873-'76; Assistant Professor of Ancient Languages, Ohio State University, 1876-'81; Student at Leipzig, 1881-'83; present position since 1883.

HENRY ADAM WEBER.....1342 Forsythe Avenue
Professor of Agricultural Chemistry

Graduate of Polytechnic School, Kaiserslautern, 1866; Student, Chemistry under Von Liebig and Reischauer, and of Mineralogy under Von Kobell, Munich, 1866-'68; Ph. D., Ohio State University, 1879; Ohio Geological Survey, Chemical Department, 1869-'74; Professor of General Chemistry and Mineralogy, University of Illinois, 1874-'82; Chemist to State Board of Agriculture, Illinois, 1874-'82; Chemist to State Board of Health, Illinois, 1874-'82; State Chemist and Chief Chemist to Ohio State Dairy and Food Commissioner, 1885-'97; present position since 1884.

BENJAMIN FRANKLIN THOMAS.....University Grounds
Professor of Physics, and State Sealer of Weights and Measures

B. Sc., Ripon, 1874; M. Sc., Ripon, 1877; Ph. D., Stevens Institute, 1880; Instructor in Mathematics and Physics, Carleton College, Northfield, Minnesota, 1876-'79; Professor of Physics, University of Missouri, 1880-'85; Member of the Board of Examiners at the International Electrical Exhibition at Philadelphia, 1884; Member of the Jury of Awards, Department of Electricity, at the World's Columbian Exposition, Chicago, 1893; present position since 1885.

GEORGE WELLS KNIGHT.....85 Jefferson Avenue
Professor of American History and Political Science and of Law

A. B., University of Michigan, 1878; A. M., University of Michigan, 1883; Ph. D., University of Michigan, 1884; Student, Law, University of Michigan, 1878-'79; Principal of High School, Lansing, Michigan, 1879-'81; Student, History and Political Science, University of Michigan, 1882-'84; Instructor in History, Ann Arbor High School, 1883-'85; Professor of History and English Literature, Ohio State University, 1885-'87; Professor of History and Political Science, Ohio State University, 1887-'98; Student at Universities of Halle, Berlin, and Freiburg, 1889-'90; present position since 1898.

ROSSER DANIEL BOHANNAN.....Sixteenth and Indianola Avenues
Professor of Mathematics

B. Sc., C. E., E. M., University of Virginia, 1876; Student of Mathematics and Physics, Cambridge, England, 1880-'82; Gottingen, 1882-'83; Teacher of Mathematics and Latin, Suffolk Collegiate Institute, Virginia, 1876-'77; Teacher of Mathematics and English, New York Latin School, New York City, 1877-'78; Professor of Mathematics and Natural Science, Emory and Henry College, 1878-'80; Acting Professor of Mathematics, University of Virginia, 1883-'84; Assistant in Mathematics and Physics, University of Virginia, 1884-'87; Professor of Mathematics and Astronomy, Ohio State University, 1887-'95; present position since 1895.

†Absent on leave.

ALBERT MARTIN BLEILE.....218 King Avenue
Professor of Anatomy and Physiology.

M. D., Starling Medical College, 1876; Student, Vienna, Chemistry and Physiology, 1876-'77; Student, Physiology, Leipzig, 1877-'78; Student Anatomy and Histology, Paris, 1878-'79; Lecturer on Experimental Physiology, Starling Medical College, 1879; Professor of Physiology, Starling Medical College, 1884; present position since 1891.

WILLIAM ASHBROOK KELLERMAN.....175 Eleventh Avenue
Professor of Botany

B. Sc., Cornell, 1874; Ph. D., Zurich, 1881; Professor of Natural Science, Wisconsin State Normal School, 1874-'79; Professor of Botany and Horticulture, Kentucky State College, 1881-'82; Professor of Botany and Zoology, Kansas State Agricultural College, 1883-'87; Professor of Botany, Kansas State Agricultural College, 1881-'91; Botanist, Kansas State Board of Agriculture, 1883-'91; Ohio Geological Survey (Botany) 1892-'93; Founder and Editor of the Journal of Mycology; present position since 1891.

GEORGE BEECHER KAUFFMAN.....University Grounds
Professor of Pharmacy, and Dean of the College of Pharmacy

B. Sc., Ohio Wesleyan University, 1877; Pharm. D., Scio., 1894; Associate Professor of Pharmacy, Ohio State University, to 1894; present position since 1894.

BENJAMIN LESTER BOWEN.....775 East Broad Street
Professor of Romance Languages and Literatures

A. B., University of Rochester, 1881; Ph. D., Johns Hopkins University, 1888; graduate work, University of Rochester, 1881-'82; Professor of Languages, New Windsor College, Maryland, 1882-'83; Graduate Student and Assistant in French, Johns Hopkins University, 1883-'86, and 1887-'88; Student at the Universities of Paris, Bonn, Rome and Madrid, 1885, and 1886-'87; Professor of French and Latin, Bowdoin College 1888-'89; Acting Associate Professor of French Language and Literature, Ohio State University, 1889-'90; Associate Professor of Romance Languages and Literatures, Ohio State University, 1890-'94; present position since 1894.

JOSEPH VILLIERS DENNEY.....230 West Tenth Avenue
Professor of Rhetoric and the English Language, and Dean of the College of Arts, Philosophy and Science

A. B., University of Michigan, 1885; Journalist, 1885-'88; Principal of the Aurora (Illinois) High School, 1888-'90; Instructor in English and Graduate Student, University of Michigan, 1890-'91; Associate Professor of Rhetoric, Ohio State University, 1891-'94; present position since 1894.

ALLEN CAMPBELL BARROWS.....85 West Tenth Avenue
Professor of English Literature

A. B., Western Reserve, 1861; A. M., Western Reserve, 1866; D. D., Iowa College, 1889; Teacher, Latin and Greek, Phillips Academy, 1865-'66; Professor of Physics, Western Reserve, 1866-'70; Professor of Latin and English Literature, Western Reserve, 1870-'71; Professor of English Literature and History, Iowa Agricultural College, 1887-'94; present position since 1894.

EDWARD ORTON, JR......The Normandie
Professor and Director of the Department of Clay-Working and Ceramics and Dean of the College of Engineering

E. M., Ohio State University, 1884; Assistant on Ohio Geological Survey, 1882; Chemist for Columbus and Hocking Coal and Iron Company, 1885-'86; Superintendent of Blast Furnace at New Straitsville, O., 1887-'88; Superintendent of Victoria Furnace, Goshen Bridge, Va., 1888; Steel Worker, Homestead Steel Works, Homestead, Pa., 1889; Superintendent Ohio Paving Company's Factory, Columbus, Ohio, 1890-'92; Special Assistant on Clays, Ohio Geological Survey, 1892; Superintendent Acme Vitrified Brick Co., Louisville, Kentucky, 1893; Secretary American Ceramic Society, 1899; State Geologist of Ohio, 1899; present position since May, 1894.

***WILLIAM FORREST HUNTER** 1032 Bryden Road
Professor of Law and Dean of the College of Law

Admitted to the Bar in 1861; Student, University of Michigan Law School; practicing attorney since 1866; Dean of the Law School, Ohio State University, 1892-'96; present position since 1896.

***JAMES HENRY COLLINS**The Chittenden; New Hayden Building
Professor of Law

In practice for thirty years; present position since 1891.

*Died June 15th, 1904.

*Died January 8th, 1904.

EMILIUS OVIATT RANDALL257 Woodland Avenue, Supreme Court Building
Professor of Law

Ph. B., Cornell, 1874; LL. B., LL. M., Ohio State University, 1892; admitted to practice, 1890; Secretary Ohio State Historical Society; Reporter Supreme Court of Ohio; present position since 1893.

WILLIAM THOMAS MAGRUDER.....191 King Avenue
Professor of Mechanical Engineering

M. E., Stevens Institute of Technology, 1881; Practical Experience in Machine Design and Shop Practice, Taunton, Mass., 1881-'86; Student in Chemistry and Mathematics, etc., Johns Hopkins University, 1886-'87; Adjunct Professor of Mechanical Engineering (practical and theoretical) Vanderbilt University, 1887-'96; present position since July, 1896.

EDGAR BENTON KINKEAD.....Wyandotte Avenue; New Hayden Building
Professor of Law

M. A., Marietta College, 1904; Assistant State Law Librarian, 1887-'94; In practice since 1891, Special Counsel for Attorney-General of Ohio, 1897-1900; present position since 1895.

WILLIAM HERBERT PAGE.....1068 Franklin Avenue; 27 Board of Trade
Professor of Law

B. A., Yale, 1889; LL. B., Ohio State University, 1892; LL. M., same institution, 1894; Instructor in Central High School, Columbus, Ohio, 1889-'96; present position since September, 1896.

WILLIAM McPHERSON.....University Campus
Professor of Chemistry

B. Sc., Ohio State University, 1887; M. Sc., Ohio State University, 1890; D. Sc., Ohio State University, 1895; Ph. D., University of Chicago, 1899; Instructor in Chemistry and Physics, Toledo High School, 1887-'89; Instructor in Chemistry and Latin, Toledo High School and Manual Training School, 1889-'92; Assistant in Chemistry, Ohio State University, 1892-'93; Assistant Professor in Chemistry, Ohio State University 1893-'95; Associate Professor, General Chemistry, Ohio State University, 1895-'97; present position since 1897.

JOSEPH NELSON BRADFORD.....54 West Tenth Avenue
Professor of Architecture and Drawing

M. E., Ohio State University, 1883; Draftsman, Ohio Geological Survey, 1882-'83; Motor Power Department, Pennsylvania Railroad, 1883-'85; Assistant in Mechanical Engineering and Drawing, Ohio State University, 1885-'90; Assistant Professor of Drawing, Ohio State University, 1890-'93; Associate Professor of Drawing, Ohio State University, 1893-'99; present position since 1899.

DAVID STUART WHITEWest Fifth Avenue
Professor of Veterinary Medicine, and Dean of the College of Veterinary Medicine

D. V. S., Ohio State University, 1890; Student, Royal Veterinary Schools of Hanover, Berlin, 1890-'91; at Imperial Veterinary Institute of Vienna, 1892; Royal Veterinary College, of Dresden, 1893; Assistant in Veterinary Medicine, Ohio State University, 1893-'95; present position since 1895.

HERBERT OSBORN.....485 King Avenue
Professor of Zoology and Entomology

B. Sc., Iowa Agricultural College, 1879; M. Sc., same institution, 1880; Student of Entomology at Museum Comparative Zoology (Cambridge, Mass.) 1881-82; College of Physicians and Surgeons, Des Moines, 1884-'85 (Anatomy and Physiology); Zoological Station, Naples (Smithsonian table), 1894-'95; Assistant in Zoology and Entomology, Iowa Agricultural College, 1880-1883; Assistant Professor of Zoology and Entomology, Iowa Agricultural College, 1884-'85; Professor of Zoology and Entomology, Iowa Agricultural College, 1886-'98; Special Agent Division of Entomology, U. S. Department of Agriculture, 1885-'94; Entomologist, Iowa Experiment Station, 1890-'98; State Entomologist, Iowa, 1898; present position since 1898.

CHRISTOPHER P. LINHART.....O. S. U. Gymnasium; The Vendome
Professor of Physical Education and Director of the Gymnasium.

M. D., Western Reserve University, Cleveland, 1882; Post Graduate Student, same institution, 1882-'83; Student and Instructor, Dr. Anderson's Normal School of Physical Education, 1886; Student in Harvard Summer School, 1887; House Physician and Surgeon, Cleveland City Hospital, 1883-'85; Assistant Demonstrator of Anatomy, Western Reserve University, 1885-'86, and Assistant Visiting Physician, Charity Hospital, Cleveland, 1886; Director of Y. M. C. A. Gymnasium, Orange, N. J., 1886 and 1888; Instructor in Physiology and Physical Education, Newark (N. J.) Academy, 1887 and 1890, and Director of Physical Education, Newark (N. J.) Public Schools, 1888-'90; Medical

Director Manhattan Athletic Club, 1891 and 1892; Instructor in Physiology and Physical Education, Union College, 1892-'97; Director of the Gymnasium and Instructor in Physical Education, O. S. U., 1897-1900; present position since 1900.

OLIVE B. JONES95 Eleventh Avenue
Librarian

Assistant Librarian, 1887; present position since 1893.

HENRY CURWEN LORD.....University Grounds
Professor of Astronomy and Director of the Emerson McMillen Observatory

B. Sc., University of Wisconsin, 1889; Assistant in Washburn Observatory, University of Wisconsin; with Thompson-Houston Electric Company, 1889; Assistant in Mathematics and Astronomy, Ohio State University, 1891-'94; Director and Associate Professor of Astronomy O. S. U., 1895-1900; elected Fellow, Royal Astronomical Society, 1897; present position since 1900.

FRANK EDWIN SANBORN.....303 West Eighth Avenue
Professor and Director of the Department of Industrial Arts

S. B., in Mechanical Engineering, Massachusetts Institute of Technology, 1889; Assistant in Drawing, Massachusetts Institute of Technology, 1889-'90; Teacher in Manual High School Department, Pratt Institute, 1890-'91; Walker Special Instructor, Tufts College, 1891-'94; Instructor in Mechanical Department, Tufts College, 1894-'98; Director of the Department of Industrial Arts, O. S. U., 1898-1900; present position since September, 1900.

FRANK ARNOLD RAY.....137 King Avenue
Professor of Mine Engineering

E. M., Ohio State University, 1887; Superintendent Building Construction, Elah Terral & Co., 1887-'88; Assistant Mining Engineer of C. & H. C. & I. Co., 1888-'89; Chief Engineer C. & H. C. & I. Co., 1899-92; Chief Engineer Congo Mining Co., 1892-'95; Assistant Professor of Mine Engineering, O. S. U., 1895-'97; Associate Professor, 1897-1900; present position since 1900.

*FREDERICK CONVERSE CLARK 1634 Neil Avenue
Professor of Economics and Sociology

A. B., University of Michigan, 1887; A. M., University of Michigan, 1888; Ph. D., University of Michigan, 1891; Student at Halle, Leipzig and Berlin, 1893-'95; Instructor in History and Economics, Ann Arbor High School, 1888-'92; Assistant Professor of Political Science, and Acting Head of the Department, Stanford University, 1892-'93; Assistant Professor of Political Economy, 1893; Assistant Professor of Economics and Sociology, Ohio State University, 1895-'98; Associate Professor, 1898-1900; present position since 1900.

JOHN ALLEN SHAUCK.....95 Winner Avenue; Supreme Court Building
Professor of Law

B. A., Otterbein University; LL. B., University of Michigan, 1867; A. M., Otterbein University, 1870; LL. D., Otterbein University, 1897; Judge of the Supreme Court of Ohio; Lecturer on Supreme Court Practice Ohio State University, 1898-1900; present position since 1900.

CAPT. GEORGE L. CONVERSE, U. S. A. (Retired)..94 Hoffman Ave., 23 East State St.
Professor of Military Science and Tactics

Present position since 1900.

JOHN WRIGHT DECKER.....325 West Eighth Avenue
Professor of Dairying

B. Agr., University of Wisconsin, 1890; Fellow in Agriculture, University of Wisconsin, 1890-'91; Instructor in Dairying, University of Wisconsin, 1891-'99; Associate Professor of Dairying, Ohio State University, 1899-1901; present position since 1901.

EMBURY ASBURY HITCHCOCK.....380 West Eighth Avenue
Professor of Experimental Engineering

M. E., Cornell, 1890; Straight Line Engine Company, Syracuse, N. Y., 1889; Corliss Steam Engine Company, Providence, R. I., 1890-'93; Assistant in Mechanical Engineering, Ohio State University, 1893-'95; Assistant Professor of Mechanical Engineering in charge of the Department, 1895-'96; Assistant Professor of Experimental Engineering, Ohio State University, 1896-'97; Associate Professor of Experimental Engineering, Ohio State University, 1897-1901; present position since 1901.

FRANCIS CARY CALDWELL.....401 West Sixth Avenue
Professor of Electrical Engineering

A. B., Cornell, 1890; M. E., Cornell, 1891; with Thomson-Houston Electric Co., Lynn, Mass., 1891-'92; Student at the National Polytechnic School, Zurich, 1892-'93;

*Died September 19th, 1903.

Assistant Professor of Electrical Engineering, Ohio State University, 1893-'97; Associate Professor of Electrical Engineering, 1897-1901; present position since 1901.

CHARLES SMITH PROSSER.....114 West Tenth Avenue
Professor of Geology

B. S., Cornell University, 1883; M. S., Cornell University, 1886; Fellow in Natural History, Cornell, 1884-'85; Instructor in Paleontology, Cornell University, 1885-'88; Assistant Paleontologist, U. S. Geological Survey, 1888-'92; Professor of Natural History, Washburn College, Topeka, Kansas, 1892-'94; Assistant Geologist, U. S. Geological Survey, 1893-'94; Professor of Geology, Union College, Schenectady, N. Y., 1894-'99; Assistant Geologist, N. Y. Geological Survey, 1895-'99; Assistant Geologist, University Geological Survey of Kansas, 1896; Chief Appalachian Division, Maryland Geological Survey, 1898-1902; Assistant Geologist, Ohio Geological Survey and U. S. Geological Survey since 1900; Associate Professor of Historical Geology, Ohio State University, 1899-1901; present position since 1901.

JOHN ADAMS BOWNOCKER.....1594 Nell Avenue
Professor of Inorganic Geology and Curator of the Museum

B. Sc., Ohio State University, 1889; D. Sc., Ohio State University, 1897; Principal of High School, Martins Ferry, 1889-'92; Fellow in Geology, University of Chicago, 1892-'94; Graduate Scholar, Yale University, 1894-'95; Assistant Geological Survey of Ohio, 1892; Assistant Geological Survey of New Jersey, 1893; Assistant Geologist Ohio Survey, 1900; Assistant in Geology, 1895-'98; Assistant Professor, 1898-'99; Associate Professor of Inorganic Geology and Curator of the Museum, 1899-1901; present position since 1901.

ALFRED DODGE COLE 237 Eleventh Avenue
Professor of Physics

A. B., Brown University, 1884; A. M., 1887; Graduate Student, Johns Hopkins University, 1884-'85; Harvard University, Summer School, 1887; Student University of Berlin, 1894-'95; Graduate Student, University of Chicago, Summer, 1898; Instructor in Chemistry and Physics, Denison University, 1885-'87; Acting Professor, 1887-'88; Professor of Physics and Chemistry, 1888-1901; Graduate Student and Assistant in Physical Laboratory, University of Chicago, Summers of 1899 and 1900; present position since September, 1901.

MINNIE AVA NELLIE STONER95 West Eleventh Avenue
Professor of Domestic Science and Head of Department of Domestic Economy

B. Sc., South Dakota College, 1890; Assistant in South Dakota State Normal, Madison, S. D., 1890-'92; Student in Boston Normal School of Household Arts; 1892-'93; graduated in class '93 with Normal Diploma in Domestic Science and Art; Investigation at Harvard, 1893; Superintendent Y. W. C. A., Industrial School, Lincoln, Neb., 1894; Demonstration Lecture work at Fort Smith, Ark., 1895, in Mr. Aubrey's School; Professor of Domestic Arts, University of Tennessee, Knoxville, 1896-98; Dean of the Woman's Department and Professor of Domestic Science, Kansas State Agricultural College, 1898-1901; Investigations at Wesleyan University, Middletown, Conn., in Summer School of Biology and chemistry, 1902; investigation at Chicago University 1903; present position since 1901.

WILBUR HENRY SIEBERT182 West Tenth Avenue
Professor of European History and Secretary of the University Faculty

A. B., Ohio State University, 1888; A. B. (with honorable mention) Harvard University, 1889; M. A., Harvard, 1890; Student, Freiburg and Berlin, 1890-'91; Student, Harvard, 1895; Assistant in History and Political Science, Ohio State University, 1891-'93; Assistant Professor of History, Ohio State University, 1893-'95, 1897-'98; Student, Harvard University, 1895-'97; Associate Professor of European History, 1898; present position since 1902.

CHRISTOPHER ELIAS SHERMAN.....772 Oak Street
Professor of Civil Engineering

C. E., Ohio State University, 1894; engaged in Civil Engineering in Ohio, Tennessee, Virginia, North Carolina and Arizona for three years during college course; engaged in railroad, geological and governmental engineering from graduation until September, 1896; Engineer to Park Commission, Springfield, Ohio, and U. S. Assistant Engineer at Tampa, Florida, and Huntsville, Alabama, summer of 1898; U. S. Assistant Engineer on Roads and Bridges, Yellowstone National Park, summer of 1899 and 1900; Assistant in Civil Engineering, Ohio State University, 1896-'97; Assistant Professor of Civil Engineering, Ohio State University, 1897-1901; Associate Professor of Civil Engineering, Ohio State University, 1901-'02; present position since 1902.

ALBERT HENRY HELLER.....1249 Nell Avenue
Professor of Civil Engineering

C. E., Ohio State University, 1890; Draftsman, Massillon Bridge Co., 1890-'91; Draftsman, Mt. Vernon Bridge Co., 1892; Assistant Chief Engineer, The Youngstown Bridge Co., 1893-'99; Chief Engineer The Youngstown Bridge Co., 1899-1900; Assistant to Vice-President of the American Bridge Co., 1900; in charge of Operating Engineering Department of the American Bridge Co., at Pittsburg, 1901; present position since 1902.

CHARLES SUMNER PLUMB.....107 West Eleventh Avenue
Professor of Animal Husbandry

B. S., Massachusetts Agricultural College, 1882; Associate Editor, "Rural New Yorker," 1883-'84; First Assistant, New York State Experiment Station, 1884-'87; Professor of Agriculture, University of Tennessee, and Assistant Director Tennessee Experiment Station, 1887-1890; Professor of Agricultural Science, Purdue University, 1890-'94; Professor Animal Industry and Dairying, Purdue University, 1894-1900; Professor Animal Industry, Purdue University, 1900-'02; Vice-Director Indiana Agricultural Experiment Station, 1890-'91; Director Indiana, Agricultural Experiment Station, 1891-1902; present position since 1902.

WILLIAM W. BOYD.....29 South Monroe Avenue
High School Visitor

B. A., Marietta College, 1884; M. A., Marietta College, 1887; teacher in public schools, 1884-'90; Superintendent of Schools at Marietta, 1890-'98; Superintendent of schools at Painesville, O., 1898-'02; Member of State Board of School Examiners, 1898-'02; present position since 1902.

SEPTIMUS SISSON 1619 Highland Street
Professor of Comparative Anatomy.

S. B., University of Chicago, 1898; Ontario Veterinary College, 1891; Demonstrator of Anatomy, Ontario Veterinary College, 1891-'99; Graduate Student, University of Chicago, Summer Quarters of 1900-'01; Associate Professor of Veterinary Science and Zoology, Kansas State Agricultural College, 1899; Professor of Zoology, *ibid.*, 1900; Associate Professor of Veterinary Medicine Ohio State University, 1901-1903; present position since 1903.

HOMER CHARLES PRICE 388 West Eighth Avenue
Professor of Rural Economics and Dean of the College of Agriculture and Domestic Science.

B. Sc. (Agr.) Ohio State University, 1897; M. S. A., Cornell University, 1899; Fellow in Agriculture, Cornell University, 1898-'99; Assistant in Horticulture, Ohio State University, 1899-1901; Professor of Horticulture and Forestry, Iowa State College, 1901-1903; present position since 1903.

LEWIS ADDISON RHOADES.....333 West Eighth Avenue
Professor of Germanic Languages and Literatures.

A. B., University of Michigan, 1884; A. M., *ibid.*, 1886; Ph. D., Gottingen, 1892; Teacher of English and Latin, Michigan Military Academy, 1884-'85; teacher of History and German, Ann Arbor High School, 1885-'88; instructor in German, University of Michigan, 1888-'90; student at University of Gottingen, 1890-'92; instructor in German, Cornell University, 1892-'96; Professor of German, University of Illinois, 1896-1903; present position since 1903.

GEORGE WASHINGTON RIGHTMIRE..... 1528 Worthington Street
Professor of Law.

B. Ph., Ohio State University, 1895; A. M., *ibid.*, 1898. Teacher North High School Columbus, 1895-1902; instructor in American History and Political Science, Ohio State University, 1902-'03; present position since 1903.

SMITH WHITWORTH BENNETT.....171 King Avenue
Professor of Law.

Admitted to practice Supreme Court of Ohio, 1882; Supreme Court of the United States, 1898; Special Counsel in Office of Attorney General of Ohio since May 1898; present position since 1903.

GEORGE WASHINGTON McCOARD.....797 Park Street
Associate Professor of Mathematics

B. A., Bethany, West Virginia, 1873; M. A., Bethany, 1882; Principal of Oakdale Classical Normal Institute, Allegheny County, Pennsylvania, 1873-'74; Private Tutor in Cleveland, Ohio, 1874-'80; Principal of Public Schools, Irving Park, Chicago, 1880-'81; Teacher of Latin and Mathematics, Columbus High School, 1881-'82; Assistant in Mathematics and Latin, Ohio State University, 1882-'87; Assistant Professor of Mathematics, Ohio State University, 1887-'99; present position since 1899.

***CHARLES WALTER MESLOH** University Grounds
Associate Professor of Germanic Languages and Literatures

A. B., Ohio State University, 1889; M. A., Ohio State University, 1895; Student in the University of Chicago, 1894; Student, University of Berlin, 1896-'97; Assistant in German, Ohio State University, 1889-'95; present position since 1895.

*Died March 15th, 1904.

ARTHUR WINFRED HODGMAN202 West Eighth Avenue
Associate Professor of the Classic Languages

A. B., Harvard, 1890; A. M., Harvard, 1893; Ph. D. (Classical Philology) Harvard, 1896; Student in Graduate School, Harvard (Classical Philology), 1892-'96; Instructor in Preparatory Schools, Quincy, Duxbury, Mass., 1890-'92; Assistant in Greek and Latin, Ohio State University, 1896-'97; Assistant Professor of the Classic Languages, Ohio State University, 1897-'99; present position since September, 1899.

†**CORNELIA PORTER SOUTHER**
Associate Professor of Domestic Art

Graduate of Mary Institute (Washington University), St. Louis, Mo., 1883; Certificated Student at Mary Institute, 1883-'85; Handarbeitslehrerinnen-Seminar des Carola-Vereins, Leipzig, 1896-'97; Investigations in Domestic Art Methods in foreign cities, 1896-'98; Teacher of Sewing, Mrs. Ball's Private School, St. Louis, 1898; Special Student at Pratt Institute, Brooklyn, and Teachers' College, Columbia University, New York, 1899; Assistant Professor of Domestic Art, Ohio State University, 1899-1900; present position since 1900.

†**CLARA MAUD BERRYMAN** 95 West Eleventh Avenue
Director and Associate Professor of Physical Education for Women

Graduated from Wisconsin Academy, 1893; University of Wisconsin, 1893-'95; Abroad 1896; graduated from Dr. Sargent's Normal School, Honors in Theory, 1900; graduate work, Harvard Summer School, 1902; present position since 1900.

WILLIAM EDWARDS HENDERSON.....182 West Tenth Avenue
Associate Professor of Chemistry

A. B., University of Wooster, 1891; Ph. D., Johns Hopkins University, 1897; Graduate Student, Johns Hopkins University, 1893-'97; Fellow in Chemistry, Johns Hopkins University, 1896-'97; Professor of Natural Sciences, College of Emporia, Kansas, 1891-'93; Professor of Chemistry, Ohio University, 1897-'99; Assistant Professor of Chemistry, Ohio State University, 1899-1901; present position since 1901.

JOSEPH RUSSELL TAYLOR448 West Seventh Avenue
Associate Professor of English Literature.

B. A., Ohio State University, 1887; M. A., Columbia University, 1897; Assistant in Drawing, Ohio State University, 1889-'94; Assistant in Rhetoric, Ohio State University, 1894-'97; University Fellow in Literature, Columbia University, 1896-'97; Assistant Professor of Rhetoric, Ohio State University, 1897-'99; Assistant Professor of English Literature, Ohio State University, 1899-1901; present position since 1901.

JAMES ELLSWORTH BOYD.....60 West Maynard Avenue
Associate Professor of Mathematics

B. Sc., Ohio State University, 1891; M. S., Cornell, 1896; Student in Physics and Mathematics, Ohio State University, 1893-'95; Student in Experimental and Theoretical Physics, Cornell, 1895-'96; also Student in Sibley College of Mechanic Arts, Cornell, summer of 1895; Assistant in Physics, Ohio State University, 1891-'95; held scholarship in Physics, Cornell, 1895; Assistant Professor of Physics, Ohio State University, 1896-1901; present position since September, 1901.

CHARLES A. BRUCE.....235 West Tenth Avenue
Associate Professor of the Romance Languages

A. B., Ohio State University, 1895; Student of French, Amherst, Summer School, 1895; Graduate Student, University of Chicago, Summer Quarter, 1896; Student, University of Geneva, Summer School, 1898; Student at the Sorbonne, College de France, and Ecole des Hautes-Etudes, Paris, 1898-'99; Graduate Student, University of Chicago, Summer Quarter, 1900; Assistant in French, Ohio State University, 1895-'99; Assistant Professor of Romance Languages, Ohio State University, 1899-1901; present position since 1901.

THOMAS EWING FRENCH.....1458 Worthington Street
Associate Professor of Architecture and Drawing

M. E., Ohio State University, 1895; Assistant in Drawing Department three years preceding graduation; Draftsman, The Smith-Vaile Company, Dayton, 1888-'90; Instructor in Mechanical Drawing, Y. M. C. A., Dayton, 1888-'91; Chief Draftsman, The Smith-Vaile Company, Dayton, 1891; Assistant in Drawing, 1892-'98; Assistant Professor of Drawing, 1898-1901; present position since 1901.

DAVID R. MAJOR 387 King Avenue
Associate Professor of Education

B. S., Wabash College, 1890; Ph. D., Cornell University, 1896; Higher Diploma in Education, Teachers' College, Columbia University, 1899; Principal of Schools, War-

ren, Indiana, 1890-'92; Graduate Student in Philosophy and Sociology, Cornell University, 1892-'96; Scholar in Philosophy, 1894-'95; Fellow, 1895-'96; Principal of High School, Frankfort, Indiana, 1896-'98; Fellow in Education, Teachers' College, Columbia University, 1898-'99; Graduate Student, University of Chicago, Summer Quarter, 1899; Acting Professor of Pedagogy, University of Nebraska, 1899-1900; Assistant in Education, Teachers' College, Columbia University, 1900-'01; present position since 1901.

CHARLES WILLIAM FOULK 1656 Neil Avenue
Associate Professor of Chemistry

B. A., Ohio State University, 1894; Commercial Analytical Work, 1894-'96; Assistant in General Chemistry, 1896-'98; Student, Physical-Chemical Institute, Leipzig, 1899-1901; Assistant Professor of Chemistry, Ohio State University, 1898-1902; present position since 1902.

JOHN H. SCHAFFNER 40 West Tenth Avenue
Associate Professor of Botany

A. B., Baker University, Kansas, 1893; A. M., University of Michigan, 1894; M. S., Baker University, 1896; Student in Botany, Zoology and Geology, University of Michigan, 1893-'95; Student in Botany and Paleo-Botany, University of Chicago, 1896-'97; Assistant in Botany, University of Michigan, 1894-'95; Professor of Natural Sciences, South Dakota University, 1895-'96; Assistant in Botany, Ohio State University, 1897-'99; Assistant Professor of Botany, 1899-1902; present position since 1902.

CHARLES BRADFELD MORREY 188 West Tenth Avenue
Associate Professor of Bacteriology.

B. A., Ohio State University, 1890; Post-graduate Student, Ohio State University, 1890-'91; M. D., Starling Medical College, 1896; Assistant in Latin, Ohio State University, 1890-'91; Assistant in Latin and Physiology, 1891-'92; Assistant in Physiology, Ohio State University, 1892-'97; Student in Vienna and Paris, 1897-'99; Assistant Professor of Anatomy and Physiology, Ohio State University, 1899-1902; Associate Professor of Anatomy and Physiology, Ohio State University, 1902-'03; present position since 1903.

JAMES STEWART HINE 1340 Hunter Avenue
Associate Professor of Zoology and Entomology

B. Sc. (H. and F.), Ohio State University, 1893; Superintendent of the N. W. Substation of the Ohio Agricultural Experiment Station, 1893; Assistant in Horticulture, Ohio State University, 1894; Student in Entomology, Cornell, 1895; Assistant in the Division of Entomology of the United States Department of Agriculture, summers of 1897 and 1899; Assistant in Entomology, 1895-'99; Assistant Professor of Zoology and Entomology, Ohio State University, 1899-1902; present position since 1902.

FRANCIS LEROY LANDACRE 299 West Sixth Avenue
Associate Professor in Zoology and Entomology

B. A., Ohio State University, 1895; Student in Chicago University, Summer Quarters of 1898 and of 1899; Professor of Embryology in Ohio Medical University since 1896; Assistant in Zoology and Entomology, Ohio State University, 1895-1900; Assistant Professor Zoology and Entomology, 1900-'02; present position since 1902.

WALLACE S. ELDEN 55 West Ninth Avenue
Associate Professor of Classic Languages

A. B., Bowdoin, 1889; A. M., Bowdoin, 1892; Ph. D., University of Michigan, 1900; Student in Johns Hopkins University, 1889-'90; Headmaster, Rectory School, Hamden, Conn., 1890-'91; Student in Johns Hopkins University, 1891-'92; Instructor in Latin and French, Ohio State University, 1892-'94; Instructor in the Romance Languages, University of Michigan, 1894-'96; Instructor in Latin and Greek, University of Maine, 1896-'97; Assistant Professor of the Classic Languages, University of Maine, 1897-'99; Student in the University of Michigan, 1899-1900; Assistant Professor of the Classic Languages, Ohio State University, 1900-'02; present position since September, 1902.

FRANK HARVEY ENO 251 West Ninth Avenue
Associate Professor of Civil Engineering

B. S., University of Illinois, 1891; C. E., University of Illinois, 1894; Assistant Engineer and Superintendent Department of "Water Supply, Sewerage and Fire Protection," World's Columbian Exposition, 1891-'93; Assistant to Consulting Engineer, Chicago, Ills., 1894-'95; City Engineer, Winnetka, Ills.; 1895-'98; Assistant Engineer and Chief Draftsman, City Engineer's Office, Columbus, Ohio, 1898-1902; present position since 1902.

ALFRED VIVIAN 244 West Tenth Avenue
Associate Professor of Agricultural Chemistry

Ph. G., University of Wisconsin, 1894; Instructor in Pharmacognosy, University of Wisconsin, 1894-'95; Assistant in Agricultural Chemistry, University of Wisconsin,

1895-'97; Instructor in Agricultural Chemistry and Assistant Chemist to Experiment Station, 1897-1902; present position since 1902.

DENNIS HAMMOND UDALL 198 West Ninth Avenue
Associate Professor of Veterinary Surgery and Obstetrics

B. S. A., University of Vermont, 1898; D. V. M., New York State Veterinary College, 1901; Demonstrator in Anatomy, N. Y. S. V. C., 1900-'01; Private practice St. Johnsbury, Vt., 1901-'03. Present position since 1903.

MAY SECREST 162 West Tenth Avenue
Associate Professor of Domestic Art.

B. Sc., Kansas State Agricultural College, 1892; Diploma Teachers' College, Columbia University, 1902; Graduate Student of Chemistry, Kansas State Agricultural College, 1897-1898; Assistant in Domestic Art, Kansas State Agricultural College, 1899-1901; Director Domestic Science, State Normal School, Stevens Point, Wisconsin, 1902-1904; present position since 1904.

J. WARREN SMITH 1422 Oak Street
Lecturer on Meteorology

B. S., New Hampshire College of Agriculture and Mechanic Arts, 1888; M. S., N. H. C. of A. & M. A., 1899; special course in Meteorology at Harvard University in 1890 and 1891; employed in United States Weather Bureau since 1888; present position Section Director in charge Columbus Station and the Ohio Section of the Climate and Crop Division of the Bureau.

WILLIAM LUCIUS GRAVES 1313 Forsythe Avenue
Assistant Professor of Rhetoric and English Language

B. A., Ohio State University, 1893; M. A., Ohio State University, 1897; Instructor in High School, Coshocton, 1894-'95; Fellow and Assistant in Rhetoric and English Language, Ohio State University, 1895-'96; present position since 1896.

CLAIR ALBERT DYE 1569 Worthington Street
Assistant Professor of Pharmacy

G. Ph., Ohio State University, 1891; Post-graduate Student in Chemistry and Pharmacy, Ohio State University; Ph. D., University of Bern, 1901; Assistant in Chemistry and Pharmacy, 1890-'94; Assistant in Pharmacy, 1894-'98; present position since 1898.

CHARLES LINCOLN ARNOLD 328 West Eighth Avenue
Assistant Professor of Mathematics

B. Sc., Ohio State University, 1890; M. Sc., Ohio State University, 1894; Student, University of Chicago, summer term 1894-'95; Assistant in Mathematics, Ohio State University, 1890-'99; present position since 1899.

KARL DALE SWARTZEL 308 West Eighth Avenue
Assistant Professor of Mathematics

B. Sc., Ohio State University, 1893; M. Sc., Ohio State University, 1894; Fellow and Assistant in Mathematics, Ohio State University, 1894-'95; Assistant in Mathematics, Ohio State University, 1895-'96; Austin Scholar, Harvard University, 1902-'03; present position since 1899.

GEORGE H. McKNIGHT 269 East Broad Street
Assistant Professor of Rhetoric and English Language

A. B., Cornell, 1892; Ph. D., Cornell, 1896; Instructor in English at Cornell, 1892-'97; Cornell Traveling Fellow in English Philology, 1897-'98; Student in Freiburg, 1897-'98; Student in Paris and London, 1898-'99; present position since 1899.

FRED A. FISH 241 West Fourth Avenue
Assistant Professor of Electrical Engineering

M. E. in E. E., Ohio State University, 1898; Fellow in Electrical Engineering, Ohio State University, 1898-'99; Assistant, 1899-1900; Honorary Fellow in Electrical Engineering, University of Wisconsin, 1900-'01; present position since 1901.

WILLIAM ABNER KNIGHT 206 West Lane Avenue
Assistant Professor of Machine Shop Practice

M. E., Ohio State University, 1900; thirteen years' practical experience in workshops; Assistant in the Industrial Department and Foreman of the Machine Shops, 1893-'98; Assistant in Industrial Arts and Instructor in Machine Work, 1898-1900; Instructor in Machine Work, 1900-'01; present position since 1901.

HARRY WALDO KUHN 308 West Eighth Avenue
Assistant Professor of Mathematics

B. Sc., Ohio State University, 1897; Ph. D., Cornell University, 1901; Fellow and Assistant in Mathematics, Ohio State University, 1897-'98; Oliver Scholar in Mathematics at Cornell, 1898-'99; Erastus Brooks Fellow in Mathematics, Cornell, 1899-1900; Assistant in Mathematics, Cornell, 1900-'01; present position since 1901.

JAMES E. HAGERTY 212 Tenth Avenue
Assistant Professor of Economics and Sociology and Acting Head of Department.

A. B., Indiana University, 1892; Ph. D., University of Pennsylvania, 1900; Instructor in Mathematics LaPorte High School, 1892-'96; Graduate Student University of Chicago, 1896-'97; Honorary Fellow in Economics, University of Wisconsin, 1897-'98; Student at Berlin and Halle, 1898-'99; Harrison Fellow in Sociology, University of Pennsylvania, 1899-1900; Senior Fellow in Sociology, University of Pennsylvania, 1900-'01; present position since 1903.

†THEODORE C. SMITH 244 West Tenth Avenue
Assistant Professor of American History and Political Science

A. B., Harvard, 1892; A. M., Harvard, 1893; Ph. D., 1896; Graduate Student, Harvard, 1892-'94, 1895-'96; Fellow in American History, University of Wisconsin, 1894-'95; Ozias Goodwin Memorial Fellow, Harvard, 1896-'97; Student at Universities of Geneva, Paris and Berlin, 1896-'97; Instructor in History, University of Michigan, 1897-'98; Instructor in History, Vassar College, 1898-1900; present position since 1901.

‡FREDERICK EDWARD KESTER Gottingen, Germany
Assistant Professor of Physics

M. E. (in E. E.), Ohio State University, 1895; M. A., Cornell, 1899; Fellow and Assistant in Physics, Ohio State University, 1895-'97; Assistant in Physics, Ohio State University, 1897-'98; held scholarship in Physics, Cornell, 1898; Instructor in Physics, Ohio State University, 1899-1901; present position since 1901.

THOMAS HARVEY HAINES 396 King Avenue
Assistant Professor of Philosophy

B. A., Haverford College, Haverford, Pa., 1896; M. A., Haverford College, 1897; M. A., Harvard University, 1898; Ph. D., Harvard University, 1901; Assistant in Philosophy, Harvard University, 1898-'99; present position since 1901.

ALONZO HUBERT TUTTLE 215 West Tenth Avenue
Assistant Professor of American History and Political Science.

A. B., University of Michigan, 1896; A. M., *ibid.*, 1903; Assistant Principal of High School, Ishpeming, Mich., 1896-'98; Principal of High School, Ironwood, Mich., 1898-1900; Instructor in American History and Political Science, Ohio State University, 1900-'02; Graduate Student, Universities of Wisconsin and Michigan, 1902-'03; present position since 1902.

VERNON H. DAVIS University Grounds
Assistant Professor of Horticulture and Forestry

B. Sc., (Agr.), Ohio State University, 1900; M. S. A., Cornell University, 1901; Assistant in Horticulture and Forestry, Ohio State University, 1901-'02; present position since 1902.

OSCAR V. BRUMLEY University Grounds
Assistant Professor of Veterinary Medicine

Veterinary Surgeon's Certificate, Ohio State University, 1897; practiced 1897-'98; Graduate Student in Royal Veterinary College, Berlin, Germany, 1902; present position since 1898.

HORACE JUDD 245 West Fourth Avenue
Assistant Professor of Experimental Engineering

M. E., Ohio State University, 1897; M. Sc., Ohio State University, 1899; Fellow and Laboratory Assistant in Mechanical Engineering, Ohio State University, 1897-'99; Student in Experimental Engineering at Cornell University and at Stevens Institute of Technology, summer of 1898; Instructor in Department of Science and Technology, Pratt Institute, 1899-1902; present position since 1902.

EDWIN F. CODDINGTON 39 West Eleventh Avenue
Acting Assistant Professor of Mathematics

C. E., Ohio State University, 1896; M. Sc., 1897; Ph. D., University of Berlin, 1902; Emerson McMillin Fellow in Astronomy, Ohio State University, 1896-'97; Fellow

†Resigned.

‡Absent on leave.

in Astronomy, Lick Observatory, University of California, 1897-1900; Student in University of Berlin, Germany, 1900-'02; present position since 1902.

EDGAR SHUGERT INGRAHAM 303 West Seventh Avenue
Assistant Professor of Romance Languages.

A. B., Colgate University 1897; Ph. D., University of Pennsylvania, 1903; Instructor in German, Colgate Academy, 1896-'97; Assistant in Modern Languages, Colgate College, 1897-'99; Student in France, summer of 1897-1898; University scholar in Romance Languages, Columbia University, 1899-1900; Student, University of Freiburg-in-Baden, summer semester 1900; Student at Sorbonne, Paris, 1900-01; University Scholar in Romance Languages, Columbia University, 1901-02; Instructor in Modern Languages, Blake School, New York City, 1901-'02; Harrison Fellow in Romanic Languages, University of Pennsylvania, 1902-'03; present position since 1903.

***MERRITT FINLEY MILLER** 1526 Worthington Street
Assistant Professor of Agronomy.

B. Sc., Ohio State University, 1900; M. S. A., Cornell University, 1901; Assistant in Bureau of Soils, United States Department of Agriculture, July 1, 1901, to January 1, 1902; Instructor in Agronomy, Ohio State University, 1902-'03; present position since 1903.

ROBERT F. EARHART 1656 Neil Avenue
Assistant Professor of Physics.

B. Sc., Northwestern University 1893; Ph. D., University of Chicago, 1900; Electrician People's Power Company, Moline, Illinois, 1893-'97; Graduate Student, Johns Hopkins University, 1897-'98; Graduate Student University of Chicago, 1898-'99; Fellow in Physics, University of Chicago, 1899-1900; Instructor in Physics, Michigan Military Academy, 1900-'01; Instructor in Physics, Rose Polytechnic Institute, 1901-'03; present position since 1903.

JAMES McILVAINE PHILLIPS
Assistant Professor of Veterinary Medicine.

M. D., University of Pennsylvania, 1898; Assistant Physician Municipal Hospital, Philadelphia, 1898-'99; Special Student Metropolitan Asylum Board Hospital, London, 1899; Lecturer on Pathology Starling Medical College, 1900; Assistant Physician, St. Francis Hospital, 1901-'02; present position since 1903.

GEORGE BURRIDGE VILES 229 West Eleventh Avenue
Assistant Professor of Germanic Languages and Literatures.

A. B., Harvard University, 1892; A. M., ibid., 1896; Ph. D., Cornell University, 1902; Student at the Sauveur Summer School of Languages, Exeter, N. H., 1892; Instructor in Modern Languages at the Worcester Polytechnic Institute, Worcester, Mass., 1892-'95; Student at the Sauveur Summer School of Languages, Rockford, Ill., 1893, and in Hanover, Summer of 1895; Instructor in German, Cornell University, 1896-1902; Student of the University of Leipzig and the Academie of Neuchatel, 1902-'03; Instructor in German at Cornell University, 1903-'04; present position since 1904.

WILLIAM C. MILLS 78 West Tenth Avenue
Curator of Archaeology

B. Sc. (H. and F.), Ohio State University, 1898; M. Sc., O. S. U., 1902; Curator and Librarian of the Ohio State Archaeological and Historical Society; Museum and Library, Page Hall, O. S. U.; Librarian Ohio Academy of Science, Library, Page Hall, O. S. U.

MAUDE WINIFRED MARTIN 1634 Neil Avenue
Director of Physical Education for Women.

Ph. B., Cornell University, 1900; Physical Instructor State Reformatory for Girls, Hudson, N. Y., 1901-'02; present position since 1903.

BURT BIDWELL HERRICK 167 Tenth Avenue
Instructor in Cheese Making
Present position since 1898.

WILLIAM HENRY RENCK 184 West Frambes Avenue
Instructor in Pattern Making and Founding

Assistant in Industrial Arts and Foreman of the Carpenter and Pattern Shops, O. S. U., 1899; present position since 1900.

CHARLES PHILIP CROWE Corner Eighth and Wesley Avenues
Instructor in Forging

Student, Ohio Business College, Delaware, Ohio; Lebanon Normal School, Lebanon, Ohio; Teacher in Public Schools of Delaware and Union Counties, two years; Forge shop experience, seven years; Manufacturer of Steel Forgings and Springs, six years; Assistant in Industrial Arts and Forge Master, O. S. U., 1899; present position since 1900.

*Resigned.

ARTHUR ERNEST DAVIES 93 Fifteenth Avenue
Instructor in Philosophy

Student in Owen's College, Manchester, England, and University College, London, 1884-'88; B. D., Yale Divinity School, 1891; Ph. D., Yale University, 1898; present position since 1900.

†ALBERT EARL VINSON 134 West Ninth Avenue
Instructor in Agricultural Chemistry

B. Sc., Ohio State University, 1901; Instructor in Chemistry, Y. M. C. A., Dayton, Ohio, 1895; Assistant in Agricultural Chemistry, Ohio State University, 1896-1901; present position since 1901.

THOMAS KENYON LEWIS 96 East Eighth Avenue
Instructor in Drawing

B. Sc., Ohio State University, 1894; Graduate Student, Ohio State University, 1894-'95; summer of 1897 and summer of 1898 at Cincinnati Art Academy; Assistant in Drawing, 1894-1901; present position since 1901.

SILAS MARTIN 317 Fifteenth Avenue
Instructor in Drawing

Studied Art with J. H. Witt, E. F. Andrews and Homier; Private Teacher in Art for twenty years; Assistant in Drawing, 1899-1901; present position since 1901.

JOSEPH HENRY VOSSKUEHLER 54 West Tenth Avenue
Instructor in Drawing

M. E., Ohio State University, 1900; Assistant in Drawing Department two years preceding graduation; Draftsman Stilwell-Bierce-Smith-Valle Co., Dayton, Ohio, 1891-1900; Head of the Department of Drawing and Instructor in Mathematics, Miller Manual Labor School, Virginia, 1900-'01; present position since 1901.

ALBERT VICTOR BLEININGER 116 West Ninth Avenue
Instructor in Ceramics

B. S. (Chemistry), 1901; Akron Paving Brick Co., 1890-'92; Cleveland Vitrified Pressed Brick Co., 1892-'95; Correspondent of "The Clay Worker," in Germany, 1895; Laboratory Assistant in Ceramics, 1898-99; Ohio Mining and Manufacturing Co., Shawnee, Ohio, summers 1898 and 1899; Editor American Ceramics Society's Translation of Seger's Gesammelte Schriften, 1900-'02; Assistant on Ohio Geological Survey, 1900 and 1901; present position since 1901.

BERTHOLD AUGUST EISENLOHR 377 King Avenue
Instructor in Germanic Languages

B. Ph., Ohio State University, 1898; Teacher of German and Physics, Portsmouth (Ohio) High School, 1892-'96; Assistant in German, Ohio State University, 1896-'97; Instructor in Columbus Latin School, 1897-'98; Instructor in Germanic Languages, Indiana University, 1900-'01; present position since 1901.

SAMUEL EUGENE RASOR 1594 Neil Avenue
Instructor in Mathematics

B. Sc., Ohio State University, 1898; M. A., Ohio State University, 1902; Fellow in Mathematics, Ohio State University, 1898-'99; Professor of Mathematics, Amity College, Iowa, 1899-1900; present position since 1901.

EDWARD EVERETT SOMMERMEIR 1590 Neil Avenue
Instructor in Metallurgy and Mineralogy

G. Ph., Ohio State University, 1898; Student Laboratory Assistant in Chemistry, 1897-'98; Assistant in Metallurgy and Mineralogy, 1898-1901; Chemical Assistant, Ohio Geological Survey since 1901; present position since 1901.

DON CARLOS HUDDLESON 450 West Seventh Avenue
Instructor in Physical Education

G. Ph., Ohio State University, 1897; Medical Student, 1897; Summer School of Physical Training, Chautauqua, 1898; Assistant in Gymnasium, 1898-1901; present position since 1901.

‡FRANK RUHLEN University Grounds
Instructor in Zootechny

B. Sc., Ohio State University, 1896; Assistant in Agriculture, Ohio State University, 1898-1902; present position since 1902.

†Absent on leave.

‡Resigned.

- DELBERT ALONZO CROWNER**.....West Jefferson, Ohio
Instructor in Butter Making
- B. Sc., Ohio State University, 1896; present position since 1902.
- MELVIN DRESBACH** 377 West King Avenue
Instructor in Anatomy and Physiology
- B. Sc., Ohio State University, 1897; M. Sc., Ohio State University, 1899; Assistant in Anatomy and Physiology, 1899-1902; M. D., Ohio Medical University, 1903; present position since 1902.
- RUDOLPH HIRSCH**.....1060 South Front Street
Instructor in Agricultural Chemistry
- B. Sc., Ohio State University, 1901; Assistant in Agricultural Chemistry, 1901-'02; present position since 1902.
- EDGAR HOLMES McNEAL**.....1340 Highland Street
Instructor in European History
- A. B., University of Chicago, 1896; Ph. D., University of Chicago, 1902; present position since 1902.
- H. DIEDRICH BRUNING** 768 Oak Street
Instructor in Civil Engineering
- C. E., Ohio State University, 1896; on re-survey C. & M. Ry., 1896-'97; in Street and Sewer Department, City of Columbus, 1897; Assistant on Engineering Corps P., C., C. & St. L. Ry., 1897-1900; Assistant Engineer P., C., C. & St. L. Ry., 1900-'03; present position since 1903.
- JOHN SATTERLEE TIDBALL**.....35 Price Street
Instructor in Architecture and Drawing.
- B. S., Cornell University, 1880; Student, Art Students' League, New York City; Assistant in Architecture and Drawing, Ohio State University, 1902-'03; present position since 1903.
- HENRY RUSSELL SPENCER** 1473 Neil Avenue
Instructor in American History and Political Science.
- A. B., Colby College, 1899; A. M., Columbia University, 1901; Instructor, Coburn Classical Institute, 1899-1900; Graduate student, Columbia University, 1900-1903; Fellow in American History, Columbia University, 1902-1903; present position since 1903.
- HARRIET TOWNSHEND**.....53 West Eleventh Avenue
Assistant in Library
- Present position since September, 1895.
- MAUD DOROTHY JEFFREY**.....1251 Neil Avenue
Assistant in Library
- B. Ph., Ohio State University, 1895; Student of Library Science, Ohio State University, 1895-'96; Student of Library Science, Amherst, summer of 1897; present position since September, 1896.
- GERTRUDE STOWELL KELLCOTT** 156 West Sixth Avenue
Assistant in Library
- Student, Ohio State University, 1883-'95; Student of Library Science, Ohio State University, 1895-'96; Student of Library Science, Amherst, summer of 1897; present position since September, 1896.
- †**CLAUDE B. GUITTARD** 80 McMillen Avenue
Assistant in Library
- Student in Ohio State University, 1892-'96; Assistant in Ohio State Library, 1897-'98; Student in Library Science, Washington, D. C., summer of 1899; present position since November, 1898.
- †**WILLIAM L. DAVIES** 47 West Eighth Avenue
Assistant in Civil Engineering
- SARAH TRACY BARROWS**.....85 West Tenth Avenue
Assistant in Germanic Languages and Literatures.
- B. L., Iowa State College, 1891; M. L., Cornell University, 1893; Student in the Lehrerinnen Seminar, Hanover, Germany, 1896-'97; Teacher of German, Columbus North High School, 1897-1903; present position since 1901.

†Resigned.

- MARION WILSON MUMMA**.....47 West Tenth Avenue
Assistant in Chemistry
B. Sc., Ohio State University, 1901; Teacher of Science, High School, New Philadelphia, Ohio, 1901-'02; present position since 1902.
- LOUIS BRYANT TUCKERMAN, JR.**.....1451 Worthington Street
Assistant in Physics.
A. B., Adelbert College, 1901; Scholar in Physics, University of Nebraska, 1901-'02; present position since 1902.
- EDWARD NATHAN WEBB**.....144 West Ninth Avenue
Assistant in Chemistry
B. Sc., Ohio State University, 1902; M. A., Ohio State University, 1904.
- HERMINE DE NAGY** 1346 Highland Street
Assistant in Romance Languages.
- MARTHA HARTFORD** 65 West Eleventh Avenue
Assistant in Library
B. Ph., Ohio State University, 1902; Student in Library Science, Ohio State University, 1901-'02; present position since 1902.
- RAYMOND JESSE SEYMOUR**.....76 West Third Avenue
Assistant in Anatomy and Physiology
B. Sc., Ohio State University, 1900; M. Sc., Tufts College, 1901; present position since 1902.
- BENJAMIN FRANKLIN MAAG** 176 West Ninth Avenue
Assistant in Astronomy
B. Ph., Wooster University, 1893; M. Sc., Ohio State University, 1899; Teacher in High School, 1894-'97, 1900-'02; Fellow in Astronomy, Ohio State University, 1898-'99; present position since 1902.
- OTTO EMERY JENNINGS** University Grounds
Assistant in Botany
- CATHERINE EMILY ANDREWS** 1013 East Broad Street
Assistant in Chemistry.
B. A., Wellesley College, 1901; M. A., Ohio State University, 1903.
- ROSS C. PURDY**245 West Eleventh Avenue
Assistant in Ceramics.
N. B. M. A., Scholarship; Assistant Superintendent of Mosaic Tile Co., Zanesville, Ohio, 1899-1901; Chemist and Foreman of Glazing and Burning Departments of The Roseville Pottery Co., Zanesville, Ohio, 1901-1902; Superintendent of The Buckeye Pottery Co., Macomb, Illinois, 1902; Private Assistant to Professor Orton, Jr., 1903-1904; present position since 1903.
- †WALTER RAYMOND JUDSON** 1550 Neil Avenue
Assistant in Mechanical Engineering.
- WALLACE ELDEN MILLER**468 Goodale Street
Temporary Assistant in Economics and Sociology.
A. B., Ohio Wesleyan University, 1897; A. M., Columbia University 1902; Graduate Student, Columbia University, 1897-'98; Assistant Principal Bethel High School, 1898-'99; Professor of History and Sociology, Southwest Kansas College, 1899-1901; President's scholar in Sociology, Columbia University, and resident at the University Settlement, New York, 1901-'02; student at University of Paris, 1902-'03; Head-Resident, Godman Guild (a social Settlement) Columbus, 1903-'04.
- LLOYD A. GRIGSBY** 1023 Neil Avenue
Temporary Assistant in Latin.
A. B. Kenyon, 1901; Assistant in DeKoven Hall, Tacoma, Washington, 1901-'02.
- ROY EDWIN CARTZDAFNER** 239 West Tenth Avenue
Assistant in Mechanical Engineering.
- HARLAN H. YORK** University Grounds
Assistant in Botany.

†Resigned.

- CYRUS ALAN MELICK 967 Say Avenue
Assistant in Civil Engineering.
- E. F. MANGOLD
Assistant in Dairy Laboratory.
- MARY MALLOY 1546 Highland Street
Fellow in Rhetoric and English Language
B. Ph., Ohio State University, 1901.
- JAMES GLOSSBRENNER SANDERS 128 West Tenth Avenue
Fellow in Zoology and Entomology.
Ph. B. Otterbein University, 1901; M. A. Ohio State University, 1903.
- GILBERT LEE PENNOCK 164 West Ninth Avenue
Fellow in Rhetoric and English Language.
B. A., Antioch College, 1902; M. A., Ohio State University, 1904.
- FREDERICK JOHN MUIRIE 1478 Pennsylvania Avenue
Fellow in Rhetoric.
B. A., Ohio State University, 1902.
- JAMES ANDERSON BEER 43 East Ninth Avenue
Fellow in Anatomy and Physiology.
B. Sc., Ohio State University, 1903.
- CLINTON GEORGE STEWART 169 West Eleventh Avenue
Fellow in Chemistry.
B. A., University of Michigan, 1897.
- JOHN ANDERSON WILKINSON 132 Tenth Avenue
Fellow in Chemistry.
B. Sc., Ohio State University 1903.
- CHARLES CLIFFORD HUNTINGTON 85 West Ninth Avenue
Fellow in Economics and Sociology.
B. Sc., Antioch College, 1896; B. Ph., Ohio State University, 1903.
- MAX DELOS MORTON 212 West Tenth Avenue
Fellow in Library.
B. Ph., Ohio State University, 1903.
- MAX WITHROW MORSE 161 West Eleventh Avenue
Fellow in Zoology and Entomology.
B. Sc., Ohio State University, 1903; M. A., *ibid.*, 1904.

CHANGES IN TITLES**1904-1905**

SEPTIMUS SISSON,	Professor of Veterinary Medicine Professor of Comparative Anatomy
JOSEPH V. DENNEY,	Professor of Rhetoric and English Language Professor of English
ALLEN C. BARROWS,	Professor of English Literature Professor of English
CHARLES B. MORREY,	Associate Professor of Bacteriology Professor of Bacteriology
JOSEPH R. TAYLOR,	Associate Professor of English Literature Associate Professor of English
DAVID R. MAJOR,	Associate Professor of Education Professor of Education
JAMES E. HAGERTY,	Assistant Professor of Economics and Sociology Professor of Economics and Sociology
WILLIAM L. GRAVES,	Assistant Professor of Rhetoric and English Language Assistant Professor of English
GEORGE H. MCKNIGHT,	Assistant Professor of Rhetoric and English Language Assistant Professor of English
MERRITT F. MILLER,	Instructor in Agronomy Professor of Agronomy
HENRY DIETRICH BRUNING,	Instructor in Civil Engineering Assistant Professor of Civil Engineering
THOMAS K. LEWIS,	Instructor in Architecture and Drawing Assistant Professor of Architecture and Drawing
JOSEPH H. VOSKUEHLER,	Instructor in Architecture and Drawing Assistant Professor of Architecture and Drawing
MARY MALLOY,	Fellow in Rhetoric and English Language Fellow in English

CHANGES 1904-1905,

RESIGNED

Professor Thomas F. Hunt, Professor Christopher P. Linhart, Associate Professor Clara Maud Berryman, Associate Professor Theodore C. Smith, Associate Professor Cornelia P. Souther, Assistant Professor Thomas H. Dickinson, Assistant Professor Merritt F. Miller, Instructor Frank Ruhlen, Assistant Claude B. Guittard, Assistant W. R. Judson, Assistant Otto E. Jennings, Assistant W. L. Davies, Assistant Roy S. King, Fellow Frank H. Meisse, Fellow John C. Cone.

APPOINTMENTS.

- GILBERT H. STEWART.....
Professor of Law.
- ARTHUR GILLETT M'CALL.....
Assistant Professor of Agronomy.
- ROY S. KING.....
Assistant in Mechanical Engineering.
- CYRUS ALAN MELICK.....
Assistant in Civil Engineering.
- THURMAN WELFORD HOLLOWAY.....
Assistant in Mechanical Engineering.
- H. A. GLEASON.....
Fellow in Botany.
- MARY M'KINLEY.....
Fellow in Botany.
- CLARENCE C. VOGT.....
Fellow in Chemistry.
- JOHN SCOTT RIDDILE
Fellow in Electrical Engineering.
- MIMA J. WEAVER.....
Fellow in English.
- GERTRUDE S. JACKSON.....
Fellow in English.
- FRANK M. SURFACE.....
Fellow in Zoology an Entomology.

Standing Committees of the General Faculty

Committee on Advanced Standing.

PROFESSOR ORTON, *Chairman*,
PROFESSOR BOWNOCKER,
PROFESSOR SMITH,
PROFESSOR PAGE,
PROFESSOR KAUFFMAN,
PROFESSOR SISSON,

Committee on Amusements and Receptions:

PROFESSOR SMITH, *Chairman*,
PROFESSOR COLE,
PROFESSOR CALDWELL,
PRESIDENT THOMPSON.

Appointment Committee:

PRESIDENT THOMPSON, *Chairman*,
PROFESSOR KNIGHT,
PROFESSOR SMITH,
PROFESSOR MCPHERSON,
PROFESSOR MAJOR,
PROFESSOR THOMAS,
PROFESSOR DENNEY.

Athletic Board:

PROFESSOR BLEILE (for three years),
PROFESSOR KAUFFMAN (for two years),
PROFESSOR THOMAS (for one year),

Committee on Time Schedule:

PRESIDENT THOMPSON, *Chairman*,
ASSISTANT PROFESSOR KUHN,
INSTRUCTOR LEWIS.

Committee on Commencement:

PROFESSOR PAGE, *Chairman*,
PROFESSOR MORREY,
ASSISTANT PROFESSOR TAYLOR.
PRESIDENT THOMPSON.

Debate and Oratory Council:

PROFESSOR DENNEY,
PROFESSOR KNIGHT,
PROFESSOR HAGERTY,
PROFESSOR SCOTT,
PROFESSOR ———.

Committee on Diplomas:

PROFESSOR BRADFORD.

CATALOGUE

High School Committee:

PRESIDENT THOMPSON, *Chairman*,
PROFESSOR DENNEY,
PROFESSOR N. W. LORD,
PROFESSOR KNIGHT,
PROFESSOR MAJOR,

PROFESSOR MCPHERSON,
PROFESSOR CALDWELL,
MR. W. W. BOYD, High School Visitor.

Library Council:

PRESIDENT THOMPSON, *Chairman*,
PROFESSOR PRICE,
PROFESSOR DENNEY,
PROFESSOR ORTON,
PROFESSOR ————,
PROFESSOR KAUFFMAN,

PROFESSOR COLE.

THE UNIVERSITY

OHIO STATE UNIVERSITY

LOCATION.

The University is situated within the corporate limits of the City of Columbus, two miles north of the Union Depot and about three miles from the State Capitol. The University grounds consist of three hundred and forty-five acres, bounded east and west by High street and the Olentangy river, respectively. The western portion, about 235 acres, is devoted to agricultural and horticultural purposes, and is under the management of the College of Agriculture and Domestic Science. The eastern portion is occupied by the principal University buildings, campus, athletic and drill grounds, a park-like meadow and a few acres of primitive forest.

The grounds are laid out with care, ornamented with trees, shrubs and flower beds; and are so managed as to illustrate the instruction in Botany, Horticulture, Forestry, Landscape Gardening and Floriculture.

The University may be reached by either the North High street or the Neil avenue electric cars. Those wishing to go to the principal buildings of the University, to the residences on the grounds or the athletic field, should take a High street car going north. Those wishing to visit the Emerson McMillin Observatory, the Veterinary Hospital, Townshend Hall, Horticultural Hall and the Dormitories, will find the Neil avenue cars more convenient.

HISTORY.

The land grant made by the United States under an act approved by President Lincoln, July 2, 1862, provided that there should be granted to each State an amount of public land equal to thirty thousand acres for each Senator and Representative to which the State was entitled by the apportionment of the census of 1860. The proceeds under this act were to constitute a perpetual fund the capital of which was to remain forever undiminished and the interest of the same was to be inviolably applied by each State which should take and claim the benefits of the act to the endowment, support and maintenance of at least one "college where the leading objects shall be, without excluding other scientific and classical studies, and including military tactics, to teach such branches of learning as are related to agriculture and the mechanic arts, in such a manner as the legislatures of the States may respectively prescribe, in order to promote the liberal and practical education of the industrial classes in the several pursuits and professions of life."

Governor Tod, in November, 1862, brought the subject before the State Board of Agriculture and later to the attention of the Legislature. In January, 1864, Hon. Columbus Delano introduced a bill accepting the grant. This became a law February 9, 1864, and pledged the faith of the State to the performance of all the conditions and provisions contained therein. In 1866, an act introduced by Hon. J. T. Brooks, was passed, which provided for the establishment of the Ohio Agricultural and Mechanical College, but the provisions were not carried into effect, and a second act introduced by Hon. R. P. Cannon was passed in 1870 entitled, "An act to establish and maintain an Agricultural and Mechanical College in Ohio." Under the provisions of this act the institution was located in Columbus and the Board proceeded to the organization of the college and the election of a faculty of instruction, and the institution was opened for the reception of students on the seventeenth day of September, 1873.

In 1878 the legislature passed "An act to reorganize and change the name of the Ohio Agricultural and Mechanical College and to repeal certain acts therein mentioned." The act provided that the institution should be thereafter designated as "The Ohio State University." Up to this time but one

appropriation had been made by the State for the support of the institution. With the reorganization came the larger and broader view of the State's relation to public education, and since that time the Ohio State University has shared with other public educational institutions a more generous support by the State.

The governing body of the institution is a Board of Trustees, appointed by the Governor of the State and confirmed by the Senate, for terms of seven years, as provided in the law organizing the University. The original endowment has been supplemented, and the objects of the University promoted, by a permanent annual grant from the United States, under an act of 1890, by special appropriations of the General Assembly; and in 1891, by a permanent annual grant from the State, which grant was doubled by the legislature of 1896. In accordance with the spirit of the law under which it is organized, the University aims to furnish ample facilities for education in the liberal and industrial arts, the sciences and the languages, and for thorough technical and professional study of agriculture, engineering in its various departments, veterinary medicine, pharmacy and law. Through the aid which has been received from the United States and from the State it is enabled to offer its privileges, with a slight charge for incidental expenses, to all persons of either sex who are qualified for admission.

ORGANIZATION.

THE UNIVERSITY EMBRACES SIX COLLEGES.

The College of Agriculture and Domestic Science.

The College of Arts, Philosophy and Science.

The College of Engineering.

The College of Law.

The College of Pharmacy.

The College of Veterinary Medicine.

Both graduate and undergraduate courses are included in all the Colleges of the University.

THE COLLEGE OF AGRICULTURE AND DOMESTIC SCIENCE:

The Four Years' Course in Agriculture.

The Four Years' Course in Horticulture and Forestry.

The Four Years' Course in Domestic Economy.

The Course in Dairying.

The Short Course in Agriculture.

The Short Course in Domestic Economy.

THE COLLEGE OF ARTS, PHILOSOPHY AND SCIENCE:

The Graduate School.

The Undergraduate Department.

THE COLLEGE OF ENGINEERING

The Course in Architecture.

The Course in Ceramics.

The Course in Chemical Engineering.

The Course in Civil Engineering.

The Course in Electrical Engineering.

The Course in Industrial Arts.

The Course in Manual Training.

The Course in Mechanical Engineering.

The Course in Mining Engineering.

The Short Course in Clay Working.

The Short Course in Industrial Arts.

The Short Course in Mining.

THE COLLEGE OF LAW:

The Graduate Course.

The Three Years' Course.

THE COLLEGE OF PHARMACY:

The Four Years' Course in Pharmacy.
The Short Course in Pharmacy.

THE COLLEGE OF VETERINARY MEDICINE:

A Three Years' Course.

Each College is under the direction of its own Faculty, which has power to act in all matters pertaining to the work of the students in that College.

BUILDINGS.

The University has fifteen buildings devoted to instruction, one Boiler House, one Power House, two Dormitories, seven residences and some farm buildings. These buildings represent an investment for construction of about nine hundred thousand dollars. The equipment and apparatus amount to about three hundred thousand dollars. The land now occupied as a site with the farm is valued at one million five hundred thousand dollars. A new building for the Department of Physics is now in process of erection.

UNIVERSITY HALL contains the Executive offices, the office of the Secretary of the Trustees, the assembly room (seating twelve hundred persons), four halls for literary societies, the Y. M. C. A. and Y. W. C. A. room, the Young Woman's League room and class rooms and laboratories for the departments of Economics, English Literature, German, Greek, History, Latin, Mathematics, Pedagogy, Political Science, Philosophy, Physics, Rhetoric and English Language, and Romance Languages. An electric passenger elevator connects all floors.

MECHANICAL HALL contains a room fitted up with cases for the care of models, samples of materials, instruments of precision, etc.; a room for instruction in experimental engineering and mechanism and draughting; and the steam, hydraulic, gas and pneumatic engineering and testing laboratories.

BOTANICAL HALL has on the first floor the lecture room of the Department of Botany. There are also an office, a store room, a dark room, and a private laboratory for Physiological Botany. On the second floor is the botanical museum, the main laboratory and the assistant's laboratory. Connected with this building is a large greenhouse and propagating house.

ELECTRICAL HALL devotes the first floor to the dynamo room. The floor of this room is of asphalt, laid on a solid concrete foundation. On the second floor are a lecture and draughting room, a photometric room, a library room, and office, stock and locker rooms.

CHEMICAL HALL which was occupied by the departments of Chemistry, Mining and Metallurgy and Pharmacy, was destroyed by fire on February 19, 1904.

The funds have been provided to restore this building and a new chemical hall will soon be erected. Meantime the departments of chemistry and metallurgy are located in Townshend Hall, the department of Mining in Brown Hall, and the department of Pharmacy in the new Veterinary Laboratory Building.

ORTON HALL is designed for the permanent accommodation of the large geological collection of the University and for work and instruction in the department of Geology. A portion of it is occupied by the library and reading room. The building is two stories in height, with a high basement, is built of brick and faced with sandstone, and is fireproof throughout. At the right of the main entrance is the geological lecture room and professors' private room; at the left is the University library, reading room and librarian's private room. The central and rear portion is occupied by the geological and paleontological museums. The petrographical laboratory is located on the second floor. In the basement a room is used for work in geographical modeling, the finished models being afterward placed in the collection of such models in a room set apart for the purpose on the second floor. The basement accommodates also the museum of economic geology. A paleontological laboratory or working room is also provided on the second floor.

The greater part of the basement of Orton Hall is occupied as a laboratory by the department of Clay-working and Ceramics. This department is also accommodated with a large room on the first floor for recitation and exhibition purposes. In the rear of Orton Hall is a small brick structure used for the kilns of this department.

HAYES HALL is devoted to instruction in Industrial Arts, Drawing, Mechanical Engineering and Domestic Economy. On the first floor are

two offices, the rooms of the department of Domestic Economy and two lecture rooms, the machine shop, the forge shop and the foundry. On the second floor are the carpenter and pattern shops and six large lecture rooms, with private rooms annexed.

HORTICULTURAL HALL contains recitation rooms and indoor laboratories of the Department of Horticulture and Forestry. An extensive greenhouse is attached.

THE VETERINARY HOSPITAL contains on the first floor a veterinary museum and library, a dispensary and two private rooms for the persons in charge. On the second floor are a class room, a bacteriological laboratory and a microscopical laboratory. The rear extension contains an operating hall and a room provided with stalls, cages, etc., for the care of animals under treatment.

VETERINARY LABORATORY BUILDING—The Veterinary Laboratory, a building with two stories and a basement, is the headquarters of the College of Veterinary Medicine. The building is especially designed for instruction in veterinary medicine and is the largest and finest building of its kind in the Middle States. It is built of buff-colored pressed brick, trimmed with stone and with an imposing entrance of Bedford limestone. The windows are of plate glass; the roof of dark red tile. As the basement of this building is fourteen feet high and provided with large windows it constitutes practically the first floor. It is approached from the rear at the ground level. In planning the building every effort has been made to have its construction conform to the modern ideas of sanitation.

THE EMERSON MCMILLIN OBSERVATORY is the gift of Mr. Emerson McMillin of New York. The first floor is divided by a hall and stairway into two parts. The east wing contains an office, library, clock room and a large, well-lighted room for the students, furnished with tables, where they reduce their observations and keep the records of their work. The west wing contains the transit house, the dome and photographic dark room. The transit house is a light frame structure, so designed as to be kept as free as possible from heat radiated by any heavy walls of masonry. The dome is a wooden frame-work, covered on the outside with canvas. The rest of the building is of pressed brick, the foundation and second story being "rock-faced." During the summer of 1902 the University added to the building a lecture room, comparator room, instrument shop, spectroscopic laboratory, a zenith telescope room and theodolite room.

TOWNSHEND HALL is devoted exclusively to the instruction given in the College of Agriculture.

On the left of the entrance is the office of the Department of Agriculture and a private office, a stenographer's room and fireproof vault. Connected with the office on the south is an assistant's room, opening into a laboratory for advanced students. At the extreme south end of this floor is a large laboratory for student work in soils and farm crops. Connected with this laboratory is a balance room, a store room and an instructor's laboratory. On the west side of the main corridor, and connected with the instructor's room, is a large class room opening into a preparation room with a dark room. This class room is fitted with all appliances for showing lantern slides of live stock, buildings, machinery, etc. On the same side of the corridor, and on the right of the stairway leading to the basement and second floor, are the class room and instructor's room for dairying. On the right of the main entrance is the department reading room. The north end of this floor is occupied by the museum with an attendant's room.

The north end of the high basement is occupied by the dairy department. This consists of a receiving room, a pasteurizing room, a store room a refrigerator room, a lavatory, butter-making room, cheese-making room, two cheese-curing rooms, and an instructor's room.

In the south end of the basement is a live stock room about forty feet square. One-third of this room is occupied by raised seats, the remaining floor space being used for exhibiting and judging live stock. Connected with this is a room fitted with stalls for the temporary accommodation of live stock when needed for class exercises. The basement also contains soil storage room, bath room, toilet rooms, repair shop, locker rooms, bicycle room and janitor's room. A small detached building will furnish steam and power for the dairy department. Detached from the main building, but connected with the soil storage room by a tramway, is a glass house for the study of soils and the experimental growth of plants.

The north end of the second story contains a large student laboratory for the Department of Agricultural Chemistry, connected with an organic and analysis laboratory, a balance room, a store room and a private laboratory. The lecture room of this department is at the south end of this floor and will seat one hundred and sixty students on raised seats, with a preparation room adjoining. There is also on this floor a class room connecting with preparation room, store room and instructor's room, which is used (temporarily) by the department of Veterinary Medicine. There is also an extra class room, ladies' toilet and locker rooms and a hall for the use of the Townshend Society, designed to seat about two hundred persons.

BIOLOGICAL HALL is designed for the special accommodation of the Departments of Entomology, Zoology, Anatomy and Physiology, and is fully equipped with all the latest and best apparatus for this work. It consists of a basement, in which is done all the work of preparation of subjects for the lecture tables and for the special laboratory work for the advanced students; the first floor, on which are lecture rooms, general and special laboratories and private work rooms for the professor of Entomology and Zoology and his assistants; the second floor, similarly arranged for the work in Anatomy and Physiology; and a large wing, in which is the museum and a large lecture room. The building is fireproof throughout, and in design and general appearance is one of the most attractive on the campus.

THE GYMNASIUM AND ARMORY was first occupied in January, 1898. The drill hall and gymnasium floor is eighty feet wide by one hundred and fifty feet long. The roof is carried on curved steel arches, lighted from a clear story at the top. There is a running track around the entire room about twelve feet from the floor, back of which is a visitors' gallery seating about seven hundred persons. At the northwest corner of the floor is a stairway leading down to the men's locker and dressing room, while the young women go down a similar way at the southeast corner to their rooms. On the level with the main floor, near the main entrance at the south, is a large room for the use of the Commandant and his classes and rooms for the Director of the Gymnasium. Above the Commandant's room is the room for the officers of the University Cadet Corps.

The basement is very high and well lighted. On the young men's side are dressing and locker rooms, the bath room with shower and plunge baths, a bicycle room, a lecture room, the cannon room, the band room, and a large room.

PAGE HALL, occupied by the College of Law, is a handsome building of buff Bedford limestone and gray speckled brick, the main front being adorned with four Ionic columns about three feet in diameter and twenty-six feet high. The basement rooms are intended to be used as class rooms when the demands of the college require additional space. The first story is utilized for class and lecture rooms, seven in number, with seating accommodations for five hundred students, and for the offices of the dean, the secretary and the faculty.

Through the large central hallway a double staircase leads to the second floor, which provides two large reading rooms, lighted from above. Between the two reading rooms is a fireproof room for the book stacks, which are designed ultimately to give shelving space to 50,000 volumes.

A separate reading room for graduate students and a conversation room are provided on this floor.

Brown Hall is devoted to Civil Engineering and Architecture and Drawing. The offices of the dean and the secretary of the College of Engineering are also located there. The building is two stories high, with basement above grade line. It consists of a main structure with a frontage of 217 feet and two short wings in the rear. It has been designed and constructed with a view to adding a third wing and considerably extending the two present wings.

The Department of Civil Engineering occupies the eastern part of the building. Their space includes four offices, three commodious lecture rooms, three large drawing rooms, a room for special drawing work, a room for thesis work, charts, library, etc., a well equipped cement laboratory, an instrument room, and a room for camp storage and workshop purposes.

The Department of Architecture and Drawing occupies the western part of the building. They are provided with three offices, three lecture rooms, six drawing rooms, all of large size, two photographic work rooms, one large dark room, a blue print room, with electric light for printing and another for washing and drying prints, and an architectural laboratory.

The Department of Mining Engineering occupies temporary quarters in this building until the completion of the School of Mines building now authorized.

THE NORTH DORMITORY is situated at the northern limit of Neil avenue, and fronts Eleventh avenue. It is at the terminus of the Neil avenue electric car line. It is a plain structure of brick, and affords accommodation for sixty-four students.

THE SOUTH DORMITORY stands near Neil avenue within a few rods of the North Dormitory. It is also built of brick, and contains rooms for twenty students.

RESIDENCES. There are eight dwelling houses upon the University campus. Five of these are brick and two are frame structures. One is occupied by the President of the University, five by professors, and the eighth is the farm house.

LABORATORIES AND EQUIPMENT.

AGRICULTURE.

The equipment of this department may be divided along three general lines—The Plant, The Museum and the Illustrative Materials.

THE PLANT. This consists of a farm of about two hundred acres, a general farm barn, a horse barn and several small buildings. The farm lies along the Olentangy river, and includes both first and second bottom land. On this farm are grown general farm crops in the rotation deemed best suited to the circumstances of the department. At present a few experiments are conducted, the general idea being to conduct such experiments as will have the largest instructional value to the students who attend the College of Agriculture. The Ohio Agricultural Experiment Station continues to conduct here the elaborate fertilizer experiments with wheat, corn and oats, which it has been making on this farm during the past five years. Different species and varieties of farm crops are grown to some extent for the purpose of class illustration and instruction, and it is expected to enlarge this feature.

Specimens of the draft, coach and roadster type of horse are kept and used in the farm work. The department manages a milk dairy, having a herd of about forty cows, composed of pure bred and grade Jerseys and Shorthorns.

The general farm barn contains a well arranged stable for forty cows, with underground drainage and sewage cistern, a milk cooling room, a silo, a roof cellar, a workshop, with room for hay, grain and other foodstuffs.

THE MUSEUM. This contains a large number of samples of farm products in various forms and their by-products, such as soils, grains, grasses, wools, cotton, forage plants and foodstuffs. Milling and other processes are illustrated by samples of the various products of manufacture.

The Museum contains Auzoux models, samples of tools and a considerable miscellaneous collection. The collections are intended primarily for student use and not for display.

ILLUSTRATIVE MATERIALS. These consist of charts, pictures and lantern slides showing results of experiments, representative and noted specimens of live stock, farm machinery, fences, buildings, etc. The department has and uses constantly in the class room a Beseler double oxygen-ether stereopticon. The collection of several hundred lantern slides for this purpose is constantly receiving additions..

THE AGRICULTURAL LIBRARY. While not considered as belonging specifically to this department, there is in the general library a fairly good collection of books and periodicals devoted to agriculture, a large use of which is required of the student.

THE LABORATORY OF SOIL PHYSICS is located on the second floor of Horticultural Hall, and is supplied with apparatus for the mechanical analysis of soils and for testing their physical properties. (See also **BUILDINGS—Townshend Hall.**)

ARCHITECTURE AND DRAWING.

The architectural, mechanical drawing and photographic work of the Department occupies the west half of Brown Hall, consisting of two architectural drawing and designing rooms, four mechanical drafting rooms, three lecture rooms provided with projection lanterns, one photographic laboratory, one photographic darkroom with forty-three developing compartments and two blue-print rooms, one of which is equipped with an Elliott electric light frame.

The freehand drawing, pen drawing, painting and clay modeling work is located in Hayes Hall, consisting of one large studio for drawing, one large studio for oil and water color painting and one studio for clay modeling.

The equipment consists of: For architecture, drawing tables, models of ornamental and constructional forms, photographs, lantern slides, portfolios of plates and instruments for experimental work in heating and ventilating; for mechanical drawing, drawing tables, models and a well selected collection of shop drawing illustrating the best modern office practice; for photography, a well equipped dark room arranged for forty-three persons, a laboratory equipped with printing apparatus, toning table, mounting table, copying cameras, ten view cameras, long and short focal length lenses, shutters and an excellent outfit for photo-micrography; for freehand drawing and painting, easels and drawing tables, a collection of representative work, wooden models, plaster casts and material for still life; for clay modeling, modeling stands, casting table, moisture box, modeling tools and apparatus for making gelatine molds.

In addition to the above the library contains a good collection of books relating to the work of the department.

ASTRONOMY.

The equipment consists of a twelve-inch equatorial telescope, mounting by Messrs. Warner & Swasey, objective by Mr. Brashear, with a large and powerful spectroscope by Mr. Brashear. This instrument is adapted to use either one or two prisms or a grating, and is provided with a double set of objectives, one corrected for the visual and one for the photographic rays; a position micrometer with a seven-inch circle by Messrs. Warner & Swasey; a combined zenith telescope and transit instrument of three inches clear aperture by Mr. G. N. Saegmuller; a sidereal clock by Clemens Riefler, of Munich; a comparator by Carl Zeiss; a four-inch portable equatorial by Alvan Clark; a chronograph by Warner & Swasey; sextants, chronometers, meteorological instruments; a zenith telescope, theodolite with twelve-inch horizontal and vertical circles and two smaller theodolites by Houghton & Simms.

The equipment of the spectroscopic laboratory consists of a five-inch concave grating, with Rowland's form of mounting by Brashear, a large spectrometer, two comparators, one by Zeiss and one by Gartner, a heliostat by Gaertner, donated to the observatory by Mr. J. F. Stone, a 110-volt storage battery, gas engine, dynamo and large induction coil. In addition to the above, Mr. McMillin's gift provides for an excellent astronomical library.

BACTERIOLOGY.

The Department of Bacteriology occupies a portion of the new Veterinary Laboratory Building. There is a laboratory on the second floor accommodating about thirty students, another in the basement with places for fifteen men, a private laboratory and office, a room for experimental animals in the attic, one for inoculated animals in the basement, and two incubator rooms. These rooms are each equipped with the necessary incubators, hot air and steam sterilizers, autoclaves, microscopes, microtomes, etc., for instruction, with facilities for advanced and original work. The furnishings are of the latest and best type, so that not only elementary teaching but also research may be carried on under the most favorable circumstances.

BOTANY.

The general Botanical Laboratory occupies a part of the second floor of Botanical Hall. It is 23x33 feet, and is furnished with both movable and fixed tables. The latter are attached to the west and south walls near windows, suitably shaded. Water, gas and an evaporating hood are also provided. The laboratory is equipped with compound microscopes of the Baush and Lomb, the Leitz and other patterns; and accompanying each is a tray of tools and a case of reagents. There are more than fifty dissecting microscopes; also charts and several minor pieces of apparatus for experiments in vegetable physiology. Three smaller rooms are also provided as laboratories for special work, as well as a dark room for photography. Other facilities for the illustration of the courses in botany, and for practical training in the same, are: A general herbarium, including flowering plants, ferns, mosses, fungi and algae; a state herbarium, a collection of fruits and seeds, valuable timbers,

woods, grasses and various economic products of the vegetable kingdom; ornamental grounds and woodland, planted with a large variety of evergreen and deciduous trees and shrubs; and a greenhouse with a fair collection of native and exotic plants. (See also MUSEUM—*The Botanical Museum*; and BUILDINGS—*Botanical Hall*.)

CHEMISTRY.

The laboratories of the department accommodate six hundred students. Each laboratory is equipped with all the necessary conveniences—water, gas, electric lights, distilled water piped from a large still in the attic, steam ovens, automatic air blasts, suction pumps, etc. The department is liberally supplied with the best apparatus and materials for both lecture room and laboratory work. Each student has his own desk with drawers and locker. All supplies are procured from the chemical store room, which has always on hand a complete stock of all necessary materials.

CIVIL ENGINEERING.

The facilities provided for the illustration of the courses in civil engineering and for practical training are as follows: One high grade and three ordinary transits, four leveling instruments, solar compass, prismatic compass, improved telescope compass, Abney hand level, level and stadia rods, sight poles, chains, tapes; twenty-six improved drawing tables with 30x36 inch top; Schroeder's models in stereotomy of roof trusses; large set of models of wooden joints; collection of photographs of bridges, both when finished and in course of erection; collections of strain sheets and shop drawings of bridges; new improved cement testing machines and outfit for making all kinds of cement tests; stone mason tools for working models out of plaster blocks; magic lantern and slides; collections of samples of building materials; calculating machines; sets of drawing instruments; blue print room with outfit; sets of tracings of standard structures, from which each student may make a set of blue prints. The equipment is growing each year by the addition of materials purchased, presented or made by students of the department.

CLAY-WORKING AND CERAMICS.

The University was the first and for some time the only institution in the United States offering facilities for the study of clays, clay-working, and the chemical technology of the ceramic art. In the last two years other institutions have entered this field. The facilities of the department comprise: 1st. A convenient chemical laboratory, specially designed and equipped for the analysis and decomposition of silicates. Provision has been made for the use of hydrofluoric acid with safety, and the platinum ware has been made to order with this purpose in view. 2d. A complete mechanical outfit for the preparation of clays for pottery manufacture and the production of the ware itself, of any grade, from earthen wares to porcelain. The machinery is of the latest type and comprises all important varieties in use for grinding, tempering, washing, filtering and molding. 3d. A similar plant for the manufacture of brick, tiles, pipes and hollow goods. The machinery here is of full size and samples up to a ton in weight can be received and transformed into the finished article by any or all of the standard methods in commercial use. The power for this purpose is derived from a fine electric motor, driven from the University power plant. 4th. A kiln house, equipped with a kiln in which several hundred bricks, or an equivalent quantity of sewer pipe, stoneware or pottery can be burned. The fuel is intended to be coke, except in special cases where the fuel available for burning clay wares is to be made the subject of test. There is also provided a crucible melting furnace and a muffle furnace for testing glazes. A muffle kiln of large size for burning pottery, glazed ware and decorated wares has also been provided. 5th. A ceramic museum, containing a fine collection of American pottery and clay products of every class, is in process of installation. 6th. A library of the best literature on the subject, mainly German, but containing a few English and French works, and the trade periodicals. (See also BUILDINGS—*Orton Hall*.)

The facilities of the department for study in the field of cement and mortar materials comprise, in addition to the foregoing plant, much of which is especially well-suited to this purpose, the following special apparatus: 1st. An improved dry-ball mill, of chilled iron, for grinding the raw material together,

and for grinding the cement clinker. 2d. A small cupola, fired with coke and using air blast, for the vitrification of the refractory silicates used. 3d. A specially constructed flat-hearth furnace lined with magnesite and fired with oil and compressed air, for burning cement where the process needs to be interrupted frequently to determine how far vitrification has progressed. 4th. Access to the complete and well-appointed cement testing laboratory of the Department of Civil Engineering.

These facilities permit the department to offer exceptional opportunities to any who wish to specialize in this important field of manufacture. (See also BUILDINGS—*Orton Hall*.)

DOMESTIC ECONOMY.

The Department of Domestic Economy (for young women) will secure for the course all that experience and observation may suggest. At present it has a large kitchen, with dining room adjoining, each fitted with the latest and best appliances for the work undertaken. About a thousand dollars has been expended to make this department entirely practical, and to permit its instruction to be thorough and scientific.

ECONOMICS AND SOCIOLOGY.

The University, through the efforts and generosity of its friends, is possessed of a unique equipment for study purposes in these lines. This equipment comprises a large collection of railroad, municipal and school bonds; of stocks of all kinds; of letters of credit, drafts, foreign bills of exchange, bills of lading, checks, enclosures, statements, insurance policies, trust certificates, notes, mortgages and all the necessary forms of business paper; also collections of coins illustrative of various periods in our monetary history, foreign coins and scrip; also sets of maps and charts and a Kiepert-Commercial Globe 80 cent. in diameter. Ample facilities for statistical work are provided and a seminary room set apart for the use of laboratory material, documents, etc., is always open to advanced students. It is the policy of the department to make the statistical investigations and research work of advanced students contributory to the permanent equipment of the department, thus enriching the facilities from year to year with material of scientific and pedagogical value.

ELECTRICAL ENGINEERING.

The Electrical Laboratory affords very good facilities for practical experimental work with dynamo machinery and other electrical apparatus. The dynamo equipment consists of twenty-five machines of various makes and sizes, from 40 horse power down, aggregating over 200 horse power. These include direct and alternating current generators, polyphase motors, arc and incandescent lighting generators, railway and station motors and unipolar dynamo. The latter, with an alternating current generator and a 2-phase motor, were built by the students, it being the policy of the department to build as much of its apparatus as possible. There are also a number of transformers of different makes, including one for welding, built at the University. Arc lamps of different styles, a 10-kilowatt-hour storage battery, condensers and resistances, and magnetic testing apparatus also form part of the equipment. The list of measuring instruments is quite complete, and includes a standard Weston voltmeter and eleven other Weston volt and am-meters, also four Kelvin static voltmeters, five dynamo-meters, one watt-meter, three galvanometers and a dozen other am-meters and voltmeters of different makes. A telephone laboratory, with apparatus for comparative tests, a variety of transmitters and receivers, and lines running to another building, has been in use for two years. Photometry is given at present in the Physical Laboratory, where the equipment in this line is excellent. Power for running the dynamo laboratory is supplied by three induction motors from the University power plant. This latter is a model 2-phase plant, and the electrical part of it has been for the most part installed by the students of the department. The repair and maintenance of this plant is done by the students, who receive compensation for the time so spent.

GEOLOGY.

The University is able to present unusual advantages for the study of geology. By an act of the Legislature it has been put in possession of all the

collections made by the late Geological Survey, and these collections have been supplemented by valuable additions of fossils and minerals from various sources. The State collection embraces a very complete representation of every geological formation shown in Ohio. In its new and ample quarters the department offers exceptionally good opportunities for work in the lithological, petrographical and modeling laboratories. (See also *MUSEUMS—the Geological Museum*; and *BUILDINGS—Orton Hall*.)

HORTICULTURE AND FORESTRY.

Among the facilities provided for the illustration of the courses in horticulture, and for practical training in the same, are: (1) a collection of horticultural tools for budding, grafting, pruning, etc.; (2) an orchard, containing well-selected varieties of the apple, pear, cherry, plum and quince; (3) a small vineyard, containing all the best varieties of the grape; (4) a garden of small fruits, containing all the best varieties of the strawberry, raspberry, blackberry, currant and gooseberry; (5) a vegetable garden with forcing houses, cold frames, experimental plats, conveniences for irrigation, etc.; (6) small nursery and forest tree plantations, with practice rows of budding, grafting, pruning and training; (7) ornamental grounds and woodland, planted with a large variety of evergreen and deciduous trees and shrubs; (8) a greenhouse with a fair collection of native and exotic plants; (9) a collection of preserved natural specimens and models of fruits, seeds, woods, etc.; (10) a laboratory fairly well equipped with balances, charts and other appliances for study and research. (See also *MUSEUMS—the Botanical Museum*; and *BUILDINGS—Horticultural Hall*.)

THE LAKE LABORATORY.

The University maintains a Lake Laboratory at Sandusky during the summer vacation, which is designed to provide opportunity for investigation of the biology of the lake region, and for giving certain courses of instruction in the Departments of Botany, Zoology and Entomology.

A new and commodious laboratory building, capable of accommodating at least one hundred students and investigators, was completed last summer and gives excellent accommodations for the work. It is well provided with tables, dark rooms, aquaria, water and gas. Microscopes and other apparatus are supplied from the University.

Boats, collecting apparatus, dredges, seines, etc., are well supplied, and special attention will be given to the methods of collecting and field work.

For further information write for special circular on Lake Laboratory.

MECHANICAL ENGINEERING.

The greater part of Mechanical Hall is devoted to laboratory purposes.

The South Laboratory is used for applied mechanics and for gas engineering. Here are located the machines for testing the strength and elasticity of engineering materials, and recording their physical properties automatically and autographically. Oils are tested as illuminants and as lubricants. Belts and pulleys are tested for their slippage, friction and horse-power transmitted. The gas engine plant has three engines, representing gas and gasoline, three methods of ignition, and fly ball and inertia governors. The air is supplied by a fan through a large meter. Temperatures and pressures of air, gas and water are measured. The fresh and burnt gases are analyzed and their heating values determined by a calorimeter. The power is measured at both the indicator and the brake. The laboratory machine shop and tool room are in this room.

The North Laboratory is used as a steam engineering and hydraulic laboratory. Four 35-horse-power engines give facilities for testing single and duplex condensing or non-condensing, simple or compound, throttling or automatic cut-off engines, using either a jet or a surface condensor. Pressure and vacuum gauges are calibrated. Indicator springs of five makers are tested, either cold or hot. Five kinds of calorimeters determine the moisture in steam before and after passing three different separators. Injectors are tested for lift, quantity, pressure and steam consumption. Steam pumps of six makes, ranging to 1,200 gallons per minute capacity; two centrifugal and a rotary pump, enable tests of pumps to be made and deliver water at pressures below 150

pounds to two stand-pipes, which in turn supply turbine and cascade and Pelton water wheels, and enable experiments to be made on the flow of water through orifices, pipes, valves, etc. Three cisterns, provided with a variety of weirs up to five feet wide, give practice in measuring flowing water. A Venturi meter and a Pilot tube are also used. Ericsson and Rider hot air engines are tested. A Rife hydraulic engine, a Humphreys ram, Gem and Eureka water motors, and a pulsometer, are included in the hydraulic apparatus, all of which are connected and prepared for complete tests.

A complete set of Westinghouse air-brake apparatus, a blower and a ventilating fan, enable experiments to be performed in the flow of air. They are supplemented by tests of the heating and ventilating plants in the buildings of the campus.

The Robinson experiment boiler gives unexcelled facilities both for laboratory exercises in the use, care and testing of steam boilers, and for the solution of original problems in this branch of engineering practice and research.

In addition to the apparatus and equipment of the power plant of the University the power house at Townshend Hall contains a horizontal, return tubular boiler, two steam engines and an ammonia refrigerating machine, making the facilities on the campus for testing quite complete. Machinery, apparatus and appliances are continually being presented, built or purchased, and the student is given an opportunity to test everything under practical conditions of operation. Besides the laboratory facilities, opportunities frequently arise to test machinery, engines or boilers in the city, and in these tests the students take part.

The buildings of the power plant were completed in 1896, and, with their contents, form a model plant. The boiler room is 38 by 100 feet, and is equipped with five 150 horse power boilers, with Babcock and Wilcox chain grates and Murphy automatic stoker. There are also coal and ash conveyors for the whole plant. At one end of the boiler room is the coal room and at the other the pit for the hot well, from which runs the tunnel (about three-fourths mile in length) to the buildings of the University, carrying heat, gas and water pipes and power, light and other wires.

Near the boiler house is the power house, 40 by 60 feet. The power generating plant consists of a 70 horse power McEwen compound engine, belted to a 60 kilowatt 2-phase Westinghouse alternator, and a 200 horse power Watertown compound, directly connected to a 125 kilowatt 2-phase generator. These occupy the main floor, together with a complete marble switchboard, with ammeters, voltmeters, wattmeters, static ground detectors, etc. A ten-ton traveling crane is available for handling the machinery in this room.

In the basement are condensers, which get their water from a large cooling reservoir at the side of the building. Here are also the transformers that convert the current to be used in the motors scattered over the campus, from 110 volts, at which it is generated, to 400 volts, at which it is transmitted.

There are installed on the campus over eighteen hundred incandescent lamps, twenty-four arc lamps and about 250 horse power in motors. The electric plant is, for the most part, of the Westinghouse system. The buildings are of brick. Nearly all of the University buildings are heated by steam from this plant. The total cost of the plant for generation of power, light and heat, and for its transmission to the buildings, has been something over \$100,000.

In order to facilitate experimental and research work in the direction of combustion of fuels under variable conditions as applied to steam generation, there was installed during the past year in the University boiler house, a most complete experiment boiler outfit. This equipment was furnished by Stillman W. Robinson, Emeritus Professor of Mechanical Engineering, who not only established the Department of Mechanical Engineering at Ohio State University and for many years was at its head, but was the originator of the first mechanical engineering department in this country connected with a state university, that at Champaign, Ill.

A Babcock & Wilcox boiler of 107 horse power, built for a working pressure of 200 pounds, with hand-fired furnace of the oven fire-brick type, is the principle of the system. The products of combustion, after passing the boiler, can be conducted direct to the open air by the chimney or otherwise, or into a Green's fuel economizer, where its 570 square feet of heating surface transfers heat to the feed water on its way to the boiler. The heat of the escaping gases

can still further be absorbed by an air heater having 1,330 square feet of heating surface. The heat thus taken up is transmitted to the air employed in the fuel combustion.

For promoting combustion, natural draft may be employed, or when greater intensity of draft is desired above that produced by the chimney, the latter can be cut out and a Sturtevant induced draft fan, driven by a direct connected engine, brought into action. In combination with either mechanical, induced or natural draft, forced draft produced by a belt-driven Sturtevant fan may be employed, and the air forced into the ash pit may be taken from the boiler room direct, or by a system of underground flues be compelled to pass through the air heater on its way to the fan.

Weighing and collection tanks, in conjunction with a steam pump, supply the boiler with known quantities of water which flows by the way of the economizer or to the boiler direct. In this feed water system is a Hayden's feed water purifier with live steam heater, which may be used in conjunction with the economizer.

Draft intensity and temperatures are determined at many points throughout the system; a Le Chatelier pyrometer being used for high, and mercurial pyrometers for low temperatures.

An Arndt's econometer indicates continuously the percentage of carbon dioxide in the escaping gases, while at the same time the Orsat's apparatus is used for giving absolute composition. The composition of the fuels employed and their calorific values are determined in the Department of Metallurgy.

The plant as a whole admits of many combinations, thereby being able to meet almost every condition in practice.

METALLURGY.

The metallurgical laboratory has all the appliances for the most modern methods of technical analysis as practiced in iron and steel laboratories, including gas analysis. A large room in the basement is fitted for gold and silver assaying, with improved muffle and melting furnaces, sampling apparatus and assay balances.

The lecture room in metallurgy has a projection lantern with a large collection of views of machines, mines and furnaces. There is a photographic room with blue-printing facilities, where students learn to make copies of drawings used in illustrating the lectures.

A collection of minerals and rocks, with a large set of rock sections, is provided for illustrating the mineralogy, as well as sets of blow-pipe apparatus for the students in determinative mineralogy. (See also BUILDINGS—*Chemical Hall*; and MUSEUMS—*The Geological Museum*.)

MINE ENGINEERING.

This department is equipped with all of the latest improved instruments and apparatus used in mine engineering, surveying and the study of mine ventilation. There is a collection of models of mine machinery and supplies, to which additions are being made, which are valuable as illustrations. The draughting room is large, well lighted and provided with a desk for each student, where he is personally taught the making of maps, the platting of actual surface and underground surveys, the making of drawings, tracings and blue-prints. He is also taught proper methods of keeping notes and all records necessary to an efficient engineer's office. The students are given practical experience by making actual surveys of coal mines and in working up their notes complete in all of the necessary details. The students are also taught how to make working drawings, plans, estimates and specifications of mining operations and equipment.

There is a large collection of views of machines, mines and mine equipment for use in the projection lantern in the lecture room. A photographic room with blue-printing facilities is used by the students in making copies of their own drawings and those illustrating the lectures.

PHARMACY.

The Pharmacy Department occupies the west wing, first floor of Chemical Hall.

The apartments consist of a large general laboratory, a smaller laboratory for advanced students, a dispensing room, reading room, lecture room, private laboratory and the office of the Dean.

The main laboratory will accommodate fifty students. Each desk is equipped with a very complete set of apparatus for individual use and special appliances are provided for general use. This laboratory is well provided with hoods, drying closets, steam pans, distilling apparatus, percolating racks, mills, and indeed, everything necessary to conduct the ordinary operations of pharmacy.

The laboratory for advanced work is similarly provided except that the individual sets of apparatus vary according to the line of work being followed, and the apparatus for general use (as, for example, the balances) is of the highest degree of accuracy. This laboratory will accommodate about twenty students.

The dispensing room is a completely equipped and well stocked drug store. The prescription desks are large enough to permit several students to work at one time and a full complement of apparatus for the work of the dispensing counter is provided.

The prescription files are very complete and cover as far as possible the entire range of prescription practice.

In the reading room are kept the books of reference belonging to the department and such other books as may be drawn from the general library of the University for use during special investigation. Here also are to be found the pharmaceutical journals.

The lecture room is well supplied with apparatus and appliances for illustration and experiment. About the walls are arranged cases in which are kept sets of specimens illustrating processes of manufacture, specimens of rare, costly and curious drugs, and of official preparations. Here also is a complete set of specimens of original crude drugs arranged by number only, for practice in the "recognition of drugs." (See also BUILDINGS—*Chemical Hall*.)

Until the new Chemical Hall shall be completed the Department of Pharmacy will occupy rooms in the new Veterinary Building.

PHYSICS.

The department has an excellent equipment of apparatus, to which additions are constantly being made. The apparatus includes a large collection of pieces for illustration of the general lecture room work, but is principally chosen for accurate measurement in the laboratory. A set of standards of length, capacity and mass, sent under the act of Congress supplying such sets to the several agricultural colleges, is in possession of the department. The pieces are copies of the United States standards made by the Coast Survey at Washington.

Among the principal pieces of apparatus are a dividing machine by Fauth & Co.; chronometers by Parkinson & Frodsham and by Negus, the latter a break-circuit; a chronograph by Fauth & Co.; a Hipp's chronoscope; cathetometers by Salleron and by the Geneva Society, the latter an exceptionally fine instrument; Regnault's apparatus for vapor tension, for expansion of gases and for specific heat; Melloni-Tyndall apparatus for radiant heat; standard thermometers by Paudin and others; Rutherford and Rowland, different gratings; Rowland's spectrum photographs; spectroscopes by Brashear, Browning, Apps and others; Duboscq's complete apparatus for projections in polarized light; lanterns for projections by the lime light and the arc light; a variety of sound apparatus from Koenig; portable and quadrant electrometers; Kelvin galvanometers of high and low resistance; Weidemann, Kohlrausch and other galvanometers; standard resistance coils, with Cavendish laboratory certificate; several sets of resistance coils and bridges; a Kew magnetometer; Kelvin standard balances; Weston ammeters and voltmeters; standards of self-induction; standard battery cells; photometric standards and photometers; X-ray apparatus, etc.

Under the laws of Ohio, the professor of physics is *ex officio* State Sealer of Weights and Measures, and all of the standard weights, measures and balances received from the United States government are in the rooms of the department.

PHYSIOLOGY.

The facilities provided for the study of anatomy, histology and physiology are excellent. The laboratory is supplied with skeletons, papier mache manikin and many models, including models of the eye, ear, larynx, etc. The apparatus of the department for work in physiology is of the best and most approved construction, and is adapted to the thorough performance of the fundamental physiological experiments. Myographs, spectrosopes, microscopes and the necessary chemical outfit are also provided. For work in histology the equipment includes twenty-four individual tables for student experiments, each table being supplied with a good microscope, microscopical accessories, microscopical re-agents; and for advanced work the needed apparatus for instruction in the various methods of hardening, staining, imbedding, section-cutting and injection. The laboratory also has excellent microtomes, imbedding baths and other essentials of an histological outfit. The equipment of the laboratory makes it possible to offer a large range of work for the choice of students in advanced courses. (See also BUILDINGS—*Biological Hall*.)

PSYCHOLOGY AND EDUCATION.

The psychological laboratory occupies three rooms on the fourth floor of University Hall, and is reasonably well equipped for work in physiological and experimental psychology and for research in related educational lines. For the study of motor processes and development the most improved form of ergograph with complete sets of myographic, chronographic, dynamometric and pneumatic recording appliances, has been provided. A complete outfit of apparatus for the study of sensation, memory and association makes it possible for students of education to acquire methods of exact observation of the various mental and motor processes involved in school work. Provision also has been made for work in comparative psychology.

SHOPWORK.

The shops occupy the north wing of Hayes Hall and afford excellent facilities for instruction in both the practical details and the underlying principles of carpentry, pattern-making, forging, moulding, foundry work and machine work.

The carpenter and pattern shop is equipped with twenty-five benches with complete sets of carpenter tools for each, and a large number of special tools for general use, twenty-three pattern-maker's turning lathes, with cupboards containing the necessary turning and pattern-making tools under each, an eight-foot pattern-maker's lathe with compound rest, a pony planer, a buzz planer, a circular rip and crosscut saw, a scroll saw, a 36-inch band saw, a trimmer and a power grindstone.

The forge shop is equipped with twenty stationary forges with anvils and tools for each, a heating forge, a portable hand forge, a foot-power hammer, a blacksmith's drill and a punch, shear and bar cutter. The blast for the forges is furnished through underground piping by a 45-inch Buffalo pressure blower, and the smoke is removed by a 55-inch Buffalo exhaust fan, overhead. Both of these fans are driven by a 15 horse power electric motor.

The foundry is equipped with a 24-inch Colliau cupola, the blast for which is furnished by a 30-inch Buffalo blower; two brass furnaces, one 16 inches in diameter and the other 20 inches in diameter; a core oven, benches for iron and brass moulding, core-making and cleaning of castings, a space for floor moulding 30 feet by 40 feet, besides all the necessary moulding tools, flasks, crucibles, ladles, tongs, etc.

The machine shop is driven by a 30 horse power electric motor from above, and is equipped with the following tools: Twenty-eight benches for vise work, with complete sets of tools; eight speed lathes, sixteen engine lathes, a Fox monitor turret lathe, two planers, two shapers, two milling machines, two upright drills, a sensitive drill, grinding machines for both plane and cylindrical surfaces, tool grinders, emery wheels, etc. This machinery is furnished with all the necessary tools, and the tool room is equipped with full sets of drills, taps, dies, milling cutters, standard plugs, gauges, threads, micrometers, and a great variety of special tools. (See also BUILDINGS—*Hayes Hall*.)

VETERINARY MEDICINE.

The Veterinary Hospital affords excellent facilities for the treatment and care of animal patients, and also gives the students the opportunity to become practically familiar with the diseases to which our domesticated animals are subject. It contains box stalls, stall for cold water applications, a large and well lighted operating hall and a special ward for dogs. The front part of the Hospital contains a lecture room, a museum of anatomical and pathological preparations, a drug dispensary and an office. In the museum are skeletons of the horse and ox, a complete manikin of the horse, papier-mache models of various anatomical parts, pathological specimens preserved in alcohol, etc.

In the library are choice collections of works in veterinary medicine and allied sciences and also copies of the leading veterinary periodicals.

The College is well equipped for surgical work. Instruments of the latest and most approved makes are kept in the instrument room for use in operations.

In the daily clinics not only are horses and dogs presented, but also the meat-producing animals from the barn, near the College.

The bacteriological laboratory in the biological department is supplied with apparatus of the most modern and improved construction, the microscopic appliances being adapted to the most accurate work in bacteriology. (See also BUILDINGS—*The Veterinary Laboratory—The Veterinary Hospital—Biological Hall.*)

ZOOLOGY AND ENTOMOLOGY.

Instruction in this department is largely by the laboratory method, with lectures and use of text or reference books, the effort being to lead the student to observe and think for himself. The various courses are intended to provide instruction in the elements of the science, familiarity with methods of study and investigation, and opportunity for special research, involving field, laboratory, museum and library work. The adjacent fields, wood, lake and river; the various well equipped laboratories, extensive collections and libraries furnish excellent opportunities for every phase of the study.

The department occupies the first and third floors of the fine new Biological Hall, providing two lecture rooms, one general and five special laboratories, museums, offices for professor and assistants, besides room for storage, workshops, aquaria, cold-storage, photography, etc. The laboratory equipment includes microscopes, microtomes, incubators, injectors, etc., for most approved methods of work in morphology, embryology and neurology. The collections include a fine series of skeletons, a number of large mammals, series of the birds of Ohio, of the birds of North America, of Ohio fishes, of mollusks and especially rich collection of insects particularly in Odonata, Hemiptera and Diptera. (See also THE MUSEUMS—*The Zoological Museum, Biological Hall.*)

The Lake Laboratory maintained at Sandusky and open during the summer vacation offers courses of instruction and exceptional opportunities for original investigation in a very interesting and delightful locality. (See Lake Laboratory.)

THE MUSEUMS.

THE GEOLOGICAL MUSEUM of the University has been collected and arranged with reference to instruction rather than to display. The basis of it is a large and comprehensive collection of the rocks, fossils and economic minerals of Ohio. The collection embraces the following named series:

(a) An excellent representation of the leading divisions of the geological scale of the State, so far as it can be illustrated by rock specimens. The specimens represent the leading phases of each formation, and in many cases carry the characteristic fossils of the horizons from which they are derived.

(b) A collection of the animal and vegetable fossils of the rocks of Ohio. This series includes a large majority of the described fossils of our formation, and in the number are many type specimens. While all the ages of our geological history are well represented, the collection of the Upper Silurian and Devonian animal fossils is particularly rich and complete. A remarkably fine series of coal plants is also included in the museum. The list of fossils has

been greatly extended in the number of species and individuals by the recent purchase of the collection of Mr. Henry Moores, of Columbus.

(c) The economic minerals of the state are also shown to excellent advantage in the museum. The coals, petroleums, iron ores, clay and building stones produced in Ohio are represented in large collections. Many of the specimens upon which chemical examinations or physical tests have been based in the work of the geological survey of the State are included here.

(d) Petrographical collections: These collections were selected with a view to their use in petrographical instruction, and embrace the Hawes collection, the Krantz collection and the Rosenbusch complete series of typical rock specimens from important centers abroad. These hand specimens are supplemented by two series of thin sections, including Voigt and Hochgesang's collections of typical rocks and of the petrographically important minerals.

In addition to the collections above described, the museum contains a great deal of valuable material in the line of general geology and mineralogy. Among other things it includes several valuable suites of ores and many fine mineral specimens.

There also belong to the museum a number of geological casts, models and maps. In this series are included a relief map of the State of Ohio, and also the models of the basins of the Atlantic ocean and Caribbean sea, prepared under the supervision of the United States Coast and Geodetic Survey.

The catalogue of the museum contains more than 10,000 entries; but as only one number is as a rule given to a fossil or a mineral species, the individual specimens make an aggregate list of many thousands in addition to the catalogue list, and probably double this list.

The skeleton of a mastodon, one of the extinct elephants of Ohio, has recently been presented to the museum by N. S. Conway, of Catawba, O., on whose farm it was found. It has been mounted by Prof. H. A. Ward, of Rochester, N. Y., and proves to be one of the largest in the country.

The museum also has a mounted skeleton of *Megalonyx Jeffersonii*, one of the great ground sloths. This specimen has the distinction of being the first and thus far the only mounted skeleton of this animal in the world. The bones were discovered by Abraham Drushell and others in a swamp in Berlin township, in Holmes county, Ohio, in 1890. They were mounted in Ward's Natural Science Establishment, Rochester, N. Y. The entire outlay involved in the purchase of the bones and in mounting them was borne by Mr. Emerson McMillin, of New York.

THE ZOOLOGICAL MUSEUM is located on the ground floor of the wing of Biological Hall. The foundations of a zoological museum have been laid and the work begun on a generous plan. Every effort is being made to secure and preserve excellent specimens in all groups of animals. Not only the adult animals are preserved but the preparatory stages as well, their work and architecture, in fact all that can illustrate the life-history and habits.

Among special features are the Wheaton collection of birds of Ohio, numbering about 1,000 skins; a collection of North American birds, about 1,500 skins, representing very fully the North American fauna; a number of fine specimens of larger animals, moose, hippopotamus, deer, tiger, pecary, lion, tapir, etc., most of which have been generously donated by Sells Brothers; a collection of about 3,500 molluscan shells; a fine series of Ohio fishes; numerous reptiles, amphibians, etc.

There is an excellent series of skeletons, crania and alcoholic material for courses in comparative anatomy.

The collection of insects is being rapidly enlarged and the purchase of the Kellicott collection of Odonata makes it especially rich in that order.

Professor Osborne's private collection of Hemiptera is deposited in the Department and available to students for comparison and study.

THE BOTANICAL MUSEUM occupies the second floor of Botanical Hall. It contains the general University herbariums, and the State herbarium, over 30,000 mounted sheets, also Professor Kellerman's private herbarium of over 20,000 specimens repositied for use in the Botanical department; a complete collection of the native woods of Ohio; a collection of the seeds and fruits of plants; a collection of native medicinal plants; a general collection of vegetable products, including seeds, textile fabrics, coloring substances, etc., illustrating economic or applied botany.

THE AGRICULTURAL MUSEUM. For a description of this museum, see BUILDINGS—Townshend Hall.

THE ANATOMICAL AND PATHOLOGICAL MUSEUM. For a description of this museum, see Laboratories and Equipment, Veterinary Medicine.

THE MUSEUM OF CLAY-WORKING AND CERAMICS is now in process of formation. Some excellent specimens of ceramic products have already been collected, and efforts are being made to increase the collection.

ARCHAEOLOGICAL COLLECTION. Page Hall now contains the second best archæologic exhibit in the Ohio Valley, the total number of specimens owned by the Ohio State University, the Ohio State Historical and Archæological Society and by private individuals, amounting to 46,200. Although the Museum is but three years old, it has shown a remarkable growth.

Field work has been carried on in various parts of the State during the summers of 1894, 1895 and 1896, and as a result the contents of more than eighty mounds, graves and village sites are now on exhibition. The chief exhibits, illustrating the life of ancient tribes are from Fort Ancient in Warren county, from the mound graves of the lower Scioto and from the Muskingum Valley. It is considered that in Ross county aboriginal culture reaches its highest development in the whole Ohio Valley. This fact is well attested by the presence of numerous copper objects, effigy pipes, fine ornaments and ceremonials, pottery, delicate work in polished stone and flint implements, etc.

The collection from the valley of Brush Creek and along the Ohio itself, and from the hill regions of Ohio, show a much lower grade of culture. Careful comparison of the work of man from these localities is exceedingly interesting.

There is an exhibit from Flint Ridge, illustrating the manufacture of arrow and spear heads. The Museum contains nearly 150 specimens of pottery from Missouri and Arkansas, many of which are effigies of animal, bird and human form.

The founders of the Archæologic Museum are arousing public interest in the preservation and study of Ohio antiquities; and, by means of exchanges, lectures and personal solicitation, the growth of the collection is considerable.

LIBRARIES.

THE UNIVERSITY LIBRARY.

The University Library, containing about fifty thousand volumes, is located in the east end of Orton Hall. The system of department libraries prevails to a limited extent, small collections of books specially needed in connection with laboratory and class room work being deposited in several departments.

During term time the Library is open six days in the week, legal holidays being excepted. From Monday until Friday the hours are from 7:30 a. m. until 9:30 p. m.; Saturday from 7:30 a. m. until 4 p. m.

The management of the Library is vested in a Library Council, which is composed of the President, the Librarian and the Deans of the six colleges.

STATE LIBRARIES.

Students are privileged in being near the two State Libraries.

The Ohio State Library numbers about 70,000 volumes and is a circulating one for all the citizens of Ohio. It occupies a room in the State House.

The State Law Library, also in the State House, is the largest and most complete law library in the State. It contains complete sets of the English, Scotch, Irish, Canadian, United States and State reports, statutes and digests. The important legal periodicals are on file.

CITY LIBRARIES.

The students of the University, as residents of Columbus, have access to the City Library and the Public School Library, under the usual regulations. The City Library numbers 28,000 volumes. It has specially pleasant reading and reference rooms. The Public School Library numbers 35,000 volumes, and is a well selected collection of books. Students will find both libraries valuable in supplementing the University Library.

SPECIAL LIBRARY IN ECONOMICS.

The University possesses a special library in Economics consisting of several hundred volumes and pamphlets. Over thirty financial, commercial and trade journals are received and filed regularly. The business men of Columbus have contributed over \$1,200 for the equipment of this commercial library.

SPECIAL LIBRARY IN ZOOLOGY AND ENTOMOLOGY.

The Department of Zoology and Entomology possesses a special library the nucleus of which was the scientific library of the late Prof. Kellicott which was generously donated to the Department. This has been increased by gifts of special papers by a number of the leading investigators of the country and will be enlarged as rapidly as possible. The private library of the professor is also accessible for reference.

AIDS TO MORAL AND RELIGIOUS CULTURE.

One of the most commendable organizations in the University is a branch of the International Young Men's Christian Association, organized in 1883. This association is directly affiliated with the work for young men directed by the college department of the State Y. M. C. A. work. Services are held weekly and voluntary classes for Bible study are successfully organized. The local association has a secretary who devotes his entire time to work among the young men. The management has rented a house at 136 West Tenth avenue as headquarters for the Association. It is hoped that in the near future a permanent home for the Association may be provided.

An equally commendable organization is the Y. W. C. A., affiliated with the State organization. Religious meetings are held regularly at noon on Tuesdays. Occasionally meetings for social purposes are held as provided for by the organization. Both of these organizations are worthy of public consideration.

New students are invited to write to the address below for a hand book of information concerning the University or for information concerning rooms, boarding or employment. Address C. C. Hatfield, Y. M. C. A. Secretary, 136 West Tenth avenue, Columbus, Ohio.

THE CONVOCATION.

At the opening of the year in September, 1900, the daily chapel exercises were abandoned. As a substitute for the short daily exercises an entire hour is now devoted to a convocation at which the president presides. In addition to devotional exercises an address is delivered upon some suitable topic. During this hour the libraries and laboratories are closed and no other University exercises occur. It is expected that the Faculty and students will attend. The hour is definitely fixed at ten o'clock on Wednesday of each week. The public is always welcome at the Convocation.

LITERARY AND OTHER SOCIETIES.

The Alcyone Literary Society, open to young men, was founded in 1874; the Horton Literary Society, open to young men, was founded in 1875; the Athenæan Literary Society, open to young men, was founded in the winter of 1896-'97. The Browning Literary Society, founded in 1883, and the Philomathean Literary Society, founded in 1894, are open to young women. These societies have commodious and well furnished apartments in University Hall. They meet weekly, and their work, offering to the student a very desirable training in composition, public speaking, and parliamentary order, is a valuable adjunct to collegiate education.

The Townshend Literary Society was established in 1883 as a technical society under the name of the Kirtland Agricultural Society. In 1894, the name Townshend was substituted. In 1898, the Society changed its constitution so as to admit any student of the University and thus became a literary rather than a technical society. It meets weekly in its commodious and well arranged society room in Townshend Hall.

The Biological Club is an organization of professors and students for mutual assistance and improvement in the line of natural science. Its meetings are regularly held every two weeks, at which papers are read, notes of observation and research presented, and current biological literature discussed.

The Chemical Association, composed of the more advanced students and instructors in the Department of Chemistry and Pharmacy, has for its object the discussion of such subjects as are of importance to students of chemistry, special stress being placed on recent discoveries. The meetings are held semi-monthly and are of great interest. Both professors and students contribute to each program.

The Political Science Club is an organization of instructors and students in political science and history for the consideration of questions in those fields. At the regular bi-weekly meetings papers are read, researches reported and current questions and publications in political science considered and discussed.

The Engineering Society is a similar organization of students and instructors, holding meetings bi-weekly, for the consideration of questions in the various branches of engineering.

The Organic Evolution Club was organized in the winter of 1896-97 by those students and members of the Faculty especially interested in the study of Evolution. The Zoological Department has a similar club known as the Journal Club.

The O. S. U. Dramatic Club was organized in 1893. Its object is to present each year to the University world one of the standard legitimate dramas. Its membership is confined to University circles.

The musical organizations of the University are: The O. S. U. Glee Club, the O. S. U. Mandolin and Guitar Club, the O. S. U. Banjo Club, the O. S. U. Orchestra, the O. S. U. Male Quartet and the University Cadet Band.

The Ornithological Club encourages observation and research in the study of birds and their habits, especially of our native species. The Wheaton collections in the possession of the University form a basis of study. The programs consist of papers and discussions and reports of observation and personal work. Anyone interested in birds is eligible to membership and visitors are always welcome. The club meets on the second and fourth Monday evenings of each month.

The O. S. U. Sketch Club has for its purpose the promotion of art interests among the students and ex-students. Any one who is or has been connected with the University in any capacity is eligible to membership. The members meet once a week and sketch from the draped human figure. Twice a month the members present sketches illustrating some word, etc., previously selected. All work is criticised by members of the club for mutual benefit.

The English Club, composed of the instructors and advanced students of the English departments, holds bi-weekly meetings at which new books in current literature are discussed and papers on literary topics are presented.

The William F. Hunter Society, in the College of Law, meets for moot-court practice and quiz-work every two weeks.

"Der Deutsche Verein," for students in the Department of Germanic Languages and Literatures, meets every two weeks.

MILITARY SCIENCE AND PRACTICE.

Under the law of Congress establishing the University, it is required that instruction shall be given in military science and tactics. In accordance with this provision an officer of the regular army has been detailed to take charge of the Department of Military Science and Tactics; and the Trustees have directed that all male students, except those in the College of Law, and such others as may be specially excused for physical disability or for having reached the age limit of twenty-five years, shall render two years of cadet service. Special students are required to take the cadet service. From the opening of the year until Thanksgiving recess cadet service is required four times a week; from Thanksgiving until Spring recess cadet service is required twice each week and gymnasium practice twice; from the Spring recess until the first of June cadet service is required four times each week. A uniform has been prescribed with which each member is required to provide

himself; and fifty minutes a day are devoted to drill, except on those days when instruction in tactics and art of war is given.

The course of instruction is both practical and theoretical. It is given by means of a systematic drill, supplemented by lectures and recitations, and is so arranged as to occupy five hours per week throughout the year. For purposes of drill, all students enrolled in the department are organized in a battalion, the officers of which are selected from those students who have shown special proficiency in their university work and the work of the department. Commissioned officers and non-commissioned officers receive certificates of satisfactory service, issued by the University. A cadet band has been organized in connection with this department, and is supplied with instruments belonging to the University and to the cadets.

The practical course in infantry embraces all the movements prescribed by the drill regulations of the U. S. Army applicable to battalion. Instruction in artillery embraces such portions of the United States drill regulations as pertain to the formation of detachments, manual of the piece, mechanical maneuvers and aiming drill. Instruction also includes duties of sentinels, the various ceremonies performed by troops, and military signaling. The theoretical instruction includes a systematic and progressive course in drill regulations of the U. S. Army, the organization and administration of the U. S. Army and the elementary principles governing in the art of war.

Competitive drills are held yearly for two medals; one, the first prize, of gold, presented to the University by the M. C. Lilley Co., of Columbus, Ohio; the other, the second prize, of silver, presented by Lieut. Wilson, when commandant. These medals remain the property of the University, the winner wearing them until the next competition. The "President's Prize" consists of an officer's sword, given to the captain of the company having the best record for attendance for the year.

The equipments of the department consist of three hundred Springfield cadet rifles and sets of infantry equipment, twenty officers' swords and belts, the necessary equipment for instruction in signaling, and a few instruments for the band.

The U. S. Ordnance Department furnishes an annual allowance of one thousand rounds of ball and one thousand rounds of blank cartridges for cadet rifles.

PHYSICAL EDUCATION.

The physical education is given by the director in charge, assisted by Miss Martin, who has charge of the work for young women. The large drill hall is used by the women in the forenoon and by the men in the afternoon.

The exercising floor, 80 x 150 feet, is thoroughly equipped with the best apparatus in duplicate. The running track is fourteen laps to the mile, with graded elevations at the curves to meet the requirements of the different rates of speed. The track is laid with felt an inch in thickness, three and a half feet wide and covered with rubber coated canvas.

The work is required for the first and second year students. The course consists of theoretical and practical work in the gymnasium, and includes calisthenics, light and heavy gymnastics, physiology of exercise, physical examinations and measurements. It is intended to give the student such a training in the methods of Physical Education that he may have a comprehensive knowledge of the subject.

A thorough physical examination of each student is made at the opening of the year, and the measurements are outlined on charts, so as to show the part below the normal development, for which special exercises suited to the health and physical condition of each individual will be suggested. These charts are constructed from the accumulated data of several thousand measurements of college students. Experience demonstrates that the body, as well as the mind, is susceptible of right and wrong development. Every part of the body can be strengthened and increased and the relation of one part to another can also be changed so as to correct imperfections.

Class leaders who act as floor aids are selected from among those who show a proficiency in the work. These students are given a certificate of their appointments as Aids, and the letter A in scarlet, which they are entitled to wear on their gymnasium suits.

It is the aim of the department to secure health, vigor and such harmonious development of the body as will fit it to resist disease and prepare it for efficient service, both now and later in life.

The gymnasium is free to all students, but those desiring a locker will be charged a fee of one dollar a term.

OHIO FORESTRY BUREAU.

This Bureau has been established and located at the University by the Legislature for the purpose of inquiring into the best means of preserving and utilizing the forests of the State.

PRIZES.

Through the generosity of Hon. William J. Bryan an annual prize of fifteen dollars is offered for the best essay on the principles underlying the form of government of the United States. Competition for this prize is open to all students of the University.

The Edward Thompson Company offer annually to the student writing the best essay on a legal theme selected by the Faculty of the College of Law, the second edition of the English and American Encyclopedia of Law, which includes about thirty volumes.

Other prizes are offered in special departments, for which see department circulars or the heads of the departments.

FEES AND EXPENSES.

GENERAL CHARGES.

All term dues must be paid at the opening of each term as a condition of admission to classes.

INCIDENTAL FEE.—A charge of six dollars a term, eighteen dollars a year, is made against all students, under the head of incidental expense. In the case of former students if this fee is not paid until the second day of the term one dollar will be added, and for each succeeding day of delinquency fifty cents will be added.

TUITION.—Tuition is free for all students except in the College of Law. The fees of the College of Law are \$30 per semester, including the usual incidental fee.

RETURN OF FEES.

The rules of the Trustees provide for the return of fees only in cases of prolonged illness or of unforeseen calamity.

LABORATORY FEES.

Students in the laboratories and shops are required to pay fees to cover, in part, the cost of the material consumed, and the deterioration of the expensive instruments used by them. First year students are also required to make a deposit of five dollars at the beginning of each term at the Chemical Store Room to cover the cost of laboratory supplies.

In the laboratories of the Department of Chemistry and Agricultural Chemistry, each student is required at the beginning of each term to pay a fixed charge of one dollar and fifty cents for gas and water. First year students are also required to make a deposit of five dollars at the beginning of each term at the Chemical Store Room to cover the cost of laboratory supplies. He is also required to buy his own supplies, as he needs them, at the general store room in Chemical Hall, where laboratory supplies are sold to students at first cost to the University.

The fees charged per term in the laboratories mentioned below are as follows:

Zoology and Entomology, 1, 3, 4, 7.....	1 00

LOCKER FEE.

A fee of one dollar a term is required from those who make use of a locker in the gymnasium.

CADET UNIFORM.

The uniform with which the members of the battalion are required to provide themselves costs (without overcoat) about fourteen dollars. It is quiet in pattern, and is designed to be worn in place of civilian dress.

GRADUATION FEE.

A fee of five dollars, to cover expense of graduation and diploma is required of each person receiving one of the ordinary degrees from the University, and this fee must be paid before the degree is conferred. A like fee of ten dollars is charged to each person receiving one of the higher graduate degrees.

FEES FOR THE COLLEGE OF LAW.

INCIDENTAL FEE.—An incidental fee of fifteen dollars per year is charged to regular undergraduate students.

Upon payment of the incidental fee, law students will be admitted to all the privileges of all the other Colleges of the University, upon the same terms as to admission, discipline and character of studies selected as other students in the University.

TUITION FEE.—In addition to the incidental fee named above, a tuition fee of twenty-two dollars and fifty cents per semester is charged to regular undergraduate students.

GRADUATE FEE.—A graduate fee of fifteen dollars per semester, payable in advance, is charged to all who take the full graduate work.

DIPLOMA FEE.—A fee of five dollars is charged to all who receive the diploma or certificate, and a fee of ten dollars is charged to those taking the degree of Master of Laws. These fees must be paid before the degrees are conferred or certificate delivered.

Special students are required to arrange their fees satisfactorily with the Dean or Secretary before being admitted.

AUDITOR'S FEE.

On presentation to the Bursar of the written consent of the head of a department, and on payment to the Bursar of an auditor's fee of one dollar, any person engaged in teaching is permitted to attend, in that department, any class or course (not to exceed three hours a week for one-half year) which is announced to be especially for teachers or those intending to teach.

ROOMS AND BOARD.

There are two dormitories on the University grounds for the use of students. Each occupant is charged by the University a rent of a dollar and a half a term.

The South Dormitory affords unfurnished rooms to such students as desire to board themselves, and thus to reduce their expenses to a minimum. The expense of living in this way is about two dollars per week. Applications for rooms should be made to the President of the University.

The North Dormitory will accommodate more than sixty students. Board, furnished rooms, fuel, light and washing are, at present prices, supplied for about three dollars and twenty-five cents a week. Students will be admitted on special recommendation to the President of the University.

Boarding clubs are also formed in the neighborhood of the University. Furnished rooms are rented at seventy-five cents to one dollar a week for each student, and the cost of table board is two dollars to three dollars a week.

Board with furnished rooms can be obtained in private families, within convenient distances of the University, at rates varying from three and a half dollars to five dollars a week. The ruling rate may be taken as four dollars.

ESTIMATE OF EXPENSES.

The expenses of a student in the University for a year may be estimated as follows, excluding clothing (except uniform) and traveling expenses:

	Low	Average	High
Incidental fees	\$18 00	\$18 00	\$18 00
Laboratory fees	15 00	20 00	54 00
Books and stationery	15 00	25 00	40 00
Room	4 50	37 00	75 00
Furniture	10 00
Board	70 00	110 00	150 00
Uniform	14 00	14 00	14 00
	<hr/> \$146 50	<hr/> \$224 00	<hr/> \$351 00

FREE SCHOLARSHIPS.

A free scholarship good for two years is granted to one student annually from each county in Ohio. If in any county there is no applicant for the free scholarship in the College of Agriculture and Domestic Science, then a free scholarship, good for two years in the College of Veterinary Medicine, may be granted. Each scholarship is valid two years from its grantal and covers the incidental fee, but the person appointed to receive its benefits is subject to all the conditions prescribed for admission to the course. Students taking laboratory work are required to make a deposit to cover materials broken or used up, the same as other students. The free scholarship can not be used in special winter term course in dairying. The appointments are made by the County Boards of Agriculture, and are not transferable by the appointees. To learn whether the scholarship of a given county for the current year has been granted, inquiry should be addressed to the Secretary or President of the County Agricultural Society.

For further information concerning these scholarships, inquiries should be addressed to the Dean of the College of Agriculture and Domestic Science.

FELLOWSHIPS.

To encourage graduates of this University, and of other similar and approved institutions in this State, to continue their studies and to undertake advanced work leading to the higher degrees, the University authorities have established fellowship in several departments. These demand about one-half of the time of the fellow for laboratory or other similar assistance—as far as possible along the line of his graduate study. The remainder of his time is given to graduate work. The fellowships pay from \$250 to \$300 for the University year. At present there are three such fellowships in Rhetoric, two in Botany and in Chemistry, and one each in Economics, and Zoology, and a few others in the technical and professional colleges.

The Stillman W. Robinson Fellowship in Engineering, recently endowed by Emeritus Professor Robinson for the encouragement of graduate research work in engineering, provides three hundred dollars (300) annually, and is open to graduates in Mechanical, Civil and Electrical Engineering.

Any student to whom this fellowship is awarded must devote his entire time to the work, which shall amount to at least sixteen hours per week, of which at least eight shall be in the line of original research or investigation.

This fellowship will be awarded on the Friday preceding Commencement Day. All applications must be filed with the committee on or before the first of June of the same year, and must include a general outline or the course of study and research proposed. This must show a definite object to be attained. The application may be for one or two years, preference being given to candidates electing the two year course.

SELF-SUPPORT.

There is a large amount of work upon the University farm which is assigned to students, preference being given to those who are studying Agriculture. *But the University cannot promise work to all applicants.* Many students find work in private families, in offices, and in various occupations, by means of which they defray a portion of their expenses. A person of ability and energy, who is master of a trade, or who can do good work of any kind, can generally find employment, but prospective students are cautioned against depending wholly upon such uncertain sources of income.

Students should distinctly understand that where they attempt entire or partial self-support they should lengthen the term of study.

As an accommodation the executive office co-operates as far as possible in this matter. The Y. M. C. A. offers its services in helping young men to secure employment. Very much depends, however, on the individual's power of initiative. Students should not come to the University expecting others to find places for them. They should report to the executive office from time to time as to their needs and their work. This will enable the authorities to be more helpful than otherwise would be possible.

RULES AND REGULATIONS.

REGISTRATION.

All students are required to register and pay their term fees on or before the first day of each term, between the hours of 8 a. m. and 12 m., or between 1 and 4 p. m., central standard time.

Former students who fail to register as above will be charged one dollar in addition to the usual incidental fee, for the first day of delinquency, and fifty cents additional for each subsequent day.

No candidate for graduation, except in the College of Arts, will be permitted to register for the second term of his graduating year, except upon presentation to the bursar, of the President's certificate that his thesis subject has been announced and approved.

ASSIGNMENT OF WORK.

Rule 89. The assignment of work shall be made and recorded for each student, as shall be determined by the several faculties; but at the beginning of each term or semester, each student's card shall be signed by the Secretary of his College before presentation to the bursar.

AMOUNT OF WORK.

No student is permitted to take less than fifteen credit hours a week of any sort of work, except by special permission, and no student will be permitted to take more than the regular work of the class to which he belongs, who has not passed all his work for the preceding term.

CREDIT HOUR.

A credit hour means one hour class room work in lecture, recitation or quiz, or "two consecutive hours of practical or experimental work in

any department shall be regarded as the equivalent of one hour of class-room exercise; but when no outside work is required in addition to the laboratory work, then three hours of laboratory work may be required as equivalent to one credit hour; and in general not more than three hours of the student's time, including class hours, shall be required for each credit hour."

ELECTIVE STUDIES.

All elections of work in continuous studies, when once made, are understood to be made for the entire collegiate year.

The right is reserved to each professor to withdraw the offer of any elective study when it is not chosen by at least four persons.

REMOVAL OF ENTRANCE CONDITIONS.

Rule 111. Students shall be regarded as strictly on trial until they have removed all deficiencies and conditions in entrance requirements.

Rule 112. Students who have any entrance conditions outstanding at the beginning of the third year of residence at the University will not be allowed to register until such conditions have been removed.

All entrance conditions must be removed by examination by the University officers. Certificates will not be received for entrance conditions after matriculation.

EXAMINATIONS AND STANDING.

At the close of any term a student failing to pass in two-thirds of his work will be considered on *probation* for the next three terms; and a second similar failure incurred while thus on "probation" will forfeit his connection with the University.

Rule 116. The standing of students in each study shall be reported at the end of each term or semester, as "merit," "passed," "conditioned," or "failed." This standing shall be determined by the head of each department by such means and methods as he may choose, but no student shall be reported "failed" without having had the opportunity of a written examination.

Rule 117. The standings "merit" and "passed" indicate that the student has full credit for the term's or semester's work in the study in which this standing is obtained.

Rule 118. The report "credit" (K) shall be used only for work not done in regular class at the University.

Rule 119. The standing "conditioned" indicates that credit for the term's or semester's work in the study in which the condition was incurred is withheld. The student shall be given an opportunity to obtain credit by a special re-examination; or if the study be a continuous one, the instructor in charge may, at his discretion, excuse the student from re-examination and may allow him to obtain credit by pursuing the study successfully during the following term or semester. If the student thus excused from re-examination does not pass upon the work of the second term or semester, he shall be reported as "failed" in the work of both terms or semesters. Any condition that is not removed within one year from the beginning of the term or semester in which it was incurred shall lapse into a "failure."

Rule 120. The standing "failed" indicates that the student has obtained no credit whatever for the term's or semester's work in which the mark is given. The student must, at the first opportunity, repeat in class the study in which he has failed. But a student who has failed in an elective study may be excused from repeating such study by the Executive Committee of his college. In case of failure in any continuous study the work of the term or semester in which the failure is incurred must be repeated in class before any subsequent term's or semester's work in that study can be commenced. Unexcused absence from any regular examination is construed as a failure therein.

Rule 121. Any student who fails at the end of any term or semester to secure full credit for two-thirds of his work shall be put on probation for the following term or semester with restricted work, and if similarly delinquent in his studies at any time within the next ten academic months, shall thereby cease to be a member of the University.

Rule 122. If for any cause the preparation, progress or success of any student in the work assigned him be found unsatisfactory, the President may remove him from a class or dismiss him from the University.

TERMS AND VACATIONS.

The first term of the University year begins on the Tuesday following the sixteenth day of September and closes on the Wednesday following the 17th day of June. The first term closes on the Wednesday preceding Christmas; the second term begins on the Tuesday following the first day of January and closes on the Friday preceding the first Monday in April; the third term begins on the Wednesday following the close of the second term. The second semester begins on Monday of the eighteenth week preceding commencement week; and the first semester closes on the Friday preceding the opening of the second semester. The regular college exercises are suspended from 4 o'clock p. m. of the Wednesday preceding Christmas until 8 o'clock a. m. of the Tuesday following the first day of January; on Thanksgiving and the day following; on University day, which is the 22d day of February; from 4 o'clock p. m. of the Friday preceding the first Monday in April; until 8 o'clock a. m. of the Wednesday following the first Monday in April; and on Memorial day.

STUDENT'S LOCAL ADDRESS.

Rule 1. Each student shall at the beginning of the year give, in writing, his or her local address to the President, and shall promptly report all subsequent changes of address.

SMOKING PROHIBITED.

Rule 53. Smoking is prohibited in the halls, basement and lecture rooms of the University buildings.

ROOM REGULATIONS.

Rule 56. The rooms of University student organizations which are located in the University buildings shall not be used for the purposes other than the usual exercises of such organization without the previously obtained consent of the general faculty.

Rule 57. No arrangements or announcements shall be made by students for any public gathering or exercises in the University buildings without the previously obtained consent of the President.

EXCUSES FOR ABSENCE.

Rule 66. All absences of individual students from the city, for any purpose, involving absence from college exercises, must be accounted for to the President; and in all possible cases permission must be previously obtained.

Excuses will not be granted for absences of more than two weeks' standing, unless the absence has been continuous.

THESIS.

As a requisite for graduation, each candidate, except in the College of Arts and Veterinary Medicine, must present an acceptable thesis, embodying the results of a special study. The subject of this study must lie within the field of the degree sought. The subject must be filed with the President of the University (dependent upon the approval of the head of the department), on the official blank provided for the purpose, not later than December 15 of the University year in which the degree is sought. The completed thesis must be submitted to the head of the department concerned not later than the second Saturday before Commencement Day.

The accepted thesis, on standard paper, Buckeye bond, 8½x11 inches, medium weight, typewritten or printed, neatly bound in black cloth, gilt-lettered on first cover with the thesis title, name of author, degree sought and year of graduation, must be filed not later than the Friday preceding Commencement Day.

DEGREES.

FIRST DEGREES.

The following baccalaureate degrees are conferred at graduation upon those who have successfully completed the regular courses leading to such degrees and who have fulfilled all other requirements of the University.

BACHELOR OF ARTS, for all courses in the College of Arts, Philosophy and Science.

BACHELOR OF SCIENCE IN AGRICULTURE, for the four year course in Agriculture.

BACHELOR OF SCIENCE IN HORTICULTURE AND FORESTRY.

BACHELOR OF SCIENCE IN DOMESTIC SCIENCE.

BACHELOR OF SCIENCE IN CHEMICAL ENGINEERING.

BACHELOR OF SCIENCE IN INDUSTRIAL ARTS.

BACHELOR OF SCIENCE IN PHARMACY.

CIVIL ENGINEER.

CIVIL ENGINEER IN ARCHITECTURE.

ENGINEER OF MINES.

ENGINEER OF MINES IN CERAMICS.

MECHANICAL ENGINEER.

MECHANICAL ENGINEER IN ELECTRICAL ENGINEERING

BACHELOR OF LAWS.

DOCTOR OF VETERINARY MEDICINE

HIGHER DEGREES

In College of Arts:

MASTER OF ARTS

DOCTOR OF PHILOSOPHY

In College of Law:

MASTER OF LAWS

Advanced degrees are given for graduate work in the technical colleges.

THE COLLEGES

THE COLLEGES

ADMISSION.

The University is open on equal terms to both sexes.

Applicants for admission to the Colleges of Agriculture, of Arts, Philosophy and Science, or of Pharmacy, must be at least 16 years of age; for admission to the College of Engineering or of Veterinary Medicine must be at least 17 years of age; for admission to the College of Law must be at least 18 years of age. Each must be provided with credentials of scholarship from his last instructor or from the last institution with which he has been connected, and with a certificate of good moral character.

Entrance may be made at any time if the applicant is competent to take up the work of the classes then in progress; but it is desirable to begin work at the opening of the University in September.

There are two modes of admission to the University—by examination and by certificate.

ENTRANCE EXAMINATIONS.

The entrance examinations for 1904 will be held on Monday and Tuesday, June 20 and 21, and on Monday and Tuesday, September 19 and 20. A part of the examinations may be taken in June and the remainder in September. Conditions incurred at the June examinations must be removed at the September examinations. *All applicants for admission who are not graduates of high schools of approved standing must take examinations for admission.*

CERTIFICATES.

Applicants for admission to any of the colleges may be admitted on presentation of properly indorsed certificates from secondary schools which have been "accredited" or "recognized" by the University. The statement of principles and method of procedure in classifying secondary schools are set forth in the following articles adopted by the General Faculty:

(1) That, until any High School of this State is inspected or reported upon by the *High School Visitor* and acted upon by the High School Committee, the status of certificates of that school shall continue as heretofore.

(2) That as fast as schools are reported on by the *High School Visitor* and action taken thereon by the High School Committee, the certificate privilege in the case of all rejected schools shall be terminated at once and the Deans of the various colleges of the University shall be furnished with lists of such rejected schools as well as approved schools.

(3) That approved schools shall be classified as follows:

(a) ACCREDITED SCHOOLS.

Those four-year secondary schools whose courses of study offer such branches of study as prepare students for all colleges of the University.

All GRADUATES holding certificates from this class of schools will be admitted to any college of the University without examination, provided the required entrance branches are covered in the certificates.

(b) RECOGNIZED SCHOOLS

Those three or four-year secondary schools whose courses of study do not prepare students for all colleges of the University, but include not less than 10 units of secondary instruction.

Any GRADUATE holding a certificate from one of these schools will be admitted without examination to any college of the University for which he is prepared.

A certificate from a recognized school, when it is presented by a graduate thereof, will be accepted toward admission by any college of the University; but an applicant holding such a certificate, will be subject to examination in the requirements for admission not covered by the certificate.

(4) No school shall be placed in either class until visited and reported to the High School Committee, whose duty it shall be to determine whether the conditions and quality of work in the school will warrant placing it in either of the above classes.

(5) No applicant shall be admitted by certificate to any college of the University who is not a graduate of the School from which he bears a certificate; but an applicant for admission to the College of Pharmacy who brings a certificate showing that he has completed at least three years work in an accredited school may be admitted without examination in the subjects covered by the certificate.

(6) The foregoing provisions do not apply to the College of Veterinary Medicine, or to such courses as do not lead to a degree.

ACCREDITED SCHOOLS OF OHIO.

(Certificate Privilege Expires June, 1906.)

Ashtabula, Bryan, Cambridge, Chillicothe, Circleville, Clyde, Collinwood, Coshocton, Dayton, East Cleveland, East Liverpool, Elyria, Fostoria, Fremont, Gallipolis, Glenville, Grand River Institute, Greenville, Hamilton, Hillsboro, Ironton, Jackson, Jefferson, Lakeside, Lakewood, Lancaster, Lockland, Logan, London, Madisonville, Mansfield, Martins Ferry, Marysville, Medina, Miamisburg, Nelsonville, Newark, New Lyme Institute, New Philadelphia, Piqua, Portsmouth, Sandusky, Springfield, Toledo, Troy, Urbana, Washington C. H., Wellington, Wellsville, Wooster, Wyoming, Xenia, Zanesville.

(Certificate Privilege Expires June, 1907.)

Akron, Ashland, Bellefontaine, Canton, Chardon, Cincinnati—Hughes, Woodward; Cleveland—Central, East, Lincoln, South, West; Delaware, Findlay, Gallon, Georgetown, Lima, Marion, Mechanicsburg, Mt. Vernon, New London, Norwalk, Painesville, Salem, Sidney, St. Marys, Tiffin, Van Wert, Warren, Willoughby, Youngstown.

RECOGNIZED SCHOOLS OF OHIO.

(Certificate Privilege Expires June, 1905.)

Alliance, Ashley, Carey, Chicago, Clarington, College Corner, Columbus, Columbus Grove, DeGraff, Deshler, East Palestine, Fort Recovery, Garrettsville, Genoa, Gibsonburg, Glouster, Harrison, Jamestown, Johnstown, Kinsman, Leipsic, LeRoy, Lexington, Lisbon, McArthur, Milan, Milford, Osborn, Perrysburg, Pleasant Ridge, Quaker City, Richwood, Rockford, Salineville, Solon, Stryker, Utica, Wadsworth.

(Certificate Privilege Expires June, 1906.)

Athens, Barnesville, Bellaire, Bethel Township, Miami County, Caldwell, Canal Dover, Canal Winchester, Chagrin Falls, Corning, Covington, Euclid, Germantown, Gnadenhutten, Groveport, Kingsville, Lebanon, Lorain, Napoleon, New Vienna, North Baltimore, Norwood, Oberlin, Olive Branch, Orrville, Plain City, Pomeroy, Port Clinton, O. S. and S. O. Home, Shelby, Tippecanoe City, Uhrichsville, Wauseon, Woodsfield.

(Certificate Privilege Expires June, 1907.)

Bellevue, Celina, Clintonville, Conneaut, Cuyahoga Falls, Dennison, Granville, Kirkland, Madison, Massillon, Mt. Sterling, New Bremen, Niles, Ottawa, Pataskala, Ravenna, Ripley, Spencerville, Upper Sandusky, Wapakoneta, Worthington.

ACCREDITED SCHOOLS OF OTHER STATES.

(Certificate Privilege Expires June, 1905.)

MICHIGAN: Ann Arbor Adrian, Alpena, Bay City, Battle Creek, Calumet, Coldwater—Detroit, Central, Eastern, Detroit University School, Detroit Home and Day School; Grand Haven, Grand Rapids, Hancock, Iron Mountain, Kalamazoo, Lansing, Menominee, Marquette, Muskegon, Mt. Clemens, Monroe, Marshall; Saginaw, West Side; St. Joseph; Saginaw, East Side; Traverse City, Ypsilanti.

INDIANA: Fort Wayne, Frankfort, Howe, Military School, Indianapolis Shortridge; Indianapolis Manual Training; Michigan City, Rensselaer.

ILLINOIS: Aurora, East; Aurora, West; Bloomington; Chicago—Austin, Calumet, Englewood, Hyde Park, Jefferson, John Marshall, Joseph Medill, Lake, Lake View, North West Division, Robert Waller, South Chicago, South Division, William McKinley; Clyde, DeKalb, Dixon South, Elgin, Evanston, Harvey, Joliet, La Grange, Moline, Oak Park, Ottawa, Peoria, Pontiac, Princeton, Rockford, Rock Island, Sterling.

IOWA: Boone, Cedar Rapids, Council Bluffs, Davenport, West Des Moines, Fort Dodge, Grinnell, Le Mars, Marshalltown, Ottumwa, Sioux City.

WISCONSIN: Ashland, Chippewa, Eau Clair, Fort Atkinson; Milwaukee, East Division; Milwaukee, West Division; Milwaukee, South Division; Milwaukee, Downer Seminary; Oshkosh, Racine, Ryan, Janesville, Kenosha, La Cross, Marinette, Marshfield, Merrill, Sheboygan, Sparta, Stevens Point, Superior, Blaine; Superior, Nelson Dewey; Waukesha, Whitewater.

MINNESOTA: Duluth; Minneapolis—Central, East Side; St. Paul—Central, Humboldt, Cleveland.

MISSOURI: Bles Military Academy, Columbia; Kansas City; Central, Manual Training, Westport; Kirkwood; St. Louis—Central, William McKinley, Washington University Training School.

NEBRASKA: Beatrice, Kearney, Lincoln Academy, Omaha.

COLORADO: Colorado Springs, Cripple Creek, Greeley, Kenyon City, La Junta, Leadville, Pueblo No. 1, Pueblo No. 20, Trinidad.

Diplomas and certificates from accredited and recognized schools will be accepted in lieu of examination for preparatory studies only under the following conditions:

(a) The certificate must state in detail the studies pursued, the textbooks used, the amount of work done in each study, the amount of time devoted to it, and the fact that the applicant has successfully passed in the work.

(b) The certificate will be accepted for such studies only, or such part of each, as it shall show to have been satisfactorily accomplished.

(c) Every such certificate must be accompanied with a diploma showing that the candidate has been graduated from the school from which he comes. *Blank certificates may be obtained by addressing the EXECUTIVE OFFICE, OHIO STATE UNIVERSITY, COLUMBUS.* Certificates should be filled out and returned to the University as early as possible after the close of the schools in June, and in any event not later than September 1.

DESCRIPTION OF SUBJECTS ACCEPTED FOR ADMISSION.

The following is a statement in full of the requirements in each subject accepted for admission to the University. Not all of these subjects are required for admission to any one college or course. *For the specific requirements for admission to a particular college or course, see statement under that college.*

A unit course of study is a course covering a school year of not less than thirty-five weeks with four or five periods of at least forty-five minutes each per week.

(a) THE ENGLISH GROUP.

(1) *English Composition and Rhetoric. One unit.* Each applicant must be able to write clear and correct English, and no applicant will be accepted in English whose work is seriously defective in spelling, punctuation, grammar

and paragraph structure. The proper preparation for this part of the requirement is practice in composition through the four preparatory years, with correction of themes by the teacher and revision by the pupil. Subjects for themes should not be taken exclusively from literature; a large share of the subjects should be based upon the pupil's observation and experience. Practice should be afforded in writing narrative, description, exposition and argumentation. Applicants should be familiar with those principles of Rhetoric which are most helpful in elementary composition; viz., the principles of sentence structure, outlining, paragraphing and choice of words. The amount and kind of work required is indicated in Scott and Denney's *Composition-Rhetoric*.

(2) *English Classics. One unit.* The following books, or *equivalents*, should be read with sufficient care to insure a knowledge of their story-plot, or argument, their chief incidents, and their principal characters; so that pupils may discuss them intelligently. Four or five of these books should be examined closely in class with reference to structure and leading characteristics of style. The list (until 1905) is as follows: Shakespeare's *Merchant of Venice*, *Julius Caesar*, and *Macbeth*; Milton's *Lycidas*, *Comus*, *L'Allegro*, and *Il Penseroso*; Burke's *Conciliation with the Colonies*; Macaulay's *Essays on Milton and Addison*; The Sir Rodger de Coverly Papers in *The Spectator*; Goldsmith's *The Vicar of Wakefield*; Coleridge's *The Ancient Mariner*; Scott's *Ivanhoe*; Carlyle's *Essay on Burns*; Tennyson's *The Princess*; Lowell's *The Vision of Sir Launfal*; George Eliot's *Silas Marner*.

(3) *English Literature. One unit.* A good knowledge of the leading facts in the history of English Literature, as given in Scudder's *English Literature*, Johnson's *History of English and American Literature* or the Introductions by Pancoast, Painter, Halleck, or Newcomer; together with the reading of representative works of literature. This may be offered in lieu of subject (2).

(b) THE HISTORY GROUP.

(4) *Civil Government. One-half unit.* A good knowledge of the origin, principles, forms and powers of the national, state and local governments is expected. Fiske's *Civil Government*, with a special study of the State from which the student comes, may serve to indicate the amount and kind of knowledge sought.

(5) *United States History. One-half unit.* A good knowledge of the main facts and features of American history, especially of the period since 1750, is expected. Johnson's *High School History of the United States*, or McLaughlin's *History of the American Nation*, or Montgomery's *Students' American History* will serve to show the kind and amount of work sought. No credit upon certificate will be accorded in this subject for work done below the ninth grade.

(6) *General History. One unit.* Adams's *European History*, Myers' *General History*, or an equivalent.

(7) *Greek and Roman History. One-half unit.* Botsford's *History of Greece and History of Rome*, or equivalents.

(8) *English History. One-half unit.* Montgomery's *Leading Facts of English History*, Larned's *History of England*, or equivalent.

(c) THE MATHEMATICS GROUP.

Algebra and Geometry together count three units.

(9) *Algebra.* Taylor's *Elements of Algebra* or an equivalent.

First, special attention should be given to the four fundamental operations (single and system), factoring, highest common factor, lowest common multiple, fractions and fractional equations, involution, evolution, surds, complex quantities, quadratic equations, solved by factoring, by completing the square and the *general formula*.

Second, a thorough review of the work above named, irrational equations, simultaneous quadratic equations, higher equations solvable by factoring, ratio, proportion, progressions, theory of exponents, binomial theorem for positive integral exponents and use of five-place tables of logarithms. It is recommended that this work be taken in the last year of the high school course.

(10) (*Geometry.*) Venable, White, Wells, Wentworth, Beman and Smith, or an equivalent. Plane geometry with solution of originals. Solid and spherical geometry, with solution of originals given in the text-books named above.

(11) *Plane Trigonometry. One-half unit.* Lyman and Goddard's *Plane Trigonometry*.

(d) THE SCIENCE GROUP.

(12) *Physics. One unit.* Gage's *Elements*, Carhart and Chute, Avery, Appleton. Laboratory training, to accompany the work of the text-book, is strongly recommended, but is not required for the present.

(13) *Physical Geography. One-half unit.* Tarr's, Davis' or Gilbert and Brigham's *Physical Geography*.

(14) *Botany. One-half unit.* Kellerman's *Elementary Botany* and *Spring Flora*, or an equivalent. The course should be divided between spring and fall.

(15) *Chemistry. One unit.* Remsen's introduction to the Study of Chemistry, or its equivalent. For laboratory work, McPherson's *Laboratory Exercises*, arranged to accompany Remsen's Chemistry. The course should consist of at least three recitations and four hours laboratory work weekly. No credit in chemistry will be allowed for preparatory work less thorough than that outlined above.

(16) *Physiology. One-half unit.* Martin's *Human Body* (brief course). No credit will be accorded in this subject for work done below the ninth grade.

(17) *Zoology. One-half unit.* Brigham's. Dana and Rice's (revised), Kellogg's "*Elementary Zoology*"; Davenport's "*Introduction*"; or equivalents, with laboratory or field work.

(18) *Geology. One-half unit.* Brigham's, Dana and Rice's (revised), Tarr's or LeConte's, may be used as texts. The recitations should be supplemented by study of the geological phenomena and formations found in the vicinity of the school.

(19) *Astronomy. One-half unit.* Young's *Lessons*, Comstock's, or equivalent.

(e) THE FOREIGN LANGUAGE GROUP.

(20) *Latin. Two units.* Pronunciation (Roman method); Grammar (an exact knowledge of the inflections); Caesar, the first four books of the *De Bello Gallico*. *Third unit*—Cicero, six orations of Cicero, including *Pro Lege Manilia*. *Fourth unit*—Virgil, the first six books of the *Aeneid* with Prosody; and Prose Composition, Daniell, or Collar, or Jones, or Dodge and Tuttle, entire. Latin cannot be continued as a university study unless at least three units are offered for admission.

(21) *Greek. Two units.* Grammar (Goodwin's preferred) and Prose Composition; or the first 100 lessons in White's *Beginner's Greek Book*. Reading: The first three books of Xenophon's *Anabasis*. A *third* unit will be allowed for preparation in the fourth, fifth and six books of the *Anabasis* and three books of Homer's *Iliad*, and a *fourth* unit for additional reading in Greek.

(22) *German. Two units.* The pupil should be able to read at sight, and to translate, if called upon, by way of proving his ability to read, a passage of very easy dialogue or narrative prose, help being given upon unusual words and constructions; to put into German short English sentences taken from the language of every-day life or based upon the text given for translation, and to answer questions upon the rudiments of grammar as defined below. During the first year the work should comprise: (1) Careful drill upon pronunciation; (2) the memorizing and frequent repetition of easy colloquial sentences; (3) drill upon the rudiments of grammar, that is, upon the inflection of the articles, of such nouns as belong to the language of every-day life, of adjectives, pronouns, weak verbs, and the more usual strong verbs, also upon the use of the more common prepositions, the simpler uses of the model auxiliaries, and the elementary rules of syntax and word-order; (4) abundant easy exercises designed not only to fix in mind the forms and principles of grammar, but also to cultivate readiness in the reproduction of natural forms of expression; (5) the reading of from 75 to 100 pages of graduated texts from a reader, with constant practice in translating into German easy variations upon sentences and in the reproduction from memory of sentences previously read. During the second year the work should comprise: (1) The reading of from 150 to 200 pages of literature in the form of easy stories and plays; (2) accompanying practice, as before, in the translation into German of easy variations upon the matter read, and also in the off-hand reproduction, sometimes orally and sometimes in writing, of the substance of short and easy selected passages; (3) continued drill upon the rudiments of the gram-

mar, directed to the ends of enabling the pupil, first, to use his knowledge with facility in the formation of sentences, and, secondly, to state his knowledge correctly in the technical language of grammar.

Four units. The applicant must offer, in addition to the above, two additional years of instruction in German, including a review of the essentials of grammar. The rapid reading of at least 200 pages of prose; for example, the following: Heyse's *L'Arrabiata*, Riehl's *Der Fluch der Schönheit*, Hauff's *Lichtenstein*. The outlines of German literature should be mastered. In connection with this about 200 pages of German ballads and lyrics should be read. Some book like v. Klenze's *Deutsche Gedichte* might be used. A considerable portion of the prose and poetry should be read extemporaneously. About 50 pages in some prose composition should be translated. Text-books suggested are: v. Jagemainn's, Poll's or Harris' *Prose Composition*. The work in composition should be carried on as far as possible in German. All exercises should be had in this entire course, as far as they may be used without interfering with the thoroughness of the work.

(23) *French. Two units.* Applicants should be able to pronounce French accurately, to read at sight easy French prose, to put into French simple English sentences taken from the language of every-day life or based upon a portion of the French text read, and to answer questions on the rudiments of the grammar as defined below. During the first year the work should comprise: (1) Careful drill in pronunciation; (2) the rudiments of grammar, including the inflection of the regular and the more common irregular verbs, the plural of nouns, the inflection of adjectives, participles and pronouns; the use of personal pronouns, common adverbs, prepositions and conjunctions; the order of words in the sentence, and the elementary rules of syntax; (3) abundant easy exercises, designed not only to fix in the memory the forms and principles of grammar, but also to cultivate readiness in the reproduction of natural forms of expression; (4) the reading of from 100 to 175 duodecimo pages of graduated texts, with constant practice in translating into French easy variations of the sentences read (the teacher giving the English), and in reproducing from memory sentences previously read; (5) writing French from dictation. During the second year the work should comprise: (1) The reading of from 250 to 400 pages of easy modern (nineteenth century) prose in the form of stories, plays or historical or biographical sketches; (2) constant practice, as in the previous year, in translating into French easy variations upon the texts read; (3) frequent abstracts, sometimes oral and sometimes written, of portions of the text already read; (4) writing French from dictation; (5) continued drill upon the rudiments of grammar, with constant application in the construction of sentences; (6) mastery of the forms and use of pronouns, pronominal adjectives, of all but the rare irregular verb forms, and of the simpler uses of the conditional and subjunctive.

Four units. In addition to the above, the applicant should be able to read at sight, with the help of a vocabulary of special or technical expressions, difficult French not earlier than that of the seventeenth century; to write in French a short essay on some simple subject connected with the works read; to put into French a passage of easy English prose and to carry on a simple conversation in French.

(24) *Spanish. Two units.* Applicants should be able to pronounce Spanish accurately, to read at sight easy Spanish prose, to put into Spanish simple English sentences taken from the language of every-day life or based upon a portion of the Spanish text read, and to answer questions on the essentials of the grammar. The first year should be spent mainly on the grammar with easy reading and oral practice; the second devoted to reading good modern Spanish, with grammatical analysis and exercises in writing. The texts read should be chiefly narrative and conversational prose, including one or more prose dramas of the present age.

Four units. In addition to the above, the applicant should be able to read at sight, with the help of a vocabulary of special or technical expressions, difficult Spanish, whether prose or poetry; to write in Spanish a short essay on some simple subject connected with the works read, which shall show a thorough knowledge of syntax; to put into Spanish a passage of easy English prose, and to carry on a simple conversation in Spanish.

ADMISSION TO SPECIAL STUDIES.

Students who desire to pursue special lines of work and do not desire to become candidates for degrees, will be admitted on the following conditions:

1. The regular entrance requirements must be satisfied.
2. But applicants who are not less than twenty-one years of age after obtaining credit for the common English branches and for such other subjects as may be necessary to qualify them for the classes that they wish to enter, may, on the presentation of satisfactory reasons, be admitted to any class in the College; provided, that if any student who has been admitted on these conditions afterwards becomes a candidate for a degree, he shall pass the omitted entrance examinations at least twelve months before the degree is conferred.
3. On entering the College, students desiring to pursue special work are required to lay before the Executive Committee, for approval or modification, a written statement of the end they have in view, the studies proposed for the attainment of that end, and the probable period of attendance. Such students will be held as strictly to their accepted schemes of work as are the regular undergraduates to their course of study.
4. Permission to enter as special undergraduates will be refused to all who fail to give satisfactory evidence of definiteness of purpose, and will be withdrawn whenever the conditions on which it was granted cease to exist.

ADMISSION TO ADVANCED STANDING.

1. Applicants who do not come from some other university or college must first obtain admission to the College in the manner already described. They will then be examined on the undergraduate studies for which they ask credits.
2. Applicants who come from the collegiate department of an approved College, and who bring explicit and official certificates describing their course of study and scholarship, and also certificates of honorable dismissal, will be admitted without examination except such as may be necessary to determine what credit they are to receive here for work done in the college from which they come.

ADMISSION TO GRADUATE WORK.

Graduates of this or other institutions may, on application to the Faculty, enter the University and pursue such lines of work as may be arranged or approved by the appropriate collegiate committee. Such graduate students are subject to all the ordinary regulations (as to fees, attendance, etc.), prescribed for undergraduates.

IN THE COLLEGES OF AGRICULTURE AND DOMESTIC SCIENCE,
ENGINEERING, LAW AND PHARMACY.

Masters degrees are conferred upon graduates in Agriculture, Horticulture and Forestry, Engineering, Law and Pharmacy at the end of not less than one year's residence, which shall be wholly devoted to the completion of an approved course of study in the University. Each is required in addition to present an acceptable thesis upon some subject connected with his course of study.

IN THE COLLEGE OF ARTS, PHILOSOPHY AND SCIENCE.

Registration as a student in the Graduate School is open to all graduates of the College of Arts, Philosophy and Science of this University, and to graduates of other colleges of this University, or of other universities or colleges who satisfy the Administrative Board that they are qualified to pursue with profit the work here offered in the lines of study which they wish to carry on.

Graduates of institutions of which the undergraduate courses of study are not substantially equivalent to the course prescribed in this college for the bachelor's degree will be required to do an additional amount of undergraduate work, or to prolong their term of residence, before being admitted to full candidacy for a higher degree.

Bachelors of this College or of other institutions who do not wish to become candidates for a higher degree may be admitted as special graduate students.

Application for admission as a graduate student should be addressed to the Chairman of the Administrative Board of the Graduate School.

THE COLLEGE OF AGRICULTURE AND DOMESTIC
SCIENCE

The College of Agriculture and Domestic Science offers six distinct courses of study:

- 1. *A four years' Course in Agriculture.*
- 2. *A four years' Course in Horticulture and Forestry.*
- 3. *A two years' Course in Agriculture and Horticulture.*
- 4. *A winter term's Course in Dairying.*
- 5. *A four years' Course in Domestic Science.*
- 6. *A two years' Course in Domestic Science.*

REQUIREMENTS FOR ADMISSION TO THE FOUR-YEAR COURSES.

The following are the requirements:

- A. Two units chosen from the following:
 - English Composition and Rhetoric..... 1 unit
 - English Classics 1 unit
 - English Literature 1 unit
- B. Two units chosen from the following:
 - Civil Government 1/2 unit
 - United States History..... 1/2 unit
 - General History 1 unit
 - Greek and Roman History..... 1/2 unit
 - English History 1/2 unit
- C. Two units as follows:
 - Algebra 1 unit
 - Plane Geometry 1 unit
- D. Two units as follows:
 - Physics 1 unit
 - Physical Geography 1/2 unit
 - Botany 1/2 unit
- E. Two units chosen from the following:
 - Latin 2 units
 - German 2 units
 - French 2 units

The extent and character of the work required in each subject mentioned above is to be found on pages 65-69.

For the present, the *German or French* required for admission may be begun at the University, but without University credits. A student may enter with conditions, amounting to two units, not counting German or French.

Algebra, Plane Geometry, Botany, Physics and Physical Geography are taught as a part of the Short Course in Agriculture. Students may prepare in these subjects for entrance to the four-year courses by entering the Short Course in Agriculture.

*A person twenty-one years of age, or over, who desires to pursue a special line of work and does not desire to become a candidate for a degree, may be admitted by vote of the Executive Committee to such classes as he is qualified to enter; provided, that if he afterwards becomes a candidate for a degree he must pass the requirements for admission at least one year before the degree is conferred. See "Admission to Special Studies," page 69.

REQUIREMENTS FOR SHORT COURSE IN DOMESTIC SCIENCE.

The following are the requirements:

- 1. *Arithmetic, Descriptive and Physical Geography, English Grammar and United States History.*
- 2. *English—(a) Composition and Rhetoric; (b) English Classics.*
- 3. *Algebra.*
- 4. *Plane Geometry.*
- 5. *Civil Government.*
- 6. *General History.*

REQUIREMENTS FOR THE SHORT COURSE IN AGRICULTURE AND THE COURSE IN DAIRYING.

Applicants unless over twenty-one, must pass an examination in *Arithmetic, Geography, Grammar and United States History*, or bring high school or other certificates for those branches. The requirements for English Grammar in the Short Courses may be met by writing a business letter or theme on some practical subject. Applicants who are over twenty-one are admitted without examination.

ADMISSION TO SPECIAL STUDIES.

Students who desire to pursue special lines of work in this college and do not desire to become candidates for degrees, will be admitted on the following conditions, as stated on page 69.

ADMISSION TO ADVANCED STANDING.

For admission to advanced standing in this college see requirements as stated on page 69.

ADMISSION TO GRADUATE WORK.

For admission to graduate work in this college see statement on page 69.

OUTLINE OF THE COURSE IN AGRICULTURE

Degree: Bachelor of Science in Agriculture.

NOTE.—The figure in parentheses following the name of each study indicates the number of that study in its department. The other figure indicates the number of credit hours.

FIRST YEAR
REQUIRED.

First Term	Credit hours	Second Term	Credit hours	Third Term	Credit hours
Agr'l Chemistry (10)	6	Agr'l Chemistry (11)	6	Agr'l Chemistry (12)	6
Principles.		Principles.		Organic.	
Zoology (1)	3½	Zoology (1)	3½	Zoology (1)	3½

Bacteriology (5)	4	Bacteriology (5)	4	Bacteriology (5)	4

ELECTIVE.

Four hours a week through the year chosen from any of the courses given in any of the Colleges of the University upon which the student is qualified to enter, except the College of Law.

†Where credit is received for Elementary French or German, French (2) 4 hours or German (4) 4 hours is required.
* In case a student intends to elect Agricultural Chemistry (6) 4, and Agronomy (14), (24), (4), 5, he may elect Agricultural Chemistry 5 hours in place of Veterinary Medicine (28), (29) and (30), 4½.

THESIS.

At the beginning of the fourth year, each student in this course shall take up as thesis work some special line of inquiry within the field of the degree sought. The subject, together with a written approval of it by the head of the department within which it lies, must be submitted to the President of the University, not later than the fifteenth day of December of the fourth year. The completed thesis must be submitted not later than the second Saturday before Commencement Day.

OUTLINE OF THE COURSE IN HORTICULTURE AND FORESTRY

Degree: Bachelor of Science in Horticulture and Forestry.

FIRST YEAR

REQUIRED.

COLLEGE OF ARTS, PHILOSOPHY AND SCIENCE

The College of Arts, Philosophy and Science offers two courses of study:
The Undergraduate Course.
The Graduate Course.

REQUIREMENTS FOR ADMISSION.

Fifteen units, as described below, are required for *unconditional* admission. No one under twenty-one years of age* will be admitted on less than thirteen units. For *unconditional* admission the candidate must be prepared to offer:

- A. Two units chosen from the following:
- | | |
|---------------------------------------|--------|
| English Composition and Rhetoric..... | 1 unit |
| English Classics | 1 unit |
| English Literature | 1 unit |
- B. Two units chosen from the following:
- | | |
|------------------------------|----------|
| Civil Government | 1/2 unit |
| United States History..... | 1/2 unit |
| General History | 1 unit |
| Greek and Roman History..... | 1/2 unit |
| English History | 1/2 unit |
- C. Three units as follows:
- | | |
|--|---------|
| Algebra, Plane Geometry, and Solid Geometry or
Plane Trigonometry | 3 units |
|--|---------|
- D. Two units chosen from the following, including Physics:
- | | |
|--------------------------|----------|
| Physics | 1 unit |
| Physical Geography | 1/2 unit |
| Chemistry | 1 unit |
| Botany | 1/2 unit |
| Physiology | 1/2 unit |
| Zoology | 1/2 unit |
| Geology | 1/2 unit |
| Astronomy | 1/2 unit |
- E. Six units chosen from the following; or two *extra* units, chosen from the preceding groups, and four units from the following:
- | | |
|---------------|--------------|
| Latin | 2 to 4 units |
| Greek | 2 to 4 units |
| German | 2 to 4 units |
| French | 2 to 4 units |
| Spanish | 2 to 4 units |

The extent and character of the work required in each subject mentioned will be found on pages 65-69.

* A person twenty-one years of age, or over, who desires to pursue a special line of work and does not desire to become a candidate for a degree, may be admitted by vote of the Executive Committee to such classes as he is qualified to enter; provided, that if he afterwards becomes a candidate for a degree he must pass the requirements for admission at least one year before the degree is conferred.

ADMISSION TO SPECIAL STUDIES.

Students who desire to pursue special lines of work in this College will be admitted on the conditions as stated on page 69.

ADMISSION TO ADVANCED STANDING.

For admission to advanced standing in this College see requirements as stated on page 69.

ADMISSION TO GRADUATE SCHOOL.

For admission to the graduate school see statement as found on pages 69, 70 and 84.

REQUIREMENTS FOR GRADUATION.

UNDERGRADUATE COURSES OF STUDY.

The work of the College of Arts, Philosophy, and Science is organized on the group-elective system. Several of the groups correspond in their chief studies and leading aims to the "courses"¹ formerly offered, but with much greater flexibility and much freer opportunities for election. Many other "courses" having equally specific aims are also provided in the groups. The groups, so far as at present arranged, number fourteen. This number will be increased as reasonable demand may arise for new groups. The characteristic features of each group may be judged from its name which is made up of the names of the chief studies of the group. The groups at present recommended are given on page 79.

About one-third of every student's curriculum is prescribed. Each student is required to lay sufficiently broad foundations, during the first two years, in English, in two other languages to be chosen by himself, in mathematics and one science, or in two sciences to be chosen by himself, in history, economics, English, or philosophy. The remaining two-thirds of each student's work is elective; but in order to insure substantial results in the studies thus freely chosen, the student is required to continue two of his first-year studies (any two) through the second year, one of his second-year studies (any one) through the third year, and one of his third-year studies (any one) through the fourth year. In order to guard against the danger of too narrow or too wide a range of work, a maximum and a minimum number of departments is fixed in which the student is allowed to work during any one year. In the first and second years the number of departments thus fixed is four or five; in the third and fourth years the number is three or four.

The degrees conferred at the satisfactory completion of a "course" in the College of Arts, Philosophy and Science will hereafter be the degree of Bachelor of Arts.

All members of the Faculty, but the Dean and the members of the Executive Committee especially, are always glad to advise with the students respecting choice of studies.

REQUIREMENTS.

On satisfactory completion of 180 term hours under the restrictions prescribed below, the student will be recommended for the Degree of Bachelor of Arts.

¹ Arts or Classical, Latin-Philosophy, Modern Language, Philosophy, English Philosophy, General Science, Commerce and Administration, Education, Preparatory to Law, Preparatory to Medicine, Preparatory to Journalism.

The 180 term hours must include the following, amounting to 57 term hours:

- (a) English 1. (2-2-2) 6 term hours.
- (b) Two of the following: (8-8-8) 24 term hours.
 Greek 1 or 7, 8, 9; Latin 1, 2, 3;
 French 1 or 2; German 1 or 4; Spanish 1 or 2.
- (c) Mathematics 31, 32, 33 and 24. (6-6-6) 18 term hours.
 Two of the following
 Mathematics 21, 22, 23; Physics 11 or 2;
 Chemistry 1; Botany 21, 22, 23; Zoology 1;
 Geology 17; Physiology 1.
- (d) One of the following: (3-3-3) 9 term hours.
 European History 1 or 14; American History 1;
 Economics 1 or 2, 3, 4; Philosophy 18, and 19 or 20;
 English 7 or 8.

For the remaining 123 term hours required for graduation the student may elect from any courses announced for students of this College in the "Departments of Instruction," (see pages 110 to 180) as follows:

- American History and Political Science—All courses.
- Anatomy and Physiology—Courses 1, 3, 4, 5, 9, 11.
- Astronomy—All courses.
- Bacteriology—5, 6.
- Botany—3, 4, 6, 7, 8, 9, 10, 11, 13, 16, 17, 18, 19, 21, 22, 23, 24, 25, 26, 27, 32, 33, 28, 29, 30, 31.
- Chemistry—1, 17, 21, 31, 8, 9, 11, 30, 35, 33, 32, 15, 25, 26, 27, 28, 29, 36, 37, 38, 39, 40, 41.
- Civil Engineering—21.
- Domestic Science—1, 2, 3, 10.
- Drawing—7, 10, 14, 17, 18, 19, 24, 25, 26.
- Economics and Sociology—All courses.
- Education—All courses.
- Electrical Engineering—6, 7, 8, 9, 10, 11.
- English—All courses.
- European History—All courses.
- Geology—6, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20.
- German—All courses.
- Greek—All courses.
- Latin—All courses.
- Law—Elementary Law, 5 hours; Contracts, 4 hours; Negotiable Instruments, 5 hours.
- Mathematics—21, 22, 23, 24, 28, 31, 32, 33, 41, 42, 43, 71, 72, 73, 25.
- Mechanical Engineering—34.
- Metallurgy and Mineralogy—2, 3, 5.
- Philosophy—All courses.
- Physics—2, 3, 4, 11, 12, 13, 14, 15, 16.
- Romance Languages—All courses.
- Zoology and Entomology—1, 2, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27.

FIRST YEAR

- (a) Fifteen or sixteen hours each term. This must include all the prescribed work indicated above, including English 1.
- (b) Cadet service (men); Hygiene and Physical Training (women); required throughout the first year.

SECOND YEAR

- (a) Fifteen hours each term. This must include all the prescribed work not done in the first year; the other work of the second year to be in three or four departments of which at least two shall be departments in which the student has worked during the first year.
- (b) Cadet service (men); Hygiene and Physical Training (women); required through the second year.

THIRD YEAR

Fifteen hours each term in three or four departments, at least one to be a department in which the student has worked during the second year.

CATALOGUE

FOURTH YEAR

Fifteen hours each term in three or four departments, at least one to be a department in which the student has worked during the third year.

EXTRA HOURS

A student who has postponed a study in group (b) from the first to the second year, may take sixteen hours in the second year, and by the permission of the Executive Committee a student who has shown exceptional proficiency may be allowed to undertake from one to three extra hours. No extra hours will be granted to a first-year student, or to any student with conditions outstanding.

RULES GOVERNING ELECTIONS

Each student enrolled in the College of Arts, Philosophy and Science must file at the Registrar's office not later than June 1st of each year a complete statement of the courses he wishes to enter the following year. Blanks for this purpose may be obtained of the Registrar.

FIRST YEAR OPTIONS

In order to meet the requirements for graduation, the first-year student must arrange his work on one of the following plans:

I. English; two languages; two sciences, or mathematics and one science, or mathematics alone; deferring until the second year the selection from group (d), above.

II. English; two languages; mathematics or science; one subject from group (d); deferring until the second year a second subject from group (c) above.

III. English; one language; two sciences, or mathematics and one science, or mathematics alone; one subject from group (d); deferring until the second year the second language from group (b), above.

In order to assist the student in his choice of work for the first two years, more specific directions are given below in connection with various natural groupings of studies. *These groups are not mandatory.* The student may make other combinations than those suggested, provided his selection of studies fulfills one of the three options given above. In the second year many other combinations are possible. The time schedule, however, is arranged primarily to fit the combinations recommended. The days and hours at which each study is taught may be found by looking up that study on pages 113 to 185. The title of a group indicates the chief studies of that group. For the work of the first-year student, groups 1 to 6 recommend a complete curriculum. Groups 7 to 14 name only one or two first-year studies, it being understood that the remaining studies of the first year will be chosen as recommended in some one of the first six groups.

STUDY GROUPS

1. *Greek-Latin.* First year: Greek 1 or 7, 8, 9; Latin 1, 2, 3; English 1; and either 6 hours in (c) or 3 hours in (c) and 3 hours in (d). Second year: Greek 7, 8, 9, or 10, 11, 12; Latin 4, 5, 6. This group corresponds to the former Classical or Arts Course. Before choosing the 3 hours in (d) read groups 7 to 12. Before choosing the work in (c) read groups 4 to 6.

2. *Latin-Modern Language.* First year: Latin 1, 2, 3; French 1 or 2, or German 1 or 4, or Spanish 1 or 2; English 1; and either 6 hours in (c) or 3 hours in (c) and 3 hours in (d). Second year: Latin 4, 5, 6; French or German, or Spanish, continued. This group corresponds in general to the Latin-Philosophy Course. Before choosing the 3 hours in (d) read groups 7 to 12. Before choosing the work in (c) read groups 4 to 6.

3. *Modern Language.* Substitute two modern languages for Greek and Latin in group 1 above. *Not more than one new language should be begun in the first year.* The student who offers but one language for admission and who does not desire to continue that language in the University should follow the arrangement of language studies suggested in the next group. This group corresponds in general to the former Modern Language-Philosophy Course. Before choosing the work in (d) read groups 7 to 12. Before choosing the work in (c) read groups 4 to 6.

4. *General Science*. First year: German 1 or 4, or French 1 or 2; Chemistry 1; Mathematics 21, 22, 23; English 1; 3 hours in (d). Second year: Continue Chemistry and one other study of the first year; add a second modern language and one of the following: Physics 2; Botany 21, 22, 23; Physiology 1; Zoology 1; Geology 17; Astronomy 1. This group corresponds in general to the former Course in Science. It also opens the way to a thorough professional course in Chemistry. Before choosing the work in (d) read groups 7 to 12.

5. *Mathematics-Physics-Astronomy*. First year: Mathematics 31, 32, 33, 24; French 1 or 2, or German 1 or 4; English 1; 3 hours in (d). Second year: Mathematics 41, 42, 43; Physics 2, Chemistry 1; English and a second modern language. Third year: Astronomy 1 and 2. Instead of Mathematics 31, 32, 33, 24 in the first year, Chemistry 1 and Mathematics 21, 22, 23, may be chosen, to be followed by Mathematics 28 in the second year. This group emphasizes the sciences named in the title. Before choosing the work in (d) read groups 7 to 12.

6. *Biological Sciences*. First year: French 1 or 2, or German 1 or 4; Chemistry 1; Botany 21, 22, 23, or Zoology 1; English 1; 3 hours in (d). Second year: Botany; Zoology; Physiology 1, or Physics 11, or Geology 17; and a second modern language. This group corresponds to the former Course Preparatory to Medicine. Before choosing the work in (d) read groups 7 to 12.

7. *Economics-History*. First year: Include European History 1, or Economics 1 or 2, 3, 4. Second year: Include American History 1, and the subject named above not taken in the first year, continuing the other. This group corresponds to the former English Philosophy Course and Course Preparatory to Law and Journalism.

8. *History-Political Science-Administration*. First year: Include American History 1, or European History 1 or 14. Second year: Include Political Science 1 or Economics 1 and the subject named above not taken in the first year. European History 4 should be taken later. The student who has not a reading command of French or German should begin French or German not later than the second year, continuing the study during two years. This group corresponds to the former Course in Administration. It opens the way to a thorough preparation for law or the public service.

9. *Commerce-Law*. First year: Include German 1 or 4, and Economic 1. Second year: Include Economics, and American History 1 or Elementary Law. This group corresponds to the former Course in Commerce and opens the way to a thorough preparation for a business career.

10. *Sociology-Philosophy*. First year: Include Economics 2, 3, 4. Second year: Include Sociology, Philosophy 15, 16, 17 and one of the following: American History 1, European History 1, Economics 1 or 5, 6, 7. This group emphasizes the studies regarded as essential in preparation for certain important forms of municipal and social service.

11. *Philosophy-Education*. First year: Include Philosophy 18, 19. Second year: Include Philosophy 20, 21 and Education 1, 2, or 3. This group corresponds to the former Course in Education, opening the way to a thorough study either of philosophy, or of educational problems.

12. *General Literature*. Continue both languages offered for admission, begin a third language in the second year and a fourth in the third year. Include English 7 and European History 14 in the work of the first two years, and take Philosophy 15, 16, 17, or 18, 19, in second or third year.

13. *General Philology*. Greek if not offered for admission should be begun in the first year, and Latin continued. Second year: Include English and German 1 or 4. Note prerequisites for courses 14, 15, in French; 14 to 21 in Germanic languages; 19, 20, 21 in Greek; 12 to 25 in Latin.

NOTICE TO THE CLASS OF 1905

Members of the class of 1905 are required to complete their respective Courses as given in the catalogue of June, 1901, up to the beginning of the second year, and in addition 135 term hours according to the new requirements, including at least 9 term hours in a study in group (d) unless the student has already completed that amount in a study in that group; the degree to be B. A.; or, on request of the student filed before June 1, 1905, the degree of B. Ph. or B. Sc., for which the student has been previously enrolled; provided that no student will be recommended for the degree of B. Sc. unless he shall

have completed at least 60 term hours in Sciences and Mathematics before the Commencement of June, 1905.

THE GRADUATE SCHOOL.

ORGANIZATION.

In order better to meet the rapidly increasing demands made by graduates of Ohio Colleges upon the University for graduate instruction, the Faculty of the College of Arts, Philosophy and Science has recently reorganized the scheme of graduate work. The object of the present plan is to emphasize and utilize in greater degree the facilities which the University affords for advanced students and to secure a more effective and systematic arrangement and supervision of the higher work. Whereas the graduate courses and instruction are organically within the College of Arts, Philosophy and Science, the supervision and administration of all matters connected with the graduate work has been lodged in an Administrative Board, consisting of the Dean and four other members chosen from the Faculty. The Chairman of the Administrative Board is Professor George W. Knight, to whom all communications should be addressed.

ADMISSION

Registration as a student in the Graduate School is open to all graduates of the College of Arts, Philosophy and Science of this University, and to graduates of other colleges of this University, or of other universities or colleges who satisfy the Administrative Board that they are qualified to pursue with profit the work here offered in the lines of study which they wish to carry on.

Graduates of institutions of which the undergraduate courses of study are not substantially equivalent to the course prescribed in this college for the bachelor's degree will be required to do an additional amount of undergraduate work, or to prolong their term of residence, before being admitted to full candidacy for a higher degree.

Bachelors of this College or of other institutions who do not wish to become candidates for a higher degree may be admitted as special graduate students.

Application for admission as a graduate student should be addressed to the Chairman of the Administrative Board of the Graduate School. Full details should be forwarded of the candidate's previous course of study, the degree desired, and the special preparation already had in the major and minor subjects to be pursued.

As the first question to be decided is whether the degree already taken by the applicant is substantially the equivalent of the degree given in this College, full information on this point is required. This should include a general statement of the character of the course pursued, with special reference to the amount of mathematics, science and the languages, including English. Blank forms of application may be obtained from the Registrar of the University.

The second question touches the qualifications of the applicant to enter upon advanced work in the special departments of study in which he desires to work. In order to determine this, a detailed statement is necessary of the previous course of study in the major and minor subjects which the applicant desires to pursue. Official evidence of the above statements must be submitted before the applicant is admitted to full registration.

No graduate student will be registered as a candidate for a higher degree later than October first of the academic year in which he seeks a degree.

COURSE OF INSTRUCTION

For Candidates for Higher Degrees. Unlike the curriculum for undergraduates, the work of candidates for higher degrees is not confined to specific courses of instruction regularly offered in the College. Each student chooses a major study, and one or two minor studies, which must be approved by the

Administrative Board before he enters upon his work. This may consist of attendance upon specified courses or of private research or reading and report thereon. The professors in charge of the studies chosen constitute a special committee, the professor in charge of the major study being the chairman, to arrange the details of the work comprising the major and minor studies, to supervise the work of the student, to examine and pass judgment on the thesis and to conduct the final examination.

Upon the completion of the prescribed course a final examination upon the entire work undertaken for the degree is held under the direction of the special committee, except that at the option of the committee the examination upon the minor or minors may be held whenever such minor or minors are completed.

A thesis upon some subject within the field of the major study is required of all candidates for the doctor's degree; and is also required of all candidates for the master's degree unless waived in individual cases by the Administrative Board on the recommendation of the special committee in charge of the candidate's work.

With the approval of the Administrative Board a candidate for a higher degree may elect specific courses, additional to the major and minor studies. For such election any course offered in the College of Arts, Philosophy and Science is open to candidates who satisfy the head of the department that they are qualified to pursue it with profit. The amount of such additional elective, if any, which the student may take must in each case be determined by the Administrative Board, and it is to be understood that such work, if allowed, will not be credited towards the degree for which the candidate is working.

For Graduate Students not Candidates for a Degree. Graduate students who are not seeking a higher degree are not required to designate major and minor studies, but may select their work with a view to the special purpose for which they are in attendance at the University. Any course of instruction announced in the College of Arts, Philosophy and Science is open for election by graduate students not candidates for a degree who satisfy the head of the department that they are qualified to pursue it with profit. But the list of elections so chosen must in each case be approved by the Administrative Board before the student enters upon his work.

Should such student subsequently desire to become a candidate for a higher degree, the Administrative Board will determine how much, if any, of the work previously done as a graduate student can be counted as a part of the major and minor studies requisite for the degree sought.

REQUIREMENTS FOR HIGHER DEGREES

The University confers two higher degrees, Master of Arts and Doctor of Philosophy, upon the completion of approved courses of resident graduate study.

The Master's Degree. The Degree of Master of Arts is open to those holding the Bachelor's degree who have been admitted to full candidacy as indicated above (see Admission, second paragraph). A residence of at least one year at this University wholly devoted to the work for the degree is required. With the consent of the committee the work of the candidates for the Master's degree may be distributed over more than one year. *The Master's degree is not conferred for study in absentia.*

A holder of the Bachelor's degree will be recommended for the degree of Master of Arts upon the completion of the prescribed term of residence, and passing a final examination in the course of study laid out for him, covering a major and one or two minor subjects approved by the Administrative Board, and unless waived by the same committee, the submission and acceptance of a thesis, on some subject within the field of the major study. The major study must be in advanced work; the minor study or studies may, with the approval of the Administrative Board, be of a more elementary character.

The subject of the Master's thesis must be chosen and approved by December 1st, and the completed thesis must be submitted not later than June 1st. A typewritten copy of the accepted thesis must be deposited with the University before the candidate will be recommended for a degree.

The Doctor's Degree. The degree of Doctor of Philosophy is open to those holding the Bachelor's degree who have been admitted to full candidacy as indicated above (see Admission, second paragraph), and who also fulfill the terms

of this and the next paragraph. At least three years of resident graduate work is required, but on approval of the Administrative Board the first year or the first two years may be spent at another university which offers equivalent graduate work.

Save in the cases of persons who come properly accredited from a graduate school of some other university no student will be enrolled as a candidate for the degree of Doctor of Philosophy until he has been in residence as a graduate student at this University for one year. Formal application for enrollment as a candidate for the degree must be made at least one year before the candidate expects to present himself for final examination. No person will be admitted to candidacy for the degree who does not possess at the time of enrollment a reading knowledge of French and German.

Each candidate for the Doctor's degree must pursue a major study and two allied minor studies, one of which may be within the same department as the major. All of them must be advanced, specialized work. The degree is intended to represent not a specified amount of work, covering a specified time, but long study and high attainment in a special field.

Each candidate is required to prepare a thesis within the field of his major study, involving an extended research or investigation and constituting an original contribution to knowledge. The thesis for the Doctor's degree is one of the most essential factors of the candidate's work, since it measures his accuracy and power of independent investigation. The preparation of an acceptable thesis will usually require the greater part of an academic year.

After the acceptance of the thesis the candidate will be examined by his special committee upon the entire work undertaken for the degree, except that at the option of the committee the examination on the minors may be held whenever such minors are completed.

Each candidate is required to have his accepted thesis printed and to deposit with the University library fifty copies to be used for exchange purposes.

The subject of the thesis for the Doctor's degree must be chosen and approved by the special committee by November 1st of the college year in which the applicant expects to take the degree. The completed thesis must be submitted not later than May 1st. The final examination will be held not later than June 1st.

THE LAKE LABORATORY

COURSES OF STUDY

ZOOLOGY AND ENTOMOLOGY.

(a) *General Zoology.* Laboratory and field course with occasional lectures and quiz, and including dissection or microscopic study of type forms, aquaria and field studies with instruction in collecting and preparing material for laboratory use and permanent collections. Special attention will be given to fishes and food of fishes. Associate Professor Landacre.

(b) *Advanced Courses.* (1) Invertebrate Morphology and (2) Comparative Anatomy of Vertebrates. (3) Embryology. Equivalent to similar courses in the University, and credit of one term may be secured. Prof. Osborn; Associate Prof. Landacre.

(c) *Entomology.* Field and laboratory course, including instruction in collecting, mounting and identifying insects in connection with studies on life history and anatomy. Prof. Osborn; Associate Prof. Hine.

(d) *Ichthyology.* Special course devoted particularly to the lake fishes, their habits and food supplies. Prof. Osborn; Associate Prof. Landacre.

(e) *Ornithology.* Special course in systematic and ecological study of birds of the region. Associate Prof. Hine.

BOTANY

(a) *General Botany.* Laboratory and field course, including the study of type forms, from the lowest to the highest orders. The course will consist of

collecting trips in the field where common species of each class are found, classification of the familiar forms and the study of the structure of interest in connection with the evolution and relationship of each group; also methods of preparation and preservation for future use. Prof. Kellerman.

(b) *Mycology*. A study of Mushrooms and Toadstools, edible and poisonous. Lectures and laboratory work; students will collect specimens, make sketches and colored drawings, and identify specimens. Prof. Kellerman.

(c) *Special Work*. Subject selected may be in Ecology; or some plant or small group in Systematic Botany. Prof. Kellerman; Mr. York.

(d) *Morphology and Taxonomy of Algae*. Field and laboratory work with occasional lectures. Prof. Kellerman.

(e) *Morphology and Taxonomy of Fungi*. Field and laboratory work with occasional lectures. Prof. Kellerman.

For courses c, d and e University credits may be secured.

PHYSIOLOGY

A course in Physiology will be offered by Prof. A. M. Bleile, provided a sufficient number apply for such work to warrant its introduction.

THE COLLEGE OF ENGINEERING

The College of Engineering offers instruction in nine fields of Engineering work.

FOUR YEAR COURSES

Architecture, Ceramics, Chemical Engineering, Civil Engineering, Electrical Engineering, Industrial Arts, Manual Training, Mechanical Engineering, Mining Engineering.

TWO YEAR COURSES

The following short courses do not lead to degrees, but students completing them are furnished with formal certificates setting forth the work they have accomplished:

Clay-working, Industrial Arts and Shopwork, Mining.

REQUIREMENTS FOR ADMISSION TO THE FOUR YEAR COURSES

Applicants to be admitted to full standing in this College must be at least seventeen years of age and must obtain credit by examination or certificate for the necessary number of units chosen from the list given below, subject to the printed restrictions; credit for thirteen units is necessary. Applicants slightly in arrears may be admitted to Freshman work subject to certain entrance conditions as set forth on page 89.

The extent and character of the work required for credit in each subject mentioned in the following list will be found on pages 65-69.

ENGLISH

- A. Two units chosen from the following:
- | | |
|---------------------------------------|--------|
| English Composition and Rhetoric..... | 1 unit |
| English Classics | 1 unit |
| English Literature | 1 unit |

HISTORY

- B. Two units chosen from the following:
- | | |
|------------------------------|----------|
| Civil Government | 1/2 unit |
| United States History | 1/2 unit |
| General History | 1 unit |
| Greek and Roman History..... | 1/2 unit |
| English History | 1/2 unit |

MATHEMATICS

- C. Three units as follows. No conditions are permitted in Mathematics:
- | | |
|---------------------------------|-------------|
| Algebra | 1 1/2 units |
| Geometry, Plane and Solid | 1 1/2 units |

SCIENCE

- D. Two units chosen from the following, including Physics:
- | | |
|--------------------------|----------|
| Physics | 1 unit |
| Physical Geography | 1/2 unit |
| Botany | 1/2 unit |
| Chemistry | 1 unit |
| Physiology | 1/2 unit |
| Zoology | 1/2 unit |
| Geology | 1/2 unit |
| Astronomy | 1/2 unit |

FOREIGN LANGUAGE

E. Four units chosen from the following list, or two units from this group, together with two extra units chosen from Groups A, B and D.

Latin	2 or 4 units
Greek	2 or 4 units
French	2 or 4 units
German	2 or 4 units
Spanish	2 or 4 units

ENTRANCE CONDITIONS

No applicant under twenty-one years of age will be admitted to the College of Engineering who is in arrears more than one unit. No deficiencies are allowed in Mathematics. Thus he must have 12 units out of the 13 required for unconditional admission. An applicant twenty-one years of age or over, who is deficient in foreign language training, will be admitted with this deficiency in addition to the unit permitted above.

For those who have conditions in foreign language to remove, the following arrangements will be made:

1. Those entering with a partial credit in Latin or Greek will be permitted to make good their deficiency by doing an equivalent amount of work in a modern language in the college. For this work they will receive no college credit.

2. Those twenty-one years of age or over, entering with no training in language, will be permitted to make good their deficiency by beginning a modern language in the college. For this work they will receive no college credit.

REQUIREMENTS FOR ADMISSION TO THE SHORT COURSES

Applicants must be not less than seventeen years of age, and, unless they are over twenty-one years of age, must pass examinations in *Arithmetic* and *Geography*, and must be able to write a business letter or a short theme correct in *Grammar* and *Orthography*; or they must present satisfactory certificates showing that they have successfully pursued these subjects elsewhere. In addition, each applicant under twenty-one years of age must present a letter or certificate showing that he has had at least one year's *practical experience* in some industry related to the course which he wishes to pursue.

Applicants over twenty-one years of age are admitted without examination, and without letter or certificate of practical experience.

ADMISSION TO SPECIAL STUDIES.

Students who desire to pursue special lines of work in this College and do not desire to become candidates for degrees, will be admitted on the conditions as stated on page 69.

ADMISSION TO ADVANCED STANDING

For admission to advanced standing in this College see requirements as stated on page 69.

ADMISSION TO GRADUATE WORK

For admission to graduate work in this College see statement on page 69.

COURSES OF STUDY

REQUIREMENTS

Thesis. As a requisite for graduation, each candidate must present an acceptable thesis, embodying the results of a special study. The subject of this study must lie within the field of the degree sought. The subject must be filed with the President of the University (dependent upon the approval of the head of the department), on the official blank provided for the purpose, not later than December 15 of the University year in which the degree is sought. The completed thesis must be submitted to the head of the department concerned not later than the second Saturday before Commencement Day.

The accepted thesis—on standard paper—Buckeye bond 8½ x 11 inches, medium weight—typewritten or printed, neatly bound in black cloth, gilt-lettered on first cover with the thesis title, name of author, degree sought and year of graduation—must be filed not later than the Friday preceding Commencement Day.

FIRST YEAR

The work of the first year is the same for all engineering students in courses leading to a degree.

NOTE—The figure in parenthesis following the name of each study indicates the number of the study in its department. A full description of department work follows this statement of Courses.

First Term	Credit hours	Second Term	Credit hours	Third Term	Credit hours
Mathematics (31)	5	Mathematics (32)	5	Mathematics (33)	5
Algebra.		Trigonometry.		Analytics.

Drill and Gymnasium.		Drill and Gymnasium.		Drill.	

SUMMER TERM IN SHOPWORK.

Students electing courses named below are required to take Shopwork courses in the summer term as follows:

Chemical Engineering—Shopwork (7) and (11), at the close of the first or second year.

Electrical Engineering — } Two from Shopwork (4), (7) and (11), at the close of
Mechanical Engineering — } the first year.

COURSE IN ARCHITECTURE

NOTE—The figure in parenthesis following the name of each study indicates the number of the study in its department. A full description of department work follows this statement of Courses:

Degree: Civil Engineer in Architecture.

FIRST YEAR

(See page 90)

SECOND YEAR

First Term	Credit hours	Second Term	Credit hours	Third Term	Credit hours

THE COLLEGE OF LAW

The College of Law offers two courses of study:
The Undergraduate Course.
The Graduate Course.

REQUIREMENTS FOR ADMISSION

Applicants for admission to the College of Law must be at least eighteen years of age.

FOR STUDENTS WHO ARE CANDIDATES FOR A DEGREE.

For *unconditional* admission the student must be prepared to offer the following:

A. Two units chosen from the following:

English Composition and Rhetoric.....	1 unit
English Classics	1 unit
English Literature	1 unit

B. Two units chosen from the following:

Civil Government	½ unit
United States History	½ unit
General History	1 unit
Greek and Roman History	½ unit
English History	½ unit

C. Three units as follows:

(9) Algebra	1½ units
(10) Plane and Solid Geometry.....	1½ units

D. Two units chosen from the following, including Physics:

Physics	1 unit
Physical Geography	½ unit
Botany	½ unit
Chemistry	1 unit
Physiology	½ unit
Zoology	½ unit
Geology	½ unit

E. Four units chosen from the following; or two extra units chosen from the preceding groups, and two units from the following:

Latin	2 or 4 units
Greek	2 or 4 units
German	2 or 4 units
French	2 or 4 units
Spanish	2 or 4 units

The extent and character of the work required in each subject mentioned above is to be found on pages 65-69.

F. In addition to the foregoing requirements for admission to the work of the College, *each candidate for a degree* must submit satisfactory evidence that he has successfully pursued a course of study equivalent to the first two years of the course leading to a degree in the College of Arts, Philosophy and Science, of this University.

The candidate will be subject to examination in such work. Where this work has been done in a college or university of approved standing, the certificate of such college or university will be accepted as a substitute for such examination.

No applicant for admission to the University will be accepted who is deficient or conditioned in required entrance work representing in the aggregate more than one daily recitation for a year. This rule does not apply to the College work indicated as requisite for a degree. Work of collegiate grade may be made up at any time before the Friday preceding Commencement Day.

A person twenty-one years of age, or over, who desires to pursue a special line of work and does not desire to become a candidate for a degree, may be admitted by vote of the Executive Committee to such classes as he is qualified to enter; provided, that if he afterward become a candidate for a degree he must pass the requirements for admission at least one year before the degree is conferred.

FOR STUDENTS NOT CANDIDATES FOR A DEGREE

Requirements for admission of students who are not candidates for a degree are the same as the requirements for admission of candidates for a degree, except paragraph F.

ADMISSION TO ADVANCED STANDING

Applicants for admission to the Second Year must also present satisfactory evidence of having completed the work of the First Year of the Course in Law, or its equivalent; and applicants for admission to the Third Year must also present satisfactory evidence of having completed the work of the First and Second Years of the Course in Law, or its equivalent.

ADMISSION TO SPECIAL STUDIES.

Persons wishing a knowledge of legal principles *for general business purposes only*, or as a part of a *liberal education*, but not intending to apply for a degree or to take a full course, may be admitted at any time as special students, and may avail themselves of such advantages of the College as they may deem expedient, subject in each case to the approval of the Faculty of the work proposed to be undertaken. Their convenience will not be taken into consideration in arranging classes, and they must make satisfactory arrangements as to fees, hours of recitations, etc., with the Dean.

ADMISSION TO GRADUATE WORK

The Graduate course is open to graduates having the degree of Bachelor of Laws (LL.B.) from Colleges or Schools of Law requiring three years' study of law and having a course of study and requirements equivalent to the undergraduate course of study and requirements of this College. Graduates of any Colleges or Schools of Law, and attorneys-at-law who have been regularly admitted to practice law, may also be admitted to this course.

APPLICATIONS FOR ADMISSION FOR DEGREES

At the time of registration all applicants should present their diplomas and certificates of work done. These certificates should state in detail the studies pursued, the text-books used, the amount of work done in each study, the amount of time devoted to it, the date of the examination, and the rank or standing of the candidate on it. A copy of the course study must accompany the certificate in all cases. These statements should also be accompanied by information as to age, occupation, experience, and work done since leaving school. Blanks for application will be furnished on request made to the Dean.

THESIS

Each candidate for a degree is required to prepare and deposit with the Faculty, not later than the second Saturday before Commencement of the year

of graduation, a thesis of not less than fifteen hundred nor more than five thousand words, exclusive of citations of authorities, upon some subject selected by himself with the approval of the professor giving instruction in that division of law from which the subject is chosen.

The subject of every thesis, with the full name of its author or authors, together with the written approval of it by the head of the department within which it lies, must be filed with the president of the University, on the official blank provided for the purpose, not later than December 15 of the year in which the degree is sought.

All undergraduate theses shall be made on paper of uniform size, 8½ by 11 inches, and of quality and weight equal to that of a sample in the president's office. Theses shall be typewritten or printed, neatly bound in black cloth, and shall be gilt-lettered on the first cover with the thesis title, name of author, degree sought, and year of graduation.

Completed theses must be submitted to the head of the department concerned, not later than the second Saturday before Commencement Day.

A copy of the thesis so prepared and accepted must be filed with the University not later than the Friday preceding Commencement Day.

ADMISSION TO THE BAR

The regular Supreme Court examination for admission to the Bar is held on the first Tuesday in June of each year. Students who have not regularly attended the full course of three years at this College, or who have not been examined here in all the subjects required in the undergraduate course, or who have not presented acceptable certificates from some recognized school or college of law covering the subjects not pursued here by them are required to pass this examination before they can receive the degree of Bachelor of Laws or the certificate mentioned on page 101.

DEGREES

The degree of Bachelor of Laws (LL.B.) will be conferred on all who, being at least twenty-one years of age and having met the requirements necessary for entrance for a degree, pass satisfactorily the examinations at the close of the Senior year, after having done at least that year's work in the College of Law at the University, and having presented a thesis acceptable to the Faculty.

The degree of Master of Laws (LL.M.) will be conferred upon any one who has received the degree of Bachelor of Laws at this University, or other University, or College, or School of Law requiring three years' study of law and having a course of study and requirements equivalent to the undergraduate course of study and requirements of this College, upon completing the studies of the Graduate year, and satisfactorily passing an examination therein, and presenting a satisfactory thesis, the subject of which has been chosen from the work included in the Graduate year.

CERTIFICATES OF WORK DONE

Those who have completed the studies of this College, but have not complied with the requirements for a degree, will be given an official certificate, showing the work done, and signed by the President and Secretary of the Board of Trustees, the President of the University.

No distinction is made between the candidates for a degree and other regular students while in attendance at this College. The two classes of students do the same work, recite together, take the same examinations, are held to the same standards of work and stand on the same footing for admission to the bar.

The distinction between the two classes of students consists entirely in the two following respects:

First—The standard of admission for candidates for a degree is higher than that for those who are not candidates for a degree.

Second—Candidates for degrees who have fulfilled all the entrance requirements and have completed the course of study in a satisfactory manner receive a diploma conferring the degree. Regular students, who are not candidates for a degree, receive under similar circumstances a formal certificate of the completion of the course.

UNDERGRADUATE COURSE OF STUDY

Degree: Bachelor of Laws.

FIRST YEAR

FIRST SEMESTER.		Recitation hours per week	SECOND SEMESTER.		Recitation hours per week
Elementary Law (including Do- mestic Relations, Status and Personal Property)	15	—	Agency	2

Thesis for graduation to count for two hours through second semester.

TEXT BOOKS

First Semester—Constitutional Law (Black); Private Corporations (Taylor); Municipal Corporations (Elliott); Equity Jurisprudence (Merwin); Probate Law (Kinhead).
Second Semester—Ethics (Sharswood); Quasi-Contracts (Keener); Suretyship (Stearns); Trial Practice (Kinhead).

GRADUATE COURSE OF STUDY.**Degree: Master of Laws.****FIRST GROUP****GENERAL AND COMPARATIVE JURISPRUDENCE**

1. **General Jurisprudence. Holland and Particular Topics.**
One hour a week, second semester.
2. **Comparative Jurisprudence. Roman Law; Outlines.**
Two hours a week, first semester.
- History of the Common Law, Pollock & Maitland.**
Three hours a week, first semester.

SECOND GROUP**ENGLISH AND AMERICAN CONSTITUTIONAL HISTORY**

3. **English Constitutional History.**
Three hours a week throughout the year.
4. **American Constitutional History.**
Three hours a week throughout the year.

THIRD GROUP**POLITICAL SCIENCE**

5. **Public International Law.**
6. **History of Treaties and Modern Diplomacy.**
Two hours a week throughout the year. (Not offered in 1904-1905.)
7. **American Diplomatic History.**
Three hours a week throughout the year. (Not offered in 1904-1905.)

FOURTH GROUP**AMERICAN JURISPRUDENCE**

8. **Private Corporations—Cases.**
Two hours a week, first semester.
9. **Railroad Law.**
One hour a week, second semester.
10. **Law of Receivers.**
One hour a week, second semester.
11. **Insurance.**
One hour a week, first semester.
12. **Negligence and Damages. Cases, and Jones on Negligence of Municipal Corporations.**
One hour a week throughout the year.
13. **Cases in Evidence.. Thayer.**
One hour a week throughout the year.
14. **Cases in Equity.**
Two hours a week, second semester.
15. **Remedies and Remedial Rights, including Drafting Pleadings and other legal papers; preparation for trial; and Moot Court.**
One hour a week throughout the year.
16. **Real Property, advanced studies, including examinations of titles and making of abstracts of title.**
One hour a week, second semester.
17. **Circuit and Supreme Court Practice, and Special Proceedings under the Ohio Code of Civil Procedure.**
One hour a week, second semester.
18. **Private International Law (Conflict of Laws).**
One hour a week throughout the year.

The graduate course may be completed in one or two years, according to the desire of the student, with the permission of the Faculty of this College; but at least one year of residence is required.

Subject to the approval of the Faculty, each graduate student must select a major course of study from some one of the groups of subjects specified in the graduate course of study hereinbefore given, and a sufficient number of minor courses to satisfy the requirements of the Faculty.

The major course must occupy at least three hours a week throughout the year, and the minor courses must occupy at least seven hours a week throughout the year.

Graduate students are permitted to select their minor courses from the undergraduate course of study, by permission of the Faculty.

THE COLLEGE OF PHARMACY

The College of Pharmacy offers two courses of study:
The Four Years' Course.
The Two Years' Course.

REQUIREMENTS FOR ADMISSION

To the Four Years' Course:
For *unconditional* admission the candidate must be prepared to offer:

- A. Two units, as follows:
 - English Composition and Rhetoric..... 1 unit
 - English Classics 1 unit
- B. Two units, as follows:
 - Civil Government½ unit
 - United States History.....½ unit
 - General History 1 unit
- C. Three units, as follows:
 - Algebra }
 - Plane and Solid Geometry..... }..... 3 units
- D. Two units, as follows:
 - Physics 1 unit
 - Physical Geography½ unit
 - Botany½ unit
- E. Two units, chosen from the following:
 - Latin 2 units
 - German 2 units

The extent and character of the work required in each subject mentioned above, see pages 65-69.

For the present, the German required for admission may be begun at the University, but without University credits.

No applicants for admission to this College will be accepted who are deficient in required entrance work representing in the aggregate more than three units, not counting the German.

ADMISSION TO THE SHORT COURSE

Applicants, unless over twenty-one, must pass an examination in *Arithmetic, Geography, Grammar* and *United States History*, or bring high school or other certificates for those branches. The requirements for English Grammar in the Short Course may be met by writing a business letter or theme on some practical subject. Applicants who are over twenty-one are admitted without examination.

ADMISSION TO SPECIAL STUDIES

Students who desire to pursue special lines of work in the University, and do not desire to become candidates for degrees, will be admitted on the conditions as stated on page 69

ADMISSION TO ADVANCED STANDING

For admission to advanced standing in this College see requirements as stated on page 69.

ADMISSION TO GRADUATE WORK

For admission to graduate work in this College see statement on page 69.

LONG COURSE

Degree: Bachelor of Science in Pharmacy.

NOTE—The figure in parenthesis following the name of each study indicates the number of the study in its department. A full description of department work follows this statement of Courses.

COLLEGE OF VETERINARY MEDICINE

REQUIREMENTS FOR ADMISSION TO VETERINARY COLLEGE.

Applicants for admission to the College of Veterinary Medicine must be at least seventeen years of age.

I. For applicants for certificate of Veterinary Surgeon: Arithmetic, Geography and Grammar.

II. For applicants who intend to become candidates for the degree of Doctor of Veterinary Medicine:

For *unconditional* admission the candidate must be prepared to offer, besides Arithmetic, Geography and Grammar:

- A. One unit:
English Composition and Rhetoric..... 1 unit
- B. One-half unit:
United States History.....½ unit
- D. Two units:
Physics 1 unit
Physical Geography½ unit
Botany½ unit
- E. One unit, chosen from the following:
Latin 1 unit
German 1 unit

The extent and character of the work required in each subject mentioned above is to be found on page 69.

ADMISSION TO SPECIAL STUDIES

Students who desire to pursue special lines of work in this College will be admitted on the conditions as stated on page 69.

ADMISSION TO ADVANCED STANDING

For admission to advanced standing in this college see requirements as stated on page 69.

COURSE IN VETERINARY MEDICINE

The course of study, depending upon the subjects offered for admission, leads to

- (a) the Degree of Doctor of Veterinary Medicine (D. V. M.) or to
- (b) a Certificate of Veterinary Surgeon (V. S.)

NOTE—The figure in parenthesis following the name of each study indicates the number of the study in its department. A full description of department work follows this statement of Courses.

DEPARTMENTS OF INSTRUCTION

DEPARTMENTS OF INSTRUCTION

1904-1905

AGRICULTURE.

Townshend Hall.

AGRONOMY.

ASSISTANT PROFESSOR MILLER.

2. **Farm Equipment.** Four and one-half credit hours. First term. Lectures and recitations on selecting, laying out and equipping of farms, planning and erecting farm buildings, fencing, road building, farm machinery, farm power, water supply, and farm engineering. Practicums in drawing plans of farms and farm buildings, leveling and laying out drains, comparison of farm machines, and in working out problems in farm mechanics. M., Tu., and Th., at 10 and W., or F., 1 to 4.
4. **Rural Engineering.** Five credit hours. Third term. Lectures, recitations, and practicum on (a) Laying out the farm, including location of buildings and works; division of the farm into fields and yards and the survey and measurement of the same; (b) Construction of buildings and works, including water supply, drains, sewage system, and roads; (c) The construction and use of farm machinery, including the application of mechanical principles in its structure and operation. Special attention will be given to comparisons and tests of various makes and kinds of farm machinery. Th., F., at 9 and M., Tu., 1 to 4.
11. **Elementary Soils.** Four and one-half credit hours. Second term. Lectures and recitations on the formation, kinds, properties and means of improvement of soils, special attention being given to the practical bearings of the subject. Practicum in the laboratory, studying the relation of soils to heat, moisture, air, and fertilizers. Two-year course in Agriculture. M., T., W., at 11 and W., 1 to 4.
12. **Elementary Soils.** Four and one-half credit hours. Second term. Lectures and recitations on the origin, formation, kinds, chemical and physical characters of soils, the factors which control fertility, and the improvement of soils by cultivation, fertilization, drainage, and irrigation. Laboratory studies of the physical properties of soils, their relations to heat, moisture, air, and fertilizers, and the making of mechanical analysis. Four-year course in Agriculture, and Horticulture and Forestry. M., Tu., Th., at 10 and F., 1 to 4 or S., 8 to 11.
14. **Advanced Soils.** Five credit hours. First term. Lectures and recitations on the physical and chemical differences of soils, the factors underlying the study of soil fertility and soil improvement and the consideration of methods of cultivation and cropping as affecting crop-producing power. Laboratory studies on certain physical properties of soils, the nature of soil solution, methods of determining certain soluble salts, and the making of mechanical analyses. Th., F., at 9 and M., Th., 1 to 4.

16. **Field Work in Soils.** Three credit hours. Third term. Lectures on classification and general character of the more important soils of the United States, the methods of establishing soil types, the relation of topography to classification and the consideration of texture affecting adaptability to crops. Practical work in the mapping of field soils, the use of the plane table in field work and in the preparation of reports of soil surveys. Special attention will be given to the work of the Bureau of Soils, U. S. Department of Agriculture, at 10 and S., 8 to 12.
22. **Farm Crops.** Four and one-half credit hours. Third term. Lectures and recitations upon the history, production, marketing, cultivation, harvesting of farm crops. Practicum with growing and dried specimens of crops, including grasses, clovers and other forage crops. M., Th., at 10 and W., or F., 1 to 4.
24. **Agricultural Experimentation.** Four credit hours. Second term. Lectures and recitations on the nature and value of agricultural experimentation, on the history and development of experiment stations and on the methods and character of station work. Seminars on study of experimental work as related to crop production and a detailed study of experimental results with the more important field crops. F., at 10; M., Tu., 1 to 4.
26. **Improvement of Farm Crops.** Five credit hours. Third term. Lectures and recitations on the improvement of farm crops through breeding and selection. Practicums in studying typical specimens of the more important crops, in cross fertilization of wheat, oats, rye, and corn and practice in corn judging. M., Tu., at 9 and Th., 1 to 4.

ANIMAL HUSBANDRY.

PROFESSOR PLUMB, MR. ———

1. **Breeds of Live Stock.** Four and one-half credit hours. First term. Lectures and recitations upon the general consideration of the history, characteristics, and adaptability of horses, cattle, sheep and swine. Practicum in scoring and judging live stock. Two year course in Agriculture. M., W., F., at 9 and Tu., 1 to 4.
2. **Breeds of Live Stock.** Four and one-half credit hours. First term. Lectures and recitations upon the history, characteristics, adaptation, etc., of the different breeds of horses and cattle. Practicum in scoring and judging. M., W., F., at 11, and W., 1 to 4.
3. **Stock Feeding.** Four and one-half credit hours. Second term. Lectures and recitations upon the laws of nutrition, the character of feeds and stuffs, and the methods of feeding different domestic animals. Students are given practical instruction in working out feeding rations, making studies of herds and flocks and reporting thereon. Two year course in Agriculture. M., W., F., at 9 and Tu., 1 to 4; F., 10.
4. **Breeds of Live Stock.** Four and one-half credit hours. Third term. Lectures and recitations upon the history, characteristics, adaptation, etc., of breeds of sheep and swine. Practicum in scoring and judging. M., W., F., at 11 and W., 1 to 4.
5. **Principles of Breeding.** Four and one-half credit hours. Third term. Lectures and recitations upon the laws of heredity and the various principles underlying animal breeding. Students are given considerable practice in studying the methods of breeding associations, tracing out pedigrees of prominent farm animals, access being given to many herd, flock, and stud books. Two year course in Agriculture. M., W., F., at 9 and Tu., 1 to 4.

- 6 **Principles of Breeding.** Four and one-half credit hours. Second term. Lectures and recitations upon the laws of heredity and their practical applications. Practicum in studying animal form and in writing and tracing pedigrees; illustrating methods and studying inneritance. M., W., F., at 11, and W., 1 to 4.
- 8 **Stock Feeding.** Four credit hours. First term. Lectures and recitations upon the laws of nutrition, the character of food stuffs, and the methods of feeding different kinds of domestic animals. Considerable practice is given in calculating digestibilities, nutritive ratios, and feeding standards. M., Tu., Th., F., at 10.
- 10 **Hygiene and Management.** Four credit hours. Second term. Lectures and recitations upon the care and management of herds and flocks. M., Tu., Th., F., at 10.
- 12 **Animal Conformation and Stock Judging.** Four and one-half credit hours. First term. Lectures, recitations, and laboratory work dealing with advanced students in studying animal conformation, with considerable practical work in judging. Special consideration will be given to market types of stock and their relationship to values. M., W., F., at 8 and Th., 1 to 4.
- 13 **Dairy Cattle Feeding.** Three credit hours. Special Course in Dairying, proper feeding rations. These lectures are of importance to the farmer. These are lectures upon the character of food stuffs, the relation of food to the animal, and the kind and quantity of food for the best milk production. The students are required to calculate digestibilities and nutritive ratios of different foods and to arrange therefrom proper feeding rations. These lectures are of importance to the farmer who produces the milk or to the factoryman who wishes to be intelligent on the subject and help his patrons.
- 14 **Live Stock Markets and Commerce.** Four and one-half credit hours. Second term. Lectures and recitations upon the methods of preparing and shipping stock to local and distant markets; of the various available markets and the relationship of prices to grades of stock; of stock yard and packing house methods; of export trade and methods of shipping abroad, etc. Practicum making up comparative market reports and inspecting transportation agencies, stock yards and packing houses. M., W., F., at 8, and Th., 1 to 4.
- 15 **Dairy Breeds and Breeding.** Four credit hours. Under this subject there are lectures upon the history, adaptation, care and management of different breeds of dairy cattle. By means of the score card with the animals before them, the students are taught to judge animals for dairy purposes. There are lectures on the principles of breeding and the student is required to trace and expand pedigrees and to understand the methods of recording animals as practiced by different breeders' associations. Special course in Dairying.
- 16 **Wools and Other Animal Fibers.** Four and one-half credit hours. Third term. Lectures and recitations upon the sources of supply of wools and other animal fibers, methods of shearing, market classification, preparation and shipping, relative values of fibers of breeds and crosses. Practicum in shearing, classifying wools, making laboratory study of fibers, etc. M., W., F., at 8, and Th., 1 to 4.
- 18 **Types and Breeds of Animals.** Five credit hours. Second term. Lectures and recitations upon the types and breeds of stock, dealing with conformation and its relationship to type and breed development. Practicum in judging stock. Course in Veterinary Medicine.

CATALOGUE

DAIRYING.

PROFESSOR DECKER, MR. HERRICK, MR. CROWNER, MR. MANGOLD.

1. **Laboratory in Butter Making and Cheese Making.** Six credit hours, First year. Practice four afternoons each week in testing milk as to purity, content of butter fat; in the use and care of centrifugal separators and of different makes and other creamery and dairy devices; and in the making of butter and cheese by the most improved methods. The student is required to follow the milk from the time it enters the laboratory until the finished product leaves it, and to determine the points in the process where losses occur and the reasons therefor. First year. Special course. M., Tu., W., Th., 1 to 5.
3. **Lectures in Butter Making and Cheese Making.** Three credit hours. Lectures and recitations on methods of creaming; factors which control the thoroughness of the separation of cream, and the manufacture of butter and cheese and sanitary milk supply. First year. Special course. Tu., Th., F., at 9.
2. **Dairy Laboratory.** Six credit hours. The preparation of starters, use of Wisconsin curd test, churning and working of butter and the manufacture of cheese and fancy products. Second year. Special course.
4. **Dairy Lectures.** Two credit hours. The manufacture of butter and cheese, and factory management. Second year. Special course.
12. **Elements of Dairying.** First term or third term. Lectures and laboratory work. Five hours' credit. Tu., Th., 8, and M., Tu., 1 to 4 or F., 1 to 4.
14. **Butter Making.** Five credit hours. Lectures and laboratory work. Tu., Th., 8 and F., 1 to 4 and S., at 11.
This course must be preceded by course (12).
16. **Cheese Making.** Third term. Lectures and laboratory work. Five hours' credit. Tu., Th., at 8 and M., Tu., 1 to 4 or F., 1 to 4 and S., 8 to 11
This course must be preceded by course 12.
18. **Advanced Dairying.** Two credit hours. Elective three terms. Seminar and laboratory work. A study of experiment station work and other dairy literature with experiments in laboratory to verify statements found. Practice in producing fancy dairy products. Hours to be arranged.
19. **Milk Inspection.** One credit hour. First term. One lecture or laboratory period a week. Required in the course in Veterinary Medicine.
20. **Household Dairying.** Two credit hours. Third term. This course will treat of the composition and nature of milk and its products, their purity and adulterations and their physical and chemical properties in cookery. Elective in the course in Domestic Science. Tu., at 11, W., 1 to 3.

RURAL ECONOMICS.

PROFESSOR PRICE.

2. **Farm Management.** Four credit hours. First term. Lectures and recitations upon farm management, farm accounts, and the cost and relative profits of grain farming, dairy farming, stock farming, and general farming. M., Tu., Th., F., at 10.
4. **History of Agriculture and Literature of Agriculture.** Four credit hours. Second term. Lectures and recitations upon the history of Agriculture; the literature of Agriculture, including current periodicals. M., Tu., Th., F., at 10.

6. **Agricultural Economics.** Four credit hours. Third term. Lectures and recitations upon the distribution and production of agricultural products; ownership, tenure and rent of farm lands; transportation and marketing of farm products; farm labor and wages. M., Tu., Th., F., at 10.

AGRICULTURAL CHEMISTRY

Townshend Hall, Rooms 29, 30, 34 and 35.

PROFESSOR WEBER, ASSOCIATE PROFESSOR VIVIAN, MR. HIRSCH.

10. **Principles of Chemistry and Chemical Nomenclature.** Six credit hours. First term. Lecture and recitations on elementary inorganic chemistry and laboratory experiments with the elements studied in class, using McPherson's Laboratory Note Book as a guide. Recitations, M., W., F., at 9; Laboratory, Sec. I: M., Tu., 1 to 4; Sec. II; Tu., W., 1 to 4; Sec. III, W., F., 1 to 4.
11. **Principles of Chemistry and Chemical Nomenclature.** Six credit hours. Second term. Lectures and recitations on elementary inorganic chemistry. Laboratory work during first half of term continuation of first term; second half qualitative analysis, using Weber's Select Course in Qualitative Analysis as a guide. Recitations, M., W., F., at 9; Laboratory, Sec. I: M., Tu., 1 to 4; Sec. II Tu., W., 1 to 4; Sec. III: Tu., W., 1 to 4.
12. **Organic Chemistry.** Six credit hours. Third term. Lecture and recitations on elementary organic chemistry and laboratory work in quantitative analysis, using Weber's Select Course in Qualitative Analysis as a guide. Recitations, M., W., F., at 9; laboratory, Sec. I, M., Tu., 1 to 4; Sec. II, Tu., W., 1 to 4; Sec. III, W., F., 1 to 4.
1. **Elements of Inorganic Chemistry.** Six credit hours. First term. Lectures and recitations on non-metals and laboratory experiments with the elements studied in class, using McPherson's Laboratory Note Book as a guide. Tu., Th., F., at 10 and M., Tu., 1 to 4.
8. **Elements of Organic Chemistry.** Six credit hours. Second term. Lectures and recitations during first half of term on metals; during second half of term lectures on organic chemistry. Laboratory work during first half of term continuation of first term; second half qualitative analysis, using Weber's Select Course in Qualitative Analysis as a guide. Tu., Th., F., at 10 and M., Tu., 1 to 4.
9. **Application of Chemistry to Agriculture.** Six credit hours. Third term. Lectures and recitations embrace the following topics: Ingredients of plants, organic and inorganic, essential and non-essential; sources of plant food, air and soil; nature of soil, mechanical portion, nutritive portion, assimilable and reserve plant food; soil exhaustion and amelioration; barn-yard manure, its sources, composition and preservation, commercial fertilizers, their rational use and methods of determining the needs of soils, feeding stuffs and feeding rations. Laboratory work consists of qualitative analysis, using Weber's Select Course in Qualitative Analysis as a guide. Tu., Th., F., at 10 and M., Tu., 1 to 4.
13. **Lectures and Laboratory.** Five credit hours. Three terms. Two lectures and three laboratory periods throughout the year. Lectures as in 9, and on the industries related to agriculture, as the manufacture of sugar from cane, sorghum and beets; the manufacture of starch, glucose and dextrine; the nature and manufacture of vinegar, as fruit, malt and distilled vinegar; the manufacture of alcohol, malt liquors and wines. Laboratory practice Monday and Tuesday afternoons or Thursday and Friday afternoons, and Thursday 8-10 a. m., consists of the official methods of analyzing fertilizer, feeding stuffs, milk,

butter and cheese; the analysis of sugar, syrup and sugar producing plants, as beets; determination of cane sugar and milk sugar by means of the polariscope. The analysis of flour, fruits, vegetables, condiments, etc. The analysis of vinegar, as cider, malt and distilled vinegar; the analysis of spirituous and fermented liquors.) Students of other departments may also elect three hours through the year in this course. For students in the courses in Agriculture and Horticulture and Forestry: Recitation, Tu., Th., at 9; Laboratory, Th., F., 1 to 4.

14. **Laboratory and Lectures.** First and second term. Course in Domestic Science. The laboratory practice embraces as much as possible of the work in quantitative analysis of simple salts and foods as mentioned in course 13. Tu., at 10; Th., F., 2 to 4.
6. **Laboratory.** Three to five credit hours. Three terms. The work of this course consists of the complete sanitary analysis of water, for which a special room detached from the main laboratory has been fitted up; the complete analysis of soils; the various official methods of determining nitrogen, potash and phosphoric acid; the analysis of oils and fats; complete analysis of grains; the analysis of tea and coffee; the examination of foods, syrups, spices, condiments, flavoring extracts for adulteration; also any work of previous courses, which for lack of time, may not have been completed. Th., at 10 and W., Th., 1 to 4.
7. **Chemistry of Milk and Milk Testing.** Four credit hours. Second term. For dairy students. The lectures include a short course in elements of chemistry. The laboratory work covers the following manipulations: The Babcock method of determining fat in pure milk, skimmed milk, cream, sour milk and cheese; the testing of instruments. (milk bottles, lactometers, etc.). The calculation of the composition of milk by Fleischman and Babcock formulae; the determination of preservatives in milk; the detection of artificial colors in butter and oleomargarine, etc. W., Th., at 11, F., 2 to 4, S., 8 to 10.
15. **Advanced.** Four credit hours. Three terms, optional. Four laboratory periods. Laboratory work consists of official methods of analysis of soils, sanitary and complete water analysis, etc. Hours to be arranged.

AMERICAN HISTORY AND POLITICAL SCIENCE

University Hall, Rooms 27, 18 and 48.

PROFESSOR KNIGHT, ASSISTANT PROFESSOR TUTTLE, MR. SPENCER.

I American History

The courses in American history are of four classes: (a) introductory (course 1), designed as a general foundation course in American political and social history; (b) advanced, (courses 2, 4, 6, 7) designed to cover distinct periods or phases of American historical development; (c) special, (courses 8, 9, 10, 12, 13) involving the deeper study of special subjects or movements, and designed to train and employ the student's faculty of investigation; and (d) a teacher's course, (course 11).

Course 1 must precede all other courses and should therefore be taken in either the first or the second year. After this is completed students may elect at their pleasure from the courses in the advanced group (courses 2, 4, 6, 7), but it is desirable that election should be made for an entire year and not for single terms. Students who intend to go far with their studies in American history should take English history (European history 14) early in their course. American history 8 and 9 may be taken in connection with any of the above advanced group, but other courses of the special group are open only to fourth year and graduate students.

1. **Political History of the United States.** Three credit hours. Three terms. A general course covering the political and social history from the earliest colonial times to the present. Text-books, prescribed readings and topical reports. Thwaites's *The Colonies*; Hart's *Formation of the Union*. Wilson's *Division and Reunion*. Sec. I: M., W., F., at 8; Sec. II: M., W., F., at 9; Sec. III: M., W., F., at 1. Assistant Professor Tuttle, Mr. Spencer.

This must precede all other courses in American history.

2. **The Formation of the United States, 1600-1820.** Three credit hours. Three terms. An advanced course covering the political and institutional development of the colonies and the establishment of a federal union. First term, the colonies 1600-1774; second term, revolution and constitution-making, 1774-1789; third term, the development of democratic national and state governments, 1789-1820. Lectures, reading and reports. M., W., F., at 2. It is desired that this course be preceded or accompanied by European History 14 or 4. Mr. Spencer.

Given biennially. Not offered in 1904-1905.

4. **The Slavery Struggle and Its Results, 1800-1885.** Three credit hours. Three terms. An advanced course comprising a study of the development and downfall of slavery in the United States, and its relation to and influence upon government, legislation and political organization. First term, development and status until the Compromise of 1850; second term, secession and civil war, 1850-1865; third term, reconstruction and its effects, 1865-1885. Lectures, readings and special reports. M., W., F., at 11. Professor Knight.

6. **American Diplomacy, Foreign Relations and Expansion.** An advanced course comprising an historical study of the foreign relations, problems, and policy of the United States, including the acquisitions of territory and their effects on our institutions and government. Lectures, readings and special reports. Three hours credit, throughout the year. M., W., F., at 11. Professor Knight.

Given biennially. Not offered in 1904-1905.

7. **History of Political Parties, 1774-1900.** Three credit hours. Three terms. A detailed study of the origin, development and structure of political parties in the United States with particular attention to their social composition, geographical distribution, organization and political methods. First term, the Federalist and Republican parties, 1774-1820. Second term, Jacksonian Democracy, Whigs and Republicans, 1820-1860. Third term, the present parties, 1860-1900. Lectures, parallel reading, quizzes and reports. M., W., F., at 2. Mr. Spencer.

8. **Historical Material and Its Use.** One credit hour. First and second terms. Lectures on elementary historical bibliography and the use of American historical documents with practical exercises. Especially designed for students intending to do advanced work in American history and political institutions. W., at 3. All students specializing in American history and political science should take this course and the one following. Assistant Professor Tuttle.

9. **Topical Research in American History.** One credit hour. Third term. The preparation of/special topics on the basis of the work of course 8. W., at 3. Assistant Professor Tuttle.

Open to those who have had course 8.

10. **Seminary for Research Work in American History and Political Science.** Two credit hours (at one meeting). Three terms. M., 3 to 5. Professor Knight.

Open on permission of the head of the department to those who have had two courses in American history (in addition to American history 8-9), and at least one course in political science.

11. **The Teaching of American History.** One credit hour. Second and third terms. A course in methods of teaching American history, especially in the secondary schools, designed for advanced students preparing themselves as teachers and expecting to ask this department for recommendation as to their qualifications. Th., at 3. Professor Knight.
12. **Graduate Seminary in American History and Institutions.** Two credit hours. Three terms. Some limited field will be made in the subject of co-operative study each year by the seminary. So far as possible the investigation will be in the sources. The subject for 1904-1905 will be the Revolutionary Period, with special reference to the diplomatic history from 1776 to 1800. Hours to be arranged. Professor Knight.
Open only to graduate students.
13. **Graduate Courses.** Under this number courses are arranged at the beginning of the year to meet the needs of individual students desiring to pursue graduate work in American history. Professor Knight.

II Political Science

The work in political science should be begun with course 1, but some other courses may be taken in connection with it. The order in which the other courses should be taken will vary according to the student's historical training. In all cases the work is closely dependent upon historical knowledge, the amount and kind varying for different courses. So far as possible a suggestion on this point is given below in connection with each course.

1. **Modern Political Institutions.** Three credit hours. Three terms. Introductory course in political science, comprising a study of the political and administrative systems of leading countries with particular reference to their actual operation. First term, the United States government and the state governments. Second term, England, France, Italy, and countries with government of the parliamentary form. Third term, German, Swiss, and other federations. Lectures, quizzes, parallel readings and reports. Bryce, American Commonwealth, and A. L. Lowell, Government and Parties in Continental Europe, cover the ground of this course. Woodrow Wilson, The State is an alternative. M., W., F., at 9 Mr. Spencer.

Prerequisite: American History 1, or European History, 1 or 14.

4. **International Law.** Two credit hours. First and second term. A study of public international law. Text book and lectures, Lawrence's Principles of International Law. Tu., and Th., at 10. Professor Knight. Open to those who have had one course in European History and one course in American History.
5. **History of Treaties and Modern Diplomacy.** Two credit hours. Third term. A study of the leading treaties of modern times, with special reference to their bearing on international law and the political relations of the leading nations. Lectures accompanied by collateral reading and special reports. Tu., Th., at 10. Professor Knight.

Course 5 must be preceded by course 4, with which it forms a year's consecutive work.

6. **The Government of Dependencies.** Two credit hours. First term. A study of the government of dependencies by the home country, and of the political and legal relations between them. Lectures, assigned reading and special reports. Tu., Th., at 11. Professor Knight.
7. **Colonial institutions.** Two credit hours. Second term. A study of local institutions, civil service and administration, and the development of local self-government in the leading colonies of to-day. Lectures, assigned reading and special reports. Tu., Th., at 11. Professor Knight.

Course 7 must be preceded by course 6.

8. **Municipal Government.** Two credit hours. Third term. A study of the development, status and government of modern municipalities, and a comparative study of recent American municipal charters. Lectures, collateral reading and special reports. Tu., Th., at 11. Professor Knight.
9. **Origin and Development of the United States Constitution.** Two credit hours. Third term. An historical study of the origin, in English, colonial and state institutions, of the constitution and its development by interpretation and exposition by the Supreme Court in selected leading cases. Lectures, assigned reading, discussions and special reports. Tu., Th., at 2. Assistant Professor Tuttle.
10. **Theories of Government, Sovereignty and Political Liberty.** Two credit hours. Three terms. An introductory survey of the origins of political theories, followed by an historical study of the political doctrines expressed in American constitutions and a critical examination of these doctrines in the light of recent European and American thought. Lectures, reports and discussions. Tu., Th., at 9. Mr. Spencer.

Open to graduates and qualified undergraduates who have obtained the instructor's permission.

12. **Comparative Politics.** Two credit hours. Three terms. A study of parties and political methods in legislation, administration and elections in the United States, Great Britain and its colonies, France, Germany, and the leading European countries. Lectures, quizzes, parallel reading and reports. M., F., at 10. Mr. Spencer.

Open only to those who have taken Political Science 1.

13. **Administration in the United States.** Two credit hours. Three terms. This course is a study of the government in action. The first term will be given to a study of Federal administration, including the president and the executive departments. The second term will cover State administration, including the governor, the executive departments and the political sub-divisions of the State. The third term will be given to a study of Administration in Ohio. Tu., Th., at 3. Assistant Professor Tuttle.

ANATOMY AND PHYSIOLOGY

Biological Hall, Rooms 12 and 20

PROFESSOR BLEILE, MR. DRESBACH, MR. SEYMOUR, MR. BEER.

1. **Human Anatomy and Physiology.** Three credit hours. Three terms. Lectures, recitations and laboratory work. This course must be preceded or accompanied by a course in chemistry. Sec. I, M., W., F., at 8. Mr. Dresbach. Sec. II: M., Th., F., at 10. Professor Bleile.
2. **General Physiology.** Three credit hours. First term. Lectures, recitations and demonstrations. M., W., F., at 9. Mr. Dresbach.
3. **Chemical Physiology.** Three hours credit. Third term. Th., F., 1 to 4. Professor Bleile.
4. **Histology and Histo-Chemistry.** Five credit hours. Three terms. M., Tu., W., 1 to 4. Professor Bleile, Mr. Dresbach, Mr. Seymour, Mr. Beer.

The work of this course is also offered in the summer by Mr. Dresbach, beginning June 29th and continuing six weeks.

5. **Microscopy and Urinary Analysis.** Two credit hours. Third term. Lectures and laboratory work. Hours to be arranged. Professor Bleile, Mr. Dresbach. M., Tu., at 9.
9. **Physiological Laboratory.** Three credit hours. Three terms. Laboratory hours to be arranged. Professor Bleile.
11. **Physiological Laboratory.** Five credit hours. Three terms. Hours to be arranged. Professor Bleile.
14. **Comparative Physiology.** Lectures and recitations. Three credit hours. Second, third and first terms. This course must be preceded or accompanied by a course in chemistry. Professor Bleile.

ANCIENT ART

(See Greek Language and Literature.)

ARCHITECTURE AND DRAWING

ARCHITECTURE

PROFESSOR BRADFORD, ASSOCIATE PROFESSOR FRENCH.

4. **Specifications.** Two credit hours. Lectures and practice in preparing Specifications for Architectural Structures. (Course in Architecture, fourth year, second term, Tu., at 11, W., 1 to 3.) Professor Bradford.
5. **Decoration and Ornament.** Three credit hours. Lectures on the different styles of carved ornaments and decorative color. The practice part of this subject will be incorporated in Clay-Modeling and Designing. (Course in Architecture, third year, first term, M., W., at 9; F., 9 to 11.) Professor Bradford.
6. **Estimates and Superintendence.** Four credit hours. Lectures and practice in preparing estimates for structures designed in Courses 11, 12, 13, and 21, and the duties of superintendence. (Course in Architecture, fourth year, third term, M., W., at 8; W., 1 to 5.) Professor Bradford.
7. **Heating, Ventilating and Plumbing.** Five credit hours. Lectures and experimental work. Lectures on the principles and methods of heating and ventilating and of sanitary plumbing. Experimental work is carried on with the heating and ventilating plants in the different University buildings. (Course in Architecture, fourth year, second term, M., W., F., at 8. M., Tu., 1 to 3.) Professor Bradford.
9. **History of Architecture.** Three credit hours. Lectures illustrated by lantern slides. (Course in Architecture, second year, first term, M., W., F., 11.) Professor Bradford.
10. Continuation of 9. (Course in Architecture, second year, second term, M., W., F., at 11. Professor Bradford.
11. Continuation of 10. (Course in Architecture, second year, third term, M., W., F., at 11.) Professor Bradford.
12. **Architectural Drawing.** Two credit hours. Drawing architectural ornament, details of orders and styles, with the special object of impressing upon the student's mind the architectural characteristics considered in Course 9. (Course in Architecture, second year, first term, W., Th., 2 to 4.) Professor Bradford.
13. Continuation of 12. (Course in Architecture, second year, second term, W., Th., 2 to 4.) Professor Bradford.

14. Continuation of 13. (Course in Architecture, second year, third term, W., Th., 2 to 4.) Professor Bradford.
15. Designing. Four credit hours. Lectures and practice in designing structures adapted to modern requirements. (Course in Architecture, third year, first term, W., Th., 1 to 4. F., 1 to 3.) Professors Bradford and French.
16. Designing. Two credit hours. Lectures and practice. (Course in Architecture, third year, second term. Th., F., 1 to 3.) Professors Bradford and French.
17. Designing. Four credit hours. Lectures and practice. (Course in Architecture, third year, third term, W., Th., 1 to 4. F., 1 to 3.) Professors Bradford and French.
18. Designing. Four credit hours. (Course in Architecture, fourth year, first term, Th., at 10. W., Th., 1 to 4.) Professor Bradford.
19. Designing. Four credit hours. (Course in Architecture, fourth year, third term, Th., at 11. Th., F., 1 to 4.) Professor Bradford.
20. Thesis. Five credit hours. Original designed to be accompanied with written description, specifications and estimate. (Course in Architecture, fourth year, third term.) Professors Bradford and French.
21. Architecture of Tall Skeleton-Constructed Buildings. Two credit hours. (Course in Architecture, fourth year, second term, Th., 11; F., 1 to 3. Professor Bradford.
22. Architectural Composition. Two credit hours. (Course in Architecture, third year, first term.) M., at 10; Tu., 9 to 11.
23. Architectural Designing. Four credit hours. (Course in Architecture, third year, second term.) M., W., 1 to 5. Professor Bradford.

DRAWING

Office, Hayes Hall, Room 23 or 27

PROFESSOR BRADFORD, ASSOCIATE PROFESSOR FRENCH, MR. LEWIS, MR. MARTIN,
MR. VOSSKUEHLER, MR. TIDBALL.

2. Lettering. Three credit hours. Practice and occasional lectures. (Short Course in Industrial Arts, first year; Short Course in Mining, second year, first term, Th., F., 1 to 4. Must be accompanied or preceded by 24 or 27.) Associate Professor French and Mr. Vosskuehler.
5. Technical Drawing. Three credit hours. Rules and Methods for making working drawings in machine design to represent correctly form and dimensions for shop use, and for tracing and blue-printing the same. This course must be preceded by Course 35. (Courses in Electrical and Mechanical Engineering, Industrial Arts and Manual Training, third year, first term, M., Tu., 1 to 4, or Th., F., 1 to 4.) Associate Professor French.
7. Photography. Two credit hours. Lectures: Optics of photography, chemistry of photography, exposing and developing, printing, lantern slides, orthochromatic photography and some of the applications of photography. Practice: Outdoor, interior, instantaneous and flash-light photography, copying, lantern slides and printing. (Course in Architecture, third year, first term, M., Tu., 1 to 3; Courses in Civil and Mechanical Engineering, third year; Courses in Ceramics and Mining Engineering, fourth year, third term, M., Tu., 1 to 3; or Th., F., 1 to 3.) Elective in first term of Arts Course. Professor Bradford and Mr. Lewis.

10. **Mechanical Drawing.** Three credit hours. Second term. Lectures and practice. Elementary mechanical drawings, lettering and working drawings. W., Th., 1 to 4; M., Tu., 1 to 4; F., 1 to 4 and S., at 11. Associate Professor French.
11. **Mechanical Drawing.** Five credit hours. Lectures and practice. (Course in Clay-working, second year, third term, W., F., at 9. Th., F., 1 to 4. Mr. Vosskuehler.
14. **Pen Drawing.** Two credit hours. Must be preceded by Course 28. (Course in Architecture, second year, first term, M., T., 2 to 4.) Mr. Lewis.
15. **Technical Drawing.** One and one-half credit hours. Second and third terms. Lectures and practice. House-planning. This course preceded by Course 20. M., 1 to 4. Associate Professor French.
16. **Technical Drawing.** Three credit hours. Third term. Lectures and practice. Designing, preparing working drawings and specifications for structures related to agriculture. This course preceded by Course 10. M., Tu., 1 to 4. Associate Professor French.
17. **Practice and Occasional Lectures.** First term. Lectures on color standards, color theory, color harmony, color appearances, tone and graduation, atmosphere and values. Practice in color work, either water or oil color. Elective in Arts Course. Mr. Martin.
18. **Water color painting.** Three credit hours. Must be preceded by Course 28. (Course in Architecture, fourth year, second term, Tu., Th., 8 to 11.) Elective in Arts Course. Mr. Martin.
19. **Water Color Painting.** Two credit hours. Must be preceded by Course 18. (Course in Architecture, fourth year, third term, Tu., Th., 8 to 10.) Elective in Arts Course. Mr. Martin.
20. **Mechanical Drawing.** One and one-half credit hours. First term. Lectures and practice. Elementary mechanical drawing and lettering. Elective in Arts Course. M., 1 to 4. Associate Professor French.
21. **Technical Drawing.** Two credit hours. Must be preceded by Course 34. (Course in Chemical Engineering, third year, first term, Tu., Th., 8 to 10.) Associate Professor French and Mr. Vosskuehler.
22. **Technical Drawing.** Two credit hours. Must be preceded by Course 21. (Course in Chemical Engineering, third year, second term, W., 1 to 5.) Associate Professor French and Mr. Vosskuehler.
23. **Technical Drawing.** Two credit hours. Must be preceded by Course 22. (Course in Chemical Engineering, third year, third term, M., 1 to 5.) Associate Professor French and Mr. Vosskuehler.
24. **Free Hand Drawing.** One credit hour. Pencil drawing from models and plaster casts. Practice and occasional lectures. (Short course in Industrial Arts, first year, first term, W., 1 to 3.) One or two credit hours. Elective in Arts Course. Messrs. Lewis and Tidball.
25. **Free Hand Drawing.** One credit hour. Charcoal from models and plaster casts. Practice and occasional lectures. Must be preceded by Course 24. (All Four-Year Courses and Short Course in Industrial Arts, first year, second term, W., 1 to 3, or S., 8 to 10. One or two credit hours. Elective in Arts Course. Messrs. Lewis and Tidball.
26. **Free Hand Drawing.** One credit hour. Charcoal from plaster casts and still life. Practice and occasional lectures. Must be preceded by 25. All Four-Year Courses and Short Course in Industrial Arts, first year, third term, W. 1 to 3.) One or two credit hours. Elective in Arts Course. Messrs. Lewis and Tidball.

27. **Free Hand Drawing.** Two credit hours. Pencil drawing from models and plaster casts. Practice and occasional lectures. (All Four-Year Courses, first year, first term. Schedule furnished on Registration Day. Course in Clay-working, second year, second term, Th., F., 1 to 3.) Messrs. Lewis, Martin and Tidball.
28. **Free Hand Drawing.** Two credit hours. Charcoal drawing from plaster casts and still life. Practice and occasional lectures. Must be preceded by Course 27. Messrs. Lewis, Martin and Tidball.
31. **Lettering.** One credit hour. Practice and occasional lectures. This course must be preceded or accompanied by Course 27. (All Four-Year Courses, first year, second term, W., F., S., 8 to 10; W., F., 8 to 10; S., 10 to 12; M., 8 to 10; S., 8 to 12; M., W., 8 to 10; S., 10 to 12; M., Tu., 1 to 4; or W., F., 1 to 4.) Associate Professor French and Mr. Vosskuehler.
32. **Lettering.** Practice and occasional lectures. Must be preceded by 31, first term. Two credit hours. (All Four-Year Courses, first year, third term.) Associate Professor French and Mr. Vosskuehler.
33. **Projection Drawing.** Lectures and practice. Orthographic, isometric and oblique projections, and elementary working drawings. This course must be preceded by Course 32. Three credit hours. (Second year, first term.)

Lectures.	Practice.	Course in
M. 8	Tu. Th. 9-11	Architecture.
W. 11	M. F. 10-12	Ceramics.
W. 11	M. F. 10-12	Chemical Engineering.
M. 8	Tu. Th. 9-11	Civil Engineering.
Th. 11	M. F. 10-12	Electrical Engineering.
W. 11	M. F. 10-12	Industrial Arts.
W. 11	M. F. 10-12	Manual Training.
W. 11	M. F. 10-12	Mechanical Engineering.
Tu. 11	Tu. Th. 9-11	Mining Engineering.

Associate Professor French and Mr. Vosskuehler.

34. **Descriptive Geometry.** Lectures and practice. This course must be preceded by 33. Three credit hours. (Second year, second term.)

Lectures.	Practice.	Course in
M. W. 11	F. 10-12	Ceramics.
Tu. Th. 11	F. 10-12	Chemical Engineering.
Tu. Th. 11	F. 10-12	Electrical Engineering.
M. W. 11	F. 10-12	Industrial Arts.
Tu. Th. 11	F. 10-12	Manual Training.
M. W. 11	F. 10-12	Mechanical Engineering.
Tu. Th. 11	Tu. 9-11; or F. 10-12	Mining Engineering.
M. W. 8	Th. 9-11	Short Industrial Arts.

Associate Professor French and Mr. Vosskuehler.

35. **Shades, Shadows and Perspective.** Three credit hours. (Second year, third term.)

Lectures.	Practice.	Course in
W. 11	M. F. 10-12	Ceramics.
Tu. 8	Tu. Th. 9-11	Civil Engineering.
Th. 11	M. F. 10-12	Electrical Engineering.
W. 11	M. F. 10-12	Industrial Arts.
W. 11	M. F. 10-12	Manual Training.
W. 11	M. F. 10-12	Mechanical Engineering.
Tu. 11	Tu. Th. 9-11	Mining Engineering.
M. 8	Tu. Th. 9-11	Short Industrial Arts.

Associate Professor French and Mr. Vosskuehler.

36. **Descriptive Geometry.** Five credit hours. (Courses in Architecture and Civil Engineering, second year, second term, M., W., at 8. Tu., Th., 8 to 11.) Associate Professor French.
37. **Architectural Perspective and Shades and Shadows.** Five credit hours. Lectures and practice. This course must be preceded by Course 36. (Course in Architecture, second year, third term. M., W., at 8. Tu., Th., 8 to 11. Associate Professor French.
38. **Projection Drawing.** Three credit hours. Lectures and practices. Orthographic, isometric and oblique projections and intersections. This course must be preceded by Course 2. (Short Course in Industrial Arts, first year; Short Course in Mining, second year, second term, Th., 1 to 4. F., 1 to 3.) Mr. Vosskuehler.
39. **Draughting and Blue-Printing.** Three credit hours. Practice and occasional lectures. This course must be preceded by Course 38. (Short Course in Industrial Arts, first year; Short Course in Mining, second year; third term, Th., F., 1 to 4.) Mr. Vosskuehler.
40. **Clay Modeling.** Two credit hours. Modeling in clay, ornamental forms from plaster casts, photographs, and nature. This course must be preceded by Course 27. (Course in Architecture, third year, second term, Tu., 1 to 5.) Mr. Lewis.
41. **Clay Modeling.** Continuation of Course 40. Modeling in clay and wax from photographs, nature and original designs. Casts made in plaster and gelatine moulds. This course must be preceded by Course 40. (Course in Architecture, third year, third term, M., Tu., 1 to 3.) Mr. Lewis.

ASTRONOMY

The Emerson McMillin Observatory.

PROFESSOR H. C. LORD, MR. SMITH, MR. MAAG.

1. **General Astronomy.** Two credit hours. Three terms. Lectures and recitations on the general principles of Astronomy. Non-mathematical. Text-book, Young's Manual of Astronomy. Tu., Th., at 1. Professor Lord.
2. **Astronomy, Geodesy and Least Squares.** Three credit hours. Three terms. Lectures on practical Astronomy, supplemented by practice with the instruments of the Emerson McMillin Observatory. M., W., F., at 11. Professor Lord and Mr. Maag.
3. **Meteorology.** Two credit hours. Third term. Lectures on practical meteorology, supplemented by laboratory work in map and chart making and regular observations with the instruments in use by the Weather Bureau. Text-book, Waldo, with daily weather maps issued by the Bureau. Tu., F., at 4. Mr. J. Warren Smith.
7. **Advanced Astronomy.** Lectures, reading and laboratory work from 3 to 5 hours a week. Three terms. Courses will be offered in Theoretical Astronomy or Astrophysics, as students may elect. Students must have had calculus. Hours to be arranged. Professor Lord.
4. **Astronomy, Geodesy and Least Squares.** Three credit hours. Lectures on practical Astronomy, supplemented by practice with the instruments of the Emerson McMillin Observatory. (Course in Civil Engineering. Third year. First term. Lecture M., W., F., at 11. Laboratory hours to be arranged with the students.)
5. Continuation of 4. Three credit hours. Second term, M., W., F., at 11.
6. Continuation of 5. Four credit hours. Third term.

BACTERIOLOGY

ASSOCIATE PROFESSOR MORREY.

1. **Bacteriology.** Two credit hours. First and second terms. The work will consist of lectures on the general principles of bacteriology. The laboratory work will include the preparation of various culture media, general and special (sputum) staining methods, with particular attention to water examination for suspected contamination. Professor Morrey. Required in Courses in Pharmacy. Lectures, M., F., at 10. Laboratory hours to be arranged.
2. **Bacteriology.** Two credit hours. Second term. Lectures and laboratory work on the general facts concerning bacteria and their relation to life processes followed by lectures on their special application to dairy industries. Th., 8 to 12, F., at 11. Dairy Course. Associate Professor Morrey.
4. **Bacteriology.** Three credit hours. Third term. General principles of bacteriology and laboratory practice in preparing culture media, cultures, stains and staining. Veterinary medicine. M., W., 1 to 4.
5. **General.** Four credit hours. Three terms. First term, Morphology, preparation of media, culture and staining methods; second and third terms, special bacteriology along one of the following lines: (a) pathogenic bacteria; (b) agricultural; (c) dairy; (d) sanitary bacteriology and water examination; (e) bacterial chemistry, products of bacterial action, enzymes, ptomaines, toxins, etc. Recitations W., at 11; laboratory, W., Th., F., 1 to 4. Associate Professor Morrey. Elective in Colleges of Arts and Agriculture.
6. **Advanced Bacteriology.** Five credit hours. More advanced work on lines of Course 5. Associate Professor Morrey.
Courses 5 and 6 are open to graduate students. Elective in College of Arts.

BOTANY.

(Botanical Hall.)

PROFESSOR KELLERMAN, ASSOCIATE PROFESSOR SCHAFFNER, MR. YORK, MR. GLEASON
AND MISS MCKINLEY.

1. **Elementary Botany.** Five credit hours. Third term. Text-books, Bailey's Botany and Kellerman's Spring Flora. Instead of the Spring Flora, the students may use Britton's Manual. This is a general course introductory to those that follow. It comprises mostly Organography and Vegetable Physiology and a study of the native flora, but some instruction is also given in Ecology and Classification. For the practical or laboratory work, Kellerman's Practical Exercises is used as a guide. The students are required to do some work in the field in both observation and collecting. M., T., Th., F., at 8. Professor Kellerman and Mr. Gleason.
3. **Systematic and Physiological Botany.** Four credit hours. First term. This course deals briefly with Ecology, Physiology, Morphology, and Classification. The tissues and parts of plants that furnish crude drugs are specially studied. The course is given partly in the form of lectures, partly as recitations, and laboratory and field work. Students are required to use Kraemer's Botany and Pharmacognosy. The students are required to add to their herbariums begun in the spring term and thus obtain a full set of the native medicinal plants. The laboratory work gives a thorough drill in the use of the microscope and modern methods in technique. It aims to acquaint the student with the vegetable cell and tissues and their development and functions. Professor Kellerman, Associate Professor Schaffner. Lectures, M., Tu., F., at 10. Laboratory, Th., 10 to 12.

4. **Medical Botany.** Two credit hours. Second term. This course is devoted exclusively to laboratory study of the medicinal plants and vegetable products used in medicine. Kraemer's Botany and Pharmacognosy is mainly followed. Each student is required to make mounts of the materials studied; these he retains for his own use in the future. Some practice is given in detecting adulterations. Associate Professor Schaffner, M., Tu., 10 to 12.
6. **Physiological Botany.** Four credit hours. First term. Text-book, Coulter's Plant Studies. This is intended to be a complete course showing the evolution of plants from the lowest to the highest. Ecology and Physiology are the more prominent subjects, but some instruction is given in Morphology and Classification. The laboratory work includes a general course in histology with practice in experimental physiology. The student receives instruction and practice in handling the microscope and has the opportunity of learning much of the important modern methods in technique. Tu., Th., at 11 and M., 1 to 4, W., 8 to 10. Professor Kellerman, Associate Professor Schaffner.
7. **Economic Botany.** Four credit hours. Second term. This course is, in part, a continuation of Course 6, but the major part of the term is devoted to a botanical study of economic plants and the vegetable products of commerce. The laboratory work includes the microscopic study of fibers, starches, resins, gums and many other important vegetable products. Tu., Th., at 11 and M., 1 to 4, W., 8 to 10. Professor Kellerman, Associate Professor Schaffner.
8. **Vegetable Pathology.** Four credit hours. Third term. The diseases of plants due to inorganic causes are briefly studied, but the main part of the course is devoted to a study of the parasitic fungi most destructive to cultivated plants. The means of their prevention forms the last part of the course. The laboratory and field work deals mainly with the commonest and most injurious parasitic fungi. Each student takes some economic subject or group of parasites for special study during the latter part of the term. Tu., Th., at 11 and M., 1 to 4, W., 8 to 10. Professor Kellerman, Associate Professor Schaffner.
9. **Dendrology.** Two credit hours. First term. Lectures and field work. Kellerman's Forest Trees of Ohio and various reference books are used. The native trees are studied and illustrative collections made. M., W., 10 to 12. Professor Kellerman.
10. **Dendrology.** Two credit hours. Second term. Laboratory work and special investigations on the structure and diseases of timber. Laboratory open daily 8 to 12. Professor Kellerman.
11. **Laboratory Work.** Two to five credit hours. Three terms. Special investigations in Economic Botany and Vegetable Pathology. Laboratory open daily 8 to 12. Professor Kellerman and Associate Professor Schaffner.
13. **Household Botany.** Four credit hours. Third term. This course is planned exclusively for students in Domestic Economy, and is devoted to those phases which directly concern household work and home life. It includes a study of such economic species as culinary, medicinal, starch, oil and fiber-producing plants. Special attention is given to yeast, fermentations, enzymes, bacteria, antiseptics, fungicides, food destroying fungi, and edible and poisonous mushrooms. Recitations Tu., Th., 9; laboratory, Tu., Th., 11 and M., 2 to 4. Professor Kellerman, Associate Professor Schaffner.
16. **Laboratory Work.** Two to five credit hours. Each term. In this course the student undertakes special investigations on medicinal plants, poisonous plants, adulterations, etc. Throughout the year. (Elective.) Professor Kellerman. Consult instructor for time schedule.

7. **Forest Botany.** Four credit hours. First term. This course is open to students who have completed Botany 6, 7, and 8 or 21, 22 and 23. It includes a special study of native and introduced trees and the preparation of a dendrological herbarium. Lectures and Seminars, M., W., at 9; laboratory and field work, Tu., Th., 2 to 4. Professor Kellerman and Associate Professor Schaffner.
18. **Normal and Pathological Histology of Wood.** Four credit hours. Second term. This is a continuation of Course 17 and includes a study of the development of woods, characters of coniferous, hard and soft woods and changes due to attacks of fungi. The students are required to prepare a series of gross and microscopic sections. Seminars, M., W., at 9. Laboratory, Tu., Th., 2 to 4. Professor Kellerman and Associate Professor Schaffner.
19. **Forest Ecology and Pathology.** Four credit hours. Third term. This is a continuation of Course 18, and includes a study of the stem, leaf and root system in relation to the environment; of seed distribution and seedlings; and characteristics and distribution with reference to geological and physiographic, as well as other ecologic conditions. Students are required to prepare a pathological herbarium. Lectures and seminars, M., W., at 9. Laboratory and field work, Tu., Th., 2 to 4. Professor Kellerman and Associate Professor Schaffner.
21. **Ecology.** Three credit hours. First term. Lectures, recitations, laboratory. Coulter's Plant Relations is used the first term and his Plant Structures and department reference books the remainder of the year. Besides the general work in laboratory, lecture room and field, each student is assigned a special subject in Ecology; occasional reports on current botanical literature are also required. Tu., Th., at 9. Laboratory, Tu., 2 to 4. Associate Professor Schaffner.
22. **Morphology and Physiology.** Three credit hours. Second term. Continuation of Course 21.
23. **Systematic Botany.** Three credit hours. Third term. Continuation of Course 22.
24. **Laboratory and Field Work.** Two or three credit hours. Three terms. Daily, 8 to 12. Professor Kellerman and Associate Professor Schaffner.
25. **Laboratory Work in Histology and Physiology.** Three to five credit hours. Three terms. Prerequisite, courses 6, 7, 8 or 21, 22, 23. Laboratory open daily. Associate Professor Schaffner.
26. **Advanced Laboratory Work in Histology and Microtechnique.** Five credit hours. Three terms. Prerequisite courses 6, 7, 8 or 21, 22, 23. Laboratory open daily. Associate Professor Schaffner.
27. **Laboratory and Field Work in Systematic Botany.** Three to five credit hours. Three terms. Prerequisite, courses 6, 7, 8 or 21, 22, 23. Laboratory open daily. Professor Kellerman.
32. **Minor Investigations.** Field and laboratory work. One to three credit hours. Three terms. Prerequisite, courses 6, 7, 8. Daily. Professor Kellerman and Associate Professor Schaffner.
33. **Current Literature.** Prescribed critical reading and indexing. One to three credit hours. Three terms. Prerequisite course 7. Daily. Professor Kellerman.

GRADUATE WORK

28. **Research Work in Systematic Botany.** Five credit hours. Three terms. Prerequisite, courses 6, 7, 8, or 21, 22, 23. Laboratory open daily. Professor Kellerman.

29. **Research Work in Morphology and Physiology.** Five or ten credit hours. Three terms. Prerequisite course 26. Laboratory open daily. Associate Professor Schaffner.
30. **Monographic Work.** Five or ten credit hours. Three terms. Prerequisite course 27. Laboratory open daily. Professor Kellerman.
31. **Research Work in Ecology.** Five or ten credit hours. Three terms. Prerequisite courses 6, 7, 8, or 21, 22, 23. Laboratory open daily. Associate Professor Schaffner.

CERAMICS

Office, Orton Hall, Room 4

PROFESSOR ORTON, JR., MR. BLEININGER, MR. PURDY.

1. **Ceramic Chemistry.** Five credit hours. First term. This course is open only to those who have completed General Chemistry 12. The student begins the quantitative analysis of salts and chemicals, and later works on limestone and other easy minerals. (Course in Ceramics and Short Course in Clay-working, second year) M., Tu., W., 1 to 4. Mr. Bleininger.
2. **Continuation of Course 1.** Five credit hours. Second term. The student begins the quantitative analysis of clays and complex minerals, working first on samples of known composition, and later on unknown materials. (Course in Ceramics and Short Course in Clay-working, second year) M., Tu., W., 1 to 4. Mr. Bleininger.
3. **Continuation of Course 2.** Five credit hours. Third term. The student completes the ultimate analysis of clays and begins the proximate or "Rational" analysis of clays and pottery bodies, following the methods of Seger. (Course in Ceramics and Short Course in Clay-working, second year.) M., Tu., W., 1 to 4. Mr. Bleininger.
4. **Lectures on Clay Manufacture** (supplemented by frequent recitations.) Five credit hours. The origin, composition and properties of clays and other minerals employed in the clay, glass and cement industries. (Course in Ceramics, third year, first term; Short Course in Clay-working, second year, first term, M., Tu., W., Th., F., at 8.) Professor Orton.
5. **Continuation of Course 4.** Five credit hours. A series of lectures with recitations, on the general principles of the manufacture of clay wares, including the selection and winning of the materials, their preparation and manufacture. (Course in Ceramics, third year; Short Course in Clay-working, second year, second term, M., Tu., W., Th., F., at 8.) Professor Orton.
6. **Continuation of Course 5.** Five credit hours. A series of lectures, with recitations, on the drying, burning and decoration of clay wares, including the preparation of coloring material, glazes, etc. (Course in Ceramics, third year; Short Course in Clay-working, second year, third term, M., Tu., W., Th., F., at 8.) Professor Orton.
7. **Ceramic Chemistry.** Continuation of Course 3. Five credit hours. Second term. Open only to those who have completed that course. The analysis of glasses and glazes, devoting special attention to the use of hydrofluoric acid in silicate analysis, and to the determination of lead and boracic acid. (Course in Ceramics, third year. M., Tu., W., 1 to 4. Mr. Bleininger.
9. **Laboratory Work in Ceramics.** Five credit hours. First term. Open only to those who have completed Courses 3 and 6. The student will first

practice the various methods of measurement of the physical properties of clays, and then will undertake the production of such wares as are made from single clays; then wares made by blending two or more natural clays; and, then, such wares as are made from an artificial body. In each case the bodies made will be burnt and tested. (Course in Ceramics, fourth year). W., Th., F., 1 to 4. Professor Orton and Mr. Purdy.

10. Continuation of Course 9. Five credit hours. Second term. The student will practice on the production of glasses and glazes, beginning with the natural "slip glazes" and taking successively the soft raw-lead glazes, the fritted lead-boracic-acid glazes, and the hard-fire leadless porcelain glazes. In each case the glazes will be made for use on some definite body, and will be made to "fit." (Course in Ceramics, fourth year.) W., Th., F., 1 to 4. Professor Orton and Mr. Purdy.
11. Continuation of Course 10. Five credit hours. Third term. The student will practice on the use of the coloring and opacifying oxides in glazes, and on the production of colors for the decoration of pottery and of body stains. (Course in Ceramics, fourth year.) M., F., 8 to 12. F., 1 to 3. Professor Orton and Mr. Purdy.
12. Lectures on Cement Manufacture. Five credit hours. Second term. The theory of hydraulicity, the compounding, manufacture and testing of natural and Portland cements and hydraulic silicates. Open to students who have had courses 3 and 6. (Course in Ceramics, fourth year.) M., Tu., W., Th., F., at 9. Mr. Bleininger.
15. Thesis. See requirements for graduation, page 90.
16. General Principles of Applied Ceramics. Five credit hours. Third term. A series of lectures on the chemical technology of the clay, glass and cement industries. (Course in Chemical Engineering, fourth year.) M., Tu., W., Th., Fr., at 11. Professor Orton.
17. Practice. Four credit hours. Second term. Drawings and specifications for brick kilns, brick dryers, pottery kilns, gas producers, glass pot-furnaces, glass tanks, cement kilns and burning cylinders. Students will be allowed to specialize along the lines they intend to follow. (Course in Ceramics, fourth year.) M., Tu., 1 to 5. Professor Orton.
18. Laboratory Work on Cement Manufacture. Five credit hours. Third term. Training is given in the analysis of cement materials by the methods in technical use; in the preparation of minerals for cement; in the burning of cement; in the testing of the products, and in the investigation of the general problem of the cement manufacturer. Open to students who have had Ceramics (12). (Alternative with Ceramics (11). Course in Ceramics, fourth year.) M., F., 8 to 12. F., 1 to 3.) Mr. Bleininger.

CHEMISTRY

Office, Chemical Hall

PROFESSOR MCPHERSON, EMERITUS PROFESSOR NORTON, ASSOCIATE PROFESSOR HENDERSON, ASSOCIATE PROFESSOR FOULK, MR. MUMMA, MR. WEBB,
MISS ANDREWS, MR. WILKINSON, MR. STEWART.

- 1 (a). Elementary Chemistry. Three credit hours. Three terms. Arranged for students who have little or no knowledge of chemistry. In the laboratory the student performs an extended series of experiments illustrating the principles of chemistry. Three subdivisions; one lecture, one quiz and three hours laboratory practice weekly throughout

- the year. Lecture Th., at 1. Quiz, Tu., at 1, with laboratory M., 1 to 4 or S., 9 to 12; or quiz W., 11 to 12 with laboratory Tu., 1 to 4. Associate Professor Henderson, Mr. Mumma, Mr. Webb and Department Fellows.
- 1 (b). **Elementary Chemistry.** Three credit hours. Three terms. Arranged for students who offer chemistry as an entrance credit. Three subdivisions; one lecture, one quiz and three hours laboratory practice weekly throughout the year. For schedule see course 1 (a). Associate Professor Henderson, Mr. Mumma, Mr. Webb and Department Fellows.
3. **Elementary Chemistry.** Five credit hours. One hour lecture, one hour quiz and six hours laboratory work weekly. This course is arranged for students in the Short Courses in Ceramics, Mining and Pharmacy. First term, lect. M., at 8; quiz Th., at 8, lab. Tu., W., 1 to 4. Second term, lect. M., at 3; quiz Th., at 8, lab. Tu., W., 1 to 4. Associate Professor Henderson, Mr. Mumma, Mr. Webb, Miss Andrews.
7. **Elementary Chemistry.** Five credit hours. Two terms. Inorganic. Lectures, laboratory and quiz. Laboratory work; first term, experiments upon the non-metals; second term, experiments upon the metals. This course is arranged for students in the College of Engineering. Lect. M., 8 or 3. Quiz, F., 9, 10, 1 or 3. Laboratory, M., Tu., 9 to 12; Th., F., 9 to 12; Th., F., 1 to 4; or W., 8 to 10, S., 8 to 12. Professor McPherson, Mr. Mumma, Mr. Webb, Miss Andrews and Department Fellows.
12. **Qualitative Analysis.** Four credit hours. Third term. This course follows course 7 and is designed for students in Engineering Courses. For hours see Course 7, omitting lecture.
- 12a. **Qualitative Analysis.** Five credit hours. (Course in Clay-working, first year, third term, F., at 9; W., 8 to 10; F., 1 to 4; S., 8 to 11.) Associate Professor Henderson, Mr. Mumma, Mr. Webb, Miss Andrews.
11. **Toxicology.** Four credit hours. Third term. Lectures and recitations. This course treats of poisons—their effects, antidotes and detection. Professor Norton. M., Tu., Th., F., 10 to 11.
17. **Inorganic Preparations.** Three to five credit hours. Third term. Laboratory and recitations. The course includes the preparation and purification of some typical inorganic compounds. Afternoons. Associate Professor Henderson.
20. **Quantitative Analysis.** Three to five credit hours. Three terms. Laboratory, lectures and recitations. This course is designed to give the student a knowledge of the first principles of gravimetric and volumetric analysis. It must be preceded by courses 37 or 12 and must be accompanied by course 40. Lecture, M., at 1. Laboratory, afternoons. Associate Professor Foulk.
40. **Stoichiometry.** One credit hour. Second and third terms. Recitations. Drill in solution of chemical problems. Th., at 11. Associate Professor Foulk.
21. **Advanced General Chemistry.** Two credit hours. Three terms. Lectures and recitations. A thorough study of general inorganic chemistry paying especial attention to chemical theory. The course is arranged as a review and extension of courses 1 and 7. Tu., Th., 9 to 10. Associate Professor Henderson.
34. **Organic Chemistry.** Five credit hours. First and second terms. Two recitations and six hours laboratory work weekly. The laboratory work includes the preparation of some of the important compounds used in medicine. Recitation, Tu., and Th., at 9. Laboratory, first term, M., and Tu., 1 to 4. Second term, Th., and F., 1 to 4. Short course in Pharmacy. Professor McPherson.

8. **Organic Chemistry.** Five credit hours. First term. Two recitations and six hours laboratory work weekly. The laboratory work includes the preparation of typical organic compounds. The course must be preceded by courses 20 and 21 unless special permission is obtained from the instructor in charge. Recitations, Tu., and Th., 10 to 11. Laboratory, afternoons. Professor McPherson.
9. **Organic Chemistry.** Five credit hours. Second and third terms. Continuation of course 8. Recitations, Tu., and Th., at 10. Laboratory, afternoons. Professor McPherson.
32. **Industrial Chemistry.** Four credit hours. First and second terms. Laboratory and lectures. This course includes the study of the processes involved in the various chemical industries. It must be preceded by at least the equivalent of course 20. Tu., Th., at 10; W., Th., 1 to 3. Professor Norton.
15. **Sanitary Analysis.** Four credit hours. Third term. Lectures and Laboratory. A study of the most important chemical methods for the analysis of water. This course must be preceded by course 20 or 38. Lectures, Tu., Th., at 10; Laboratory, afternoons. Associate Professor Foulk.
37. **Qualitative Analysis.** Three to five credit hours. First term. Laboratory, lectures and recitations. This course must be preceded by course 1 and accompanied by course 21 unless by permission of the instructor in charge. One lecture and two to four laboratory periods. One laboratory period equals three clock hours. Laboratory must be taken in full periods. Students electing this course will take courses 38 and 40 in the second and third terms. Associate Professor Foulk.
38. **Quantitative Analysis.** Three to five credit hours. Second and third terms. Laboratory, lectures and recitations. Includes the first principles of gravimetric and volumetric analysis. This course must be preceded by 37 or its equivalent and accompanied by course 40 unless permission be obtained from the instructor in charge. One lecture and two to four laboratory periods. One laboratory period equals three clock hours. Laboratory must be taken in full periods. Associate Professor Foulk.
39. **Quantitative Analysis.** Three to five credit hours. First and second terms. Laboratory, lectures and recitations. This is a continuation of course 38, designed to enlarge the students knowledge of quantitative methods. One lecture and two to four laboratory periods. One laboratory period equals three clock hours. Students electing this course will take course 17 in third term. Associate Professor Foulk.
27. **Advanced Chemistry.** Three to five credit hours. Three terms. Laboratory and reference work. Hours to be arranged with the instructor.
- (a) **Organic.** Arranged for students who have completed courses 8 and 9. The work includes the further preparation of typical organic compounds, their purification and analysis. Professor McPherson.
- (b) **Inorganic.** This course is designed for students who have completed course 17, and are desirous of studying the methods of preparation and the properties of a series of inorganic substances; or for those who desire to take some laboratory work on the preparation of the compounds of the rare elements. Associate Professor Henderson.
- (c) **Analytical.** Special topics such as the critical study of methods, etc. Associate Professor Foulk.

28. **Organic Chemistry.** Two credit hours. Third term. Lectures on special topics. This course must be preceded by courses 8 and 9 and preferably by course 27 (a). Hours to be arranged with the instructor. Professor McPherson.
35. **Rare Elements.** Three credit hours. First term. Lectures and recitations. This course is designed to serve two purposes. It extends the student's knowledge of the facts and principles of chemistry by a study of those elements usually passed by with brief comment in the general courses. It is of considerable value to students of metallurgy because of the increasing use of the rarer elements in the arts and industries. The course must be preceded by the equivalent of course 21. M., W., F., at 8. Associate Professor Henderson.
30. **Physical Chemistry.** Three credit hours. Second and third terms. Lectures and recitations. A general study of the principles of physical chemistry. The course pre-supposes a knowledge of quantitative analysis. M., W., F., at 8. Associate Professor Henderson.
41. **Physical Chemistry.** Three to five credit hours. Three terms. Laboratory. A course in physical-chemical measurements, designed to illustrate the principles and methods of physical chemistry. The course must be preceded by course 30, but students taking course 30 may enter upon the laboratory course at the beginning of the second term and carry it along with course 30. One credit hour equals three clock hours. Afternoons. Associate Professor Henderson.
25. **Historical Chemistry.** Lectures and recitations. Three credit hours. Second term. This course must be preceded by course 21. Hours to be arranged. Professor Norton.
26. **Chemical Seminary.** One credit hour. Three terms. Advanced students meet for the discussion of special topics and current literature. M., at 4.
29. **Research Work, Library and Laboratory Work.** Five to ten credit hours. Three terms. Hours to be arranged with the instructor. Professor McPherson, Associate Professor Henderson, Associate Professor Foulk.
36. **The Teaching of Chemistry.** Three credit hours. Third term. This course is arranged for students who expect to teach chemistry in secondary schools. It includes a general discussion of the equipment of laboratories, methods of teaching and related topics. Each student will spend two hours in conference and three hours in supervising the laboratory work of the freshmen students. The course is open only to advanced students and no student is allowed to take it except by permission of the instructor in charge. Conferences, Tu., and Th., at 9. Professor McPherson.

CIVIL ENGINEERING

Office, Brown Hall, Room 33.

PROFESSOR SHERMAN, PROFESSOR HELLER, ASSOCIATE PROFESSOR ENO, ASSISTANT
PROFESSOR BRUNING, MR. MELICK.

1. **Land Surveying.** Six credit hours. Recitations and field work. Johnson's Theory and Practice of Surveying. (Course in Civil Engineering, second year, first term. M., Tu., W., Th., F., at 1, M., 2 to 4; or M., Tu., W., Th., F., at 11, Tu., 2 to 4. Professor Sherman, Associate Professor Eno, Assistant Professor Bruning, Mr. Melick.

2. **Railroad Surveying.** Six credit hours. Recitations and field work. Searle's Field Engineering and Crandall's Transition Curve. (Course in Civil Engineering, second year, third term, M., Tu., W., Th., F., at 1, M., 2 to 4; or M., Tu., W., Th., F., at 11, Tu., 2 to 4.) Professor Sherman, Associate Professor Eno, Assistant Professor Bruning, Mr. Melick.
3. **Topographical Surveying.** Four credit hours. Lectures, field work and drawing. Johnson's Surveying used for reference. (Course in Civil Engineering, third year, first term, M., Th., at 10, S., 8 to 12; or Tu., F., at 10, S., 8 to 12.) Professor Sherman, Assistant Professor Bruning.
4. **Topographical Drawing.** Four credit hours. Platting, pen and tinted work. Reed's Topographical Drawing and Sketching. (Course in Civil Engineering, second year, second term, M., Tu., 1 to 4, W., 1 to 3; or Th., F., 2 to 4, S., 8 to 12.) Associate Professor Eno, Assistant Professor Bruning.
6. **Stereotomy.** Four credit hours. Recitations, drawing and model cutting. Warren's Stereotomy. (Courses in Architecture and Civil Engineering, third year, second term, M., Th., at 10, S., 8 to 12; or Tu., F., at 10, S., 8 to 12.) Professor Sherman, Assistant Professor Bruning.
7. **Bridge Stresses.** Five credit hours. Recitations and lectures. Part 1 of Dubois' Stresses in Framed Structures. (Course in Civil Engineering, third year, third term, M., Tu., W., Th., F., at 8 or 9.) Professor Heller.
8. **Bridge Designing.** Five credit hours. Lectures and drawings. Part II of Dubois' Stresses in Framed Structures and Johnson's Modern Framed Structures used for reference. (Course in Civil Engineering, fourth year, first term, M., Tu., W., Th., F., at 8.) Professor Heller.
10. **Sanitary Engineering.** Five credit hours. Recitations and lectures. Folwell's Sewerage. (Course in Civil Engineering, fourth year, third term, M., Tu., W., Th., F., at 9.) Associate Professor Eno.
14. **Civil Engineering Laboratory.** Cement testing. Two hours credit. (Course in Civil Engineering, fourth year, second term, M., 1 to 5; or Tu., 1 to 5.) Professor Sherman, Associate Professor Eno.
15. **Masonry Construction.** Five credit hours. Recitations and lectures. Baker's Masonry Construction. (Courses in Architecture and Civil Engineering, fourth year, first term, M., Tu., W., Th., F., at 9.) Professor Sherman.
16. **Highways.** Five credit hours. Recitations and lectures. Byrne's Highway Construction. (Course in Civil Engineering, third year, first term, M., Tu., W., Th., F., 8 or 9.) Associate Professor Eno.
17. **Railway Location.** Five credit hours. Recitations and lectures. Wellington's Economic Theory of Railway Location. (Course in Civil Engineering, fourth year, second term, M., Tu., W., Th., F., at 9.) Professor Sherman.
18. **Water Supply.** Five credit hours. Recitations and lectures. Folwell's Water-Supply Engineering. (Course in Civil Engineering, fourth year, third term, M., Tu., W., Th., F., at 8.) Associate Professor Eno.
19. **Trusses.** Five credit hours. Lectures and drawings. (Courses in Architecture, Mining and Mechanical Engineering, third year, third term, M., Tu., Th., F., at 10, W., at 2; or M., Tu., W., Th., F., at 11.) Professor Heller.
21. **Surveying.** Three credit hours. Recitations and field work. Pence and Ketchum's Manual. (Courses in Architecture and Industrial Arts fourth year, third term, M., W., F., at 9.) Professor Sherman, Assistant Professor Bruning, Mr. Melick.

22. **Summer Course in Field Work.** The students are taken into camp in a rough, broken country and given a thorough drill in land and elementary railroad surveying. The course begins the Friday before Commencement Day, and continues four weeks of six days per week, ten hours per day. The work of the student and the discipline of the camp is in the hands of competent instructors. This course must be preceded by Courses 1, 2 and 4. Students conditioned on any of these courses may be admitted at discretion of instructor in charge. (At conclusion of second year of Course in Civil Engineering.) Professor Sherman, Associate Professor Eno, Assistant Professor Bruning, Mr. Melick.
23. **Summer Course in Field Work.** Similar to Course 22. Students work on advanced railroad surveying and topographical surveying. This course must be preceded by Courses 3, 22 and 24. Students conditioned in any of these courses may be admitted at discretion of instructor. (At conclusion of third year of Course in Civil Engineering.) Professor Sherman, Associate Professor Eno, Assistant Professor Bruning, Mr. Melick.
24. **Drawing of Engineering Structures.** Five credit hours. (Course in Civil Engineering, third year, second term, M., Tu., 1 to 5, W., 1 to 3; or W., 3 to 5, Th., F., 1 to 5.) Professor Sherman, Assistant Professor Bruning, Mr. Melick.
25. **Advanced Bridge Work.** Five credit hours. Draw-spans, continuous girders, steel arches, etc. (Option, Course in Civil Engineering, fourth year, second term, M., Tu., W., Th., F., at 8.) Professor Heller.
26. **Steel Construction.** Three credit hours. Steel skeleton construction for tall buildings. (Course in Architecture, fourth year, second term, M. W., F., at 9.) Professor Heller.
27. **Timber and Masonry.** Three credit hours. Lectures on timber and masonry construction. (Courses in Industrial Arts and Mechanical Engineering, third year, last three-fifths of second term, M., Tu., W., Th., F., at 9.) Assistant Professor Bruning.

DOMESTIC ECONOMY

Hayes Hall, Rooms 1, 3 and 10.

DOMESTIC SCIENCE

PROFESSOR STONER.

1. **Food Economics.** Five credit hours. First term.

(a) Lecture and recitations. A study of the evolution of society as effected by food conditions. A study of the food principles and their functions; the history, manufacture and use of food materials; the calorie value, the relative nutritive and money value of typical foods of certain classes; Chemistry as applied in the study of the science of nutrition and general dietetics, Dietary studies, etc.

Collateral readings are required.

(b) Laboratory instruction includes experimental and research work with typical foods of certain classes, and the scientific and practical application of certain principles in food investigation; demonstration, etc. M., W., at 9, and Tu., and W., 1 to 4. Professor Stoner.

2. Food Economics. Five credit hours. Second term.

(a) Lectures and recitations. This includes a continuation of the subject outlined in Course 1, and marketing, etc., calculations in Dietary work, considering varying conditions of life. United States Bulletin Standards are used. Collateral readings are required.

(b) Laboratory work is a continuation of Course 1. M., W., and Tu., 1 to 4. Professor Stoner.

3. Advanced Food Economics. Five credit hours. Third term.

(a) Lectures and recitations. This subject includes advanced research in Food Economics and Dietetics as outlined in Course 2 and a brief study of the preservation of foods, etc. Collateral readings are required.

(b) Laboratory work is a continuation of the advanced work as outlined in Course 2. M., W., and Tu., and W., 1 to 4. Professor Stoner.

4. (a) Preservation of Foods. Five credit hours. One-half term.

(b) Hygiene of Clothing. Five credit hours. One-half term.

First term.

(a) Continuation of Course (3). Includes a brief study of the causes of decomposition; a history of the methods employed in the preservation of foods; the economic value of canned foods and the principles involved in canning, preserving, etc. A brief study of the sugars and the food value of fruits, etc.

(b) Includes a study of the structure of fibers and their proper treatment; the properties and cleansing effects of water and soap; the effect of blueings, etc. Experimental work with chemical reagents for the treatment of all kinds of stains, etc., and the use of disinfectants and their properties. Lectures on hygienic clothing and the proper care of all kinds of house linens, etc. Demonstration work in practical laundry methods. Tu., Th., at 11 and Th., F., 1 to 4. Professor Stoner.

10. Household Economics. Two and one-half credit hours. Third term. A consideration of the best location for a house; its hygienic and sanitary construction and arrangement. A consideration of water supplies, sanitary drainage, care of plumbing, etc. Discussion of approved methods of the management of lighting, heating and ventilation systems. A study of the best practical and scientific methods of general household management. Furnishings of the home from the standpoint of utility, sanitation and economy. A study of household accounts and expenditures, etc. Collateral readings are required. Tu., and Th., at 9. Professor Stoner.

11. Therapeutic Diet and Emergency Work. Two and one-half credit hours. Second term. The lectures, demonstrations and practical work are designed to set forth the principles of the dietetic treatment of various diseases and to consider such emergency cases as frequently require prompt treatment in the home, as well as the principles underlying good nursing. Food suitable for infants, invalids and convalescents is prepared in the laboratory work. Parallel readings are required. Tu., at 9 and Th., 1 to 4. Professor Stoner.

12. Theory and Practice of Domestic Science. Three and one-half credit hours. Third term. Elective. This course is designed for young women who desire to take special professional training in Home Economics and who wish to study the educational, economical, scientific and practical principles involved in the application of those subjects in pro-

essional work. A study of course of work and equipment in various schools, planning and furnishing of class rooms and laboratories. Lectures, conferences and practical work in teaching, etc. Tu., Th., at 10 and F., 1 to 4. Professor Stoner.

DOMESTIC ART

ASSOCIATE PROFESSOR SECREST.

1. **Hand craft.** Two and one-half credit hours. First term. A systematic study of the principles of plain needle work. The application in various articles. Cord work, and woven and sewed basketry. A study of race development as shown in hand work, and in the evolution of spinning and weaving. Lectures and recitations. W., at 11. Laboratory, Tu., 1 to 4. Associate Professor Secrest.
2. **Textiles.** Two and one-half credit hours. Second term. This course covers a study of fabrics, history, processes of manufacture and the development of these processes, economic value and their effect on social conditions. Also garment making; the taking of accurate measurements, drafting by simple measurements; the choice and economical cutting of materials, and the making of garments. Lectures, recitations, W., at 11; laboratory work, Tu., 1 to 4. Collateral reading. Associate Professor Secrest.
3. A continuation of Domestic Art, 2. Two and one-half credit hours. Third term. W., at 11; Laboratory, Tu., 1 to 4. Associate Professor Secrest.
4. **History of Costume. Design and Dress-Making.** Second term. Costume designing; making of patterns from systems of dressmaking; making waists and skirts, and tailor pressing and construction. Prerequisite, courses 1, 2 and 3. Lectures, demonstrations, recitations Tu., and Th., at 9. Laboratory work, Th., and F., 1 to 4. Associate Professor Secrest.
5. **Household Art and Decoration.** Five credit hours. Third term. Art in every day life; effect of color in the home; healthful and beautiful clothing and furniture. Millinery—Practical construction and artistic trimming of hats. Millinery for all seasons considered. Prerequisite courses 1, 2 and 3. Lectures, discussions, Tu., and Th., at 9; laboratory work, Th., and F., 1 to 4. Associate Professor Secrest.
6. **Theory and Practice of Teaching Domestic Art.** Five credit hours. First term. This course deals with the place of Domestic Art in modern education. A study of courses of work and equipment in various schools, the organization and management of departments, the planning and furnishing of class rooms and laboratories. Lectures, conferences, Tu., and Th., at 10; practical work in teaching, laboratory, W., 1 to 4. Associate Professor Secrest.

In all courses except 1 students provide their own material.

ECONOMICS AND SOCIOLOGY

University Hall, Rooms 17, 18, 20, 29

PROFESSOR HAGERTY, DR. THOMPSON, ASSISTANT PROFESSOR ———

Undergraduate Courses

1. **Elements of Political Economy.** Three credit hours. Three terms. A careful study of the laws of production, exchange, distribution, and consumption of wealth; combined with an analysis of the industrial

actions of men as regards land, labor, capital, money, credit, rent, interest, wages, etc. Text-book, lectures, and individual investigations. In the Economics-History group an option is given. It is desirable that students who do not come well prepared in history and with a fair amount of general knowledge of economic principles should take courses 2, 3, 4, deferring course 1 to their second year. Law students will find this course well adapted to their work. Sec. I, M., W., F., at 8; Assistant Professor _____. Sec. II, M., W., F., at 9; Professor Hagerty. Sec. III, M., W., F., at 2; Assistant Professor _____.

This course should precede all courses except 2, 3, 4.

2. **The History of Industrial Society.** Three credit hours. First term. A general view of the evolution of modern industrial society; involving a study of the manorial and gild systems; of the rise of class interests; the formation of trading companies; land-holding; labor laws; the development of capitalistic enterprise, and the economic legislation, idea and theories that grew out of these conditions; with special reference to England from the eleventh century. Text book, lectures, and assigned readings. Courses 2, 3 and 4 are open to all students of the University without preliminary requirements. M., W., F., at 9. Assistant Professor _____.
3. **Industrial and Financial History of the United States.** Three credit hours. Second term. A complete survey of American industries, financial resources, and policies. The social aspects of the subject will be treated in order to prepare the student for course 11 the following year. Lectures and assigned readings. M., W., F., at 9. Assistant Professor —.
4. **Transportation.** Three credit hours. Third term. A study of the development and present economic status of roads, canals, and railroads in their relation to industry, society, and to the state. Lectures and assigned readings. M., W., F., at 9. Assistant Professor _____.
5. **Practical Problems; Immigration, Money, Land.** Two credit hours. First term. Tu., Th., at 9. Prerequisites, 1 or 2, 3, 4. Professor Hagerty.
6. **Practical Problems; Railroads, Tariff, Crises.** Two credit hours. Second term. Tu., Th., at 9. Should be preceded by course 5. Professor Hagerty.
7. **Practical Problems; Labor and Capital.** Two credit hours. Third term. Under the head of labor are discussed the problems of co-operation, profit-sharing, strike, eight-hour day, trade unions, etc. Under the head of capital are discussed the problems of municipal ownership of quasi-public utilities, and capitalistic production. Should be preceded by course 6. Tu., Th., at 9. Professor Hagerty.
8. **Economic Geography.** Three credit hours. First term. A study of the extractive industries—agriculture, horticulture, mining, fisheries. The relative importance of the leading nations as determined by their economic resources will be considered. M., W., F., at 11. This course must be preceded by course 1. Assistant Professor _____.
9. **Economic Geography of the United States.** Three credit hours. Second term. Climate, soil, and surface considered as determining resources and their utilization. The relative importance of agricultural, manufacturing, mining, and commercial industries, and their relation to each other will be considered. M., W., F., at 11. Should be preceded by course 8. Assistant Professor _____.
10. **The Distribution of Products.** Three credit hours. Third term. This course will deal with the various methods of marketing goods, including a study of distributing centers, of wholesale and retail institutions, commercial agencies. Boards of Trade, Chambers of Commerce, Stock Exchanges, etc. M., W., F., at 11. Should be preceded by 8 and 9. Professor Hagerty.

11. **Sociology.** Three credit hours. First and second terms. Text books, lectures, and original investigations. Through the kindness of the various officers of the Godman Guild House opportunity will be provided students in this course to do practical work at the guild, and the State Board of Charities as well as the officers of the Associated Charities of the city are enlisted in the work of this course. M., W., F., at 1. First term, Giddings' Elements of Sociology. Second term, Henderson's Dependents, Defectives, and Delinquents. This course should be preceded by 1 or 2, 3, and 4. Professor Hagerty.
12. **Primitive Society.** Three credit hours. Third term. This course must be preceded by course 11. Text book, Tyler's Anthropology. M., W., F., at 1. Professor Hagerty.
13. **Public Finance and Taxation.** Two credit hours. First and second terms. This course aims to make the student acquainted with the theory of public revenue and expenditure; and with the leading systems of financial administration throughout the world. Text book, Adams' Finance and lectures. Tu., and Th., at 2. Dr. Thompson.
14. **Money. Credit and Banking.** Two credit hours. Third term. This course involves the history and theory of the subject, a comparative study of the monetary systems, currency, etc., together with the various methods of banking; national banks; clearing house system, etc.; with a critical analysis of proposals for reform. Lectures and collateral readings. Tu., and Th., at 2. Dr. Thompson.
15. **Problems in Sociology.** Two credit hours. Three terms. A study of social forces and social institutions. This course involves a study of the various social institutions, the family, church, state, and the various voluntary societies, social, economic, and benevolent. It will also include a study of the customs, conduct, manners, habits of thought, etc., of peoples. The third term will be devoted to a study of the English social pioneers of the 19th century—Owen, Kingsley, Maurice, Ruskin, etc. This course must be preceded by 11 and 12. Tu., Th., at 10. Professor Hagerty.
16. **Commerce.** Three credit hours. First term, History and Geography of Commerce. Second term. Theory and Technique of Commerce. Third term, Art of Commerce. The aim of this course is decidedly practical and it is suggested that the student might with profit coordinate it with one or more of the following courses: Botany 7; Chemistry 32; Drawing 1; Geology 6; Political Science 4 and 5; and certain courses in Law. This course must be preceded by courses 8, 9 and 10, and should be elected in the third year. Lectures, practical investigations, and reports. M., W., and F., at 11. Assistant Professor ———.
17. **Seminary in Economics.** Two credit hours. Three terms. Students having their major work in Economics must take this course in their fourth year. Open to graduates and advanced undergraduates on permission of the head of the department. The work for the ensuing year 1904-5 is outlined as follows: At each alternate meeting a practical problem will be presented and discussed. The other meetings will take up the study of Classical Economists—English, German, and American. Those contemplating taking the course should arrange for this work in advance and receive their assignments. M., 3 to 5. Professor Hagerty.
18. **Thesis Work.** Two credit hours. Three terms. In this work, as far as possible, only original sources are used, and investigations made from real life. The aim is to set before each student the accomplishment of the task of extending in some degree, however slight, the boundaries of economic and sociological knowledge. Meetings are arranged with the instructor throughout the year. This course may accompany 22. Hours to be arranged.

19. **Business Laws and Forms.** Two credit hours. First and second terms. Text book, lectures, and laboratory work. May be taken in connection with course 16. Tu., Th., at 11. (Omitted in 1904-5.)
20. **Corporation Problems.** Two credit hours. Third term. This course aims at a complete analysis of the subject in both its theoretical and practical aspects. Trusts, mergers, and capitalistic forms of organization in general come under discussion. It follows course 19. Tu., and Th., at 11. (Omitted in 1904-5.)
21. **Economic Thought.** Two credit hours. First term. Text book and lectures. This course must be preceded by 1, and 2, 3, and 4, and should be taken in the third year. Tu., and Th., at 11. Professor Hagerty. (Omitted in 1904-5.)

GRADUATE COURSES.

22. **Advanced Economics.** One to ten credit hours. Three terms. Hours arranged with the students individually. Open to undergraduates only on permission of the head of the department. The aim of these courses is to offer the student an opportunity to specialize to any degree he may desire along the various lines within the field of the department. Elections will naturally fall under the following heads:
 - (a) Theoretical problems. (b) Historical problems. (c) Practical problems. (d) Finance. (e) Commerce. (f) Sociology (Theoretical or Practical). (g) Statistics. (h) Teachers' Course and Training for Fellowship.

When several students elect the same line of work, they may constitute themselves a group and a *Seminary* will be organized as a nucleus for such work. A *Seminary in Sociology* (22f) is announced for the year 1904-5. Students should give notice in advance if they desire to enter this course. Tu., 3 to 5.

EDUCATION

University Hall, Rooms 51 and 54.

ASSOCIATE PROFESSOR MAJOR, ASSISTANT PROFESSOR HAINES.

1. **Educational Psychology.** Three credit hours. Three terms. The aim of this course is to make a thorough study of laws and principles selected from standard psychological literature which seem to bear upon educational theory and practice. Emphasis is laid upon the function of psychology in determining the selection and arrangement of school studies as well as upon its bearing on class-room procedure. The work of the first two terms will be based on James' Talks on Psychology and Adams' Herbartian Psychology supplemented by reference to standard psychological and educational literature. The course will include topics as: The physical basis of mental life, native impulses and interests, habit, association of ideas, interest and attention, imitation and suggestion. The work of the third term will consist of a study of normal mental types, a description of the so-called stages of mental development, special topics in mental pathology. Open to second year students. M., W., F., at 11. Associate Professor Major.
2. **Introduction to Educational Theory.** Two credit hours. Three terms. The chief purpose of this course is to enable the student to understand the nature of present day educational problems and to arouse interest in their critical study. An effort is made also to establish a body of educational principles derived from ethics, psychology, biology and sociology. The following topics will indicate the general nature of the course: Education as a science; the aim of education; educa-

tional values; the relation of psychology to education; the meaning and value of child-study; the learning process; stages of mental development; the selection and arrangement of school studies; prescribed and elective courses of study. T., Th., at 10. Associate Professor Major.

3. **History of Education.** Three credit hours. Three terms. This course gives an account of the most important educational movements and systems beginning with the oldest culture nations and concluding with a study of the present trend of education in this country and Europe. Constant reference is made to the influence of religious, political and social ideas in controlling a people's educational aims and methods; Greek education; the rise of the universities; the Renaissance; the Reformation and education; the rise and development of humanism; the development of modern theories and systems of education. Should be preceded or accompanied by European history, 1, 2, 3. M., W., F., at 2. Assistant Professor Haines.
4. **Child Study.** Two credit hours. Three terms. The first part of this course is designed to present the general facts and laws of physical growth and development with special reference to school hygiene. The following topics indicate the nature of this part of the course: Laws of bodily development, development of the nervous system, defects of sight and hearing, the fatigue problem. Principal references: Donaldson's Growth of the Brain, Warner's Study of Children, Rowe's Physical Nature of the Child. The second part of the course aims to describe the characteristic features of child mind, to study the principles and empirical data of mental development with special reference to educational theory and practice. The course includes a study of typical definitions of mental development, the theory of nascent periods, children's imagery, types of children, mental defects and abnormalities, the value of laboratory tests of mental ability. Principal references: Pedagogical Seminary; Trans. Ill. Soc. for Child Study; Educational Review; Sully's Studies of Childhood; Barnes' Studies; Baldwin's Mental Development. M., F., at 10. Associate Professor Major.
5. **Science of Education.** Three credit hours. Three terms. This course aims to afford a wide view of the science of education, endeavoring to develop a consistent theory of education. It is especially intended for students who expect to deal with the larger problems of education which confront the superintendent or principal. It means to widen the horizon and at the same time orient the student in this larger world. But all teachers should have this enlarged view and intelligent grasp of the fundamental problems of education, to make them masters of their craft. It should help all specialists to see the place of their particular grade or subject in the developmental process of the individual pupil. It is an essential part of the professional training of the teacher. Philosophy 18, 19, and education 1, 2 or 3 must precede this course. Lectures, readings and reports. M., W., F., at 11. Assistant Professor Haines.
6. **Modern Educational Systems.** Two credit hours. Three terms. A comparative study of the educational systems of Germany, England and France. The course will deal briefly with the history of these systems, but chiefly with their present organization. The interest centers in the secondary education of those countries, and so the course will appeal chiefly to prospective high school teachers, or those who will be called upon to organize and develop high schools. Russell's German Higher Schools, Balfour's Educational Systems of Great Britain and Ireland, and the Reports of the U. S. Commissioner of Education constitute the essential literature for the course. Lectures, reading and reports. Tu., Th., at 2. Associate Professor Major.
7. **Secondary Education.** Two credit hours. Three terms. The history, curriculum, organization and administration of secondary education in the United States. After making a short study of the historical

development of secondary education in the United States, the course will be concerned mainly with the problems of the public high school and will include a consideration of the various functions of the high school; the educational value and arrangement of the high school studies now generally accepted; the demand for changes in the contents and organization of the high school curriculum. A study of the Reports of the Committee of Ten and of the Committee on College Entrance Requirements will form an important feature of the course. The course is intended primarily for those who are preparing to become high school teachers or principals. Open to third and fourth year students, and graduates. T., Th., at 11. Associate Professor Major.

8. **Educational Classics.** Two credit hours. Three terms. The aim of this course will be to make a critical and comparative study of such classics as Plato's Republic, Rousseau's Emile, Pestalozzi's Leonard and Gertrude, Froebel's Education of Man, Herbart's Science of Education, Spencer's Education. Lectures, readings and reports. M., W., at 2. Associate Professor Major.
9. **Seminar.** Two credit hours. Three terms. Designed for students who wish to investigate special problems in education. Members of the course will work independently, but will meet once a week for general discussion of some subject under investigation. Open only to fourth year students and graduates who have worked extensively either in philosophy or education. F., 2 to 4. Associate Professor Major.

ELECTRICAL ENGINEERING

Office, Electrical Building, Room 8

PROFESSOR CALDWELL, ASSISTANT PROFESSOR FISH.

6. **Electrical Engineering.** Two credit hours. Lectures on direct and alternating circuits, dynamo machinery, transformers, accumulators and their applications. (Courses in Civil, Mechanical and Mining Engineering, Industrial Arts and Manual Training, fourth year, first and second terms; Course in Chemical Engineering, fourth year, first term. M., Th., at 10.) Professor Caldwell.
7. **Electrical Engineering.** Two credit hours. Laboratory work on the subjects treated in Course 6, which it accompanies. Fourth year. Assistant Professor Fish.

 First term—S. 8-12. Course in Chemical Engineering.
 W. 1-5. Course in Industrial Arts.
 W. 1-5. Course in Manual Training.
 W. or Th. 1-5. Course in Mechanical Engineering.
 M. 1-5. Course in Mining Engineering.

 Second term—M. or W. 1-5. Course in Civil Engineering.
 Th. 1-5. Course in Industrial Arts.
 Th. 1-5. Course in Manual Training.
 Th. 1-5 or S., 8-12. Course in Mechanical Engineering.
 W. 1-5. Course in Mining Engineering.
8. **Direct Current Dynamo Machinery.** Four credit hours. Generators and motors, their theory, construction and operation. Lectures, recitations and problems. (Course in Electrical Engineering, third year, second term, M., Tu., Th., F., at 9.) Professor Caldwell.
9. **Elementary Dynamo Laboratory.** Four credit hours. Handling and testing of circuits, generators, motors, etc. (Course in Electrical Engineering, third year, third term, W., Th., 1 to 5; or F., 1 to 5, S., 8 to 12.) Assistant Professor Fish.

10. **Alternating Current Circuits and Machinery.** Three credit hours. Single phase and polyphase generators, motors, transformers and other apparatus. Lectures, recitations and problems. (Course in Electrical Engineering, fourth year; first term, M., W., F., at 11; second term, M., W., F., at 8.) Professor Caldwell.
11. **Advanced Dynamo Laboratory.** Three credit hours. Continuation of the work begun in Course 9, together with alternate current apparatus, telephone apparatus, accumulators, lamps, etc. (Course in Electrical Engineering, fourth year; first term, Tu., or F., 10 to 5; second term, Tu., or F., 10 to 5; third term, M., 10 to 5, or Tu., 10 to 5.) Assistant Professor Fish.
12. **Electrical Transmission and Distribution.** Two credit hours. Systems, operation and apparatus. (Course in Electrical Engineering, fourth year, second term, Tu., Th., at 8.) Professor Caldwell.
13. **Application of Electricity.** Five credit hours. Brief treatment of the application of electricity to illumination, railway work, telephone, electro-metallurgy, mining, etc. The seminary method is used in this course to the extent of each student writing one paper on some assigned subject, and reading the same before the class. (Course in Electrical Engineering, fourth year, third term, M., Tu., W., Th., F., at 8.) Professor Caldwell.
14. **Electrical Design.** Four credit hours. Includes wiring plans, dynamos, transformers, distribution, etc. (Course in Electrical Engineering, fourth year; second term, M., Tu., 1 to 5; third term, W., 1 to 3, Th., F., 1 to 4). Professor Caldwell.

ENGLISH

(Office, Rooms 44 and 31, University Hall.)

PROFESSOR DENNEY, PROFESSOR BARROWS, ASSOCIATE PROFESSOR TAYLOR, ASSISTANT PROFESSOR GRAVES, ASSISTANT PROFESSOR MCKNIGHT, MISS MOLLOY, MISS WEAVER, MISS JACKSON.

UNDERGRADUATE COURSES.

1. **Paragraph Writing and Analysis of Prose.** (Formerly Rhetoric 1.) Two credit hours. Three terms. The course includes two exercises weekly, in the writing of short themes, the outlining and composition of essays and speeches, and the study of illustrative texts for structure and form. Text-books, Scott and Denney's Paragraph Writing, Cairn's Forms of Discourse. M., Th., or Tu., F., at 8, Tu., Th., at 9, Tu., Th., at 10, M., F., at 11. Professor Denney, Associate Professor Taylor, Assistant Professor Graves, Assistant Professor McKnight, Miss Molloy, Miss Weaver, Miss Jackson.
2. **Expository Writing.** (Formerly Rhetoric 2.) Two credit hours. First term. In this course, practice is afforded in composing the various types of the essay, specimens of which are analyzed by the class. Text-book, Buck & Woodbridge's Expository Writing. M., or Tu., and Th., or F., at 10; Tu., Th., at 11; W., F., at 1. Prerequisite, course 1. Professor Denney, Assistant Professor McKnight.
3. **Brief Making and Written Argumentation.** (Formerly Rhetoric 3.) Two credit hours. Second and third terms. The course includes a study of the principles of logical analysis, evidence and argumentation; practice in writing briefs of noted speeches (Baker's Specimens); and in preparing original briefs with written arguments. Prerequisite, course 1. M., or T., and Th., or F., at 10; Tu., Th., at 11; W., F., at 1. Professor Denney, Assistant Professor McKnight.

5. **Advanced Composition.** (Formerly Rhetoric 10.) Two credit hours. Second and third terms. This course affords practice in one or more of the forms of composition studied in courses 1 and 2, (exclusive of argumentation.) Prerequisite, courses 1 and 2. Tu., Th., at 11. Professor Denney, Assistant Professor Graves.
7. **Introduction to English Literature.** (Formerly English Literature 1.) Three credit hours. Three terms. Moody and Lovett's English Literature; literary analysis and interpretation; critical study of selections beginning with those in Palgrave's Golden Treasury. No prerequisite course. M., W., F., at 8 and at 9. Professor Barrows.
8. **General Survey of English Literature.** Three credit hours. Three terms. An extensive reading course intended especially for those whose scheme of work permits no further courses in English. No prerequisite course. M., W., F., at 11. Assistant Professor Graves.
10. **Spenser to Milton.** (Formerly English Literature 2.) Three credit hours. First term. The course includes a special study of the Elizabethan lyrics. Prerequisite, course 7 or 8. M., Tu., Th., at 10. Professor Barrows.
11. **Dryden to Pope.** (Formerly English Literature 3.) Three credit hours. Second term. Especial attention is given to the work of Swift. Prerequisite, course 7 or 8. M., Tu., Th., at 10. Professor Barrows.
12. **The Age of Johnson.** (Formerly English Literature 4.) Three credit hours. Third term. The course includes a study of the Eighteenth Century Essayists. Prerequisite, course 7 or 8. M., Tu., Th., at 10. Professor Barrows.
14. **Burke to De Quincey.** Four credit hours. First term. This course with 15 and 16 comprises a study of the dominant ideas of the 19th century as embodied in its prose exclusive of fiction. Prerequisite, course 7 or 8. M., Tu., W., Th., at 9. Professor Denney.
15. **Carlyle, Ruskin, Newman.** Four credit hours. Second term. Prerequisite, course 7 or 8. M., T., W., Th., at 9. Professor Denney.
16. **Arnold, Pater, Stevenson.** Four credit hours. Third term. Prerequisite, course 7 or 8. M., Tu., W., Th., at 9. Professor Denney.
18. **Shelley and Wordsworth.** (Formerly English Literature 6.) Three credit hours. First term. Prerequisite, course 7 or 8. M., W., F., at 9. Associate Professor Taylor.
19. **Tennyson.** (Formerly English Literature 18.) Three credit hours. Second term. Prerequisite, course 7 or 8. M., W., F., at 9. Associate Professor Taylor.
20. **Browning.** (Formerly English Literature 18.) Three credit hours. Third term. Prerequisite, course 7 or 8. M., W., F., at 9. Associate Professor Taylor.
22. **The English Bible: Pentateuch and the Earlier Histories.** (Formerly English Literature 7.) One credit hour. Three terms. Th., at 8. Professor Barrows.
23. **The English Bible: The Later Histories, Poetry, Prophecies.** (Formerly English Literature 8.) One credit hour. Three terms. No prerequisite course. Not offered until 1905-6. Professor Barrows.
24. **The English Bible: The New Testament.** (Formerly English Literature 9.) One credit hour. Three terms. No prerequisite course. Not offered until 1906-07. Professor Barrows.

26. **History of the English Language.** (Formerly Rhetoric 15.) Two credit hours. First and second terms. Text-book, Champney's History of English. No prerequisite course. Not offered until 1905-6. Assistant Professor McKnight.
27. **English Words.** Two credit hours. Third term. Text book, Greenough and Kittredge's Words and Their Ways in English Speech. No prerequisite course. Not offered until 1905-6. Assistant Professor McKnight.
28. **Old English Prose and Poetry.** (Formerly Rhetoric 16.) Two credit hours. Three terms. Text-book, Sweet's Anglo Saxon Reader. No prerequisite course. Tu., Th., at 9. Assistant Professor McKnight.
30. **Poe-Chaucerian Literature.** (Formerly Rhetoric 18.) Three credit hours. First term. Middle English Prose and Poetry; evolution of modern verse. Prerequisite, course 7 or 8. M., W., F., at 11. Assistant Professor McKnight.
31. **Chaucer.** (Formerly English Literature 13.) Three credit hours. Second term. Prerequisite, course 7 or 8. M., W., F., at 11. Assistant Professor McKnight.
32. **Arthurian Story.** (Formerly Rhetoric 17.) Three credit hours. Third term. Arthurian story in English will be studied in connection with the related stories in Celtic and in French. Prerequisite, course 7 or 8. M., W., F., at 11. Assistant Professor McKnight.
35. **Shakespeare and the Elizabethan Drama.** (Formerly English Literature 10.) Three credit hours. Three terms. This course includes, besides the study of plays, lectures on the development of the drama. Prerequisite, course 7 or 8. M., W., F., at 3. Professor Barrows.
36. **The Drama Since Shakespeare.** (Formerly English Literature 15.) Three credit hours. First and second terms. Not offered until 1905-6. Prerequisite, course 7 or 8. Professor Barrows.
37. **Milton: Epic and Prose.** (Formerly English Literature 14.) Three credit hours. Third term. Not offered until 1905-6. Prerequisite, course 7 or 8. Professor Barrows.
38. **The History of Prose Fiction.** Four credit hours. First term. Not offered until 1905-6. Prerequisite, course 7 or 8. Professor Barrows.
39. **The Short Story.** (Formerly Rhetoric 4.) Four credit hours. First term. Some practice in composition will be afforded. Prerequisite, courses 2, and 7 or 8. M., W., Th., and F., at 2. Assistant Professor Graves.
40. **The Novel.** (Formerly English Literature 11.) Four credit hours. Second and third terms. Prerequisite, course 7 or 8. M., W., Th., F., at 2. Associate Professor Taylor.
42. **Literary Types.** (Formerly English Literature 17.) Three credit hours. First and second terms. A theory of criticism is developed and applied to the dramatic, epic and lyric types in both verse and prose. Prerequisite, course 7 or 8. M., W., F., at 1. Associate Professor Taylor.
43. **Poetics.** (Formerly Rhetoric 6.) Three credit hours. Third term. Some practice in verse writing is afforded. Text-book, Alden's English Verse. Prerequisite, course 7 or 8. M., W., F., at 1. Assistant Professor Graves.
45. **American Literature.** (Formerly English Literature 12.) Three credit hours. First term. Prerequisite, course 7 or 8. M., Th., F., at 10. Associate Professor Taylor.

46. **Current Literature.** (Formerly English Literature 19.) Three credit hours. Second and third terms. Prerequisite, course 7 or 8. M., Th., F., at 10. Associate Professor Taylor.
48. **Teachers' Course.** (Formerly Rhetoric 13 and English Literature 21.) Two credit hours. Three terms. Prerequisite, courses 1, 2, and 7 or 8. Not given until 1905-6.
49. **Seminary in Rhetoric.** (Formerly Rhetoric 12.) Two credit hours. Three terms. Topic for 1904-5, Development of Rhetorical Ideas. M., 4 to 6. Assistant Professor McKnight. Topic for 1905-6, the History of Rhetoric. Professor Denney.
50. **Seminary in Literary Criticism.** Two credit hours. Three terms. Not given until 1905-6. Topic for 1905-6, Shakespeare's Earlier Comedies. Professor Denney.

GRADUATE COURSES.

For admission to major graduate work in this department the student should have a reading knowledge of two languages besides English and should have such an acquaintance with English Language and Literature as is represented by two years of undergraduate study. He should also be familiar with the outlines of English history.

Courses 28, 30, 31, 32, 42, 43, 45, 46, 48, 49, and 50, described above, though primarily for undergraduates, are open to graduate students as minor work. The major courses are as follows:

- (a) **Theories of Rhetoric.** Individual work in the investigation of rhetorical problems, or of topics in the history and development of rhetorical theory. Professor Denney.
- (b) **Old and Middle English Philology.** Selected works studied for the acquisition of methods of philological research. The topic investigated in 1903-4 was the Rise of Romance and the Development of the Court Allegory. Assistant Professor McKnight.
- (c) **Literary Problems.** A series of studies of the fundamental problems of criticism. Lectures followed by investigation of special topics. Professor Barrows.
- (d) **Comparative Criticism.** The development of literary types. The types in English Literature being referred to their models in classic or romance literature. The course requires a reading knowledge of French and German and some acquaintance with Greek and Roman literature. In 1903-4 the types studied were the pastoral, the romance, and the novel. Associate Professor Taylor.

EUROPEAN HISTORY.

University Hall, Rooms 7, 36.

PROFESSOR SIEBERT, DR. MCNEAL.

The courses of instruction in this department are divided into three groups: (1) the general courses in Ancient, Continental and English history (courses 1, 2 and 3; 14; 5 and 6); (2) the advanced courses, dealing in a fuller way with special periods and phases of the subject (courses 4, 7, 8, 9, 10, 11, 12, 15, 16, and 18); and (3) those courses intended to acquaint the student with the principles and method of research (Courses 20 and 21).

The general courses are intended to meet the needs of four classes of students: (a) those desiring only a general knowledge of European history; (b) those looking forward to advanced work in the department; (c) those study-

ing Greek and Latin (see Courses 5 and 6); and (d) those expecting to specialize in the line of American history, or to enter upon a legal or business career. For the fourth class courses 1, 2, 3, 4 and 14 are especially recommended

The advanced courses are intended to acquaint those qualified to enter them with an intimate knowledge of the special period or subject concerned, to give the student a comprehensive acquaintance with the best authorities and practice in the written and oral exposition of assigned topics. Courses 1, 2 and 3 must precede these advanced courses, except that Course 4 should be preceded by Course 14.

1. **The Early Middle Ages.** Three credit hours. First term. The history of Europe to 1300, including the establishment of the mediæval empire, the formation of the separate states, the rise of the Christian church, the crusades, and the conflict of the empire with papacy. Lectures, recitations and assigned readings. Robinson, History of Western Europe. Two sections. Sec. I: M., W., F., at 9, Professor Siebert. Sec. II: M., W., F., at 1, Dr. McNeal.
2. **Renaissance.** Three credit hours. Second term. The history of Europe from 1300 to 1500, giving an account among other things of the revival of learning, the revival of commerce and industry, and the voyages of discovery. Lectures, recitations and assigned readings. Robinson, History of Western Europe. Two sections. Sec. I: M., W., F., at 9, Professor Siebert. Sec. II: M., W., F., at 1, Dr. McNeal.
3. **Modern Europe.** Three credit hours. Third term. A general survey of European history from 1500 to the present time, including the Reformation, the rise of Russia and Prussia, the English and French revolutions, and the unification of Italy and Germany. Lectures, recitations and collateral readings. Robinson, History of Western Europe. Two sections. Sec. I: M., W., F., at 9, Professor Siebert. Sec. II: M., W., F., at 1, Dr. McNeal.
4. **Political and Constitutional History of England.** Three credit hours. Three terms. An advanced course. First term—Germanic origins of the English nation; Anglo-Saxon institutions; effects of the Danish and Norman invasions. Second term—Early history of Parliament; the church in England; the Reformation and Puritan revolution. Third term—The restoration of the Stewarts; the establishment of a Protestant line of rules; the rise of party government; parliamentary reform, etc. It must be preceded by Course 14 or Courses 1, 2, 3. M., W., F., at 11. Professor Siebert.
5. **Political and Social History of Greece to the Roman Conquest.** Two credit hours. First term. A short course introduced by a few lectures on ancient oriental history. Lectures text-book and assigned readings. Botsford's History of Greece. Tu., Th., at 9. Dr. McNeal. Given biennially. Omitted in 1905-1906.
6. **Roman History and Institutions to the End of the Republic.** Two credit hours. Second and third terms. This course together with Course 5, is intended to meet the needs of students taking Latin and Greek. Lectures, recitations and special reports. Tu., Th., at 9. Dr. McNeal. Given biennially. Omitted in 1905-1906.
7. **Period of the Protestant Reformation.** Three credit hours. First term. Open to those who have had Courses 1, 2 and 3, or 14. This is an advanced course, and deals with reformational movements from the time of the death of Dante (1231), to the Council of Trent (1562). Lectures, collateral reading and investigations. M., W., F., at 2. Professor Siebert.
8. **The French Revolutionary and Napoleonic Periods, 1789-1815.** Three credit hours. Second term. Open to students who have had Courses 1, 2, and 3, or 14. An intensive study of the causes and effects of the French

Revolution, and of Napoleon's struggle with Europe. Lectures, collateral reading and special reports. M., W., F., at 2. Professor Siebert.

9. **History of Europe in the Nineteenth Century.** Three credit hours. Third term. Open to students who have had Courses 1, 2, and 3, or 14. Lectures, assigned readings and topical reports. M., W., F., at 2. Professor Siebert.
10. **History of European Colonies.** Three credit hours. First and second terms. Open to students who have had Courses 1, 2 and 3, or 14. A study of the colonial enterprises of Portugal, Spain, England, the Netherlands, France and Germany. This course begins with the age of geographical discoveries and traces the evolution of colonies to the present time. Lectures, assigned readings and investigations. M., Tu., F., at 10. Professor Siebert. Given biennially. Omitted in 1904-1905.
11. **The Eastern Question.** Three credit hours. Third term. An advanced course treating of the relations of European powers with Turkey and Russia by means of lectures, topical reports and required readings. Open to students who have had Courses 1, 2 and 3. Course 9 gives a special preparation for this course. M., Tu., F., at 10. Professor Siebert. Given biennially. Omitted in 1904-1905.
12. **Constitutional History of France.** Two credit hours. Three terms. From the ninth to the middle of the eighteenth century. Origin and development of the feudal system in France, growth of the French Monarchy, French institutions before the Revolution. Lectures, required reading, reports. Students must be able to read French. Courses 1, 2, 3 prerequisite. Tu., Th., at 9. Dr. McNeal. Given biennially. Omitted in 1904-1905.
14. **Narrative History of England.** Three credit hours. Three terms. General course in the History of England. Lectures, text-book and reports. M., W., F., at 8. Dr. McNeal.
15. **History of North-Eastern Europe.** Two credit hours. First and second terms. This course will deal with Denmark, Sweden, Poland and Russia from the fifteenth century. Courses 1, 2 and 3, or 14 are prerequisite. Lectures and reports. Tu., Th., at 9. Professor Siebert. Given biennially. Omitted in 1905-1906.
16. **Europe and the Asiatic Question.** Two credit hours. Third term. Origin and development of the interests of the various European states in the Far-East. Lectures and reports. Courses 1, 2 and 3, or 14 are prerequisite. Tu., Th., at 9. Professor Siebert. Given biennially. Omitted in 1905-1906.
18. **History of Mediaeval Civilization.** Three credit hours. Three terms. A study of institutions and customs in Western Europe during the Middle Ages; primitive Germanic conditions, social and economic features of the Frankish Kingdom and Empire, monasticism, origins of feudalism, etc. Lectures, readings, reports. M., W., F., at 3. Courses 1, 2, 3 prerequisite. Dr. McNeal. Given biennially. Omitted in 1904-1905.
- 19a. **The Germanic Invasions.** Three credit hours. First term. Early history of the Germanic tribes; invasions of the Roman Empire; history of the tribal kingdoms; the history of Western Europe from the second to the seventh centuries. Lectures, readings, reports. M., W., F., at 3. Courses 1, 2, and 3, or 14 prerequisite. Dr. McNeal. Given biennially. Omitted in 1905-1906.
20. **Historical Method and Documentary Sources of the Middle Ages.** Two credit hours. Three terms. Study of special problems and topics. An outline of the principles of historical research and criticism; the bibliography of history; a study of mediaeval sources. German tribal laws, capitularies, charters, formulæ, etc. Courses 1, 2, 3, or 14 prerequisite. Hours to be arranged. Dr. McNeal.

21. **Investigations of Special Topics in Modern European History.** Two credit hours. Three terms. Open to those students who are able to satisfy the instructor as to their fitness to pursue the course. Hours to be arranged. Professor Siebert.
- 19b. **Charles the Great.** Three credit hours. Second term. Origins and early history of the Carolingian house; career of Charles; institutions of his empire; the Carolingian renaissance; dissolution of the Carolingian empire; Western Europe during the eighth and ninth centuries. M., W., F., at 3. Courses 1, 2 and 3, or 14 prerequisite. Dr. McNeal. Given biennially. Omitted in 1905-1906.
- 19c. **The Feudal System.** Three credit hours. Third term. The conflict of the Empire and the Papacy; the Crusades; study of feudalism and the mediaeval church; Western Europe from the eleventh to the thirteenth centuries. M., W., F., at 3. Courses 1, 2 and 3, or 14 prerequisite. Dr. McNeal. Given biennially. Omitted in 1905-1906.

FRENCH.

(See Romance Languages and Literatures.)

GEOLOGY.

Orton Hall, Rooms 1, 4, 5, 7 and 13.

PROFESSOR PROSSER, PROFESSOR BOWNOCKER.

1. **Physiography.** Five credit hours. The topographic features of the earth's surface and the agencies producing these. The atmosphere, climate, etc. Oceans, rivers and lakes. Recitations, lectures, map work. (Short Courses in Agriculture, Mining and Clay Working, first year. Short Course in Industrial Arts, second year, third term. M., Tu., W., Th., F., at 11.) Professor Bownocker.
2. **General Geology.** Five credit hours. Structural, historical and dynamical geology. Four hours lectures and recitations, and two hours laboratory and field work. In the laboratory, Dana's *Manual of Geology*, the Ohio Geological Reports and characteristic fossils will be studied. In the field, specimens will be collected, sections measured, formations identified, and the student given an idea of the methods of work pursued by a field geologist. Field trips, mainly on Saturdays. (Long courses in Agriculture and Horticulture, and courses in Architecture, Ceramics, Civil and Mining Engineering, fourth year; Short course in Clay-Working, second year, first term, M., Tu., W., Th., F., at 11.) Professor Prosser.
4. **Elementary Geology.** Five credit hours. Lithological, dynamical, structural and historical geology. Recitations, lectures, laboratory work. (Short Course in Mining, second year, second term. M., F., at 10. Tu., Th., at 9 and W., at 4. Professors Bownocker and Prosser.
5. **Applied Geology.** Three and one-half credit hours. Second term. The common minerals and rocks composing the earth's crust, their disintegration and decomposition. Soils, their origin and classification; the soils of the United States and especially those of Ohio. Fuels, coal, oil and gas. Building stones, limes and cements. Iron and the most useful metals. Lectures, M., Tu., W., at 8; laboratory, Th., at 8. Professor Bownocker.
6. **Economic Geology.** Three credit hours. Lectures and assigned reading. The nature of ores, their classification and origin. The metals of the

United States, their distribution, abundance, modes of occurrence and origin. The non-metals, coal, oil, gas, clay, lime, cement, building stone, etc. In the discussion of the non-metals emphasis will be laid on the products of Ohio. (Courses in Architecture, Ceramics, Civil and Mining Engineering, fourth year; Short course in Clay-Working, second year, second term. M., W., F., at 11.) Professor Bownocker.

7. **Petrography.** Two credit hours. Lectures and laboratory work. The igneous, sedimentary, and metamorphic rocks—their origin and classification. The volcanic rocks of the Western United States—their composition, structure and alteration products. The object of this course is to give the student a practical acquaintance with rocks. (Course in Mining Engineering, fourth year, second term, Tu., at 9 to 11; Th., at 9.) Professor Bownocker.
11. **Inorganic Geology.** Three credit hours. First term. Including lithological, dynamical and structural geology. Lectures, recitations, laboratory work and field exercises. The lectures are illustrated by lantern views, maps, models and specimens. M., W., F., at 9. Open to all. Professor Bownocker.
12. **Historical Geology.** Three credit hours. Second term. A general course in paleontological and stratigraphical geology, with laboratory study of Dana's Manual of Geology, the Ohio Geological Reports and identification of characteristic fossils. The development of organisms and the classification and distribution of the geological formations are considered. Lectures, recitations and laboratory work. The lectures are illustrated by lantern views, maps and specimens. Prerequisite, course 11. M., W., F., at 9. Professor Prosser.
13. **Field Geology.** Three credit hours. Third term. Lecture, field and laboratory study of the geological formations readily accessible from Columbus. This course is intended to acquaint the student with the ordinary methods of field investigation, and involves the collection and identification of specimens, the measurement of geological sections and the preparation of a report describing the region studied. Prerequisite, courses 11 and 12. Field trips Saturdays. Laboratory open M., Tu., W., Th., F., 8 to 12 and 1 to 4. Professor Prosser.
14. **Paleontology.** Two to five credit hours. Three terms. Careful training in systematic classification which may be used in the philosophical study of the development of plant and animal life, or as a means of becoming acquainted with the fauna and flora that characterize the various geological formations. At first the student devotes some time to conchology, studying recent shells in which the characters used in classification are well preserved, and after this preliminary work, fossils are studied. Fossils afford the most reliable data for identifying and correlating geologic formations, and the critical study of faunas is a field especially adapted to independent research. Laboratory, museum, and field work. This course may be undertaken at the beginning of the second or third term. Prerequisite or accompanying courses, 11 and 12. Laboratory open M., Tu., W., Th., F., 9 to 12 and 1 to 4. Professor Prosser.
15. **Areal Geology.** Two to five credit hours. First and third terms. Instruction in the methods of preparing geological maps and reports. The student compiles from a geological report a map with sections showing geologic structure, and later traces the outcrops and prepares a geological map of some region. Prerequisite courses 11, 12, 13 and 14. Field work Saturdays, laboratory open M., T., W., T., F., 9 to 12 and 1 to 4. Professor Prosser.
16. **Advanced Historical Geology.** Three to five credit hours. Three terms. Work in paleontology and stratigraphical geology for students who have had courses 11, 12, 13 and 14. A written report is required which shall review the literature of the work undertaken and in addition show

some scientific merit in the presentation of the results of the original investigation. Field work to be arranged with individual students. Laboratory open M., Tu., W., Th., F., 9 to 12 and 1 to 4. Professor Prosser.

17. **Physiography.** Three credit hours. Three terms. Introductory course. Study of the physiographic features of the earth's surface with special reference to North America; the agencies which produced these, and changes now in progress. The ocean and the atmosphere. The lectures illustrated by lantern views and maps. Open to Freshmen and Sophomores only. M., W., F., at 1. Professor Bownocker.
18. **Geographic Geology.** Three credit hours. Third term. The origin, development and destruction of topographic forms. Rivers, lakes, ocean, ice and winds as agents modifying the surface of the earth. Lectures, map work, field excursions. Prerequisite, course 11 or 17. Tu., Th., 9 to 10. Professor Bownocker.
19. **Petrography.** Two credit hours. Three terms. Laboratory and lectures. Optical crystallography, with practical determination of rock-forming minerals, macroscopically and microscopically. Study of the igneous rocks in the hand specimen and thin section. The Sturtz rock collection and Voight Hockgesang thin sections of typical minerals and rocks will be studied. Books of reference:—Mitchel Levy—Des Minneaux des Roches; Rosenbusch—Mikroskopische Physiographie der Petrographisch Wichtigen Mineralien, 3d ed.; Mikroskopische Physiographie der Massigen Gesteine, 2d ed.; Teall's British Petrography;; Spottiswoode's Polarization of Light. Prerequisites, Chemistry 1, Metallurgy 2, (Mineralogy and crystallography) elementary mineralogy. M., Tu., W., Th., F., 1 to 4. Professor Bownocker.
20. **Research Work.** Three to five credit hours. Three terms. Field, laboratory and library study in Inorganic or Historical Geology. Outline of work and time to be arranged with individual students. Preceding courses in Inorganic or Historical Geology are prerequisite. Professor Bownocker or Professor Prosser.

GERMANIC LANGUAGES AND LITERATURE.

University Hall, Rooms 30 and 32.

PROFESSOR RHOADES, ASSISTANT PROFESSOR VILES, MR. EISENLOHR.

1. **Elementary German.** Four credit hours. Three terms. This course includes a careful study of the inflections and the sentence structure of German and the reading of easy prose; drill on syntax with constant oral and written practice in the reproduction of the text and in prose composition. Sec. I; M., Tu., W., Th., at 9. Professor Rhoades. Sec. II; M., Tu., Th., F., at 10. Assistant Professor Viles. Sec. III; M., Tu., Th., F., at 11. Mr. Eisenlohr. Sec. IV; Tu., W., Th., F., at 2. Assistant Professor Viles. Sec., V; Tu., W., Th., F., at 3. Mr. Eisenlohr.
2. **Science Reading.** Two or four credit hours. Three terms. Sec. 1; M., Tu., W., Th., at 9. Sec. II; Tu., Th., at 8. Mr. Eisenlohr.
4. **Intermediate German.** Four credit hours. Three terms. Review of grammar, reading of descriptive and narrative prose and a classic drama, with prose composition and practice in the reproduction of texts read. Sec. I; M., Tu., Th., F., at 10. Professor Rhoades. Sec. II; M., Tu., Th., F., at 11. Assistant Professor Viles.
9. **Classical Drama.** Three credit hours. Three terms. Lectures on the life and works of Lessing, Goethe and Schiller with the interpretation of Nathan der Weise, Iphigenie auf Tauris and Wallenstein; reports on assigned outside reading. Prerequisite, courses 1 and 4, or four years high school work. M., W., F., at 2. Professor Rhoades.

10. **Modern Prose and Drama.** Three credit hours. Three terms. Reading of modern and contemporary writers, translation, paraphrase and reports in German on assigned outside reading. Prerequisite, courses 1 and 4, or four years high school work. M., W., F., at 2. Professor Rhoades.
Not offered in 1904-1905.
11. **Faust I and II.** Three credit hours. First and second terms. Critical interpretation of the text. Lectures and recitations. Prerequisite, course 9 or 10, except by special permission. Credit for one term will not be given. M., W., F., at 11. Professor Rhoades.
12. **Colloquial Exercises and Composition.** Two credit hours. Three terms. Open only by permission. Prerequisite, course 4 or equivalent. Tu., Th., at 2. Mr. Eisenlohr.
13. **Deutscher Aufsatz.** One credit hour. Three terms. The work is intended especially for students preparing to teach, and affords practice in advanced composition and in the writing of original themes. In the third term lectures on methods of teaching are given, and the members of the class report upon text books, outline courses of study and conduct recitations. M., at 2. Assistant Professor Viles. Third term, Tu., at 2. Professor Rhoades.
14. **Gothic.** Three credit hours. First term. The work is introductory to the historical study of either German or English. Systematic work in grammar with the reading of a large amount of text; philological relations emphasized. Wright's Gothic Primer and ————— M., W., F., at 8. Assistant Professor Viles.
15. **Old High German.** Two credit hours. Second and third terms. With 17 this course forms a natural sequence to 14. Wright's Old High German Primer, and Braune's Alt-hochdeutsches Lesebuch; translation, philological study and a brief survey of Old High German Literature. M., W., at 8. Assistant Professor Viles.
16. **Middle High German.** Two credit hours. Three terms. Wright's Middle High German Primer followed by reading of the Nibelungenlied with selections from the Court Epics and from Walter von der Vogelweide. Literary and philological study. Tu., Th., at 8. Assistant Professor Viles.
17. **Old Saxon and Old Norse.** One credit hour. Second and third terms. The work follows 14 and should be taken in connection with 15. Braune's Abrisz der Althochdeutschen Grammatik mit Berücksichtigung des Altsächsischen and Behagel's Der Heliand. In the third term Sweet's Icelandic Primer. Philological relations are specially emphasized. F., at 8. Assistant Professor Viles.
26. **Seminary. Contemporary German Drama.** Two credit hours. Three terms. Open only to fourth year and graduate students. Hours to be arranged. Professor Rhoades.
28. **Volkslied and Kirchenlied.** Two credit hours. Three terms. Prerequisite, course 4 or equivalent. M., W., at 2. Mr. Eisenlohr.
30. **History of German Literature Since the Reformation.** Three credit hours. Third term. Lectures with reports on assigned reading. Prerequisite, course 4, also 9 or 10 unless taken in connection with this course. M., W., F., at 11. Professor Rhoades.

GREEK LANGUAGE AND LITERATURE

University Hall, Rooms 37, 29 and 28.

PROFESSOR SMITH, ASSOCIATE PROFESSOR HODGMAN, ASSOCIATE PROFESSOR ELDEN.

First-year students coming to the University without preparation in Greek and desiring to study that language will enter Greek 1. For admission to course

7 the student must have passed course 1 or must be prepared at the time of admission as follows: Grammar: (Goodwin or Hadley-Allen) and Prose Composition; or White's First Greek Book entire. Reading: The first three books of Xenophon's Anabasis.

Courses 7-12 cover the work of two college years, and the consecutive numbering indicates the order in which the student is expected to take that work. The later courses, beginning with 13, are not necessarily in sequence, and are open to all who can show that they are qualified to pursue them with profit. This will be understood to mean the accomplishment of courses 7-12 or an equivalent.

Courses 22 and 23 (on the history of ancient art) do not presuppose any knowledge of Latin or Greek; but are especially recommended to those who have studied one or both of these languages.

1. **Elementary Greek.** Four credit hours. Three terms. This course includes the work in White's First Greek Book, with the reading of three books of the Anabasis. It is intended to meet the wants of those who lack the preparation for the advanced courses, or those who wish, without pursuing the subject farther, to gain some acquaintance with the elements of Greek. M., Tu., Th., F., at 11. Associate Professor Elden.
7. **Xenophon: The Memorabilia of Socrates; with Exercises in Greek Prose.** Four credit hours. First term. M., Tu., Th., F., at 11. Professor Smith.
8. **Herodotus, Selections; with Studies in Greek History.** Four credit hours. Second term. M., Tu., Th., F., at 11. Professor Smith.
9. **Homer's Odyssey, Selections from Books I-IX.** Four credit hours. Third term. M., Tu., Th., F., at 11. Professor Smith.
10. **Lysias; Eight Orations; with Studies in Attic Procedure.** Three credit hours. First term. Tu., Th., F., at 10. Professor Smith.
11. **Plato: Apology, Crito and Phaedo (narrative portions).** Three credit hours. Second term. Tu., Th., F., at 10. Professor Smith.
12. **Homer's Iliad.** Three credit hours. Third term. Rapid reading of the first six books, with literary discussion of the Homeric poems. Only those who have taken course 9 or its equivalent, will be admitted to this course. Tu., Th., F., at 10. Professor Smith.
13. **Thucydides: Book I or Book VII.** Three credit hours. First term. M., W., F., at 3. Associate Professor Hodgman.
14. **Demosthenes: Olynthiacs and Philippics.** Three credit hours. Second term. M., W., F., at 3. Associate Professor Hodgman.
15. **Greek Lyric Poets, or Theocritus.** Three credit hours. Third term. M., W., F., at 3. Associate Professor Hodgman.
16. **Attic Drama.** Two credit hours. First term. Lectures and discussions. Tu., Th., at 3. Associate Professor Hodgman.
17. **Euripedes: Two plays.** Two credit hours. Second term. Tu., Th., at 3. Associate Professor Hodgman.
18. **Aeschylus; the Agamemnon.** Two credit hours. Third term. Tu., Th., at 3. Associate Professor Hodgman.
- *19. **Epic Poetry.** Two credit hours. First term. Lectures with reading of Hesiod's Works and Days. W., F., at 2. Professor Smith.
- *20. **Greek Comedy.** Two credit hours. Second term. Lectures, with reading of the Birds of Aristophanes. W., F., at 2. Professor Smith.

- *21. **Post-Classical Greek.** Two credit hours. Third term. Lucian's *Timon* and Dion Chrysostom's *Hunters of Euboea*. W., F., at 2. Professor Smith.
- *22. **Ancient Art.** Two credit hours. First term. Lectures on Architecture. Professor Smith.
- *23. **Ancient Art.** Two credit hours. Second term. Lectures on Sculpture. Professor Smith.
- *24. **Private Life of the Greeks.** Two credit hours. Third term. Lectures. Professor Smith.
- 25. **Greek Philosophy.** Two credit hours. First term. Lectures with reading of Xenophon's *Memorabilia* (other portions than those in course 7). Tu., Th., at 2. Professor Smith.
- 26. **Plato: Gorgias or Protagoras.** Two credit hours. Second term. Tu., Th., at 2. Professor Smith.
- 27. **Studies in New Testament Greek.** Two credit hours. Third term. Tu., Th., at 2. Professor Smith.
- *28. **Historical Grammar.** One credit hour. Three terms. Lectures on the principles that govern the development of the language. Th., at 3. Associate Professor Hodgman.
- 29. **Relations of Greece and Persia.** Two credit hours. First term. Panegyricus of Isocrates. W., F., at 2. Professor Smith.
- 30. **The Macedonian Supremacy: Arrian's Expedition of Alexander the Great.** Two credit hours. Second term. W., F., at 2. Professor Smith.
- 31. **Later Greek Epics: the Argonautica of Apollonius Rhodius.** Two credit hours. Third term. W., F., at 2. Professor Smith.

HISTORY.

(See American and European History.)

ITALIAN.

(See Romance Languages.)

HORTICULTURE.

Horticultural Hall.

PROFESSOR LAZENBY, ASSISTANT PROFESSOR DAVIS.

- 1. **Elements in Horticulture.** Four and one-half credit hours. First term. A study of the principles of plant growth and culture including preparatory tillage, drainage, irrigation, weeds, insects, etc., in their relation to horticultural crops. Lectures and recitations, M., W., F., 9 or 11; laboratory or practicum, M., or W., 1 to 4.
- 2. **Vegetable Forcing.** Four and one-half credit hours. Second term. A study of the history and development of different types of plant houses, including methods of heating, ventilating and general management. Lectures and recitations, M., W., F., 9 or 11; laboratory or practicum, M., or W., 1 to 4.

* Not given in 1904-1905.

3. **Plant Propagation.** Four and one-half credit hours. Third term. The theory and practice of multiplying plants by seeds, layers, cuttings, grafts and divisions; pruning and training, including both the theory and practice of the operations involved; spraying, history of the development and use of insecticides and fungicides, together with a study of the comparative merits of different remedies for particular insects and plant diseases. Lectures and recitations, M., W., F., 9 or 11; laboratory or practicum, M., or W., 1 to 4.
5. **Varieties of Cultivated Fruit.** Four and one-half credit hours. First term. A study of history, characteristics, adaption and general qualities of orchard and garden fruits, including their commercial and food values. The judging and scoring of apples, pears, peaches, grapes, citrons and nut fruits. Lectures and recitations, M., W., F., at 8; laboratory and practicum, W., 1 to 4.
6. **Principles of Fruit Culture.** Four and one-half credit hours. Second term. A study of the location, tillage and fertilizing of orchards and gardens; the selection of varieties, laying out, planting and general management of fruit plantations, including diseases, insects and fungi; the use of insecticides and fungicides; harvesting, marketing and storing fruit. Lectures and recitations. Tu., Th., F., at 9 or 10; laboratory and practicum, M., or W., 1 to 4.
14. **Olericulture.** Four and one-half credit hours. Third term. Principles of home and truck gardening, including a study of the culture, soil, climate and market conditions to be considered in relation to the various garden crops. Lectures and recitations, M., W., F., at 8; laboratory or practicum, W., 1 to 4.
8. **Ornamental Plants.** Two and one-half credit hours. First term. A study of the history, classification, general characteristics, propagation and culture of ornamental plants, together with their uses for home and public grounds. Lectures and recitations. Tu., at 8 or F., at 9; laboratory or practicum, M., or Tu., 1 to 4.
9. **Window Gardening and Floriculture.** Two and one-half credit hours. Second term. Including the general management of house plants, the home conservatory, commercial greenhouse, and the propagation and uses of flowers and plants for decoration. Lectures and recitations, Tu., at 8 or F., at 9; laboratory or practicum, M. or Tu., 1 to 4.
10. **Home Gardening.** Two and one-half credit hours. Third term. The location, planting and management of the kitchen garden, and the laying out and treatment of the ornamental grounds about the home. Lectures and recitations, Tu., at 8 or F., at 9; laboratory or practicum, M. or Tu., 1 to 4.
15. **Landscape Gardening.** Two and one-half credit hours. Third term. A study of the art of producing picture-like or landscape effect; the making of lawns, walks and drives, and the correct planting of trees, shrubs and flowers for the external adornment of home and public grounds. Lectures and recitations, Th., at 8; practicum, F., 1 to 4.
11. **Elements of Forestry.** Five credit hours. First term. Our native and introduced trees and shrubs treated individually and collectively; their use for timber, fuel, shelter, ornament, etc. Methods of propagation and culture. Lectures and recitations. Tu., Th., at 9; laboratory or practicum, Th., F., 1 to 4.
12. **Forest Technology and Timber Physics.** Five credit hours. Second term. The principles and methods of establishing, improving and managing woodlands; including the measurements and estimates of standing timber and harvesting of forest products; a study of the more important physical properties of wood. Lectures and recitations, Tu., Th., at 9; laboratory or practicum, Th., F., 1 to 4.

15. **Forest Economics.** Five credit hours. Third term. The economic features of modern forestry; the influence of forests upon climate, soils and crop production; forest valuation, protection and administration; forest laws and forest policies; forestry conditions in Ohio and other states. Lectures and recitations. Tu., Th., at 9; laboratory or practicum, Th., F., 1 to 4.
16. **Nature Study.** Two and one-half credit hours. First term. A course intended primarily for those who are or expect to become teachers; treating of the objects and aims of nature study with lectures on some of the interesting things to be found everywhere about us, indicating how such material can be advantageously used by the teacher in class room work. Lectures, recitations and practicum, Th., at 11, M., 1 to 4.
17. **Plant Variation.** Two and one-half credit hours. Second term. A course designed for those interested in plant breeding and in the modification and improvement of plants by mutation, crossing, dwarfing, forcing, etc., together with a discussion of the current theories of evolution as applied to the variation and amelioration of plants under cultivation. Lectures and recitations, W., at 8; seminar or a laboratory period, Th., 1 to 4.

INDUSTRIAL ARTS AND SHOPWORK.

Hayes Hall, Rooms 2, 5, 6, 12, 17, 18 and 21.

PROFESSOR SANBORN, ASSISTANT PROFESSOR KNIGHT, MR. RENCK, MR. CROWE.

Industrial Arts.

1. **Tools and Machines.** Three credit hours. Lectures and recitations on hand and machine tools and the principles underlying their construction and operation, and materials used in construction. (Courses in Industrial Arts and Manual Training, third year; Short Course in Industrial arts, second year, first, second and third terms, Tu., Th., S., at 8.) Professor Sanborn.
2. **Designing.** Three credit hours. Problems in design to accompany Course 1. (Courses in Industrial Arts and Manual Training, third year; Short Course in Industrial Arts, second year, second and third terms, F., 1 to 4; S., 9 to 12.) Professor Sanborn.
3. **Shop Equipment, Appliances and Management.** Three credit hours. A continuation of Course 1. Lectures and recitations on the strength and durability of the materials used in construction; shop and factory buildings and their construction; power, power transmission and prime movers; automatic machines and other special devices for turning out cheap and accurate work; methods of compensation and shop accounts and management. (Course in Industrial Arts, fourth year, first, second and third terms, M., W., F., at 11.) Professor Sanborn.
4. **Advanced Designing.** Three credit hours. Problems in the design of buildings and the arrangement of machinery, line-shafting, etc., for manufacturing plants; to accompany Course 3. (Course in Industrial Arts, fourth year, first and second terms. M., Tu., 1 to 4; third term, W., Th., 1 to 4.) Professor Sanborn.
5. **Workshop Appliances.** Three credit hours. Lectures and problems on the construction of shop buildings and the arrangement of machinery; power required and the means of transmission; friction in line shafting and the efficiency of machinery; automatic machines and special shop appliances. (Course in Mechanical Engineering, fourth year, third term, M., W., F., at 8.) Professor Sanborn.

7. **Machine design.** Three credit hours. Practical application of principles of machine design. (Course in Electrical Engineering, second year, third term. M., Tu., 1 to 4.) Professor Sanborn.
8. **Machine Drawing.** Three credit hours. Working sketches of mechanisms and machines from measurement; detail and assembly drawings same. (Short Course in Industrial Arts, second year, first term. Th., 1 to 4.) Professor Sanborn.

SHOPWORK

(Note.—For credit given, time schedule, courses required, etc., see table)

1. **Carpentry and Pattern Making.** Exercises and practice in carpentry, wood-turning and pattern making, including sawing, planing, jointing, framing and other work involving the use of ordinary carpenter tools; center and chuck turning; the making of finished patterns; enough elementary moulding to illustrate draft, parting, cores, etc. Mr. Renck.
2. **Forging.** Exercises and practice in iron and steel forging, including operations as cutting, bending, drawing, upsetting, shaping and straightening iron, the making, hardening and tempering of steel punches and cold chisels. Mr. Crowe.
3. **Foundry Work.** Exercises and practice in tempering sand and preparing moulds of machine parts in the sand, core-making, melting iron, brass and pouring castings. Mr. Renck.
4. **Chipping and Filing.** Exercises and practice in vise work, including chipping in cast and wrought iron, surface filing, squaring, fitting and straightening, and the scraping of surface plates. Assistant Professor Knight.
7. **Carpentry and Pattern Making.** Exercises and practice in carpentry, wood-turning and pattern making, including sawing, planing, mortising, jointing, framing and other work involving the use of the ordinary carpenter tools; center and chuck turning; the making of finished patterns; enough elementary molding to illustrate draft, parting, cores, etc. Mr. Renck.
8. **Carpentry: Cabinet Work.** Exercise and practice work in cabinet making, including paneling, mitre and dovetail joints, etc.; use of power tools. Mr. Renck.
9. **Advanced Pattern Making.** Continuation of pattern work of Shop No. 1. Mr. Renck.
11. **Forging.** The use and care of forge, fire and tools; practice in iron and steel forging, including such operations as cutting, bending, drawing, upsetting, shaping and welding iron; the making, hardening and tempering of steel punches, chisel and lathe tools. Mr. Crowe.
12. **Advanced Forging.** Various forms of welds in iron and steel; the making of scrolling irons and of forms for duplicating work; annealing; making; case-hardening; tempering drills, dies and cutters; making; ornamental iron work; visits to shops. Mr. Crowe.
13. **Machine Work.** Exercises and practice in hand-turning in iron and steel on speed lathes; in straight and taper turning, boring, fitting, churning and thread-cutting on engine lathes. Assistant Professor Knight.
14. **Machine Work.** Exercises and practice on the lathe, planer, shaper, press and milling machine, with use of small tools as drills, taps, reamers, counterborers, etc.; construction of parts of actual machines. Assistant Professor Knight.

15. **Advanced Machine Work.** Exercises and practice on turret lathe, universal, surface and tool grinding machines; in gear cutting, etc. Assistant Professor Knight.
16. **Advanced Machine Work.** The construction and use of jigs and templates; the accurate laying out of work; the duplication of parts, the production of work rapidly and economically, etc. Assistant Professor Knight.
17. **Advanced Machine Work.** The making and use of special tools and fixtures, standard plugs and collars, standard caliper and limit gauges; error limits in modern machine construction; methods of testing the accuracy of machine tools, etc. Assistant Professor Knight.

Summer Term. The Summer Term in Shopwork will begin on Monday morning preceding Commencement Day and continue for four weeks. The courses open to students are Shopwork (4) (7) (11) (13) (14) and (15), three hours credit in each.

Each course requires three hours a day for six days a week. Students electing the Electrical or Mechanical Engineering Courses are required to take two of the three courses, Shopwork (4) (7) and (11) at the close of their first year.

Students electing the Chemical Engineering Course are required to take Shopwork courses (7) and (11) at the close of their first or second year.

The courses are open as elective to students who desire to lighten their work of the regular terms, to make up back work or to take extra work.

SHOPWORK REQUIRED

Number	Credit hours	Subject	Year	Term	Hours	Courses in
1	3	Woodworking	1	3	M. Tu. 1-4; W. Th. 1-4; or F. 1-4; S. 8-11.	Agric.; Hort. and For.
2	3	Forging	1	3	M. Tu. 1-4; or W. Th. 1-4	Short Agric.
3	3	Forging	2	3	M. Tu. 1-4; W. Th. 1-4; or F. 1-4; S. 8-11.	Agric.
4	2	Founding	2	1	Th. 1-5; or S. 8-12.	Mech. Eng.
5	2	Founding	2	1	Tu. 1-5.	Short Ind. Arts.
6	3	Founding	2	1	M. 2-4; Tu. 1-5.	Ind. Arts; Manual Train.
7	2	Chipping & Filing	1	3	M. Tu. 1-3.	Short Clayworking.

LATIN LANGUAGE AND LITERATURE

University Hall, Rooms 17, 28, 29, 37, 54 and 55

PROFESSOR DERBY, ASSOCIATE PROFESSOR HODGMAN, ASSOCIATE PROFESSOR ELDEN.

At least five units of preparatory Latin are required for admission to this department. Starred courses are not given in 1903-1904. Courses 1, 2 and 3 must precede all elective work in Latin, and courses 4, 5 and 6 must precede or accompany other elective courses in this department.

1. **Cicero:** De Senectute and De Amicitia, or Selected Letters. Four credit hours. First term. Sec. I: M., Tu., Th., F., at 10; Associate Professor Elden. Sec. II: M., Tu., Th., F., at 11; Professor Derby. Sec. III: Tu., W., Th., F., at 2; Associate Professor Hodgman.
2. **Livy:** Book 1, 2, 21, or 22. Four credit hours. Second term. Sec. I: M., Tu., Th., F., at 10; Associate Professor Elden. Sec. II: M., Tu., Th., F., at 11; Professor Derby. Sec. III: Tu., W., Th., F., at 2; Associate Professor Hodgman.
3. **Horace:** Odes. Four credit hours. Third term. Sec. I: M., Tu., Th., F., at 10; Associate Professor Elden. Sec. II: M., Tu., Th., F., at 11; Professor Derby. Sec. III: Tu., W., Th., F., at 2; Associate Professor Hodgman.
4. **Pliny:** Selected Letters. Three credit hours. First term. Sec. I: Tu., Th., F., at 2; Professor Derby. Sec. II: Tu., Th., F., at 11; Associate Professor Hodgman.

- . **Tacitus:** *Germania and Agricola* or *Catullus*. Three credit hours. Second term. Sec. I: Tu., Th., F., at 2; Professor Derby. Sec. II: Tu., Th., F., at 11; Associate Professor Hodgman.
- . **Terrence:** *Phormio*; *Plautus, Trinummus* or *Captivi*. Three credit hours. Third term. Sec. I; Tu., Th., F., at 2; Professor Derby. Sec. II; Tu., Th., F., at 11; Associate Professor Hodgman.

The instruction in courses 4, 5 and 6, without neglecting the lines of the preceding work, pays more attention to the style and literary merit of the authors studied, and to the subject-matter as a contemporary record of Roman thought and life.

- . **Tacticus:** *Historiæ* or *Annales*. Three credit hours. First term.
- . **Juvenal:** *Satires*. Three credit hours. Second term.
- . **Martial:** *Selected Epigrams*. Three credit hours. Third term.
- . **Plautus:** *Manacchi* and *Rudens*. Three credit hours. First term. Tu., Th., F., at 10. Associate Professor Hodgman.
- . **Cicero:** *De Finibus* or *De Officiis*. Three credit hours. Second term. Tu., Th., F., at 10. Associate Professor Hodgman.
- . **Seneca.** *Medea, De Vita Beata, De Providentia, De Tranquillitate Animi*. Three credit hours. Third term. Tu., Th., F., at 10. Associate Professor Hodgman.
- . **Cicero:** *De Natura Deorum*. Three credit hours. First term. M., W., F., at 9. Associate Professor Elden.
- . **Lucretius:** *De Rerum Natura*. Three credit hours. Second term. M., W., F., at 9. Associate Professor Elden.
- . **Horace:** *Satires*. Three credit hours. Third term. M., W., F., at 9. Associate Professor Elden.
- . **Horace:** *Epistles*. Three credit hours. First term. M., W., F., at 3. Professor Derby.
- . **Suetonius:** *Divus Julius and Divus Augustus, or Tacitus, Annals*. Three credit hours. Second term. M., W., F., at 3. Professor Derby.
- . **Late Latin.** Three credit hours. Third term. M., W., F., at 3. Professor Derby.
- . **Teachers' Course.** Three credit hours. Three terms. This course is designed especially for students who intend to teach Latin and is open only to those who have completed courses 1 to 6 inclusive. First term: *Caesar*; lectures, private reading, practical exercises in syntax, assigned topics in military antiquities. Second term: *Cicero*; lectures on Roman oratory and style, rapid reading of selected orations, assigned topics on Roman life and political antiquities. Third term: *Vergil*; lectures, studies in versification with especial reference to the diction and hexameter of *Vergil*, interpretation of selected portions of the text. Tu., Th., at 9. Associate Professor Elden.
- . **Latin Prose Composition.** Two credit hours. Three terms. M., W., at 8. Professor Derby.
- . **Antiquities.** Two credit hours. Three terms. Roman private life will be studied during the first term; attention will be given to such topics as the family, education, dress, food, the house, trade and in-

* Not given in 1904-1905.

dustries, books, travel, etc. The second and third terms will be devoted to political and legal antiquities, including finance and provincial administration. Tu., Th., at 8. Professor Derby.

- *21. **Latin Literature.** Two credit hours. First and second terms.
- *22. **Latin Philology.** Two credit hours. Third term.
- *23. **Historical Latin Grammar.** Two credit hours. Three terms. Sounds and inflections. Associate Professor Hodgman.
This course treats in lectures of the growth of Latin sounds and inflections. There will be collateral reading of inscriptions and from Quintilian. Tu., Th., at 10.
- *24. **Advanced Latin Writing.** Three credit hours. Three terms.
- 25. **Pro-Seminary.** Three credit hours. Principals of textual criticism and methods of independent research. The work of 1904-05 will consist of the textual and exegetical study of a portion of the Jugurtha of Sallust, combined with the more rapid reading of other portions of the author, and will be supplemented by lectures upon the history and development of Roman History. Special topics will be assigned to the student for investigation and report. This course should be preceded or accompanied by course 18. The ability to use German text-books will be required of students in this course. M., W., at 2. Professor Derby.
- 26. **Pharmaceutical Latin.** Four credit hours. Three terms. M., Tu., Th., F., at 10.
- *27. **Ovid: Fasti.** One credit hour. Three terms. A large amount will be read of Ovid's poetical calendar, with its account of the social and religious observances connected with the Roman holidays. F., at 10. Associate Professor Hodgman.
- *28. **Historical Latin Grammar.** One credit hour. Three terms. Syntax, lectures on problems connected with the origin and development of certain constructions in Latin Syntax; a treatment along historical lines of the syntactic uses of the cases, moods and tenses. F., at 3. Associate Professor Elden.

LAW.

Page Hall.

PROFESSORS HUNTER, †KINKEAD, KNIGHT, PAGE, RANDALL, SHAUCK,
STEWART, AND RIGHTMIRE.

Elementary Law. Fifteen credit hours. First Semester. First year. (Robinson, Walker, Tenth Edition, and Blackstone and Tiffany's Persons and Domestic Relations.) Mr. Page, Mr. Rightmire.

Agency. Two credit hours. Second Semester. First year. (Mechem.) Mr. Randall.

Contracts. Four credit hours. Second Semester. First year. (———) Mr. Page.

Criminal Law. Three credit hours. Second Semester. First year. (Hawley.) Mr. Kinkead.

Sales. Two credit hours. Second Semester. First year. (Tiedeman.) Judge Hunter.

*Not given in 1904-1905. †Died, June 15, 1904.

Torts. Four credit hours. Second Semester. First year. (Cooley.) Mr. Kinkead.

Bailments. Two credit hours. First Semester. Second year. (Hale.) Judge Hunter.

Negotiable Instruments. Five credit hours. First Semester. Second year. (Tiedeman, Randall.) Mr. Randall.

Evidence. Three credit hours. Throughout the year. Second year. (Greenleaf, Sixteenth edition.) Judge Hunter.

Pleading. Four credit hours. Throughout the year. Second year. (Phillips.) Mr. Kinkead.

Moot Court. One credit hour. Throughout the second and third years. Judge Hunter.

Partnership. Two credit hours. Second Semester. Second year. (Mechem.) Mr. Randall.

Real Property. Five credit hours. Second Semester. Second year. (Tiedeman.) Mr. Page.

Wills. Two credit hours. Second Semester. Second year. (Page.) Mr. Page.

Constitutional Law. Three credit hours. First Semester. Third year. (Black.) Mr. Knight.

Private Corporations. Two credit hours. Throughout the year. Third year. (Taylor.) Judge Hunter.

Municipal Corporations. Three credit hours. First Semester. Third year. (Elliott.) Judge Hunter.

Equity. Four credit hours. First Semester. Third year. (Merwin.) Judge Shauck.

Probate Law. Two credit hours. First Semester. Third year. (Kinkead.) Mr. Kinkead.

Ethics. Two credit hours. Second Semester. Third year. (Sharswood.) Mr. Kinkead.

Federal Practice. Two credit hours. Second Semester. Third year. Mr. Stewart.

Quasi-Contracts. Two credit hours. Second Semester. Third year. (Keener.) Mr. Page.

Suretyship. Two credit hours. Second Semester. Third year. (Stearns.) Judge Hunter.

Trial Practice. Two credit hours. Second Semester. Third year. (Kinkead.) Mr. Kinkead.

GRADUATE WORK.

General and Comparative Jurisprudence.

General Jurisprudence. Holland and Particular Topics. One credit hour. Second Semester. President Thompson.

Comparative Jurisprudence. Roman Law; Outlines. Two credit hours. First Semester.

History of the Common Law, Pollock & Maitland. Three credit hours.
First Semester. Mr. Page.

English and American Constitutional History.

English Constitutional History. Three credit hours. Throughout the year.
Mr. Siebert.

American Constitutional History. Three credit hours. Throughout the year.
Mr. Knight.

Political Science.

Public International Law. Mr. Knight.

History of Treaties and Modern Diplomacy. Five and six, two credit hours.
Throughout the year. Mr. Knight.

American Diplomatic History. Three credit hours. Throughout the year.
This is included in American Constitutional History, but may be taken separately. Mr. Knight.

American Jurisprudence.

Private Corporations—Cases. Two credit hours. First Semester. Judge Hunter.

Railroad Law. One credit hour. Second Semester.

Law of Receivers. One credit hour. Second Semester.

Insurance. One credit hour. First Semester.

Negligence and Damages. Cases, and Jones on Negligence of Municipal corporations. One credit hour. Throughout the year. Judge Hunter.

Cases in Evidence. Thayer. One credit hour. Throughout the year. Judge Hunter.

Cases in Equity. Two credit hours. Second Semester. Judge Shauck.

Remedies and Remedial Rights, including drafting, pleadings and other legal papers; preparation for trial; and Moot Court. One credit hour.
Throughout the year. Mr. Kinkead.

Real Property, advanced studies, including examinations of titles and making of abstracts of title. One credit hour. Second Semester. Mr. Page.

Circuit and Supreme Court Practice, and Special Procedure under the Ohio Code of Civil Procedure. One credit hour. Second Semester. Judge Shauck.

Private International Law (Conflict of Laws). One credit hour. Throughout the year. Mr. Knight.

MATHEMATICS.

Office, University Hall, Room 45

PROFESSOR BOHANNAN, ASSOCIATE PROFESSOR MCCOARD, ASSOCIATE PROFESSOR BOYD, ASSISTANT PROFESSOR ARNOLD, ASSISTANT PROFESSOR SWARTZEL, ASSISTANT PROFESSOR KUHN, ASSISTANT PROFESSOR CODDINGTON, MR. RASOR, MR. DAVIS, MR. CLEMENTS.

1. **Elementary Algebra. Five credit hours. Venable. (Short Course in Clay-working, first year, first term, M., Tu., W., Th., F., at 9.) Mr. Clements.**

2. **Elementary Algebra.** Five credit hours. Wentworth. (Short Courses in Mining and Industrial Arts, first year, first, second, third terms, M., Tu., W., Th., F., at 9.) Professor Ray.
3. **Plane Geometry.** Five credit hours. Venable. (Short Courses in Mining and Industrial Arts, first year, first term, M., Tu., W., Th., F., at 11.) Mr. Clements.
- 3a. **Plane Geometry.** Five credit hours. Venable. (Short Course in Clay-working, first year, second term, M., Tu., W., Th., F., at 9.) Mr. Davis.
11. **Differential Equations.** One credit hour. Edwards. (Course in Mechanical Engineering, third year, first term, F., at 10.) Assistant Professor Boyd.
13. **Solid Geometry.** Five credit hours. Venable. (Short Courses in Mining and Industrial Arts, first year, second term, M., Tu., W., Th., F., at 11.) Mr. Clements.
14. **Trigonometry.** Plane trigonometry. Five credit hours. (Short Courses in Industrial Arts and Mining, first year, third term, M., Tu., W., Th., F., at 8.) Mr. Clements.
21. **College Algebra.** Three credit hours. First term. Taylor's College Algebra. Open to students having credit for the second unit of entrance algebra. (Students not able to present this second unit on entrance may make it up in college, but without college credit. Each term a class will be organized for this purpose.) M., W., F., at 9, 11 and 1. Professor Bohannon, Associate Professor McCoard, Assistant Professors Swartzel, Kuhn, Mr. Rasor, Mr. Clements.
22. **Plane Trigonometry.** Three credit hours. Second term. Open to students having credit for the first unit of entrance algebra and the first unit of entrance geometry. M., W., F., at 9, 11, and 1. Professor Bohannon, Associate Professor McCoard, Assistant Professors Swartzel, Kuhn, Mr. Rasor, Mr. Davis.
23. **Elementary Course in Analytical Geometry and Calculus.** Three credit hours. Third term. Open to students having credit for entrance algebra and geometry and for course 22. (Students not prepared in the second unit of entrance geometry may make up the deficiency in a special class during the second term, but without college credit. See also note to course 21.) M., W., F., at 9, 11, 1. Professor Bohannon, Associate Professor McCoard, Assistant Professors Swartzel, Kuhn, Coddington, Mr. Rasor, Mr. Davis.
24. **Problems on all past Work.** One credit hour. Three terms. Peterson's Problems in Geometry, with selected problems in algebra, trigonometry, analytical geometry and calculus. This course may accompany courses 21, 22, 23, or courses 31, 32, 33. F., at 10. Mr. Rasor.
28. **Analytical Geometry and Calculus.** Three credit hours. Three terms. Open to students having credit for courses 21, 22, 23, or courses 31, 32, 33. Hours to be arranged. Professor Bohannon, Associate Professor McCoard, Assistant Professors Swartzel, Kuhn, Mr. Rasor.
31. **College Algebra.** Five credit hours. First term. Open to students having credit for entrance algebra. Twelve sections meeting daily at 8, 9, 11, 1 and 2. Professor Bohannon, Associate Professor McCoard, Assistant Professors Swartzel, Kuhn, Coddington, Mr. Rasor, Mr. Davis.
32. **Plane Trigonometry.** Five credit hours. Second term. Open on a credit for entrance algebra and for the first unit of entrance geometry. Twelve sections meeting daily at 8, 9, 11, 1 and 2. Professor Bohannon, Associate Professor McCoard, Assistant Professors Swartzel, Kuhn, Coddington, Mr. Rasor, Mr. Davis.

33. **Analytical Geometry.** Five credit hours. Third term. Open on a credit for entrance algebra, the first unit of entrance geometry and for course 22 or 23. Twelve sections meeting daily at 8, 9, 11, 1 and 2. Professor Bohannon, Associate Professor McCoard, Assistant Professors Swartzel, Kuhn, Coddington, Mr. Rasor, Mr. Davis.
41. **Calculus.** Five credit hours. First term. Open on a credit for courses 21, 22, 23, or for courses 31, 32, 33. Five sections meeting daily at 8, 11 and 1. Professor Bohannon, Associate Professors McCoard and Boyd, Assistant Professors Swartzel, Kuhn, Coddington.
42. **Continuation of course 41.** Five credit hours. Second term. Daily at 8, 11, 1
43. **Continuation of course 42.** Five credit hours. Third term. Daily at 8, 11, 1.
71. **Mechanics.** Five credit hours. First term. Open on credit for courses 41, 42, 43. Daily at 8, 9, 11. Associate Professor Boyd, Assistant Professor Swartzel, Assistant Professor Kuhn.
72. **Continuation of course 71.** Five credit hours. Second term. Daily at 8, 9, 11.
73. **Continuation of course 72.** Five credit hours. Third term. Daily at 8, 9, 11.
25. **Higher Mathematics.** From one to ten hours a week may be selected from the following courses:
- (a) Determinants.
 - (b) Modern Geometry. (Assistant Professor Kuhn.)
 - (c) Modern Higher Algebra.
 - (d) Advanced Plane Analytical Geometry.
 - (e) Advanced Calculus.
 - (f) Space Analytics.
 - (g) Differential Equations.
 - (h) Theory of Equations. (Assistant Professor Coddington.)
 - (i) Higher Plane Curves.
 - (j) Groups. (Assistant Professor Kuhn.)
 - (k) General Function Theory.
 - (l) Elliptic Functions.
 - (m) Potential Functions. (Assistant Professor Swartzel.)
 - (n) Spherical Harmonics.
 - (o) Mathematical Electricity.
 - (p) Mathematical Optics.
 - (q) General Mathematical Physics.
 - (r) Higher Geodesy.
 - (s) Infinite Series and Products. (Assistant Professor Swartzel.)
 - (t) The Teaching of Elementary Mathematics. A course in methods of teaching elementary mathematics, designed especially for those preparing to teach in the secondary schools. The laboratory plan will be carefully considered. Twice a week, third term. Tu., Th., at 2. Assistant Professor Kuhn.

Course 25 (b) Three terms. Hours for all other courses to be arranged with the instructors. Tu., Th., at 10. Professor Bohannon, Assistant Professor Swartzel, Assistant Professor Kuhn, Assistant Professor Coddington.

MECHANICAL ENGINEERING.

Office, Hayes Hall, Room 11.

PROFESSOR MAGRUDER, PROFESSOR HITCHCOCK, ASSISTANT PROFESSOR JUDD, MR.
CARTZDAFNER.

3. **Mechanism.** Five credit hours. Lectures and recitations on the principles of mechanism and mechanical movements. (Courses in Electrical and Mechanical Engineering, third year, second term, M., Tu., W., Th., F., at 8; or M., Tu., Th., F., at 10; W., 9.) Professor Hitchcock. The accurate laying out of movements, embodying the principles of mechanism. Two hours credit. (Course in Mechanical Engineering, third term, M., Tu., 1 to 3.) Professor Hitchcock.
12. **Experimental Engineering Laboratory.** Two credit hours. Calibration of pressure gauges and indicator springs; steam engine indicator practice and oil testing. (Course in Mechanical Engineering, third year, first term, W., 1 to 5; S., 8 to 12. Course in Industrial Arts, fourth year, first term, Th., 1 to 5.) Assistant Professor Judd and Mr. Cartzdafner.
14. **Continuation of Course 27.** Four credit hours. (Course in Mechanical Engineering, fourth year, second term, M., W., 1 to 5.) Professor Hitchcock, Assistant Professor Judd and Mr. Cartzdafner.
15. **Continuation of Course 14.** Three credit hours. Testing of steam boilers, injectors, steam, centrifugal and power pumps, pulsometer and hydraulic rams. (Course in Mechanical Engineering, fourth year, third term, M., Tu., 9 to 12.) Professor Hitchcock, Assistant Professor Judd.
17. **Experimental Engineering.** Three credit hours. Practice in the testing of materials, of construction, calibration of orifices and weirs, study of the flow of liquids and gases, accompanied by lectures and recitations on laboratory practice, steam engines, boilers and power transmission. (Course in Civil Engineering, fourth year, second term, Th., at 11; F., 1 to 5.) Professor Hitchcock, Assistant Professor Judd and Mr. Cartzdafner.
18. **Machine Designs.** Five credit hours. Recitations on Unwin's Machine Design, with lectures on American practice. (Course in Chemical Engineering, fourth year, first term, M., Tu., W., Th., F., at 11. Course in Mechanical Engineering, fourth year, first term, M., Tu., W., Th., F., at 9. Courses in Chemical and Mechanical Engineering, fourth year, second term, M., Tu., W., Th., F., at 11.) Professor Magruder.
19. **Machine Design.** Five credit hours. Practical applications of the principles of machine design. (Courses in Chemical and Mechanical Engineering, fourth year, third term, M., 1 to 5; Tu., W., 1 to 4.) Professor Magruder.
21. **Thesis Work.** Five credit hours. (Course in Mechanical Engineering, fourth year, third term.) Professor Magruder and Professor Hitchcock.
23. **Materials of Construction.** Four credit hours. Lectures on the materials used in architectural and building construction, and laboratory exercises on their properties. (Course in Architecture, fourth year, first term, Tu., Th., at 8; Tu., F., 1 to 5.) Professor Hitchcock.
24. **Experimental Engineering Laboratory.** Three credit hours. Arranged to meet the needs of those desiring to elect advanced laboratory work. (First and second terms. Elective to third and fourth year engineers.) Professor Hitchcock Assistant Professor Judd.
25. **Continuation of Course 17.** Five credit hours. Tests of steam, power, rotary and centrifugal pumps, water motors and turbine wheels.

(Course in Civil Engineering, fourth year, third term, Th., 9; M., Tu., 1 to 5.) Professor Hitchcock, Assistant Professor Judd and Mr. Cartzdafner.

26. **Steam Machinery.** One credit hour. One lecture a week on the care of steam engines and boilers, pumps and injectors, and of ammonia refrigerating machinery. (Course in Dairying, second term, F., at 1.) Professor Magruder.
27. **Continuation of Course 12.** Five credit hours. Testing materials of construction, steam engine, hot air engine and air compressor tests, transmission and absorption dynamometer trials and testing of belts. (Course in Mechanical Engineering, fourth year, first term, M., 1 to 5; F., 10 to 5.) Professor Hitchcock, Assistant Professor Judd and Mr. Cartzdafner.
28. **Experimental Engineering Laboratory.** Two credit hours. Testing materials of construction, transmission and absorption dynamometer tests, testing of lubricating oils. (Course in Electrical Engineering, third year, third term, Th., or F., 1 to 5. Course in Manual Training, fourth year, third term, F., 1 to 5.) Assistant Professor Judd and Mr. Cartzdafner.
29. **Continuation of Course 28.** Two credit hours. Testing of pressure gauges and indicator springs, steam engine indicator practice and steam engine trials. (Course in Electrical Engineering, fourth year, first term, Tu. or Th., 10 to 12, 1 to 5. Course in Industrial Arts, fourth year, second term, W., 1 to 5.) Assistant Professor Judd and Mr. Cartzdafner.
30. **Continuation of Course 29.** Two credit hours. Steam engine and boiler trials, steam and power pump tests and hydraulic experimentation. (Course in Electrical Engineering, fourth year, second term, Tu., Th., 1 to 5. Course in Industrial Arts, fourth year, third term, F., 1 to 5.) Assistant Professor Judd and Mr. Cartzdafner.
31. **Hydraulic Machinery.** Three credit hours. Recitations and lectures on pumping machinery. (Course in Mechanical Engineering, fourth year, third term, Tu., Th., at 8; W., at 9.) Professor Hitchcock.
32. **Mechanical Engineering of Power Plants.** Five credit hours. A descriptive study of steam and gas engines, boilers, pumps, injectors and other machinery used in plants generating power. (Course in Chemical and Electrical Engineering, and Industrial Arts, third year, third term, M., Tu., W., Th., F., at 9. Course in Mechanical Engineering, third year, third term, M., Tu., W., Th., F., at 11. Course in Manual Training, fourth year, third term, M., Tu., W., Th., F., at 9.) Professor Magruder.
33. **Steam Engines and Boilers.** Five credit hours. A detail study of steam using and steam generating machinery. (Courses in Electrical and Mechanical Engineering, fourth year, first term, M., Tu., W., Th., F., at 8.) Professor Magruder.
34. **Thermodynamics.** Five credit hours. Lectures and recitations on the transmutations of heat and mechanical energies in steam, gas and air engines, and in air and ammonia compressors, together with a study of the tests of ideal and actual engines and of their indicator diagrams; the flow of gases through pipes and orifices. (Course in Mechanical Engineering, fourth year, second term, M., Tu., W., Th., F., at 8.) Professor Magruder.
35. **Experimental Engineering Laboratory.** Five credit hours. (Option, Course in Chemical Engineering, fourth year, second term, M., at 9, M., Tu., 1 to 5.) Professor Hitchcock, Assistant Professor Judd and Mr. Cartzdafner.

- 36. Experimental Engineering Laboratory.** Five credit hours. Lectures and recitations on power transmission, steam engines and boilers. Laboratory; testing pressure gauges, indicator springs, etc.; valve setting; testing of steam engines, steam, power and centrifugal pumps; boiler and fuel trials. (Courses in Ceramics and Mine Engineering, fourth year, third term, Tu., Th., 10 to 11, W. Th., 1 to 4.) Professor Hitchcock, Assistant Professor Judd and Mr. Cartzdafner.

METALLURGY

Office, Chemical Hall, Room 5

PROFESSOR N. W. LORD, MR. SOMERMEIER, MR. SPITLER.

- 2. Mineralogy.** Three credit hours. Lectures arranged so as to be preparatory to Determinative Mineralogy (Course 3.) (Courses in Chemical and Mining Engineering, second year, third term; Course in Ceramics, third year, third term, M., W., F., 11.) Professor N. W. Lord.
- 3. Determinative Mineralogy.** Five credit hours. Laboratory course in practical determination of minerals by physical and chemical tests. Each student is furnished with a set of apparatus, and works under an instructor's inspection. Brush and Penfield's Determinative Mineralogy is used as a manual. (Course in Mining Engineering, third year, third term, M., Tu., W., 1 to 4.) Professor Lord, Mr. Somermeier, Mr. Spitler.
- 4. Metallurgy.** Five credit hours. A course of lectures upon fuel and its uses, iron and steel, copper, lead, gold and silver, their properties, tests, ores and details of the methods of reduction. The lectures are supplemented by a careful study of references to standard works and journals. (Course in Mining Engineering, third year; option, Course in Chemical Engineering, fourth year, first and second terms, M., Tu., W., Th., F., 9. Course in Industrial Arts and Mechanical Engineering, third year; Course in Ceramics, fourth year, first term, M., Tu., W., Th., F., at 9.) Courses in Industrial arts and Mechanical Engineering, third year, first two-fifths of the second term, M., Tu., W., Th., F., at 9.) Professor Lord.
- 5. Metallurgical Laboratory.** Five credit hours. Lectures and laboratory work. Laboratory practice in the analysis of iron and steel, fuel and slags, and the assay of lead, copper and zinc ores by wet methods, using approved methods as practiced in technical laboratories of metallurgical works. Course 5 must be preceded by Chemistry 7. (Course in Mining Engineering, second year, first, second and third terms; Course in Chemical Engineering, third year, first term, W., Th., F., 1 to 4.) Professor Lord, Mr. Somermeier, Mr. Spitler.
- 6. Assaying.** Laboratory work. Five credit hours. Practical work in the assaying of gold, silver and lead ores, by furnace methods. (Courses in Chemical and Mining Engineering, third year, second term, M., Tu., 11, 1 to 5.) Professor Lord, Mr. Somermeier, Mr. Spitler.
- 7. Metallurgical Construction.** Three credit hours. Practice in the designing of furnaces and other metallurgical machinery, including detail drawings and estimates. (Course in Mining Engineering, fourth year, second term, Th., F., 1 to 4.) Professor Lord, Professor Ray.
- 8. Ore Dressing and Coal Washing.** Two credit hours. Instruction in the methods of concentrating and enriching ores and fuels by mechanical means. Lectures, with reference to standard books and various papers in technical journals. (Course in Mining Engineering, fourth year, first term, Tu., F., 10.) Professor Lord.

9. **Mineral Chemistry.** Five credit hours. Lectures upon fire-damp, mine explosions, explosives, boiler waters, poisonous gases, iron ores; iron and steel, their properties and modes of manufacture; coal and coke. (Short Course in Mining, second year, third term, M., Tu., W., Th., F., at 8.) Professor Lord.

MILITARY SCIENCE AND TACTICS.

The Armory.

CAPTAIN GEORGE L. CONVERSE, U. S. A. (Retired.)

The Military Department is open five days during each week of each term.

1. **Military Drill.** Four times a week from the opening of college till the Thanksgiving vacation; four times a week from Thanksgiving till April first; four times a week till the close of the school year. Required of all able-bodied male students during first and second years of their course. M., Tu., W., Th., at 4.
2. **Tactics.** Lectures and recitations. Once a week. Second term.
3. **Art of War.** Lectures and recitations. Once a week. Second term.

MINE ENGINEERING

Office, Brown Hall, Room 21

PROFESSOR RAY.

1. **Mine Surveying.** Five credit hours. Lectures and field practice. This is similar to Course 4, but more elementary. The same text is used. The students have more practice in the drawing room. (Short Course in Mining, second year, first term, M., Tu., W., Th., F., at 11.) Professor Ray.
2. **Ventilation and Haulage.** Five credit hours. Lectures illustrated by experiments and maps of mines and models when possible, tests by safety lamps and anemometers, and methods of air distribution in coal mines. (Short Course in Mining, second year, second term, M., T., W., Th., F., at 11.) Professor Ray.
3. **Mine Operating.** Five credit hours. A course of lectures and practical instruction in mine book-keeping and accounts, cost of working, etc., particularly adapted to Ohio coal mining. (Short Course in Mining, second year, third term, Tu., Th., F., at 10, M. 9 to 11. Professor Ray.
4. **Mine Surveying.** Five credit hours. Field practice in the use of instruments for surface and underground surveys. Full notes are taken and maps and plans made in the drawing room. Davies' Surveying by Van Amringe is used as a text-book. (Courses in Mining Engineering and Ceramics, third year, first term, M., Tu., Th., F., at 10, M., 1 to 3.) Professor Ray.
5. **Mine Engineering.** Five credit hours. Lectures. Mine operating, mining machinery, ventilation, shaft-sinking, working out deposits, etc. Constant reference is required to the standard works and to the leading technical journals, with practice in designing mine plants, draughting and estimates. (Course in Mining Engineering, fourth year, first, second and third terms, M., Tu., W., Th., F., at 8.) Professor Ray.
6. **Plans and Specifications.** Five credit hours. (Course in Mining Engineering, fourth year, third term, M., Tu., W., Th., F., at 8.) Professor Ray.

7. **Surveying.** One credit hour. Practical experience in surveying in some mine convenient to Columbus; the time taken in one trip of not more than four consecutive days. (Course in Mining Engineering, third year, second term, Short Course in Mining, second year, second term. Professor Ray.

PHARMACY

Office, Room 4B Veterinary Laboratory.

PROFESSOR KAUFFMAN, ASSISTANT PROFESSOR DYE.

6. **Pharmacy.** Three credit hours. First term. General pharmaceutical processes. Lectures three times a week. M., W., F., 9 to 10. Room 3B Veterinary Laboratory. Professor Kauffman.
7. **Pharmacy.** Five credit hours. Second term. United States Pharmacopoeia official preparations. Lectures M., W., at 9. Laboratory for students in Short Course, Th., F., 1 to 4. Laboratory for students in Long Course, Th., 10 to 12; Sat. 8 to 12. Room 1A Veterinary Laboratory. Professor Kauffman, Assistant Professor Dye.
8. **Dispensatories.** Five credit hours. Third term. Official preparations. Lectures, M., W., at 9. Laboratory for students in Short Course, Th., F., 1 to 4. Laboratory for students in Long Course, Th., 10 to 12; Sat., 8 to 12. Room 1A Veterinary Laboratory. Professor Kauffman, Assistant Professor Dye.
10. **Extemporaneous Pharmacy.** Five credit hours. Second term. Second year. Prescription practice. Laboratory practice three times a week. Lectures, Tu., Th., 11 to 12. Laboratory, Tu., W., 1 to 4. Room 1A Veterinary Laboratory. Professor Kauffman, Assistant Professor Dye.
11. **General Practice.** Five credit hours. Third term. Lectures, dispensing and prescription practice. Lectures, Tu., Th., at 11. Laboratory, Tu., W., 1 to 4. Room 1A Veterinary Laboratory. Professor Kauffman and Assistant Professor Dye.
12. **Materia Medica.** Three credit hours. First term. Official drugs and classifications. Lectures, M., W., F., at 11. Room 5A Veterinary Laboratory. Assistant Professor Dye.
13. **Materia Medica.** Three credit hours. Second term. Official and unofficial drugs. Lectures and recitations. M., W., F., 11 to 12. Room 5A Veterinary Laboratory. Assistant Professor Dye.
14. **Materia Medica and Therapeutics.** Three credit hours. Third term. Synthetic products. Poisons and Antidotes. Lectures and recitations. M., W., F., at 11. Room 5A Veterinary Laboratory. Assistant Professor Dye.
15. **Pharmaceutical Assaying.** Five credit hours. First term. For time, consult professor in charge. Professor Kauffman.
16. **Methods of Manufacture.** Five credit hours. Second term. For time, consult professor in charge. Professor Kauffman.
17. **General Pharmacy.** Five credit hours. Third term. Two lectures, three laboratory periods a week. For time, consult professor in charge. Professor Kauffman.
18. **Pharmacognosy.** Three credit hours. Second term. Lecture once a week. Two laboratory periods a week. For time, consult professor in charge. Associate Professor Dye.

- 19. Pharmacognosy. Three credit hours. Third term. Lectures and laboratory. Continuation of Course 18.
- 20. Pharmacognosy. Three credit hours. First term. Lectures and laboratory.

PHILOSOPHY

University Hall, Rooms 33, 49, 50, 51

PROFESSOR SCOTT, ASSISTANT PROFESSOR HAINES, DR. DAVIES.

The first year's work in the Department may be any one or more of the following groups of courses:—

	First Term.	Second Term.	Third Term.
1.....	18	18	19
2.....	19	18	18
3.....	18	18	20
4.....	22a	21	21
5.....	19	21	21
6.....	22a	22b	20
7.....	22a	18	18

UNDERGRADUATE COURSES

- 18. General Psychology. Three credit hours. Sec. I: First and second terms. M., W., F., at 11; Professor Scott. Sec. II: second and third terms, M., W., F., at 9; Assistant Professor Haines.
- 19. Logic. Three credit hours. Sec. I: Third term. M., W., F., at 11; Professor Scott. Sec. II: First term. M., W., F., at 9; Assistant Professor Haines.
Students who take Rhetoric 3 during the same year should enter Section II, in which course 19 will precede course 18.
- 20. Ethics. Three credit hours. Third term. M., W., F., at 3. Professor Scott.
Those who take course 18 during the first two terms will have an option between courses 19 and 20 for the third term. The instruction in these courses is given by text-book, lectures and collateral reading.
- 21. History of Modern Philosophy. Three credit hours. Second and third terms. M., W., F., at 8. Dr. Davies.
- 22a. History of Ancient Philosophy. Three credit hours. First term. M., W., F., at 8. Dr. Davies.
- 22b. History of Mediaeval Philosophy. Three credit hours. Second term. M., W., F., at 9. Dr. Davies.

These historical courses aim to present a comprehensive view of the field and to trace the historical development of philosophic thought during the designated periods. One thesis will be required each term.

- 29. Introduction to Experimental Psychology. Three credit hours. Three terms. Tu., Th., 1 to 3. Lecture Th., at 1. Assistant Professor Haines.
This is a practice course intended to familiarize the student with the experimental method in psychology and at the same time bring him in touch with some of the more important results of recent psychological investigation. It is the natural preparation for the research work

offered in course 30. But it offers a distinct service to those who do not intend to do further work in experimental psychology. It brings one to a first hand acquaintance with the standpoint of psychology as an empirical science; and constitutes a valuable course of training in introspection. The course must be preceded or accompanied by Philology 18 or Zoology 21. Titchener's Experimental Psychology will be used as a laboratory guide.

UNDERGRADUATE AND GRADUATE COURSES

Most of the following courses are designed primarily for graduate students. many of them may be pursued with profit by undergraduates who have had such as two years of preparation, and a few of them by those who have had a single year of previous work. For example, courses 23, 24, 25 may immediately follow courses 18 and 19 or courses 18 and 20, and the historical courses be pursued by those who have successfully completed courses 22 and 21.

Conspectus of Philosophy. Three credit hours. First term. M., W., F., at 2. Professor Scott.

Theory of knowledge. Three credit hours. Second term. M., W., F., at 2. Professor Scott.

Metaphysics. Three credit hours. Third term. M., W., F., at 2. Professor Scott.

Course 23 proposes a logical survey of the whole field of philosophy, determining the content, boundaries, and relations of its several departments, and investigating as far as time permits the conceptions and problems of each. It, with courses 24 and 25, must be preceded by courses 18 and 19 or courses 18 and 20, and it is desirable that they should be preceded or accompanied by courses 22 and 21. Kulpe's Introduction to Philosophy or a similar book will be used as a text with collateral use of Paulsen, Ladd and Stuckenberg.

Courses 24 and 25 constitute a continuous study in fundamental philosophy, the former concerning itself primarily with the subjective, and the latter with the objective, aspects of the problems considered. In the former the main topics will be the nature and laws of thought, the categories and the relations of knowledge and belief, and of knowledge and reality. In the latter the special problem will be the nature of reality. Theses will be required during the year, not less than one for each term.

Advanced Psychology. Two credit hours. Three terms. Tu., Th., at 9. Dr. Davies.

This course is intended for students who may wish to carry their study of systematic Psychology beyond the limits of the elementary course 18. The purpose is to give the student facility in handling psychological questions in dependence upon the results of psychological inquiry. It will include during the first two terms an analytic and genetic treatment of selected topics; and in the third term the more important psychological theories will be presented and an attempt made to formulate a general theory of mental life. Baldwin's "Handbook of Psychology" will be used as the basis of the study, but constant reference will be made to the works of James, Sully, Ladd, Wundt, Höffding and other representative psychologists, as well as to current periodicals.

Philosophy of Science. Two credit hours. Three terms. Tu., Th., at 2. Professor Scott.

Course 27 has for its purpose to investigate the postulates and concepts of physical science. It will include such subjects as casuality, mechanism and teleology, the existence and nature of matter and mind, the relation between them, and man's place in nature. Assigned readings, with reports and discussions, in Hume, Mill, Lotze, Spencer and others. One thesis will be required each term.

28. **Philosophy of Religion.** Two credit hours. Three terms. Tu., Th., at 2. Professor Scott.

This course includes a study of the nature of religion, the foundations of religious belief, the relations of philosophy to religion, and religious problems, such as the existence and nature of God, the problem of evil, and human immortality. Assigned readings, with reports and discussions in Spinoza, Kant, Fichte, Schleiermacher, Lotze, Pfleiderer, Martineau and others. One thesis will be required each term. Courses 27 and 28 are alternative. Which of them will be given in 1903-04 will be decided after consultation with the class.

30. **Research Work in Experimental Psychology.** Two or more credit hours. Three terms. Hours to be arranged. The psychological laboratory is open to students with suitable preparation to prosecute original investigations. The equipments in the laboratory and library, which are constantly increasing, make such work well worth the consideration of any student interested in the phenomena of mind. Philosophy 18 and 29 are required as preparation for this work. The arrangement of hours will be subject to the needs of the individual student. At least two hours must be taken. Assistant Professor Haines.

31. **Plato.** Two credit hours. Three terms. Tu., Th., at 3. Dr. Davies.

32. **Aristotle.** Two credit hours. Three terms. Tu., Th., at 3. Dr. Davies.

Only one of these two courses will be given each year, but it will be course 31 or 32, as the class may elect. The work will consist of readings from English translations of the author chosen and from commentaries and criticisms such as those of Zeller, Grote, Nettleship, and Pater on Plato, and Grote, Lewes, Grant and Davidson on Aristotle. Lectures on special problems suggested by the author will be given.

33. **Descartes and Spinoza.** Three credit hours. First term. M., Th., F., at 10. Dr. Davies.

34. **Locke and Leibnitz.** Three credit hours. Second term. M., Th., F., at 10. Dr. Davies.

35. **Berkley, Hume and Reid.** Three credit hours. Third term. M., Th., F., at 10. Dr. Davies.

36. **Kant, Fichte, Schelling and Hegel.** Three credit hours. Three terms. Not offered in 1904-1905.

Courses 33, 34 and 35 constitute one year's work, and will alternate with course 36. The first three are preparatory to the last and will be given in 1904-1905. Assigned portions of the leading works of the thinkers named will be studied and discussed, and an attempt will be made to obtain a clear conception of the author's system as a whole, and of his position on particular important problems of philosophy. One thesis will be required each term.

37. **Later German Philosophy.** Three credit hours. Three terms. M., Th., F., at 10. Assistant Professor Haines.

Following in historic order upon course 36, this course will deal with the German successors of Herbart and Hegel, and with Herman Lotze and Gustav Fechner. Greatest stress will be placed upon Lotze and his successors in Germany and America.

38. **Recent and Current Philosophy.** Three credit hours. Three terms. M., Th., F., at 10. Assistant Professor Haines.

This course will be primarily concerned with the neo-Hegelian movement and its recent exponents in America and England. It will resolve itself into a study of present day idealism as set forth by its leading representatives in these countries. Three hours throughout the year. Only one of these courses (37 and 38) will be given in 1904-1905. Which one shall be given will be decided on consultation with the class.

Psychological Seminary. Two credit hours. Three terms. Time to be arranged. Assistant Professor Haines.

A research course for advanced students. Subject for the year, the Will, or, more broadly, the conative life. The first manifestations and development of volition in children, a comparative study of will, the relations of instinctive and voluntary reactions, aboulia and impulsive insanities, and the manifestations of will in crowd phenomena, are topics which will sufficiently indicate the line of work. Lectures, readings, discussions and theses.

Ethical Seminary. Two credit hours. Three terms. Hours to be arranged. Professor Scott.

This course will be devoted in 1904-1905 to the historical and critical study of one or more of the great problems of ethics. The work will consist of assigned readings, papers and discussions.

Philosophical Seminary. Two credit hours. Three terms. Hours to be arranged. Dr. Davies.

This course will undertake a systematic study of the problem of knowledge. The consideration of the nature and conditions of formal truth will constitute the first part of the work, and Hobhouse's *Theory of Knowledge* will be read. This will be followed by a study of the psychology of knowledge, and by an examination of the nature, grounds, limits, and validity of our knowledge of reality. Ladd's *Philosophy of Knowledge* indicates the character of the discussion in the second part, and will be read in connection. The method of study combines lectures with papers and discussions by the class.

Comparative Psychology. Two credit hours. Three terms. Tu., Th., at 8. Assistant Professor Haines.

The course covers a broad field. It purposes to carry on the study of mind, begun in Philosophy 18. The interest there developed in the workings of the individual mind is here further satisfied by the insight afforded by comparative study. Comparisons of different minds are fruitful in insight into the mechanism of the individual mind. The three terms take up (1) Animal Psychology, (2) Child Psychology, and (3) Social Psychology.

Scientific Method. Two credit hours. Tu., Th., at 9. Assistant Professor Haines.

A study of the general methods of scientific procedure—the general methods by which science grows. It is not a study of the special methods of any individual science, though of course the illustrative material must be found in special fields. This concrete illustrative material reveals the presence of methods, more or less general, logical or mathematical. Candidates for the work should have an intimate acquaintance with some one science.

Advanced Ethics. Two credit hours. Three terms. Tu., Th., at 3. Some of the subjects considered in Philosophy 20 will receive a more thorough examination, and some of the leading theories of ethics will be studied. It is open only to students who have had courses 18 and 20. Professor Scott.

Esthetics. Two credit hours. Three terms. Hours to be arranged. This course will consider the subject of the beautiful from three points of view. 1, Historical: This will deal with the origin and development of art products in their dependence upon social and economic conditions; 2, Psychological: A consideration of the nature of the art impulse in its individual and social aspects; 3, Philosophical: A discussion of the relation that the Beautiful sustains toward the True and the Good with a view to the formulation of a theory of the beautiful as part of a philosophical system. Dr. Davies.

46. **Abnormal Psychology.** Two credit hours. Three terms. Tu., Th., at 8. Assistant Professor Haines. Omitted in 1904-5.

A systematic study of the abnormal states of the human mind. The chief types of mental disease are passed in review, in order to obtain a definite picture of each, and also to obtain by the perspective thus afforded a clearer view of the normal mental processes. A psychological analysis of the various forms of insanity, for the student of psychology, education or medicine. Defendorf's Clinical Psychiatry will be used as text, supplemented by lectures; and the exceptional facilities which Columbus affords for such work will be utilized.

PHYSICAL EDUCATION

For Men

The Gymnasium and Armory

PROFESSOR LINHART, MR. HUDDLESON.

1. **Gymnasium.** Second term. Required of all young men during the first and second years of their course. M., T., W., Th., at 4.

PHYSICAL EDUCATION

For Women

The Gymnasium and Armory

ASSOCIATE PROFESSOR MARTIN.

1. **Gymnasium.** Three terms. Required of all young women during the first year of their course. M., Tu., Th., F., at 9 or 11.
2. **Gymnasium.** Three terms. Required of all young women during the second year of their course. M., Tu., Th., F., at 8 or 10. The right is reserved to discontinue one section if an insufficient number apply for work.

PHYSICS

Office, University Hall, Room 13

PROFESSOR THOMAS. PROFESSOR COLE, ASSISTANT PROFESSOR EARHART, MR. TUCKERMAN.

1. **Elementary Physics.** Five credit hours. Recitations and experimental lectures. Text: Carhart & Chutes' "Elements of Physics." (Short Courses in Mining, first year, first and second terms, M., Tu., W., Th., F., 8. Short Course in Clay-working, first year; Short Course in Industrial Arts, second year, first and second terms, M., Tu., W., Th., F., at 11.) Assistant Professor Earhart.
2. **Mechanics and Heat. Electricity and Magnetism. Sound and Light.** Three credit hours. Lectures and recitations. (All four-year courses, second year, first, second and third terms. M., W., F., at 9.) Professor Thomas.
3. **Physics.** Two credit hours. Extension of Course 2, with practice in solution of problems. (Courses in Electrical Engineering, Ceramics, Industrial Arts and Manual Training, second year, first, second and third terms, Tu., Th., at 9.) Professor Thomas, Assistant Professor Earhart, Mr. Tuckerman.

Electricity and Magnetism.—Three credit hours. Lectures and recitations. (Course in Electrical Engineering, third year, first term, M., Tu., Th., at 10.) Professor Thomas.

Physical Laboratory. Four credit hours. Elementary manipulation. Length, mass and time measurements. Work in density, elasticity and in heat. (Course in Electrical Engineering, second year, third term, M., Tu., 1 to 4, W., 1 to 3; or Th., F., 1 to 4. Option, Course in Manual Training, third year, first, second and third terms, M., Tu., 1 to 4, W., 1 to 3.) Professor Cole, Assistant Professor Earhart, Mr. Tuckerman.

Physical Laboratory. Five credit hours. Theory and practice of magnetic and electrical measurement, including the testing and standardizing of instruments; conductivity of conductors; insulation, capacity and resistance of insulated conductors and cables; temperature co-efficients; commercial measuring and testing instruments; strength and distribution of magnetic fields; magnetic moments; permeability; work in light, including optical constants; spectroscopy; photometry of gas, electric and other lights. (Course in Electrical Engineering, third year, first and second terms, M., Tu., W., 1 to 4.) Professor Thomas.

Physical Laboratory. Two credit hours. (Course in Mechanical Engineering, second year, second term, M., Tu., 1 to 3; or Th., F., 1 to 3.) Three credit hours. (Course in Mechanical Engineering, second year, third term, M., Tu., 1 to 4; or Th., F., 1 to 4.) Three to five credit hours. (First, second and third terms. Elective.) Professor Cole, Assistant Professor Earhart, Mr. Tuckerman.

Physical Laboratory. Three to five credit hours. A second year's work in Physical Laboratory. Course 9 must be preceded by Courses 6 or 7. Elective. Professor Thomas, Professor Cole, Assistant Professor Earhart.

General Physics. Three credit hours. Three terms. One lecture. Two laboratory periods a week. An elementary course for students who do not wish to do the more exact work of Physics 2. The laboratory exercises are performed by the class in sections. Sec. I: Tu., Th., 8 to 10; Sec. II: Th., F., 2 to 4; Sec. I and II: W., at 11. Professor Cole.

Laboratory. Three to five credit hours. Three terms. For those who have had, or who are taking Physics 2. The work begins with measurements of length, mass and time, and the study of instruments. Each student works alone. When sufficient skill in general manipulation has been acquired, the student is allowed much liberty in the selection of his work. The apparatus provided is sufficient to permit him to work in any desired branch of physics. M., Tu., W., 1 to 4. Professor Thomas, Professor Cole, Assistant Professor Earhart.

II. FOR ADVANCED UNDERGRADUATES AND GRADUATES

Laboratory. Three to five credit hours. Three terms. Prerequisites, a year's work in General Physics of college grade and a course in the laboratory, (Physics 2 and 12). May be taken as a graduate minor. Professor Thomas, Professor Cole.

Theoretical Physics. Three to five credit hours. Three terms. For 1904-1905 the following subjects are offered:

- (a) Advanced Light, based upon Preston's "Theory of Light," with frequent reference to the original memoirs of Newton, Fresnel, Young, Fraunhofer, Michelson, Rowland, Stokes, Zeeman, etc. (b) Radiation, with special reference to the electro-magnetic theory of light. (c) Theory of Heat. (d) Theoretical Physics. Christiansen. A course in Differential Equations or Analytical Mechanics is desirable as preparation. (e) Evolution of Experimental Physics, with special reference to recent methods and results.

Prerequisites for each of the above subjects, a year of College Physics (Physics 2) and Calculus. A laboratory course in Physics must precede or accompany. Professor Thomas, Professor Cole.

16. **Physical Seminary.** One credit hour. Three terms. Discussion of the current literature of physical research, and of assigned topics chosen to illustrate the progress of the science. Time to be arranged. Open to those who have had a year of college work in Physics. Professor Cole.

III. FOR GRADUATES.

15. **Advanced Laboratory.** Three to five credit hours. Three terms. Research work. Prerequisites, two years of laboratory work in Physics. Professor Thomas, Professor Cole.

PHYSIOLOGY

(See Economics and Sociology.)

POLITICAL SCIENCE

(See American History and Political Science.)

PSYCHOLOGY

(See Philosophy.)

ROMANCE LANGUAGES AND LITERATURES

University Hall, Rooms 35 and 34.

PROFESSOR BOWEN, ASSOCIATE PROFESSOR BRUCE, ASSISTANT PROFESSOR INGRAHAM.

I. FRENCH

Note—Courses 1 and 2 in French must precede all others (except Course 3).

1. **Elementary French.** Four credit hours. Three terms. Grammar: Fraser and Squair's or Grandgent's Essentials. Reader: Whitney's (Parts I and II), or Laboulaye's Contes bleus, or Bowen's First Scientific French Reader; historical and narrative prose; one or more prose comedies. In this course the study of the language is taken up from the beginning. Stress is laid upon the acquisition of a correct pronunciation, after which the entire energy of the student is directed toward the attainment of a full and accurate reading knowledge of the language. Grammar and composition are made to contribute to this end. Sight reading is emphasized. Sec. I: M., Tu., Th., F., at 10; Assistant Professor Ingraham. Sec. II: M., Tu., Th., F., at 11; Associate Professor Bruce. Sec. III: Tu., W., Th., F., at 2; Associate Professor Bruce. Sec. IV: Tu., W., Th., F., at 3; Professor Bowen.
2. **Modern French Literature.** Four credit hours. Three terms. Two sections, at 10 and 11, M., Tu., Th., F., and a third section, first and second terms, at 9, M., Tu., W., Th. The study of the literature as such is now taken up. The work of the year covers a survey of two or more of the following subjects: (1) Contes; (2) Novels (Balzac or Hugo); (3) Lyric Poetry (Bowen's Modern French Lyrics or Canfield's French Lyrics); (4) Romantic Drama (Hugo). Prose Composition (Bouvet or Chardenal). Lectures supplement the work; private reading required; systematic attention given to syntax and idiom. Open to those who have completed Course 1, or who have received credit for French as an entrance subject. Sec. I: M., Tu., Th., F., at 10; Associate Professor Bruce. Sec. II: M., Tu., Th., F., at 11. Professor Bowen.

3. **Science Reading.** Four credit hours. Third term. Herdler's Scientific French Reader and Luquiens' Popular Science, or other similar works. A course of rapid reading introductory to the vocabulary of scientific literature; to be preceded by two terms of French 2. Intended for engineering and science students, and required of all students in the College of Engineering who offer French as their entrance language. M., Tu. W., Th., at 9. Assistant Professor Ingraham.
4. **French Comedy of the Seventeenth Century.** Three credit hours. First term. Study of the growth of French Comedy, with work centering upon Moliere (three plays), and Regnard. Lectures and collateral reading. Professor Bowen. Given biennially, alternating with Course 16. M., Th., F., at 10. Not offered in 1905-1906.
5. **French Tragedy.** Three credit hours. Second term. Lectures and readings. Corneille, Racine and Voltaire. Critical study of *Le Cid*, *Andromaque*, *Esther* and *Zaire*. Professor Bowen. Given biennially. M., Th., F., at 10. Not offered in 1905-1906.
6. **Seventeenth Century Prose.** Three credit hours. Third term. Critical study of Descartes, Pascal, Bossuet and others (Warren's Selections), supplemented by lectures. Professor Bowen. Given biennially. M., Th., F., at 10. Not offered in 1905-1906.
7. **Advanced Prose Composition.** One credit hour. Three terms. Bouvet's and Cameron's French Composition. Intended for advanced students who desire special training on the practical side of the language. Tu., at 10. Professor Bowen.
8. **Literary Criticism in France.** Two credit hours. First term. Readings and lectures. Selections from Sainte-Beuve, Faguet, Lemaitre and others. Tu., Th., at 9. Associate Professor Bruce. Not offered in 1904-1905.
9. **Recent French Prose.** Two credit hours. Second term. Rapid reading with lectures. Critical study of some of the leading prose writers of the present, such as Bourget, Daudet, Loti, Zola and others. Tu., Th., at 9. Associate Professor Bruce. Not offered in 1904-1905.
10. **Practice in Speaking and Writing French—Based on Daudet's Stories.** Two credit hours. Third term. Students wishing to elect this course must have the consent of the instructor in charge. Tu., Th., at 9. Associate Professor Bruce. Not offered in 1904-1905.
11. **French Travel Writers.** Two credit hours. First term. Readings and lectures. Scenes of travel from Gautier, Hugo and Dumas. Tu., Th., at 9. Associate Professor Bruce. Alternates with Course 8. Not offered in 1904-1905.
12. **Eighteenth Century Prose.** Two credit hours. Second term. Readings and lectures. Selections from Voltaire (ed. Cohn and Woodward) or others. Tu., Th., at 9. Associate Professor Bruce. (Alternates with Course 9. Not offered in 1904-1905.
13. **Advanced Conversational Practice—Based on Stories of Coppee and Maupassant.** Two credit hours. Third term. Students wishing to elect this course must have the consent of the instructor in charge. Tu., Th., at 9. Associate Professor Bruce. Alternates with Course 10. Not offered in 1904-1905.
14. **French Seminary A.** Three credit hours. Three terms. Open only to fourth-year students of French, who have completed Courses, 1, 2, 4, 5, 6 and 7, or an equivalent. Given biennially. The subjects for the year 1904-1905 will be : (1) The Development of the French Novel, and (2) Recent Tendencies of French Drama. Toward the close of the year several lectures will be given on methods of Teaching French and the Teacher's Equipment. M., W., F., at 9. Professor Bowen.

15. **French Seminary B.** Three credit hours. Three terms. The same conditions as in course 14. Given biennially. Not offered in 1904-1905. For 1905-1906 the subjects will probably be: (first half-year) Old French (Cledat, Morceaux choisis), with emphasis of la Chanson de Roland (Paris); (second half-year) Sixteenth Century French (Darmesteter et Hatzfeld, Morceaux choisis), with critical study of Montaigne. M., W., F., at 9. Professor Bowen.
16. **French Comedy of the Eighteenth Century.** Three credit hours. First term. Lectures on the growth of French Comedy, with work centering upon Marivaux and Beaumarchais. M., Th., F., at 10. Professor Bowen. Given biennially. Not offered in 1904-1905.
17. **French Society in the Seventeenth Century.** Three credit hours. Second term. With special reference to the Precieux Movement. Crane's Selections. With lectures. M., Th., F., at 10. Professor Bowen. Given biennially. Not offered in 1904-1905.
18. **Precursors of French Romanticism.** Three credit hours. Third term. Rousseau, Chateaubriand (Bowen's Atala and Rene) and Madame de Stael. With lectures. M., Th., F., at 10. Professor Bowen. Given biennially. Not offered in 1904-1905.

II. ITALIAN.

1. **Elementary Italian.** Two credit hours. Three terms. Grammar (Grandgent's or Edgren's), and Bowen's First Italian Readings. Modern prose. Comedy (Goldoni). Students contemplating this course are advised to postpone such election until they have completed French 1, or its equivalent. Tu., Th., at 9. Associate Professor Bruce.
2. **Advanced Italian.** Two credit hours. Three terms. Classical drama. Dante (Vita Nuova, Inferno). Petrarch (Rime). Tu., Th., at 9. Given biennially. Offered in 1905-1906.

III. SPANISH.

1. **Elementary Spanish.** Four credit hours. Three terms. Grammar (Edgren's or Garner's), and Reader; (Matzke's or Ramsey's Stories and Plays. Composition and conversation. Two sections. M., Tu., Th., F., at 11. Tu., W., Th., F., at 3. Assistant Professor Ingraham.
2. **Advanced Spanish.** Two credit hours. Three terms. The modern novel. Classical drama. Don Quixote. With lectures. Advanced composition and conversation. Open to those who have completed course 1. Tu., Th., at 3. Professor Bowen. Not offered in 1904-1905.

DEPARTMENT OF VETERINARY MEDICINE

**PROFESSOR WHITE, PROFESSOR SISSON, ASSISTANT PROFESSOR UDALL,
ASSISTANT PROFESSOR BRUMLEY, ASSISTANT
PROFESSOR PHILLIPS.**

Free clinic is held for two hours daily. (Saturdays, included) at this building inasmuch as from 1,000 to 1,500 animals are treated annually at this clinic, the students have ample opportunity to learn in a practical way the best methods of treating diseased and injured stock.

11. **Veterinary Anatomy...Osteology.** Ten credit hours. First term. Lectures illustrated with skeletons and anatomical preparations. Dissections. Dr. Sisson.
12. **Myology, Splanchnology.** Ten credit hours. Second term. Practical dissections and demonstrations on cadavers. Dr. Sisson.
13. **Angiology and Neurology.** Ten credit hours. Third term. Lectures illustrated by drawings, in the dissecting room and on anatomical models. Books recommended for reference and study: Stranveway's Veterinary Anatomy (new edition); Chauvau's Comparative Anatomy; McFaydean. Dr. Sisson.
14. **General Pathology and Morbid Anatomy.** Five credit hours. First term. Text-book: Green's Morbid Anatomy.

Lectures and recitations for students of the second year. This course of study forms the foundation for Theory and Practice (Special Pathology), and embraces the study of the various disease processes. The lectures are supplemented by demonstrations of museum specimens, and by post-mortem examinations upon all cases which die in the College Hospital. The processes especially studied are: Inflammation, Functional Disturbances, Fever, Anatomical Changes, Hyperaemia, Anaemia, Hemorrhage, Thrombosis, Embolism, Degenerations, Tumors, Stones and Concrements. Dr. White.
15. **Theory and Practice of Veterinary Medicine.** Five credit hours. Second term. Sporadic, non-infectious diseases. Dr. White.
16. **Theory and Practice of Veterinary Medicine.** Five credit hours. Third term. Dr. White.
17. **Diseases of the Cow.** Three credit hours. Second term. Special course for students in Dairying. Lectures and demonstrations consisting in the following: (a) Anatomy of the cow with special references to the digestive, reproductive and milk producing organs; (b) The more common non-infectious diseases of these organs and their treatment; (c) Most important infectious and contagious diseases and methods of preventing and dealing with them; (d) Practical methods of administering medicines, securing during operations, castings, etc. W., Th., F., at 9. Dr. White.
18. **Surgical Diseases.** Three credit hours. Four terms. Text-books: Friedberger and Froehner. Dr. Udall.
19. **Clinic. Lectures.** Six credit hours. Six terms. Dr. White, Dr. Udall, Dr. Brumley.
21. **Theory and Practice.** Lectures; illustrated by practical demonstrations, by drawings, on clinical cases. Head and neck. First term, third year. Dr. White.
22. **Therapeutics.** Three credit hours. Third term, third year. Dr. Brumley.

23. Obstetrics. Five credit hours. Third term, third year.

The course in Obstetrics is given during the third year, one term being devoted to this branch. The lectures, recitations and class-room demonstrations are amplified as much as possible by taking advantage of the clinical material afforded by an enviroing live-stock and dairying district.

Students have a particular advantage in coming in actual contact with cases of dystokia, foetal, placental, and maternal, and are required to assist in all obstetrical operations upon animals in labor, under the direction of the instructors. Dr. Udall.

24. General Surgery. Two credit hours. First term, first year. Dr. Udall.

25. Practice in Operating. Three credit hours. Second term, third year. Dr. Udall.

26. Horse Shoeing. Three credit hours. First term, third year. This subject is taught by a series of about fifty lectures, recitations and demonstrations upon prepared specimens and clinical cases, and embraces the following: The anatomy of the horse's foot; relationship of the outer skin to the foot; parts nurturing the horn; how horn grows; physiological mechanism of the foot; relationship of the foot to the rest of the limb and the influence of conformation over forms of hoofs; flight of feet; forms of hoofs; judging horses for shoeing; preparation of the hoof for the shoe; summer and winter shoes; fitting shoes to the hoof; nails; hoof nurture; shoeing for defective gaits; shoeing for lameness; shoeing for faulty conditions of the horny capsule; use of rubber pads, buffers, etc. Dr. White.

27. Meat Inspection. Lectures and recitations. Three credit hours. Second term, third year. Dr. Phillips.

Thirty-six recitations and lectures are given on the subject of Meat Inspection. These lectures include the normal character of the various organs of the meat-producing animals; rules and regulations for the inspection before and after slaughter; diseases due to the infestation with animal parasites; diseases due to the infection with vegetable parasites; putrid meat; over-heated meat; emaciated meat; foetal meat; natural death; abnormal odors and colorations of meat and fat; imperfect bleeding; disposition of diseased meat, etc.

As this course embraces much morbid anatomy, it is just as valuable to those who intend entering regular veterinary practice as to those who contemplate taking the civil service examination for meat inspectors in the Bureau of Animal Industry.

28. Veterinary Anatomy. Four and one-half credit hours. First term. (For Agricultural Students.) Brief outline of the anatomy of the horse and ox. Lectures, recitations, clinical practice and demonstrations. M., Tu., W., at 8. Clinical practice Th. afternoon. Dr. Sisson.

29. Veterinary Practice. Four and one-half credit hours. Second term. (For Agricultural Students.) The more common diseases of a non-infective character, to which farm animals are subject. Minor surgery, castration, and the principles of horseshoeing are included in this course. Lectures, recitations and practicum. M., Tu., Th., at 10. Practicum, Th. afternoon. Dr. White.

30. Veterinary Practice. Three credit hours. Third term. (For Agricultural Students.) The most common infectious and contagious diseases affecting farm and dairy animals, and the most scientific methods of preventing, dealing with and treating the same. Lectures, recitations and practicum. M., Tu., Th., at 10. Practicum, Th. afternoon. Dr. White.

31. Canine Diseases. Five credit hours. Second term, third year.

This course is taught by recitations, lectures, and practical demonstrations in the daily clinics and on subjects anæsthezied for the operating table. Dr. Brumley.

Supplementary lectures will be given on the origin and history of the dog, psychical characteristics, zoological position of the dog, with a comparison of the different breeds of dogs, their peculiarities, habits, etc. One term of five hours each week. Dr. Brumley.

33. **Ophthalmology.** Two credit hours. Third term, third year. A short course of twenty lectures is given on diseases of the eye. This course includes: Methods of examining the eye; the use of the ophthalmoscope; use of artificial and natural illumination; use of mydriatics; diseases and treatment of the organs surrounding and adjacent to the bulbus; diseases of the bulbus and their treatment. The lectures are supplemented by clinical demonstrations, and the students are given practice in the use of the most practical instruments for eye examination. Dr. White.
34. **Pathology Laboratory.** Three credit hours. Second and third terms, second year. Dr. Phillips.
36. **Pathology Laboratory.** Three credit hours. First term, third year. Dr. Phillips.
37. **Topographical Anatomy.** Five credit hours. First term, second year.
These are laboratory courses supplemented by lectures. They consist of three laboratory periods per week for an entire year, beginning with the second term of the second year and ending with the first term of the third year. The student is taught the correct methods of making autopsies and how to judge correctly ante-mortem and post-mortem changes in the tissues.
The holding of autopsies, preservation of tissues, the preparation, staining, microscopical examination and description of pathological tissue sections is done by the student. This course also includes the study of ecto and ento-parasites and pathological bacteriology. Dr. Sisson.
38. **Materia Medica.** Five credit hours. Three terms. Dr. Brumley.

ZOOLOGY AND ENTOMOLOGY.

Biological Hall, Rooms 3, 4, 7, 8 and 9.

PROFESSOR OSBORN, ASSOCIATE PROFESSOR HINE, ASSOCIATE
PROFESSOR LANDACRE.

1. **Invertebrate and Vertebrate.** Three credit hours. Three terms. Open to first year students and preliminary to other courses. Invertebrate, first and second term; Vertebrate, third term. This course includes a general discussion of groups, dissection of types and an outline of classification. Lecture. Tu., Th., at 8, or M., F., at 10; Professor Osborn. Associate Professor Landacre. Laboratory, Sec. I: F., 1 to 4; Sec. II: Th., 1 to 4; Sec. III: W., 1 to 4; Sec. IV: M., 2 to 4; Sec. V: Tu., 2 to 4.
2. **Comparative Anatomy of Vertebrates.** Three or five credit hours. Three terms. Must be preceded by Course 1 or equivalent. One hour quiz; two or four periods laboratory. Wiedersheim's Comparative Anatomy of Vertebrates is used as a basis. Quiz, W., at 1; Laboratory, W., Th., Fr., 1 to 4. Associate Professor Landacre.
3. **Economic Entomology.** Two and one-half credit hours. Third term. Insects of forest, orchard and garden. A detailed study of injurious species intended particularly for students of Horticulture. The work includes field studies, collections, reports on observations, etc. Lectures and recitations, Th., 9. Laboratory, F., 9 to 12. Associate Professor Hine.

4. **Economic Entomology.** Two and one-half credit hours. Three terms. This course must be preceded by Course 1. A systematic study of the group of insects with special reference to injurious and beneficial species. A foundation is laid for special study in Entomology. Preparation of collections, essays, life history studies and use of remedial measures along with laboratory studies on general anatomy. Recitations and lectures, F., 9. Laboratory, Tu., 1 to 4. Associate Professor Hine.
5. **Economic Entomology.** Three credit hours. First term. Insects of the household. Discussions of the different insects of importance in the household as injurious to food materials, clothing, carpets, draperies, etc. Fourth year; course in Domestic Science. Tu., W., Th., 9. Professor Osborn.
7. **Systematic and Practical Entomology.** Third term. Two lectures and one laboratory period a week. An elementary practical course for students in the Short Course in Agriculture. Associate Professor Hine.
8. **Parasites of Domestic Animals.** One credit hour. First term. A lecture course devoted to the principal parasites affecting domestic animals intended especially to meet the needs of those who intend to give particular attention to stock raising. Elective. Time arranged. Professor Osborn.
9. **Special Entomology.** Four credit hours. First term. Studies of life histories, collection and classification in selected groups. Field work and lectures. Elective. Time arranged. Professor Osborn.
10. **Special Entomology.** Four credit hours. Second term. Studies of winter condition of insects. Insecticides. Insecticide machinery, methods of preparing insect illustrations, greenhouse pests, etc. Elective. Time arranged. Professor Osborn.
11. **Special Entomology.** Four credit hours. Third term. Investigations of selected groups or species. Lectures on insect legislation, distribution, natural enemies, special methods of control, etc. Elective. Time arranged. Professor Osborn.
12. **Gross Anatomy of the Frog.** Three or five credit hours. First term. Must be preceded by Course 1. Ecker's Anatomy of the Frog and Huxley and Martin's Practical Biology. Laboratory, W., Th., F., 1 to 4. Associate Professor Landacre.
13. **Minute Anatomy of the Frog.** Three or five credit hours. Second term. Must be preceded by Course 1. Continuation of 12, but devoted particularly to a study of the tissues. Laboratory, W., Th., F., 1 to 4. Associate Professor Landacre.
14. **Embryology of the Frog.** Three or five credit hours. Third term. Must be preceded by Course 1. Laboratory, W., Th., F., 1 to 4. Associate Professor Landacre.
15. **Invertebrate Morphology. I.** Three or five credit hours. First term. I. Must be preceded by course 1. Devoted to lower Invertebrates, especially Protozoa and Coelenterata, Parker and Haswell, Lang, McMurrick, Shipley and other works are used for reference. Lecture, Tu., 2; Laboratory, M., Tu., W., Th., F., 2 to 4. Professor Osborn.
16. **Invertebrate Morphology. II.** Three or five credit hours. Second term. II. Must be preceded by Course 1. Will usually be devoted to Worms and Mollusks. References as in 15. Lecture, Tu., at 2; Laboratory, M., Tu., W., Th., F., 2 to 4. Professor Osborn.
17. **Invertebrate Morphology. III.** Three or five credit hours. Third term. III. Must be preceded by Course 1. Usually devoted to Arthropoda. Above references and Packard's Text-book of Entomology. Lecture, Tu., at 2; Laboratory, M., Tu., W., Th., F., 2 to 4. Professor Osborn.

18. **Invertebrate Embryology.** Three or five credit hours. Three terms. Must be preceded by Course 1. Korschelt and Helder used as a basis. Lecture, Tu., at 2; Laboratory, M., Tu., W., 1 to 4. Professor Osborn.
19. **Vertebrate Embryology: Karyokinesis, etc.** Three or five credit hours. First term. Must be preceded by Course 1. Hertwig, Marshall, Balfour, Minot, Foster and Balfour are used as references. Lecture, M., at 1; Laboratory, M., Tu., W., 1 to 4. Associate Professor Landacre.
20. **Vertebrate Embryology: Chick and Mammal.** Three or five credit hours. Second and third terms. Must be preceded by Courses 1 and 19. Foster and Balfour used as a guide. Lecture, M., 1; Laboratory, M., Tu., W., 1 to 4. Associate Professor Landacre.
21. **Comparative Neurology.** Three or five credit hours. Three terms. Should be preceded by Course 1 or equivalent, but is open to advanced students in psychology or pedagogy. Includes study of brain and spinal cord in all classes of vertebrates. Edinger, Lectures on the Central Nervous System is followed and numerous treatises and special papers consulted. Lecture, Tu., at 1; Laboratory, M., Tu., W., 1 to 4. Associate Professor Landacre.
22. **Cytology.** Three or five credit hours. Three terms. Advanced course. Must be preceded by Course 1 and equivalent or 2 or 15, 16, 17. Hertwig, Cell and Tissues; and Wilson, The Cell in Development and Inheritance. Professor Osborn.
23. **Entomology.** Three or five credit hours. Three terms. Must be preceded by Course 1. Advanced practical course for those wishing to investigate some special groups of insects or to fit themselves for professional work in Entomology. Lecture, F., at 1; Laboratory or field work, M., Tu., W., Th., F., 2 to 4. Professor Osborn.
24. **Ornithology.** Two credit hours. Three terms. Lecture and laboratory work on Morphology, Ecology and classification of birds. Laboratory, Tu., 9 to 11; Lecture, M., at 10. Associate Professor Hine.
25. **Research Work.** Five or ten credit hours. Advanced undergraduate or graduate course. Must be preceded by Course 1, and the equivalent of 2 or 15, 16, 17 or 19 and 20. Time to be arranged with individual students, or 9 to 12 and 2 to 5 through week. Professor Osborn.
26. **Seminar.** One credit hour. Three terms. Discussion of assigned subjects, reports on research work, current literature, etc. Advanced and graduate students in the department are expected to register in this course. F., at 4. Professor Osborn, Associate Professors Hine and Landacre.
27. **Teachers' Course.** Two or three credit hours. Three terms. In this course, which is intended especially for teachers and those who intend to teach, the work will consist of a presentation of the principles of zoology; a review of typical forms; discussion of the methods of instruction and investigation, and a course in laboratory practice for those who have not had such work. Two lectures, one laboratory period per week. Time to be arranged. Professor Osborn, Associate Professor Landacre.

GRADUATES

GRADUATES

The faculty of the Ohio State University are anxious to place a copy of each annual catalogue in the hands of every graduate. They will esteem it a favor if any alumnus who changes his residence will notify the Executive office of his new address and occupation. They will also be grateful for any information from any source that may assist in making or keeping the Directory of the Alumni complete and correct.

ALUMNI ASSOCIATION

OFFICERS FOR 1904-1905

PAUL M. LINCOLN, '92, Pittsburgh.....*President*
WILLIAM RENICK DUNLAP, '95, Kingston*First Vice-President*
ELLEN B. TALBOT, '90, Berlin, Germany*Second Vice-President*
FRANCIS L. LANDACRE, '95, Columbus.....*Secretary*
JAMES E. BOYD, '91, Columbus.....*Treasurer*
WM. H. PAGE, '92, Columbus*Orator*
WALLACE C. SABINE, '86, Cambridge, Mass.*Alternate*

COMMITTEE ON NECROLOGY

CARL G. DONEY, '91, Columbus Term expires 1905
E. S. T. SCHAUB, '85, Columbus..... " 1906

OFFICERS OF THE BOARD

PAUL JONES	<i>President.</i>
GUY W. MALLON.....	<i>Vice-President.</i>
CARL E. STEEB.....	<i>Secretary.</i>
LOUIS F. KIESEWETTER.....	<i>Treasurer.</i>

COMMITTEES OF THE BOARD

EXECUTIVE

†J. McLain Smith,	PAUL JONES,
GUY W. MALLON.	

FARM

†J. McLain Smith,	JOHN T. MACK,
OSCAR T. CORSON.	

FINANCE

D. M. MASSIE,	PAUL JONES,
GUY W. MALLON.	

FACULTY AND COURSES OF STUDY

JOHN T. MACK,	OSCAR T. CORSON,
*GEORGE K. NASH.	

*Died October 24, 1904.
†Died July 4, 1905. Oscar Bradfute, Cedarville, has been appointed to fill the unexpired term of J. McLain Smith, deceased.
‡Succeeded Paul Jones, term expired May 13, 1905.

MEMBERS OF UNIVERSITY FACULTY AND OTHER INSTRUCTORS

1904-1905

WILLIAM OXLEY THOMPSON.....University Grounds.
President.

THOMAS CORWIN MENDENHALL.....Florence, Italy.
Emeritus Professor of Physics.

ROBERT WHITE MCFARLAND.....Oxford, Ohio.
Emeritus Professor of Civil Engineering.

SIDNEY AUGUSTUS NORTON.....363 East Town Street.
Emeritus Professor of Chemistry.

STILLMAN W. ROBINSON.....1353 Highland Street.
Emeritus Professor of Mechanical Engineering.

WILLIAM HENRY SCOTT.....Clintonville.
Professor of Philosophy.

NATHANIEL WRIGHT LORD.....338 West Eighth Avenue.
Professor of Metallurgy and Mineralogy, Director of the School of Mines.

SAMUEL CARROLL DERBY.....93 Fifteenth Avenue.
Professor of Latin.

WILLIAM RANE LAZENBY.....348 West Eighth Avenue.
Professor of Horticulture and Forestry.

JOSIAH RENICK SMITH.....950 Madison Avenue.
Professor of Greek Language and Literature.

HENRY ADAM WEBER.....1342 Forsythe Avenue.
Professor of Agricultural Chemistry.

BENJAMIN FRANKLIN THOMAS.....University Grounds.
Professor of Physics, and State Sealer of Weights and Measures.

GEORGE WELLS KNIGHT.....85 Jefferson Avenue.
Professor of American History and Political Science and of Law.

ROSSER DANIEL BOHANNAN.....16th and Indianola Avenues.
Professor of Mathematics.

ALBERT MARTIN BLEILE.....218 King Avenue.
Professor of Anatomy and Physiology.

- WILLIAM ASHBROOK KELLERMAN.....175 Eleventh Avenue.
Professor of Botany.
- GEORGE BEECHER KAUFFMAN.....University Grounds.
Professor of Pharmacy, and Dean of the College of Pharmacy.
- BENJAMIN LESTER BOWEN.....775 East Broad Street.
Professor of Romance Languages and Literatures.
- JOSEPH VILLIERS DENNEY.....190 West Eleventh Avenue.
Professor of English and Dean of the College of Arts, Philosophy and Science.
- ALLEN CAMPBELL BARROWS.....1496 Pennsylvania Avenue.
Professor of English.
- EDWARD ORTON, JR.....The Normandie.
Professor of Clayworking and Ceramics, and Dean of the College of Engineering.
- EMILIUS OVIATT RANDALL.....257 Woodland Avenue; Supreme Court Building.
Professor of Law.
- WILLIAM THOMAS MAGRUDER.....191 King Avenue.
Professor of Mechanical Engineering.
- EDGAR BENTON KINKEAD.....Wyandotte Avenue; New Hayden Building.
Professor of Law.
- WILLIAM HERBERT PAGE.....1068 Franklin Avenue; 27 Board of Trade.
Professor of Law.
- WILLIAM MCPHERSON.....University Grounds.
Professor of Chemistry.
- JOSEPH NELSON BRADFORD.....54 West Tenth Avenue.
Professor of Architecture and Drawing.
- DAVID STEWART WHITE.....1619 Highland Street.
Professor of Veterinary Medicine, and Dean of the College of Veterinary Medicine.
- HERBERT OSBORN.....485 King Avenue.
Professor of Zoology and Entomology, and Director of the Lake Laboratory.
- OLIVE B. JONES.....95 West Eleventh Avenue.
Librarian.
- HENRY CURWEN LORD.....University Grounds.
Professor of Astronomy, and Director of the Emerson McMillen Observatory.
- FRANK EDWIN SANBORN.....303 West Eighth Avenue.
Professor and Director of the Department of Industrial Arts.
- FRANK ARNOLD RAY.....137 King Avenue.
Professor of Mine Engineering.

- JOHN ALLEN SHAUCK.....95 Winner Avenue; Supreme Court Building.
Professor of Law.
- CAPT. GEORGE L. CONVERSE, U. S. A. (Retired) . .94 Hoffman Avenue; 23 E. State St.
Professor of Military Science and Tactics.
- JOHN WRIGHT DECKER.....235 West Eighth Avenue.
Professor of Dairying.
- EMBURY ASBURY HITCHCOCK.....380 West Eighth Avenue.
Professor of Experimental Engineering.
- FRANCIS CARY CALDWELL.....401 West Sixth Avenue.
Professor of Electrical Engineering.
- CHARLES SMITH PROSSER.....114 West Tenth Avenue.
Professor of Geology.
- JOHN ADAMS BOWNOCKER.....1594 Neil Avenue.
Professor of Inorganic Geology and Curator of the Muscum.
- ALFRED DODGE COLE.....237 West Eleventh Avenue.
Professor of Physics.
- MINNIE AVA NELLIE STONER.....95 West Eleventh Avenue.
Professor of Domestic Science and Head of Department of Domestic Economy.
- WILBUR HENRY SIEBERT.....182 West Tenth Avenue.
Professor of European History and Secretary of the University Faculty.
- CHRISTOPHER ELIAS SHERMAN.....230 West Tenth Avenue.
Professor of Civil Engineering.
- ALBERT HENRY HELLER.....1249 Neil Avenue.
Professor of Civil Engineering.
- EDMOND BOTHWELL DILLON.....83 Wilson Avenue.
Professor of Law.
- JAMES M. BUTLER.....195 East Town Street
Professor of Law.
- WADE H. ELLIS.....Hartman Hotel
Professor of Law.
- JOSEPH H. OUTHWAITE.....447 East Broad Street.
Professor of Law and Dean of the College of Law.
- CHARLES SUMNER PLUMB.....107 West Eleventh Avenue.
Professor of Animal Husbandry.
- WILLIAM W. BOYD.....791 Bryden Road.
High School Visitor.
- SEPTIMUS SISSON.....1619 Highland Street.
Professor of Comparative Anatomy.

- HOMER CHARLES PRICE**.....388 West Eighth Avenue.
Professor of Rural Economics and Dean of the College of Agriculture and Domestic Science.
- LEWIS ADDISON RHOADES**.....156 Fourteenth Avenue.
Professor of Germanic Languages and Literatures.
- DAVID R. MAJOR**.....387 King Avenue.
Professor of Education.
- CHARLES BRADFIELD MORREY**.....188 West Tenth Avenue.
Professor of Bacteriology.
- JAMES E. HAGERTY**.....212 West Tenth Avenue.
Professor Economics and Sociology.
- GEORGE WASHINGTON MCCOARD**.....244 West Tenth Avenue.
Associate Professor of Mathematics.
- ARTHUR WINFRED HODGMAN**.....202 West Eighth Avenue.
Associate Professor of the Classic Languages.
- WILLIAM EDWARDS HENDERSON**.....182 West Tenth Avenue.
Associate Professor of Chemistry.
- JOSEPH RUSSELL TAYLOR**.....1497 Michigan Avenue.
Associate Professor of English.
- JAMES ELLSWORTH BOYD**.....60 West Maynard Avenue.
Associate Professor of Mathematics.
- CHARLES A. BRUCE**.....235 West Tenth Avenue.
Associate Professor of the Romance Languages.
- THOMAS EWING FRENCH**.....1458 Worthington Street.
Associate Professor of Architecture and Drawing.
- CHARLES WILLIAM FOULK**.....1247 Michigan Avenue.
Associate Professor of Chemistry.
- JOHN H. SCHAFFNER**.....141 West Ninth Avenue.
Associate Professor of Botany.
- JAMES STEWART HINE**.....1340 Hunter Street.
Associate Professor of Zoology and Entomology.
- FRANCIS LEROY LANDACRE**.....234 West Tenth Avenue.
Associate Professor in Zoology and Entomology.
- WALLACE S. ELDEN**.....756 Neil Avenue.
Associate Professor of the Classic Languages.
- FRANK HARVEY ENO**.....251 West Ninth Avenue.
Associate Professor of Civil Engineering.

- ALFRED VIVIAN.....325 West Eighth Avenue.
Associate Professor of Agricultural Chemistry.
- DENNIS HAMMOND UDALL.....175 West Eleventh Avenue.
Associate Professor of Veterinary Surgery and Obstetrics.
- *MAY SECREST.....162 West Tenth Avenue.
Associate Professor of Domestic Art.
- OSCAR V. BRUMLEY.....University Grounds.
Associate Professor of Veterinary Medicine.
- J. WARREN SMITH.....1422 Oak Street.
Lecturer on Meteorology.
- WILLIAM LUCIUS GRAVES.....1313 Forsythe Avenue.
Assistant Professor of English.
- CLAIR ALBERT DYE.....1569 Worthington Street.
Assistant Professor of Pharmacy.
- CHARLES LINCOLN ARNOLD.....328 West Eighth Avenue.
Assistant Professor of Mathematics.
- KARL DALE SWARTZEL.....308 West Eighth Avenue.
Assistant Professor of Mathematics.
- GEORGE H. MCKNIGHT.....269 East Broad Street.
Assistant Professor of English.
- *FRED A. FISH.....241 West Fourth Avenue.
Assistant Professor of Electrical Engineering.
- WILLIAM ABNER KNIGHT.....206 West Lane Avenue.
Assistant Professor of Machine Shop Practice.
- HARRY WALDO KUHN.....308 West Eighth Avenue.
Assistant Professor of Mathematics.
- FREDERICK EDWARD KESTER.....1316 Neil Avenue.
Assistant Professor of Physics.
- THOMAS HARVEY HAINES.....396 King Avenue.
Assistant Professor of Philosophy.
- ALONZO HUBERT TUTTLE.....215 West Tenth Avenue.
Assistant Professor of American History and Political Science.
- VERNON H. DAVIS.....University Grounds.
Assistant Professor of Horticulture and Forestry.
- HORACE JUDD.....245 West Fourth Avenue.
Assistant Professor of Experimental Engineering.

* Resigned.

- EDWIN F. CODDINGTON.....39 West Eleventh Avenue.
Assistant Professor of Mathematics.
- EDGAR SHUGERT INGRAHAM.....396 King Avenue.
Assistant Professor of Romance Languages.
- ROBERT F. EARHART.....1656 Neil Avenue.
Assistant Professor of Physics.
- JAMES MCILVAINE PHILLIPS.....115 North Grant Avenue.
Assistant Professor of Veterinary Medicine.
- GEORGE BURRIDGE VILES.....229 West Eleventh Avenue.
Assistant Professor in Germanic Languages and Literatures.
- THOMAS KENYON LEWIS.....96 East Eighth Avenue.
Assistant Professor of Architecture and Drawing.
- *JOSEPH HENRY VOSSKUEHLER.....54 West Tenth Avenue.
Assistant Professor of Architecture and Drawing.
- *H. DIEDRICH BRUNING.....768 Oak Street.
Assistant Professor of Civil Engineering.
- ARTHUR GILLETT MCCALL.....111 West Eleventh Avenue.
Assistant Professor of Agronomy.
- MATTHEW BROWN HAMMOND.....1483 Michigan Avenue.
Assistant Professor of Economics and Sociology.
- ALLAN COGGESHALL.....201 West Eleventh Avenue.
Assistant Professor of Electrical Engineering.
- WILLIAM C. MILLS.....78 West Tenth Avenue.
Curator of Archaeology.
- MAUDE WINIFRED MARTIN.....1634 Neil Avenue.
Director of Physical Education for Women.
- WILLIAM HENRY RENCK.....163 West Eleventh Avenue.
Instructor in Pattern Making and Founding.
- CHARLES PHILIP CROWE.....1453 Wesley Avenue.
Instructor in Forging.
- ARTHUR ERNEST DAVIES.....1948 North High Street.
Instructor in Philosophy.
- SILAS MARTIN.....317 Fifteenth Avenue.
Instructor in Architecture and Drawing.
- ALBERT VICTOR BLEININGER.....422 West Sixth Avenue.
Instructor in Ceramics.

* Resigned.

BERTHOLD AUGUST EISENLOHR.....	1627 North High Street.
<i>Instructor in Germanic Languages.</i>	
SAMUEL EUGENE RASOR.....	1594 Neil Avenue.
<i>Instructor in Mathematics.</i>	
EDWARD EVERETT SOMMERMEIER.....	1590 Neil Avenue.
<i>Instructor in Metallurgy and Mineralogy.</i>	
DON CARLOS HUDDLESON.....	326 Linwood Avenue.
<i>Instructor in Physical Education.</i>	
*MELVIN DRESBACH.....	377 West King Avenue.
<i>Instructor in Anatomy and Physiology.</i>	
*RUDOLPH HIRSCH.....	1060 South Front Street.
<i>Instructor in Agricultural Chemistry.</i>	
EDGAR HOLMES MCNEAL.....	1473 Neil Avenue.
<i>Instructor in European History.</i>	
JOHN SATTERLEE TIDBALL.....	35 Price Street.
<i>Instructor in Architecture and Drawing.</i>	
HENRY RUSSELL SPENCER.....	1473 Neil Avenue.
<i>Instructor in American History and Political Science.</i>	
GEORGE WASHINGTON RIGHTMIRE.....	1418 Michigan Avenue.
<i>Instructor in Law.</i>	
CATHERINE EMILY ANDREWS.....	1013 East Broad Street.
<i>Instructor in Chemistry.</i>	
E. S. GUTHRIE.....	80 West Eighth Avenue.
<i>Instructor in Butter-making.</i>	
RALPH ROGERS.....	80 West Tenth Avenue.
<i>Instructor in Architecture and Drawing.</i>	
HARRIET TOWNSHEND.....	53 West Eleventh Avenue.
<i>Assistant in Library.</i>	
MAUD DOROTHY JEFFREY.....	161 Fourteenth Avenue.
<i>Assistant in Library.</i>	
GERTRUDE STOWELL KELLCOTT.....	156 West Sixth Avenue.
<i>Assistant in Library.</i>	
MARTHA HARTFORD.....	65 West Eleventh Avenue.
<i>Assistant in Library.</i>	
RAYMOND JESSE SEYMOUR.....	1311 Highland Street.
<i>Assistant in Anatomy and Physiology.</i>	

* Resigned.

- BENJAMIN FRANKLIN MAAG.....176 West Ninth Avenue.
Assistant in Astronomy.
- ROSS C. PURDY.....112 West Lane Avenue.
Assistant in Ceramics.
- *HARLAN H. YORK.....University Grounds.
Assistant in Botany.
- E. F. MANGOLD.....68 East Maynard Avenue.
Assistant in Dairy Laboratory.
- CLINTON GEORGE STEWART.....1287 Bryden Road.
Assistant in Chemistry.
- *CYRUS ALAN MELICK.....
Assistant in Civil Engineering.
- *THURMAN WELFORD HOLLOWAY.....
Assistant in Mechanical Engineering.
- *HERBERT S. ARKELL.....
Assistant in Animal Husbandry.
- HIRAM DOUTHITT AYRES.....192 West Eighth Avenue.
Assistant in Physics.
- HOWARD RODOLPHUS WATKINS.....
Assistant in Chemistry.
- DANA JAMES DEMOREST.....93 West Eleventh Avenue.
Assistant in Metallurgy and Mineralogy.
- *MARY DENVER JAMES.....
Assistant in Romance Languages.
- *RAY SHARP BLINN.....
Assistant in Civil Engineering.
- C. W. BAUMAN.....
Assistant in Cheese Making.
- JOHN ROSS CHAMBERLAIN.....226 West Ninth Avenue.
Assistant in Civil Engineering.
- CAROLINE MARTHA CARMACK.....West Sixth Avenue.
Temporary Assistant in Botany.
- MARY MOLLOY.....1546 Highland Street.
Fellow in English.
- JAMES ANDERSON BEER.....226 West Eighth Avenue.
Fellow in Anatomy and Physiology.

* Resigned.

MAX DELOS MORTON.....	212 West Tenth Avenue.
<i>Fellow in Library.</i>	
MIMA JACOBS WEAVER.....	
<i>Fellow in English.</i>	
GERTRUDE SEE JACKSON.....	89 North Twentieth Street.
<i>Fellow in English.</i>	
CLARENCE CHARLES VOGT.....	131 West Eighth Avenue.
<i>Fellow in Chemistry.</i>	
JOHN SCOTT RIDDILE.....	
<i>Fellow in Electrical Engineering.</i>	
JOHN MCBRIDE KNOTE.....	307 West Ninth Avenue.
<i>Fellow in Chemistry.</i>	
JOSEPH EPHRIAM BEAL.....	
<i>Fellow in German.</i>	
ROBERT OSCAR BUSEY.....	
<i>Fellow in German.</i>	
ROSALIE TELFAIR JAMES.....	
<i>Fellow in Romance Languages.</i>	
*ERNEST AVERY SANDERS.....	
<i>Fellow in Zoology and Entomology.</i>	
FRANK MACY SURFACE.....	
<i>Fellow in Zoology and Entomology.</i>	
*MARY ANN MCKINLEY.....	
<i>Fellow in Botany.</i>	
HENRY ALLAN GLEASON.....	186 West Ninth Avenue.
<i>Fellow in Botany.</i>	

* Resigned.

ADMINISTRATIVE OFFICERS

THE UNIVERSITY

- WILLIAM OXLEY THOMPSON, D. D., LL. D.....*President.*
Office, University Hall.
- CARL E. STEEB, B. PH.....*Secretary of the Board of Trustees and Bursar.*
Office, University Hall; office hours 8 to 12 a. m.; 2 to 5 p. m.
- WILBUR H. SIEBERT, M. A.....*Secretary of the University Faculty.*
Office, University Hall.
- EDITH D. COCKINS, B. A.....*Registrar.*
Office, University Hall; office hours 8 to 11:45 a. m.; 1:30 to 4 p. m., except
Saturday.
- KATHARINE H. DUNCAN.....*Executive Clerk.*
Office, University Hall; office hours 8 to 11 a. m.; 1 to 4 p. m.; Saturday,
9 to 11 a. m.
- JOSEPH V. DENNEY, B. A.....*Dean of the Summer Term and Chairman of the
Entrance Board.*
Office, University Hall.
- WILLIAM W. BOYD, M. A.....*High School Visitor and Secretary of the
Summer Term.*
Office, University Hall.
- WILBUR E. MANN, M. A.....*Accountant.*
Office, University Hall; office hours 8 to 11 a. m.; 1 to 5 p. m.
- EDWARD ORTON, JR., E. M....*Chairman of the Committee on Advanced Standing.*
- JAMES E. BOYD, M. S.....*Secretary of the Entrance Board.*
Office, University Hall.
- JOHN A. BOWNOCKER, D. SC.....*Curator of Geological Museum.*
- WILLIAM C. MILLS, B. SC.....*Curator of Archaeological Museum.*
- WILLIAM C. MCCracken.....*Chief Engineer.*
Office, Power House.

COLUMBUS, OHIO, October 1, 1905.

His Excellency, HON. MYRON T. HERRICK, *Governor of Ohio*:

DEAR SIR:— I have the honor to transmit herewith the thirty-fifth annual report of the Board of Trustees, Ohio State University.

Very respectfully, Your obedient servant,

CARL E. STEEB,
Secretary.

ANNUAL REPORT.

OFFICE OF THE BOARD OF TRUSTEES OHIO STATE UNIVERSITY.

JUNE 30, 1905.

HON. MYRON T. HERRICK, *Governor of Ohio*:

SIR:— In accordance with law, the Board of Trustees respectfully submits the thirty-fifth annual report of the Ohio State University, it being for the fiscal year ending June 30, 1905.

ENDOWMENTS

The part of the irreducible debt of the State which forms the principal endowment of the University, at the date of the last annual report, June 30, 1904, was \$577,246.47 upon which the annual interest was \$34,634.79.

Under the operations of an act of the General Assembly entitled "An act to quiet title to unpatented lands in the Virginia Military District of Ohio," passed March 14, 1889, there has been added to the above principal \$7,830.28; from the sale of lot No. 2, Union County, there has been added \$100.00, and from the rents and profits of Page Will Lands, and from the sale of said lands the sum of \$110,657.19 has been added, making the principal endowment fund June 30, 1905, \$695,838.19, on which the annual interest is \$41,750.29.

THE WILLIAM JENNINGS BRYAN PRIZE

July 20, 1898, the Hon. William Jennings Bryan gave to the University \$250.00, the annual interest thereon to be awarded as a prize for the best essay, discussing the principles which underlie our form of government. This amount was placed in the State Treasury under the provisions of Section 4105-15 R. S. of Ohio, and under the operations of Section 4105-47 R. S. of Ohio, this principal has been augmented by additions of interest in years when no prize has been awarded, until at the close of the year covered by this report, the principal sum has become \$340.11, on which the annual interest is \$20.40.

THE ROBINSON FELLOWSHIP IN ENGINEERING

Professor Stillman W. Robinson gave to the University, on January 28, 1905, \$5,000.00 to endow a fellowship in Engineering. As in the case of the Bryan Prize Fund, this amount was placed in the State Treasury,

under the Sections of the Statutes above mentioned, and at the close of this year the principal sum is \$5,414.31.

During the past year this fellowship has been held by Antonio Ribot, who has received, as salary, the interest from said amount.

THE C. NEWTON BROWN SCHOLARSHIP FUND

At the time of the last annual report, this fund, which was started May 18, 1903, with \$1,000, donated by students of the late Professor Brown, had increased to \$1,063.00. December 1, 1904, a further installment of \$92.09 was received, which, added to the principal sum, and interest for this year, makes the fund June 30, 1905, \$1,223.06.

SETH ADAMS MEMORIAL FUND

Professor C. S. Plumb, head of the department of Animal Husbandry, on July 1, 1903, started a popular subscription among the farmers of the State to erect a building for the care of sheep, to be named after the late Seth Adams. This fund started at the above date with \$52.72, and at this time has increased to \$382.26. This amount is in an interest bearing certificate of deposit, placed with a local bank.

RECEIPTS AND DISBURSEMENTS

The receipts and disbursements for the year ending June 30, 1905, are as follows:

RECEIPTS

Balance in treasury June 30, 1904.....	\$12,035 00
Interest on Endowment.....	36,769 01
State Levy	293,582 04
Appropriations Act of Congress 1890.....	25,000 00
Rents	1,779 00
Virginia Military Lands	96 00
Students' Fees	43,034 44
Store Room cards and supplies.....	6,785 00
State appropriation Mines Building.....	16,905 94
State appropriation Chemical Building.....	24,926 42
State appropriation temporary equipment.....	1,659 52
Emergency allowance, Dairy Equipment.....	8,455 35
Veterinary Clinic	928 40
Refunds	138 01
National Brick Manufacturer's Scholarship.....	250 00
Sale of old brick.....	428 50
Old boiler and iron.....	435 02
Siebert Library	200 00
Sale of laboratory supplies.....	875 71
Diploma Fees	1,135 00
Fees Summer Schools.....	1,588 50
Interest special endowments	325 61
Miscellaneous	278 24
Total receipts	\$477,610 71

DISBURSEMENTS

Bonds and Interest	\$35,912 50
Salaries instruction	184,831 30
Salaries administration	37,129 52
Transfer Page Will Funds to Endowment.....	5,443 43
New Buildings	103,254 98
Tunnels and sewers	3,766 30
Roads and grounds	4,422 48
Heat, Power and Light, Labor and Materials.....	10,061 58
Fuel	12,087 23
Gas	1,912 30
Oils and gasoline.....	521 70
Water rents	2,963 48
Repairs buildings	12,355 47
Virginia Military Lands agency.....	1,634 50
Expenses Trustees	388 91
Books and Binding	4,393 72
Store Room supplies	8,888 98
Rent Fire-alarm boxes, etc.....	429 00
Commencement expenses	1,156 74
Messenger and guide service.....	387 54
Postage	1,226 88
Stationery and office supplies.....	2,862 56
Printing and advertising	2,260 11
Fee refunds	429 08
Telephones and telegrams.....	917 60
Laboratory supplies	3,486 75
Expenses High School Visitor.....	650 20
Apparatus and Equipment.....	9,650 98
Repairs to apparatus and equipment.....	585 10
Tools and implements	607 17
Repairs to tools and implements.....	108 49
Furniture and fixtures	2,730 27
Freight and cartage	746 23
Laundry work	477 94
Live stock	66 25
Feed	491 58
Extra labor in departments.....	2,451 74
Extra labor janitors	395 15
Extra labor watchman	62 45
Extra labor registrar	157 99
Extra labor library	1,019 24
Extra labor clerical	434 50
Cleaning supplies	433 36
Rent farm lands	505 00
Honorariums	200 00
Auditing accounts	802 27
Printing certificates	370 00
Expenses Summer School Civil Engineering.....	561 00
Traveling expenses	691 59
Incidentals	928 88
Total disbursements	\$468,252 02
Balance in Treasury, June 30, 1905.....	9,358 69

The amount expended for student labor during the year was \$5,003.50, which is included in the above statement.

The Treasurer's report filed herewith contains a complete itemized statement of the above receipts and disbursements.

FARM

Until the close of this year the Dean of the College of Agriculture has received and disbursed all moneys arising from sales of farm and dairy products, by action of the Board of Trustees these moneys will hereafter be certified direct to the Secretary of the Board of Trustees, and by him turned over to the Treasurer of the University, in the same manner as all other funds coming to the University. These funds will also be drawn upon by the Secretary of the Board of Trustees, in like manner, as other University funds.

As shown by the books of the Farm Manager the receipts and disbursements of the farm for the year ending June 30, 1905, were as follows:

Balance on hand June 30, 1904.....	\$861 26
Total receipts	11,413 49
	<hr/>
	\$12,274 75
Total disbursements	12,264 27
	<hr/>
Balance on hand June 30, 1905.....	\$10 48

HORTICULTURAL GARDENS

The same conditions prevail in the Horticultural Gardens as in the Farm, and hereafter these funds will also be handled by the Secretary of the Board of Trustees.

The Garden's account as shown by the books of the Manager, were for the year ending June 30, 1905, as follows:

Total receipts	\$2,117 09
Total expenditures	\$1,854 50
Deficiency. June 30, 1904.....	272 95
	<hr/>
	2,127 45
	<hr/>
Deficiency. June 30, 1905.....	\$7 96

NEW MORRILL FUND

The receipts and disbursements of this fund are included in the preceding general statement of receipts and disbursements; the detailed statement of these disbursements, showing specifically for what the funds have been expended, as is required by Act of Congress, will be found appended to the report of the Treasurer filed herewith.

BONDED INDEBTEDNESS

The bonded indebtedness of the University, June 30, 1905, is \$225,000, which is divided as follows:— \$30,000 bearing interest at 4 per cent., and \$195,000 4½ per cent., under the plan of payment of these bonds as provided by an Act of the General Assembly passed April 23, 1898 (O. L., 93, p. 221), the total indebtedness will have been paid by December 1, 1912.

NEW BUILDINGS

The building for the department of Physics was completed and accepted by the Board of Trustees June 21, 1905.

The two buildings provided for by the last legislature, one for the department of Chemistry, to replace the one destroyed by fire February 19, 1904, and one for the departments of Mines and Ceramics, are now well under way, and will probably be completed ready for occupancy during the coming year.

EMERGENCY ALLOWANCE

At a meeting of the State Emergency Board held September 8, 1904, an allowance of \$9,000 was made for the department of Dairying, the same to be expended, in enlarging and improving the present building and equipment. This work has been going on under the direction of Prof. J. W. Decker, and will be completed by the opening of the coming Fall Term.

PAGE WILL CASES

As was mentioned in the last annual report the University by the decision of the Supreme Court of Illinois, came into complete possession of the 960 acres of Page Lands in Illinois.

Acting under the direction of the Will, the Trustees proceeded to sell these lands, in order to place the funds in the State Treasury, as a part of the Endowment Fund. Mr. John G. Haas was appointed Agent to negotiate the sale of these lands, and during this year has sold the entire 960 acres, at an average price of \$123.11 per acre, realizing therefrom \$116,800. Of this amount \$14,350 was received in mortgage notes, and \$425 was paid for discounting other notes, leaving a balance of \$102,025, which sum, together with the rents and profits amounting to \$8,632.19 in the hands of Mr. Haas, as Trustee, has been certified to the State Treasurer, under the provisions of Section 4105-15 Revised Statutes of Ohio, and made a part of the principal Endowment Fund of the University.

The cases now in the United States Circuit Court of Appeals, which concern the Ohio lands, have not been settled during the time covered by this report, but a favorable decision is expected by the University authorities; when the Ohio Lands will also be sold and the proceeds added to the Endowment Fund.

FACULTY

The instructional force of the University for the past year was as follows: Presidents, 1; Emeritus Professors, 4; Professors, 54; Associate Professors, 16; Assistant Professors, 22; Lecturers, 1; Instructors, 18; Assistants, 9; Curators, 2; High School Visitors, 1; Fellows, 17; Directors, 1.

The Library Staff consists of the Librarian; 4 Assistants; 1 Fellow.

The positions and compensation of members of the faculty, and of other officers and employees of the University are given in Statement No. 3 of the Treasurer's report.

ESTIMATES

Estimate of expenses for year ending June 30, 1906:

Bonds and Interest	\$44,637 50
Salaries	277,130 00
Fuel and Light	20,000 00
Repairs Buildings	13,000 00
Printing and Advertising	3,000 00
Roads and Grounds	5,000 00
Water Rents	3,500 00
Incidentals	9,000 00
Expenses of Trustees.....	300 00
Books	12,000 00
Summer School	7,170 00
Apparatus and Equipment	24,865 00
To complete School of Mines Building.....	67,739 10
To complete Chemical Building.....	75,069 83
Equipment New Buildings	25,000 00

PROGRESS OF THE UNIVERSITY

The changes in the faculty, enrollment of students, the degrees conferred, and the courses of instruction offered, as well as the general progress of the University during the past year, are given in the report of the President of the University, which report is made a part hereof.

Respectfully submitted,

CARL E. STEEB,
Secretary.

ANNUAL REPORT OF THE PRESIDENT TO THE BOARD OF TRUSTEES

NOVEMBER 8, 1905.

HON. GUY W. MALLON, *President of Board of Trustees, Ohio State University*:

DEAR SIR: — I have the honor to present, through you, to the Board of Trustees of the Ohio State University for transmission to the Governor of Ohio, as required by law, the thirty-fifth annual report of the President of the Ohio State University for the year ending June 30, 1905.

THE BOARD OF TRUSTEES

During the year just closed the Board has suffered two changes. The Hon. George Kilbon Nash, upon his retirement from duties as Governor of Ohio, was appointed to succeed the Hon. Myron T. Herrick, who had resigned his trusteeship upon election to the office of Governor. Governor Nash's death occurred in October, 1904. An appropriate memorial was adopted by the Board of Trustees and placed upon their records. Governor Nash brought to the service of the Board a wide acquaintance with the affairs of the state and developed an increasing interest in the cause of higher education as represented at the University. Although his term of service was brief, his interest was genuine. The University suffered a distinct loss in his death. Governor Nash was succeeded in office by the Hon. F. A. Derthick, of Mantua, Ohio.

The Hon. Paul Jones retired from the Board at the end of his term of service in May, 1905. Mr. Jones is an alumnus of the University and has served his alma mater with devotion and distinction. He retired with the good will of all members of the Board of Trustees and Faculty, and will doubtless continue to serve his alma mater in other directions. He was succeeded by Hon. F. E. Pomerene, of Coshocton, a graduate of the University in 1891, with the degree of B. Ph., and in 1895 the degree of LL. B.

The Hon. Alexis Cope, who for twenty years had served as the efficient secretary of the Board of Trustees, retired from office in June, 1904, and was succeeded by Mr. Carl E. Steeb, an alumnus of the University in the class of 1899. Mr. Steeb has already proved his efficiency and capacity in the office. In this connection it may be proper to report that in 1904, upon recommendation of the President, the Trustees decided to employ an expert accountant to examine the books of the University. This examination began with the year beginning July 1st, 1899, and carried through to the year 1904. It is a matter of gratification to know that

this examination attested the accuracy and carefulness of the Board's accounts. A similar examination was made for the year ending June 30, 1905, with similar findings. This disinterested and expert examination is a valuable testimony to the carefulness of the work under the direction of the Board of Trustees. The large revenues of the University and great variety of expenditures combine to make the business of the state's greatest institution a matter of public concern. It is therefore with great pleasure that I call attention to the satisfactory condition of its accounts and the efficiency of the work as attested by the expert accountant.

THE FACULTY

During the year closed no important changes by way of loss have occurred in the University Faculty. Some well-earned promotions have been given to men after some years of service in the University and some new appointments have been made in order to make adequate provision for the increasing demands upon the teaching force. It is inevitable in a Faculty as large as that of the Ohio State University that changes should occur every year. The younger teachers are apt to have opportunities for promotions elsewhere that cannot be granted here. It is proper that such teachers should avail themselves of the better opportunities. There is an interchange between institutions among the instructional force that is not altogether hurtful, brings about a wider acquaintance, and on the whole tends to unify the cause of education among institutions of higher learning. A complete list of the appointments may be seen upon reference to the statistical reports, but it may be proper also to call attention to the fact that new appointments have been made in the departments of Electrical Engineering, Domestic Art, Animal Husbandry, Chemistry, Economics and Sociology, English, Experimental Engineering, Geology, Architecture and Drawing, Germanic Languages, and Romance Languages. The active instructional force for the year numbered one hundred and forty. In the Budget adopted to take effect July 1st, 1905, the Board of Trustees, on recommendation of the President, advanced the salaries of the heads of departments to \$2,500.00. This is the salary received by heads of departments twenty years ago. Owing to financial stress the Trustees felt compelled to make a ten per cent. reduction. It was understood that this reduction was only temporary; however, the temporary condition lengthened out for a long series of years. As a matter of equity and common justice this salary has now been replaced, although the restoration was all too tardy. In this connection it is worth while to call attention to the fact that the statute provides that no salary shall exceed \$2,500.00. This law was passed at a time when salaries were on a much lower scale than at present. The small salary of men in college circles in view of the changed conditions and increased cost of living, alone would justify the repeal of this statute. It would be well to bear

in mind that at the time the statute was passed, this limit was not reached in any of the Ohio schools. At present not only University and college men but public school men are paid salaries in excess of this amount. The Board of Trustees of the Ohio State University is the only educational board in the state of Ohio whose discretion in the amount of salary to be paid to the teacher is limited by law. There is no danger that the Trustees will waste money in extravagant salaries. There is great danger that the State University shall suffer by reason of its inability either to secure or retain men whose services would receive higher appreciation elsewhere. There would seem, therefore, to be no good reason why the legislature should not repeal the statute providing for the limitation in salaries of professors in the Ohio State University.

ENROLLMENT

For the year just closed the student roll has reached its highest mark. A summary of students reveals an enrollment of 1,870 as against 1,735 for the preceding year. A steady increase of attendance at the Ohio State University marks a very healthy sentiment and is also a tribute to the continued efficiency and high standards of education maintained. The summary by counties reveals the fact that every county in the state, as for some years past, has a representative in the University. Naturally enough there is always a large attendance from Franklin county. The proportion of students from this county, however, is steadily decreasing and the proportions increasing from other parts of the state. The unwarranted criticism has sometimes been offered, not apparently with the best motives, that there is an excessive proportion of students enrolled from the immediate vicinity. Upon this condition it is proper to remark that every college or university stimulates attendance in its own vicinity. Moreover, a large and growing city always furnishes a considerable contribution for any college or university. It is notably true in Ohio in the cities of Cleveland, Columbus, Cincinnati, and proportionately true of the colleges and universities located in the smaller cities. At the State University, as also at other institutions, it is worthy of observation that a considerable number of families leave their place of residence for a period of four or five years in order to educate their children and thus make a temporary residence in the city because of the University. These people are always reported as local residents. It is doubtful whether any just criticism can be made upon any institution for the large number enrolled from its vicinity which is rather a tribute to the efficiency and character of such institution. In this regard the Ohio State University has fully justified not only its own character but the wisdom of its location. In the distribution of attendance it is gratifying to know the increasing enrollment is from cities and counties having the largest population. These students come from counties where, at much less sacrifice and with less inconvenience, they might attend well-known and reputable colleges.

A summary by states and counties reveals the interesting condition of 1,870 students, 1,689 of which are enrolled from Ohio, the remainder of them are scattered through forty different states and countries. In many instances this shows the influence of our alumni and friends who have removed to great distances. Within a few years, as the children of the alumni come to college, this number will doubtless be increased and the influence of the University greatly extended. A summary of the attendance by colleges is added and for matters of comparison reference is made to page 32 of the report for the year ending June 30, 1904.

GENERAL SUMMARY

College of Agriculture and Domestic Science —		
Graduate Students	1	
Undergraduates	269	
	—	270
College of Arts, Philosophy, and Science —		
Graduate Students	46	
Undergraduates	490	
	—	536
College of Engineering —		
Graduate Students	5	
Undergraduates	738	
	—	743
College of Law.....		179
College of Pharmacy.....		35
College of Veterinary Medicine —		
Graduate Students	2	
Undergraduates	87	
	—	89
Lake Laboratory, Summer 1904.....		32
Shopwork, Summer of 1904.....		74
		—
Total		1,958
Names counted twice.....		88
		—
Net Total		1,870

DEGREES

At the Commencement, held on June 21, 1905, the University granted a total of 209 degrees. These were distributed as follows:

College of Agriculture and Domestic Science.....	31
College of Arts, Philosophy, and Science.....	85
College of Engineering.....	68
College of Law.....	16
College of Pharmacy.....	0
College of Veterinary Medicine.....	9
	—
Total	209

In addition to the degrees granted, certificates for the completion of courses not leading to degrees were granted as follows:

College of Agriculture —	
Short Course	2
Course in Dairying.....	6
	— 8
College of Engineering —	
Short Course in Clayworking.....	1
Short Course in Industrial Arts.....	3
	— 4
College of Pharmacy.....	5
College of Veterinary Medicine.....	5
College of Law.....	14
	—
Total	36

It is not uncommon that certain students fail to receive their degrees at the Commencement owing to the failure to complete the technical requirements or to temporary illness. The custom has been to recognize these persons during the year when the deficiency has been made good and their record completed. During the current year the following degrees were granted as above stated:

- October 20, 1904 — John S. Norris, Master of Arts.
(as of the class of 1904.)
- January 12, 1905 — William Wilson Chaffin, Civil Engineer.
Grandville R. Jones, Civil Engineer.
(as of the class of 1904.)
- January 12, 1905 — The following certificates in the short course in Clay-working were also granted:
Arthur Frederick Greaves-Walker.
Frederick J. Klaus.
Walter Stowe Porter.

The class of 1905 was the largest class ever graduated and marks a steady increase in the number of degrees granted from year to year.

THE UNIVERSITY AND HIGH SCHOOLS

Another year of experience in visiting high schools has served to deepen the conviction of the wisdom of this effort to more closely relate the University with the public educational facilities of the State. The co-operation of the high schools with the University has been most cordial. It is gratifying to report that the services of the High School Visitor have been much appreciated and that the efficiency of his work has increased from year to year. As a result of this work a clearer understanding has usually resulted between the University and men engaged in the secondary schools. In many instances the local schools have recognized their opportunity and have improved the conditions of education. This has brought to the communities and the pupils of the high schools improved educa-

tional facilities, and usually a better appreciation of the work of the teacher. It is believed that the students from the accredited high schools under this system of visitation have shown better preparation than before. It is also evident that the stricter interpretation of its entrance requirements by the University has resulted in a more carefully selected body of students. From year to year, a considerable number of students have found it impossible to meet the requirements of the University and have returned either to high schools or to preparatory departments of colleges in order to prepare for entrance at the University later. As stated in former reports, it is not the thought of the University that the work of the High School Visitor shall be carried on with a view to increase the number of students at the State University; that number is already increasing quite as rapidly as the facilities justify. There is a greater and more important work for the University than the mere securing of students; not the least important of this work is that the State University shall stimulate and lead in the ideals for higher education within the state. There is no disposition to divorce the University from the public high schools, but rather to make the union closer. It is desired, however, that the University shall maintain and enforce the highest ideals in education. In a spirit of friendly co-operation, not only with high schools but with other colleges and universities, the official visitation is made in the hope that the University may make a contribution to the cause of education that shall find increasing appreciation among teachers, schools, colleges, and the public.

THE ENTRANCE BOARD

Among the new provisions made during the current year attention is directed to the organization of what is termed the Entrance Board. The functions of this board are to pass upon all questions pertaining to the entrance of students; to provide for the necessary examinations at the close and opening of the year, and to bring to the Faculty appropriate reports of its work. One or two members of this board will be in service during the entire vacation period so that entrance correspondence may be promptly disposed of and provisions made for the registration of candidates. The policy of accrediting schools, admitting upon certificate only those who are graduates of such schools, has made it necessary to provide for regular entrance examination periods. Accordingly, a schedule of one week in June and a week in September has been provided in order to accommodate the convenience of applicants. Approximately, one hundred persons availed themselves this year of this opportunity to secure entrance to the University. The important work of this board is found in caring for the credentials of students coming from other colleges and asking for advanced standing. The number of such students is steadily increasing from year to year, and it is found advisable to make a somewhat careful study of the courses offered in neighboring colleges and uni-

versities in order that students may avail themselves of the facilities of the University with as little inconvenience as possible. The limited experience of this Entrance Board already proves the wisdom of its organization, and it is confidently believed that it is a step toward increasing the efficiency of the University and of emphasizing the importance of the standards insisted upon.

THE UNIVERSITY EDITOR

Provision has been made in the Budget for the appointment of a University Editor to take effect July 1st, 1905. This appointment is the response to a need greatly felt for some years. The Editor will be charged with the duty of publishing the annual catalogue of the University, the announcements of the several colleges, and the bulletins that are published under University auspices. The growth of the University has made it incumbent upon the authorities to publish in a somewhat systematic form some records of the progress of the University as well as to give official recognition to work done in the Faculty. The Editor will serve as secretary of the University Faculty and will, therefore, have at his command all the official records necessary for accurate publication. For some years the sentiment has been growing in favor of periodical publication of contributions made by the University Faculty in science and in the several departments of learning in which men are engaged. This new department looks toward a systematic endeavor on the part of the University to publish such results of research and contributions to learning as conditions warrant.

SUMMER SCHOOL WORK

For some years the University has maintained the Lake Laboratory school at Cedar Point, near Sandusky, for the purpose primarily of research in biological science. Professor Osborn has been made director of this laboratory and a substantial building has been erected by the University for the work. It is gratifying to report that the student roll at this summer work has been composed chiefly of graduates of the University and of other colleges, and of teachers engaged in teaching science in our schools and colleges. The policy has been adopted to employ a faculty for this work composed of men in part from the University and in part of men engaged in teaching such subjects in other colleges. The unparalleled facilities for the study of fresh water forms at Cedar Point have attracted students to this location. It is confidently believed that this co-operation with other faculties under the auspices of the State University will make a noteworthy contribution to the cause of scientific education in Ohio. There has been no effort made to attract large numbers, but rather to attract persons who are desirous of making investigation and of increasing their scientific attainments. Investigation rather than instruction has, therefore, been the chief aim of this summer

school. In the summer of 1904, thirty-two students were enrolled and practically all of the work was of advanced character and done with reference to graduate degrees.

In addition the usual summer work of the shops for the students in the College of Engineering was carried on and also a party of Civil Engineers sent out for field work. These efforts to supplement the theory and limited practice possible during the year by an active experience during the summer have proved entirely satisfactory and received the cordial endorsement of the University Faculty.

The limited experience of the University in summer term work has already brought numerous requirements for the extension of opportunities at the University for study. Accordingly, a summer term has been announced for 1905 giving special emphasis to a better preparation of teachers in our high schools and opportunity for the study of Manual Training. The Board of Trustees has very cordially approved the policy of extending the facilities of the University to a portion, at least, of the summer. If, in the judgment of the legislature, this policy should be approved it would seem wise to make such an increase to the revenues of the University as would justify ample provision for summer study. It is doubtful whether the policy of keeping valuable materials idle during one-fourth of the year is sound economy for the state. The saving of time and money to students, the offering of opportunities to many teachers, and the increased efficiency of the plant would seem to justify a relatively small increase necessary for providing the teaching force.

A COLLEGE OF EDUCATION

For a number of years the University has maintained a department of education. It is necessary to the completeness of the facilities of the University to offer this for persons desiring a liberal education; but aside from the demand for the technical study of the problems of education, there is an increasing recognition of the necessity of educational facilities for persons who propose to engage in teaching. The state has made some provision for the training of elementary teachers and has provided for the establishment and maintenance of normal schools at Ohio University and Miami University. These facilities, however, will not meet the need or respond to the demand for advanced education on the part of persons who desire to engage in teaching either in secondary schools or colleges. The statutes already provide and require that the University shall teach Manual Training among other subjects; the movement is pretty well defined in Ohio for Manual Training High Schools. The preparation of teachers for such work is not provided for anywhere in the state except so far as the technical courses at the University make such provision. The large equipment of the University, unparalleled anywhere in Ohio, should be made available for teachers

in our higher grades of education. A comparatively small addition to the expense account of the University could provide a Teachers' College which should utilize existing educational opportunities and add some new features for the benefit of teachers. The library and laboratory facilities of the University, the extensive courses in technical education, all furnish a splendid opportunity for students of education to study the problems of higher education at first hand with great advantage. The work of the University will not be complete until a Teachers' College has been organized, equipped, and properly related to the educational facilities now afforded by the state. The voluntary expression of interest in this subject by many of the school superintendents and high school teachers of the state has stimulated a discussion of this matter in University circles and it is earnestly desired that the legislature may take appropriate action recognizing this need.

ATHLETICS

In the modern college athletics assume so large a place that it seems appropriate to offer a few remarks upon that subject in a formal report of the University. The Ohio State University has made provision, at considerable expense, for an Armory and Gymnasium. This was in response to the requirement for instruction in military tactics as provided in the original act on which the University was founded. In this building provision is made for instruction in physical education, for both men and women, and for the organization of the University battalion; athletics also shares an interest in the building. A wide-spread interest has developed among the students in base ball, foot ball, track athletics, basket ball, and in the various other forms. No institution is isolated from another in this respect; the problems are not only local but general. A very marked tendency toward athletics may be observed both East and West, North and South. An absorbing interest of the public, of alumni, and of students has created an atmosphere not always the purest. For ten years or more, commendable efforts have been made to regulate the excesses, irregularities, and professionalism of athletics. There has been evident improvement in the rules; what is most needed at present is to improve in the ethical standards of all persons interested in athletics. Conformity to athletic rules is too much of a technicality and not enough of a principle. The extreme care necessary on the part of any team in order to avoid playing against the team in which professional people may be listed, indicates a condition that can be recognized without further detail or description. The suspicion that seems to be in the minds of people interested in athletics, is itself a greater evil than some of the abuses complained of. Athletics like every other form of amusement or business must eventually rest on sound ethics; all policies like all practices, should be founded on sound principles. Amusements can no

more afford to ignore righteousness than business can. It is unfortunate in the extreme that the public mind is so eager for amusement that it becomes indifferent to the ethical conditions surrounding the game. Up to date, little assistance in the purification and reform of athletics has been received from the public; whatever progress has been made, or is likely to be made, must have its inspiration from within. College faculties must recognize not only their *right* but their *duty* to lead in all forms of college athletics. It is futile to think that groups of hundreds and thousands of students who attend colleges and universities shall have no forms of amusement; no greater misfortune could happen than to banish all forms of amusements from college circles. It is a manifest waste of energy for college faculties or individuals to spend time in denouncing athletic or the abuse of athletics; what is needed is efficient leadership by men to whom principle is dearer than anything else. If university faculties are set for the education of the youth, it is little more than a corollary to add that they can not ignore the ethical conditions existing in college sports. The Faculty of the Ohio State University, in common with other faculties, has made some effort in this direction. It is not apparent that they have done all that could be done, or that the results of these efforts have been entirely satisfactory. It would be gratifying to some if there were no athletic problems; but so long as there are institutions there will be students and so long as there are games there will be problems. We shall never reform athletics simply by rules; we shall reform it only when we have inspired young men to cling to high ideals and to be governed by sound ethics. In the adjustment of this perennial problem, college and university faculties should be the inspiring leaders.

THE MATERIAL PROGRESS OF THE YEAR

As stated in the report of the previous year, the largest amount of money ever appropriated by the state was given by the last legislature. The University has tried to meet the responsibility of this cordial support by a careful use of the available money. The increased facilities provided in the way of buildings are in process of construction and will be available by the time the next legislature meets. The appropriations were not quite sufficient to completely equip the new buildings provided for and it will be necessary to ask that this provision be made by the approaching legislature. Since the last report, the physics building has been completed and is now occupied by the department of physics and is a very considerable improvement upon the educational facilities offered at the University and has greatly increased the efficiency of the department of physics. The new Chemical building will be completed by January 1906, as will also the School of Mines building.

NEEDED BUILDINGS

The growth of the University and the development of its work have made it necessary for the University to plan on a somewhat extended scale what may be termed a plant which ought to be brought to speedy completeness. Among the new buildings, to make the plant somewhat complete, may be named the following:

The College of Agriculture needs suitable barns for the stock necessary for the successful work in Agriculture. The present buildings for the purpose were provided early in the history of the school and are now practically worn out. Probably a thousand farms in Ohio are better equipped, from the standpoint of tools and tool houses and the necessary buildings in connection with the farm operations, than the College of Agriculture. Agricultural education in the meantime has made great progress. There is pressing need, therefore, for a horse barn, a cattle barn, a sheep barn, and provision for swine, a building for instruction in Animal Husbandry, a building for instruction in Farm Mechanics, and a general adjustment of these buildings with a view to increasing the educational facilities of the College of Agriculture. During the past year a syndicate of gentlemen bought land lying west of the Olentangy River and are holding it that the state may purchase it at a reasonable price and thus provide additional land which is needed for the College of Agriculture.

In addition to these considerations it is important that a railway line be extended from the Hocking Valley Railroad to the power house. The proposed purchase of this land would enable the University to own the right of way west of the railway. The decrease in the cost of delivering fuel would be sufficient to pay the interest on the purchase of the land and thus give the land to the College of Agriculture for its use practically for nothing. The spur of railway would also serve as a valuable adjunct to the departments of Mechanical and Electrical Engineering for experimental purposes, and would not only be a wise expenditure of money but an economic arrangement for the state.

The number of buildings has now become so great that the Power House is inadequate to furnish heat to all and it will become necessary, therefore, to make some provision to increase the facilities for heat, power, and light.

The rapid development of the College of Engineering has demonstrated a necessity for some adequate provisions for the important departments of Mechanical and Electrical Engineering. The provision already made for these departments is substantially what was made twenty years ago; the rapid development not only in the College of Engineering but in the means of teaching make it imperative that the opportunities in this department be brought up to date.

The Departments of Botany and Horticulture and Forestry are in need

of suitable provision in the way of buildings. This need has existed for ten years; it becomes more urgent every year and the time has now arrived when a large and valuable collection of scientific material that could not be duplicated for a large sum of money, is constantly threatened and some of it is not available for educational purposes simply because there is neither room in which to place it nor suitable space to exhibit it.

The large number of students in the battalion, and the demands for physical education make the present facilities of the Armory inadequate. The University needs a large drill shed which could be erected at small cost. This is a matter of good faith on the part of the state with the United States Government in accepting the Land Grant Act of 1862.

A Woman's Building, which should make provision for the women on the campus, (not for dormitory purposes) but for physical education, for Domestic Science, and for general headquarters, is an imperative need and has been recognized for some years. The University of Illinois was the first state institution to make adequate provision for its women. The facts are that in Ohio large numbers of young women would gladly avail themselves of the educational facilities offered by the state if the facilities were supplemented by some recognized necessities and conveniences. In the practice of co-education, so cordially supported in Ohio, it would seem that the call for a "Woman's Building" would meet with a hearty response.

It is not to be forgotten that the Library facilities of the Ohio State University are inadequate. A library building will continue to be a necessity until the provision is made. The library is temporarily, therefore, in a building designed for other purposes, and has been a most efficient aid in education under the limited facilities provided.

It is not presumed that the state will be willing to provide for all the needs of the University in any one year. The important consideration is that a recognition of these needs shall bring forth necessary facilities as rapidly and promptly as the revenues of the state will permit. The increasing confidence in the University and its work is a matter of congratulation and manifests itself from year to year. The state, through the legislature, is increasingly liberal in its support. It is the purpose of the Trustees and of the Faculty to merit this confidence and support.

CONCLUSION

In closing this report, it is a pleasure to state that the year has been one of harmony, co-operation, and efficiency. The uniform courtesy and good-will among the Faculty, students, and Trustees, is a matter of common observation. The President desires to make public recognition of his obligation to the Trustees, Faculty, and students for their most cordial co-operation in carrying forward the work of the University.

The report of the Librarian, the report of the Dean of the College of Law, the several tables of statistics and itemized reports as required by law are herewith submitted and made a part of this report.

Respectfully submitted,

W. G. THOMPSON,

President.

COLLEGE OF LAW

REPORT OF JOSEPH H. OUTHWAITE, DEAN

(35)

COLLEGE OF LAW

REPORT OF JOSEPH H. OUTHWAITE, DEAN, FOR THE YEAR 1904-1905

To the President of the Ohio State University:

DEAR SIR:— I have the honor to submit the following report on the condition of the College of Law for the year 1904-1905.

The death of William Forrest Hunter, late Dean of this College, occurred at the close of the last academic year, June 15th, 1904. The day after his death the Faculty of the College of Law, in token of respect for his memory, adopted certain resolutions, of which one was, that Mr. Page be requested to prepare a memorial of him, and to submit the same to the Faculty. At a subsequent meeting of the Faculty, during this College year, in pursuance of that resolution the following memorial was presented and was adopted, and a copy of the same furnished to the family of Dean Hunter:

“The death of William Forrest Hunter, second Dean and first working Dean of the College of Law of the Ohio State University, ends a long, useful, and honorable career.

“William Hunter was a member of an old Virginia family, who had long resided at Alexandria. In 1817 he left Virginia and settled at what is now Woodsfield, Ohio, with his son, William Forrest Hunter, the first of the name. Here at Woodsfield, Ohio, William Forrest Hunter, the second of the name, late Dean of the College of Law, was born on the 26th day of May, 1839. The first of the name was a lawyer whose devotion to the active practice was interrupted only by his service as a member of the lower house of Congress. His son, our late Dean, inherited his father's love for law but not for politics. As a youth, residing at his birth-place, he studied law with Judge John W. Okey, at one time Judge of the Supreme Court of Ohio, and in 1861, at the age of twenty-two, was admitted to the Bar of Ohio. Then came the only period of his life in which he turned aside from his systematic and unremitting study of the law. He entered the Union Army during the Civil War, and with characteristic devotion gave his energy and services to the Union cause, and risked his life for it. Serving as Adjutant of the Sixty-second Ohio Volunteer Infantry and subsequently as Captain of the Ninety-seventh Ohio Volunteer Infantry, he took part in some of the fiercest battles of the Civil War, and was wounded at Missionary Ridge. To the day of his death he carried in his body the Confederate bullet that so nearly ended his life.

"At the end of the Civil War he resumed his study of the law, taking some of the courses offered in the Law School of the University of Michigan; and then in 1866 he moved to Cincinnati, Ohio, where he spent two years in assisting Judge Okey in the preparation of Gholson and Okey's Digest. As will be seen from an examination of the earlier Ohio Reports, the judges, in rendering opinions construing and applying statutes, frequently omitted to cite the specific statute under which the case was decided, and accordingly where there had been amendments or new enactments, it was impossible to determine what statute a given decision construed, without a great amount of research. Mr. Hunter examined every reported Ohio case decided up to that time in which a statute was cited, and ascertained what statute the court had before it for construction. The list of Statutes of Ohio cited or construed in the volume embraced in that Digest is his work.

"When this work was published in 1867, Mr. Hunter was ready to enter the active practice of his chosen profession. He had not intended to locate at Woodsfield, but his father requested his assistance at the following term of court at which the father had so many cases for trial that he felt the need of assistance. The son's success was marked and decided. The first case which he tried, by his own selection, was one involving the law of common carriers, a subject in which he always had been and always was especially interested. As his father requested him to locate in Woodsfield and offered him strong inducements, he entered the practice there in partnership with his father, and in a short time the elder Mr. Hunter retired from the active practice leaving the younger man to carry his father's practice and the practice which his own ability had begun to draw to him. Here he lived for nineteen years. His practice steadily increased, and he became one of the leading lawyers of that and the surrounding counties. Ultimately he became largely engaged in railroad practice, and for that reason he moved to Zanesville in 1885, where he lived between two and three years, and then removed to Woodsfield for a short time. He had resolved to wind up his local business and to move to Columbus to be near a University for the sake of his children. Accordingly, in 1890, he terminated his local practice, retaining only some of his railroad business, and removed to Columbus.

"Soon after he removed to Columbus his connection with the College of Law began, originally in a way accidental. Our late colleague, Judge J. H. Collins, was at that time instructor in the law of Private Corporations. During the first year of the life of the Law School, Judge Collins was obliged to spend much of his time in Chicago in railroad litigation; and being well acquainted with Mr. Hunter, he invited him to act as substitute for him on certain of these absences. Mr. Hunter's success as an instructor was immediate and decided. Without any previous experience in giving formal instruction, he was a born teacher of the law; and his ability to interest his students, his thorough knowledge of the law,

his enthusiasm in his work, and the high standards which he fixed as an ideal, made him at once a favorite with the class. The first petition of the students in the Law College was that Judge Collins invite Mr. Hunter to act as a substitute whenever the former was absent. Their second petition, made on learning that the subject of Sales, which was to begin at the second term of the College of Law, was not assigned, was that Mr. Hunter be appointed to teach such subject. Both petitions were granted. Thus began the connection of Mr. Hunter with the Ohio State University. His success as an instructor was marked from the first. Additional subjects of instruction were assigned to him from time to time. In 1893 Judge Marshall J. Williams, nominal Dean of the Law School, resigned and Mr. Hunter was appointed Dean, a position which he retained when the Law School was reorganized and made the College of Law of the Ohio State University.

"With this appointment began the last, the most important; the most useful, and the most honorable part of his career. At that time the College of Law numbered less than sixty students. Its sessions were held in the rooms at the Franklin County Court House now occupied by the library of the Bar Association of Franklin County. The course was the two year course then characteristic of the majority of the law schools of the country. It may fairly be said that the school itself was still in the experimental stage. To build this College up and strengthen its position in every possible way was the work of the Dean. To it all his energies were bent. From the time that he assumed the Deanship, Mr. Hunter's life, strength and ambition centered in the College of Law. His energy, enthusiasm, devotion and ability, together with the hearty cooperation of the Faculty and the loyal support of the student-body, soon produced marked results. The increase in the number of students was one manifestation of this gain in strength. From a college of fifty-eight students in 1893 it had increased to a college of one hundred and thirty-two in 1897, and to one of two hundred and twenty students in 1901. This increase in numbers was not gained by the lowering of standards. The quality of work done in the College, and the amount required from the students was steadily increased. Taking effect with the class entering in 1901, the standard for admission to the College of Law was raised from a common school to a high school education; and the requirements for a degree from a year and a half of academic work of collegiate grade to two years. This increase in entrance requirements cut the number of the first class entering under them by one-half. In 1902 with the first year students alone under the new requirements, the attendance at the College was one hundred and eighty-eight. In 1903, with the first and second year students under the new requirements, the attendance was one hundred and sixty-six. It is, however, gratifying to remember that during Mr. Hunter's life-time the steady gain in the strength of the school had caused a turn in the attendance. In 1904, with all three years

under the new requirements, the attendance, instead of showing the anticipated loss when compared with 1903, showed a gain, reaching in the latter year the number of one hundred and seventy-one. In 1897 the College of Law removed from the Court House to the University campus. This change checked for a time the normal increase in numbers, and temporarily resulted in very inadequate accommodations; but in addition to its bringing the College of Law into closer touch with the University, it resulted ultimately in the erection of the present building for the College of Law. In November, 1903, the College occupied its present quarters, and the Dean for the last year and a half of his life saw the College in the material surroundings in which he had long striven to place it.

"The relation of the College of Law to the University was another change that marked the development of the school. Prior to 1897 the Law School was but loosely connected with the University. In that year it became one of the regular colleges into which the University had been divided.

"Thus he lived and worked, his life practically merged in the welfare of the College, its gains and advances his great source of happiness. The same kindness and courtesy that marked his ideal home life characterized his relations with his colleagues of the Faculty. The power and force that he put into his work did not in the least take from his consideration for others. If he expected much from us, it was because he was willing to do more. No toil was too hard for him; no sacrifice too great, if the welfare of the College could be advanced.

"It was thus, in the flood-time of success, at the height of his usefulness, that he was taken from us. It was during the last six months of his life that for the first time the condition of his health interfered with his work at the College. He suffered far more from the thought that he was not able to give to his beloved College the care and attention that he was accustomed to bestow upon it, than he did from the disease itself. The slightest apparent improvement in health was to him a sufficient excuse for braving the raw cold of a belated spring in the effort to take up his work again at the point where he had been forced to lay it down. If he had thought more of himself and less of his work, his life might have been spared. Even as he lay dying in the delirium of fever, his thoughts were always with his College; his great anxiety that his inability to attend to his work might cause some harm to the institution which was so dear to him. It needed not the general grief at his death, not the outpouring to do him the last honors that men receive, to show that he was equally dear to the College and to the University. It will always be among the honors and glories of this College and of the Ohio State University that this was the field in which such a man as William Forrest Hunter gave the best of his service."

The vacancy occasioned by the death of Dean Hunter was not filled by the Board of Trustees until its meeting in December, when the present

Dean was elected, who assumed the duties of the office in January, 1905. Up to this time Professor George Wells Knight had been serving the College as Acting Dean, having been elected to that position by the Faculty at its meeting of September 26, 1904.

There were some changes in the corps of instructors at the beginning, or during the year — James M. Butler, Esq., took the course in Municipal Corporations. Hon. Wade H. Ellis has taken that in Private Corporations, and Judge Edmund B. Dillon has taken the lectures in Evidence — the latter two courses running through the entire year. In the second semester Professor Edgar B. Kinkead gave the course in Moot Court. Mr. George W. Rightmire gave that in Sales, and the Dean those in Criminal Law and Procedure, and in Suretyship.

Some changes and adjustments in the course of study have been made by the Faculty during the past year to take effect in the College year 1905-1906. Prior to this change Elementary Law occupied fifteen hours a week during the first semester, and the subjects of Personal Property, Domestic Relations and Status were included in this course. These subjects have been separated and placed in distinct courses. Elementary Law will occupy eight hours a week to November 1st and five hours a week from that date on to the end of the semester. Domestic Relations will occupy three hours a week for the first semester; and in the second semester Personal Property and Elementary Real Property will each occupy two hours a week. Criminal Law has been transferred to the first semester. The time given to Contracts and Torts proved inadequate and has been increased. Contracts begins November 1st and will occupy two hours a week to the end of the semester and four hours a week during the second semester. Torts begins November 1st and will occupy two hours a week to the end of the first semester and three hours a week during the second semester.

In the second year, Real Property has been changed from a course of four hours a week during the second semester to a course of two hours a week throughout the year. Thus a continuous course is formed, beginning with Elementary Real Property in the second semester of the first year, running through the second year with the course in Real Property, and concluding in the first semester of the third year with a new course on Mortgages and Liens for two hours a week during the first semester. The course on Circuit and Supreme Court Practice of one hour has been transferred from the Graduate Courses into the second semester of the third year; and the courses in Probate Law and in Ethics have each been reduced from two hours a week for a semester to one hour. The requirement of a thesis to be prepared by each candidate for a degree was abolished.

The following table shows the courses given by each instructor in the College of Law during the year, the number of lectures per week in each course, and the number of students in each course:

Instructor.	Subject.	Lectures per week.	Whole No. Lectures.	Whole No. Students.
Prof. Knight.....	Constitutional Law	3	54-54	37
Prof. Page.....	Elementary Law	10	180	76
	Contracts	4	68	64
	Real Property	5	85	55
	Wills	2	34	53
	Quasi Contracts	2	34-401	33
Prof. Kinkead.....	Torts	4	68	61
	Pleading (1st Sem.).....	5	90	56
	Pleading (2nd Sem.)....	1	17	54
	Probate Law	2	34	36
	Trial Practice	2	34	31
	Ethics	2	34	30
	Moot Court	2	34-311	82
Prof. Randall.....	Negotiable Instruments...	5	90	53
	Partnership	2	34	54
	Agency	2	34-158	61
Judge Shauck.....	Equity Jurisprudence....	4	72-72	36
Judge Stewart.....	Federal Practice	2	34-34	30
Mr. Ellis.....	Private Corporations....	2	70-70	40
Mr. Butler.....	Municipal Corporations...	3	54-54	37
Judge Dillon.....	Evidence	3	105-105	59
Mr. Rightmire.....	Domestic Relations	5	90	83
	Bailments	2	36	52
	Sales	2	34-160	61
Prof. Outhwaite.....	Suretyship	2	34	32
	Criminal Law	3	51-85	56

The number of undergraduate students enrolled in each of the classes of the College during the preceding academic year and during this year is shown in the following statement. It includes also the number of students from other colleges of the University who were taking courses in Law :

1903-1904

I

Students enrolled in the College of Law.....	60	
Students from other colleges of the University enrolled in law courses	22	82

II

Students enrolled in the College of Law.....	42	
Students from other colleges of the University enrolled in Law courses	1	43

III

Students enrolled in the College of Law.....	43	
		168

1904-1905

I

Students enrolled in the College of Law.....	70	
Students from other colleges of the University enrolled in Law		
courses	11	
		81

II

Students enrolled in the College of Law.....	59
--	----

III

Students enrolled in the College of Law.....	39	
Total	179	

The total number enrolled shows an increase of eleven this year over the attendance of last year.

One-third of the members of the Senior Class were College graduates. Of the members of that class, one was not recommended by the Faculty to the Supreme Court for admission to the Bar, because he was not yet twenty-one years of age. The rest were so recommended, and all passed that examination—the four most creditable papers presented to the Committee at that examination being by members of this Class, as I am informed. The number of applicants for admission at that time was two hundred and ninety-five.

The year has been a fair one, and well calculated to encourage our expectations of an increase in numbers and a growth in standards.

JOSEPH H. OUTHWAITE,

November 3, 1905.

Dean.

REPORT OF LIBRARIAN

(45)

REPORT OF LIBRARIAN

JULY 1, 1905.

DR. W. O. THOMPSON, *President Ohio State University, Columbus, Ohio:*

DEAR SIR:— I beg leave to submit herewith my report as Librarian for the year ending June 30, 1905.

The number of books recorded on the accession books of the Library is 58,522, being an increase of 5,139 over the number reported last year. Of this increase, 916 have been secured by purchase, 1,864 by binding, 2,351 by gift, 6 by exchange, 2 by replacement.

Owing to the conditions which made necessary the cutting in half the ordinary Library appropriation for the year which has just closed, it was not expected that the year's accessions would reach any large figure. The amount of money appropriated, \$2,500.00, was barely sufficient to pay for periodicals and continuations regularly received and to provide for a little of the most important binding, \$300.00 being set aside for that purpose. The showing, however, has not been so bad as was anticipated. This has been due to two causes. (1) Several important orders which had been long outstanding and for which money had been provided, were filled during this year; and a considerable number of books were purchased by the Departments with money from their departmental appropriations which was available for the purchase of books. (2) At the close of the year 1903-4 the services of a traveling binder had been secured who for a very small sum put into a cheap but fairly satisfactory binding a large number of the pamphlets. Many of these were recorded upon the accession records this year, some still remaining to be entered next year. This accounts for the comparatively large number of accessions received by binding.

GIFTS

Among the important gifts recorded among this year's accessions are the books from the library of Mr. Mesloh, of which an account was given in last year's report, and the books belonging to the professional library of Dr. Edward Orton, to which bare reference was made in last year's report.

The library of Dr. Orton was given by his son, Professor Edward Orton, Jr. It consisted of volumes of the United States and State Geological Surveys, of geological texts, and of a great number of separates from geological periodicals and transactions which had been sent to Dr. Orton by the authors, many of them containing the autograph of the writer. Some of the books duplicated books in the University Library and were not accessioned. The volumes of the United States and State

Surveys were, however, put upon the Library shelves in preference to the volumes already standing there, it being the feeling that the geological section of the University Library should be as closely as possible connected with the great geologist who had laid its foundations. Of the bound volumes incorporated in the University Library, there were 653 volumes. Some of these dealt with subjects other than geology, and have been put in their places in the other divisions of the Library. The duplicate volumes have been put in the duplicate room to be used in the way of exchange when possible. Of the separates, 635 have been found to be either not in the University Library or greatly needed in duplicate. The remaining numbers are at present shelved in the duplicate room. There were also approximately 400 miscellaneous pamphlets. Among Dr. Orton's papers were found a number of University programs, some of them of the early years, which have formed a distinct and valuable addition to our memorabilia books. According to the terms of this gift, the books secured by the Geological Survey are to be kept at the Ohio State University and the care of them is to be vested in the University Library. It is the desire that a room be set aside in Orton Hall for the geological library of the University, which will include the books owned by the University and the books received by the Survey. The Survey, having just begun its systematic work of collecting a library, has not yet a large number to show.

Another interesting gift has been the gift of the large agricultural library of Mr. James Buckingham, of Zanesville. This consists of agricultural texts, of agricultural reports, and of a large number of bound papers, especially stock papers. It is doubtful whether these early volumes could have been secured in any other way.

Mr. John and Mr. Louis Siebert continue their generosity to the University, and their interest in the Siebert Library by the annual gift of \$200.00 for the purchase of books in German History.

An interesting token of University fellowship was the gift from the University of Chicago of the First Series of their Decennial Publications. These are beautiful volumes of great value.

INTER-LIBRARY LOANS

As in former years we are indebted to other libraries for many courtesies, and grateful acknowledgment is hereby tendered to the Cincinnati Public Library, Columbia University Library, Cornell University Library, Detroit Public Library, Harvard University Library, Library of Congress, Library of the University of Pennsylvania, Western Reserve University — Adelbert College Library, Wisconsin Historical Society Library. The courtesy shown by these libraries has been most gracious, and has enabled our graduate students to accomplish work which would have been impossible without it.

USE OF THE LIBRARY

Owing to the cramped quarters of the Library, it has been a physical impossibility to offer any inducements looking toward a more extended and satisfactory use of books. At certain hours of the day the small amount of space available for readers is crowded to discomfort. During the evening hours the attendance has increased. The fact that so many come across the large campus to spend an evening in the Library demonstrates the fact that when not crowded it is a good place for uninterrupted study. The attendance at the Law Library seems to be increasing.

LIBRARY SITE

It is needless to repeat in this report what has been said in former reports regarding the great need of a library building. I cannot, however, lose this opportunity to urge again the necessity of setting aside a place on the University campus for the library building when it does come. This is especially important at the present time because of the attention which is now being given to plans for a definite scheme of location for University buildings. Some plans have, I believe, been submitted to the Trustees of the University.

In deciding upon the location for a library building two things must be kept in mind: (1) The location should be near the center of population. (2) It should be so situated that there would be not only room but opportunity, in the architectural and artistic sense, for indefinite growth. The second requirement so modifies the first that the exact center of the University scheme of buildings should not be the place selected. Architecturally speaking, the center of such a group should be a finished product, with no unsightly false walls. That the Library should not be an adjunct to another building or group of buildings would seem to go without saying. It should at the very beginning be planned so large that it would necessarily have to stand alone.

The place on the University campus which comes almost ideally near to fulfilling these conditions is the site of the present Botany Building. It is the understanding that it is the desire to unite Botany and Horticulture in one large building on the present location of the Horticultural Building, so that eventually its present site will be free for other uses. It is very near the center of the University, so fulfilling the first requirement. The second requirement is met in that it gives room on the level for the main structure of the building, while the hillside and hollow to the south give opportunity for indefinite expansion to the rear. Stack wings could be run down the hill and into the hollow in such a way that it would be hard to see how they could ever interfere with the architectural scheme of the University.

It may seem unnecessary at the present time to plan for such indefinite

expansion, but to profit by the experience of others is only the part of wisdom. The need of expansion in buildings is the experience of all libraries, but it is necessary only to turn our attention to some of the larger ones in order to prove the point. A consultation of the annual reports of Harvard University will give a graphic picture of the experience in the Library of that institution. Gore Hall with its beautiful Gothic lines erected in 1838, was at that time supposed to fill all library needs. In 1877 a large wing was added, providing amply as it was thought for stack and work rooms. In 1895 it was found necessary to mutilate Gore Hall by dividing it into two floors, doing away with the beautiful Gothic effect, the lower floor being used for stack purposes, the upper for a large reading room. Ever since 1898 the demand for more room has been so pressing that it is a great problem as to what can be done to provide for the books belonging to Harvard University. The desire is for an entirely new building, and it is hoped that some bequest will be made so that the building may be in keeping with the great library. In the meantime the pressure for more space has made President Eliot consider the desirability of having store rooms for the less used books built in some locality where the land has not the great value that it has in the College Yard.

Yale University is just now providing for its third library building, and the cry of the Yale Alumni Weekly has been that the plans contemplated were not large enough, and that the building should not be placed in the Quadrangle because of the impossibility of providing room for growth. The plans as adopted, however, connect the two library buildings now standing so as to make a complete whole, with the understanding that a complete library building will sometime be placed near the center of University population rather than in the Quadrangle which represents college life more especially.

The University of Wisconsin, which has just put up a \$600,000 building, has left one wing of the original plans untouched, and one great drawback to the locality and the building is the fact that it will be hard to add other wings.

The Boston Public Library with a building costing \$2,343,000 within three years from its occupancy found it necessary to remodel a part at a cost of \$85,000 in order to gain more room.

This being the experience of libraries in general, it certainly would behoove the University in planning for a library building to insure itself as much as possible against a like experience. President Eliot's idea of separating the much used or live books from books seldom consulted, is a good one, and may possibly become a principle of book storage. However, even if it be adopted by the Ohio State University, it is not probable that the University would ever wish to buy land especially for the purpose of building such a storage house. And if the books are to be stored on the University campus, it would be manifestly better to have the storage house in close connection with the working library. Hence the

providing for it in the rear of the library building or in the hollow back of the site recommended, would seem a wise thing to do.

UNDERGRADUATE COURSES IN LIBRARY SCIENCE

During the fall term there was brought to my attention by the Dean of the Colleges of Arts, Philosophy, and Science, the need of the University offering some courses to satisfy the great demand for work along the lines of Library Science. Requests for such work were coming in such numbers as to show that there was an increasing demand. After conference with the Dean, it was agreed that if work could be offered as undergraduate courses which, while not giving professional training, would be preparatory to such training, it would be all that could be attempted by the University at the present time. From the viewpoint of general culture such courses would be of great value, and it was felt that they could also be made of value for those students who were intending to enter the library profession. Having these conditions in mind, I took occasion at the meeting of the American Library Association in St. Louis in October to discuss with Mr. Melville Dewey, head of the first professional library school which was ever established (New York State Library School), and with Mr. W. H. Brett, Dean of the latest library school to be established (Western Reserve University), the value of undergraduate courses in library science. Both Mr. Dewey and Mr. Brett were much interested and felt that such preliminary courses would add greatly to the character of the work done in the regular professional schools.

It had been the hope that some arrangement could be made whereby these courses could be begun next year, one course being given as a Sophomore elective followed by Junior and Senior electives. It was plainly stated, as you may remember, that the work could be done next year without additional teaching force, but it was also honestly stated that the year after in order to carry two courses and the third year in order to carry three courses, additional members of the Library Staff would be required. It was this feature, involving as it did financial considerations, which made it seem best to drop the plan for the present year.

STAFF

There have been no changes in the Library Staff during the past year. The work has been carried on under the organization which has been outlined in previous reports, and which has worked to our great satisfaction. The lack of money for new orders has enabled the Accession Department to accomplish some important work in filling sets of documents. The lack of new books also gave time to the Reference Department for continuous work on the catalogue of English literature. This work has been in charge of Miss Martha Hartford, and is nearing completion. It

will prove, I am sure, a work of sterling scholarship and great value. A definite account of it is withheld until next year's report.

It is a pleasure to report to you the ever increasing efficiency of all the members of the Library Staff.

Very respectfully submitted,

OLIVE JONES,
Librarian.

REPORT OF THE TREASURER.

COLUMBUS, OHIO, June 30, 1905.

To the President of the Board of Trustees of the Ohio State University:

SIR:— I hand you herewith my annual report for the fiscal year ending June 30, 1905, accompanied by duly receipted vouchers for all disbursements.

Very respectfully,

L. F. KIESEWETTER,

Treasurer.

STATEMENT NO. I

DETAILED STATEMENT OF RECEIPTS BY L. F. KIESEWETTER,
TREASURER, DURING FISCAL YEAR ENDING JUNE 30, 1905.

STATEMENT NO. III.

In compliance with Section 7 of the Organic Act, passed by the Legislature of Ohio, May 1, 1878 (Bates' Annotated Statutes, Sec. 4105-42), which requires the list of "the number of professors, officers, teachers and other employes, and the compensation of each, to be annually reported," I submit the following:

Name of Employee.	Position.	Salary.
Wm. Oxley Thompson....	President	\$5,000 00
Homer C. Price.....	Professor of Rural Economics and Manager of the Farm.....	2,250 00
John W. Decker.....	Professor of Dairying.....	1,700 00
Charles S. Plumb.....	Professor of Animal Husbandry.....	2,000 00
A. G. McCall.....	Associate Professor of Agronomy.....	1,400 00
Alex Argo	Herdsman	720 00
E. F. Mangold.....	Assistant in Dairy Laboratory.....	600 00
Laura Hill	Stenographer	480 00
Henry A. Weber.....	Professor of Agricultural Chemistry...	2,250 00
Alfred Vivian	Associate Professor of Agricultural Chemistry	1,500 00
Rudolph Hirsch	Instructor in Agricultural Chemistry...	600 00
George W. Knight.....	Professor of American History and Political Science	2,250 00
A. H. Tuttle.....	Assistant Professor of American History and Political Science	1,400 00
Henry R. Spencer.....	Instructor of American History and Political Science	1,100 00
A. M. Bleile	Professor of Anatomy and Physiology..	2,250 00
Melvin Dresbach	Instructor in Anatomy and Physiology..	800 00
R. J. Seymour.....	Assistant in Anatomy and Physiology..	300 00
James A. Beer.....	Fellow in Anatomy and Physiology....	300 00
Wm. C. Mills.....	Curator	480 00
J. N. Bradford.....	Professor of Architecture and Drawing.	2,100 00
Thomas E. French.....	Associate Professor of Architecture and Drawing	1,500 00
Thos. K. Lewis.....	Instructor in Architecture and Drawing.	1,200 00
Silas Martin	Instructor in Architecture and Drawing.	1,000 00
J. H. Vosskuehler.....	Instructor in Architecture and Drawing.	1,200 00
J. S. Tidball.....	Instructor in Architecture and Drawing.	800 00
Ralph Rogers	Instructor in Architecture and Drawing.	800 00
Henry C. Lord.....	Professor of Astronomy	2,250 00
J. Warren Smith.....	Lecturer in Meteorology.....	100 00
B. F. Maag.....	Assistant in Astronomy	1,000 00
Charles B. Morrey.....	Professor of Bacteriology.....	1,600 00
W. A. Kellerman.....	Professor of Botany.....	2,250 00
J. H. Schaffner.....	Associate Professor of Botany.....	1,300 00
Harlan H. York.....	Assistant in Botany.....	600 00
H. A. Gleason.....	Fellow in Botany.....	300 00
James McOwen	Florist	480 00
Sidney A. Norton.....	Emeritus Professor of Chemistry.....	1,250 00
William McPherson	Professor of Chemistry.....	2,250 00
W. E. Henderson.....	Associate Professor of Chemistry.....	1,600 00
Charles W. Foulk.....	Associate Professor of Chemistry.....	1,400 00
Catherine E. Andrews.....	Assistant in Chemistry.....	800 00
C. F. Sherman.....	Professor of Civil Engineering.....	1,800 00
A. H. Heller.....	Professor of Civil Engineering.....	1,800 00

STATEMENT No. III — Continued.

Name of Employee.	Position.	Salary.
Frank Eno	Associate Professor of Civil Engineering.	1,500 00
H. D. Bruning.....	Instructor in Civil Engineering.....	1,250 00
Edward Orton, Jr.....	Professor of Clayworking and Ceramics.	2,000 00
A. V. Bleininger.....	Instructor in Ceramics.....	1,000 00
R. C. Purdy.....	Assistant in Ceramics	500 00
Minnie A. Stoner.....	Professor of Domestic Science.....	1,800 00
May Secrest	Associate Professor of Domestic Art....	1,200 00
Cora Elliott	Maid	250 00
J. E. Hagerty.....	Professor of Economics and Sociology..	1,600 00
M. B. Hammond.....	Assistant Professor of Economics and Sociology	1,200 00
D. R. Major.....	Professor of Education	1,600 00
T. H. Haines.....	Assistant Professor of Philosophy (part time)	433 00
W. W. Boyd.....	High School Visitor.....	2,000 00
F. C. Caldwell.....	Professor of Electrical Engineering.....	1,900 00
Helen Lambdin	Stenographer	110 00
Allen C. Barrows.....	Professor of English Literature.....	2,250 00
J. R. Taylor.....	Associate Professor of English Literature.	1,500 00
Wilbur H. Siebert.....	Professor of European History.....	1,800 00
E. H. McNeal.....	Instructor in European History.....	1,000 00
C. S. Prosser.....	Professor of Geology.....	1,900 00
J. A. Bownocker.....	Professor of Inorganic Geology and Curator of Geological Museum.....	1,600 00
Lewis A. Rhoades.....	Professor of Germanic Languages and Literatures	2,250 00
George B. Viles.....	Assistant Professor of Germanic Languages and Literatures.....	1,200 00
B. A. Eisenlohr.....	Instructor in Germanic Languages and Literatures	800 00
J. R. Smith.....	Professor of Greek.....	2,250 00
A. W. Hodgman.....	Associate Professor of Classical Languages	400 00
Wallace S. Elden.....	Associate Professor of Classical Languages	400 00
W. R. Lazenby.....	Professor of Horticulture and Forestry..	2,250 00
Vernon H. Davis.....	Assistant Professor of Horticulture and Forestry	1,000 00
Frank E. Sanborn.....	Professor of Industrial Arts and Director of Department.....	2,000 00
W. A. Knight	Assistant Professor of Machine Shop Practice	1,200 00
W. H. Renck.....	Instructor in Pattern Making and Founding	1,200 00
C. P. Crowe.....	Instructor in Forging.....	1,200 00
Allando Case	Machinist	760 00
R. B. Cool.....	Pattern Maker	715 00
Samuel C. Derby.....	Professor of Latin.....	2,250 00
A. W. Hodgman.....	Associate Professor of Classical Languages	1,200 00
Wallace S. Elden.....	Associate Professor of Classical Languages	1,200 00
William H. Page.....	Professor of Law.....	2,000 00
E. B. Kinkead.....	Professor of Law.....	1,300 00
J. A. Shauck.....	Professor of Law.....	1,000 00
E. O. Randall.....	Professor of Law.....	800 00
George W. Knight.....	Professor of Law.....	250 00
Gilbert H. Stewart.....	Professor of Law.....	500 00
Harriet Schneider	Stenographer	440 00

To the Board of Trustees of the Ohio State University:

The undersigned, the Finance Committee, have in obedience to your instructions, examined the accounts and vouchers of L. F. Kiesewetter, the treasurer of the university, for the period from July 1, 1904, to June 30, 1905, and carefully compared them with the vouchers in possession of the secretary, and hereby certify that the report of the treasurer submitted to the board for the period named, which is the last fiscal year, is correct.

D. M. MASSIE,
GUY W. MALLON,
JNO. T. MACK,
Finance Committee.

COLUMBUS, OHIO, September 27, 1905.

OHIO STATE UNIVERSITY
COLUMBUS, OHIO

REPORT OF TREASURER

of said institution to the Secretary of Agriculture and the Secretary of the Interior, of amount received under act of Congress of August 30, 1890, in aid of Colleges of Agriculture and the Mechanic Arts, and the disbursements thereof, to and including June 30, 1905. (Report due September 1. See explanation on back.)

Balance on hand July 1, 1904.....	\$111 61
Date of receipt of installment for 1904-5 — July 7, 1904. Amount....	25,000 00
<hr/>	
Total available for year ended June 30, 1905	\$25,111 61
Disbursements thereof for and during the year ended June 30, 1905:	
Agriculture, as per Schedule A.....	\$3,896 66
Mechanic Arts, as per Schedule B.....	7,190 00
English Language, as per Schedule C.....	1,770 00
Mathematical Science, as per Schedule D.....	2,720 00
Natural or Physical Science, as per Schedule E.....	8,350 00
Economic Science, as per Schedule F.....	1,160 00
<hr/>	
Total expended during year.....	\$25,086 66
Balance remaining unexpended July 1, 1905.....	\$24 95

I hereby certify that the above account is correct and true, and, together with the schedules hereunto attached, truly represents the details of expenditures for the period and by the institution named; that said expenditures were applied only to instruction in agriculture, the mechanic arts, the English language, and the various branches of mathematical, physical, natural, and economic science, with special reference to their applications in the industries of life, and to facilities for such instruction, and that no part of these funds was expended for the erection, preservation, or repair of any building or buildings.

L. F. KIESEWETTER,
Treasurer.

The fact that it has already been necessary to require several institutions to replace sums of money erroneously expended from this fund makes it advisable to call attention again to the limitations placed by the

NOTE. — Two copies to be returned to the Bureau of Education, one of which will be forwarded to the Secretary of Agriculture.

act of Congress of August 30, 1890, upon the use of money appropriated by it, which is "*to be applied only to instruction in agriculture, the mechanic arts, the English language, and the various branches of mathematical, physical, natural, and economic science, with special reference to their applications in the industries of life, and to the facilities for such instruction.*" It is held that this language authorizes the purchase from this money of apparatus, machinery, text-books, reference books, stock, and material used in instruction or for the purpose of illustration *in connection with any of the branches enumerated*, and the payment of salaries of *instructors in said branches only*. The erection of buildings is specifically prohibited by the act, and the Assistant Attorney-General has decided that the purchase of land is not allowable. It should not be expended for heating or lighting buildings, repairs, furniture, cases, shelving, desks, musical instruments, the salaries of instructors in philosophy, psychology, ethics, logic, history, political science, civics, pedagogy, ancient and modern languages (except English), or for the salaries of presidents, treasurers, secretaries, bookkeepers, janitors, watchmen, etc. Neither can charges for cashing the checks of the United States Government be paid out of this fund. In short, *the plant* — the land, buildings, and ordinary appliances of a school — must be provided from other sources, and this particular fund must be applied exclusively to the subjects named in the act and the facilities especially required for those subjects.

SCHEDULE A

Disbursements for Instruction in Agriculture and for Facilities for such Instruction During the Year Ended June 30, 1905.

I. FOR SALARIES OF INSTRUCTORS.

Names of Instructors.	Subjects Taught for Which Paid From "Morrill Fund."	Amount.

Disbursements for Instruction in English Language and for Facilities for such Instruction During the Year Ended June 30, 1905.

I. FOR SALARIES OF INSTRUCTORS.

Names of Instructors.	Subjects Taught for Which Paid From "Morrill Fund."	Amount.
Prof. J. V. Denney.....	English language	\$500 00
Prof. A. C. Barrows.....	English language	450 00
Assoc. Prof. J. R. Taylor.....	English language	300 00
Asst. Prof. W. L. Graves.....	English language	260 00
Asst. Prof. G. H. McKnight.....	English language	260 00
Total	\$1,770 00

SCHEDULE D

Disbursements for Instruction in Mathematical Science and for Facilities for such Instruction During the Year Ended June 30, 1905.

I. FOR SALARIES OF INSTRUCTORS.

Names of Instructors.	Subjects Taught for Which Paid From "Morrill Fund."	Amount.
Prof. R. D. Bohannon.....	Mathematics	\$450 00
Assoc. Prof. G. W. McCoard.....	Mathematics	320 00
Assoc. Prof. J. E. Boyd.....	Mathematics	300 00
Asst. Prof. C. L. Arnold.....	Mathematics	260 00
Asst. Prof. K. D. Swartzel.....	Mathematics	300 00
Asst Prof. H. W. Kuhn.....	Mathematics	220 00
Assistant S. E. Rasor.....	Mathematics	200 00
Asst. Prof. E. F. Coddington.....	Mathematics	220 00
Prof. H. C. Lord.....	Astronomy	250 00
Assistant B. F. Maag.....	Astronomy	200 00
Total	\$2,720 00

SCHEDULE E

Disbursements for Instruction in Natural or Physical Science and for Facilities for Such Instruction During the Year Ended June 30, 1905.

I. FOR SALARIES OF INSTRUCTORS.

Names of Instructors.	Subjects Taught for Which Paid From "Morrill Fund."	Amount.
Prof. S. A. Norton.....	Chemistry	\$250 00
Prof. Wm. McPherson.....	Chemistry	450 00
Assoc. Prof. W. E. Henderson.....	Chemistry	320 00
Assoc. Prof. C. W. Foulk.....	Chemistry	280 00
Assistant H. R. Watkins.....	Chemistry	120 00
Assistant C. E. Andrews.....	Chemistry	160 00
Assistant C. G. Stewart.....	Chemistry	120 00
Prof. B. F. Thomas.....	Physics	450 00
Prof. A. D. Cole.....	Physics	400 00
Asst. Prof. R. F. Earhart.....	Physics	240 00
Assistant H. D. Ayers.....	Physics	160 00
Prof. W. A. Kellerman.....	Botany	450 00
Assoc. Prof. J. H. Schaffner.....	Botany	260 00
Assistant H. H. York.....	Botany	100 00
Prof. Herbert Osborn.....	Zoology and Entomology.....	450 00
Assoc. Prof. J. S. Hine.....	Zoology and Entomology.....	240 00
Assoc. Prof. F. L. Landacre.....	Zoology and Entomology.....	240 00
Prof. C. S. Prosser.....	Geology	380 00
Prof. J. A. Bownocker.....	Geology	320 00
Prof. N. W. Lord.....	Metallurgy and Mineralogy....	400 00
Assistant D. J. Demorest.....	Metallurgy and Mineralogy....	160 00
Prof. A. M. Bleile.....	Physiology	450 00
Assistant M. Dresbach.....	Physiology	160 00
Prof. C. B. Morrey.....	Bacteriology	320 00
Prof. G. B. Kauffman.....	Pharmacy	400 00
Asst Prof. C. A. Dye.....	Pharmacy	220 00
Prof. H. A. Weber.....	Agricultural Chemistry	450 00
Assoc. Prof. A. Vivian.....	Agricultural Chemistry	280 00
Assistant R. Hirsch.....	Agricultural Chemistry	120 00
Total	\$8,350 00

SCHEDULE F

Disbursements for Instruction in Economic Science and for Facilities for Such Instruction During the Year Ended June 30, 1905.

I. FOR SALARIES OF INSTRUCTORS.

Names of Instructors.	Subjects Taught for Which Paid From "Morrill Fund."	Amount.
Prof. J. E. Hagerty.....	Political economy	\$320 00
Assoc. Prof. M. B. Hammond.....	Political economy	240 00
Prof. M. A. Stoner.....	Domestic economy	360 00
Assoc. Prof. May Secret.....	Domestic economy	240 00
Total	\$1,160 00

STATISTICAL TABLE I — THE WORK OF INSTRUCTORS 1904-1905.

Course Subjects.	Department. Number.	Total Hours per Week.						Number of Students.			
		Lectures.			Laboratory.			First Term.	Second Term.	Third Term.	
		First Term.	Second Term.	Third Term.	First Term.	Second Term.	Third Term.				
AGRICULTURE											
Farm Manangement	2	4	12
History of Agriculture and Agricultural Literature.....	4	4	6
Agricultural Economics	6	12
Thesis
Advanced Soils	14	1
Farm Equipment	2	3	10
Elementary Soils (2-year course)	45
Elementary Soils (4-year course)	11	3	3	12
Elementary Soils	12	3	6	26
Agricultural Experimentation	24	1	6	6
Farm Crops	22	38
Improvement of Farm Crops	26	8
Rural Engineering	4	7
Field Work in Soils	16	12
Breeds of Live Stock	2	3	80
Animal Conformation and Stock Judging	12	3	17
Breeds of Live Stock	1	3	17
Stock Feeding	8	4	13
Principles of Breeding
Hygiene and Management	6	3	3	32
Live Stock Markets and Commerce	10	4	18
Types and Breeds of Animals	14	3	3	12
Stock Feeding	18	3	3	11
Dairy Cattle Feeding	3	3	3	25
Dairy Breeds and Breeding	13	3	3	16
Breeds of Live Stock	15	3	3	4
Thesis	4	26
Principles of Breeding	4
Elements of Dairying	12	5	9	11

Totals	305	465	642	686	745	969	1,019	1,150	1,178	1,268	1,481	1,547	1,757	1,933	1,978

Until 1896, graduate students have been included in the first three classes.

Until 194, summer term students in shopwork have been included with graduate students.

STATISTICAL TABLE IV.—SHOWING DEGREES AND CERTIFICATES
GRANTED IN JUNE, 1905

COLLEGE OF AGRICULTURE AND DOMESTIC SCIENCE
BACHELOR OF SCIENCE IN AGRICULTURE

JOHN THOMAS DALLAS.....	Shackleford, Va.
ELKANA ELHANA FINNEY.....	Cedarville
CHESTER GLENN FOSTER.....	London
HENRY HOGE HAMILTON.....	Brownsville
JAMES VERNON HYATT.....	Augusta
WILLIAM A. MARTIN.....	Kenton
EDWARD RUSSELL MINNS.....	Lodi
WILLIAM HENRY PALMER.....	Thurston
JAMES CHALMER WHITE.....	Lebanon
EMERSON SCOTT POSTON.....	Logan
DWIGHT WILSON WEIST.....	Basil
FREDERIC LONG WEST.....	Bloomington
THOMAS LEROY WHEELER.....	Columbus
EDGAR LEVI ZEHRING.....	Germantown

BACHELOR OF SCIENCE IN HORTICULTURE AND FORESTRY

IRA JUDSON CONDIT.....	Jersey
EDWIN CHARLES COTTON.....	Elyria
CHARLES HENRY FLORY.....	Arcanum
RUDO LORENZO FROMME.....	Richmond, Ind.
CHARLES AUSTIN MINER.....	Bristolville
LINDLEY M. SMITH.....	Chesterhill

BACHELOR OF SCIENCE IN DOMESTIC SCIENCE

CLARA NAOMI CAMPBELL.....	Columbus
EMMA EVANS MCKINLEY.....	Columbus
SOPHIA WEBER FOX.....	Columbus
NOLA KATHERINE FROMME.....	Richmond, Ind.
FRIEDA HIRSCH.....	Columbus
NOLA ROWENA KNOX.....	Westerville
ALICE SPITLER	Dayton
VIVIEN WATT	Freeport
LOULA BELLE THOMPSON.....	Georgetown
OPAL IONE TILLMAN.....	Greenville

MASTER OF SCIENCE IN DOMESTIC SCIENCE

MARY FAYE HILL, B. Sc. (In Domestic Science).....	Columbus
---	----------

COLLEGE OF ARTS PHILOSOPHY AND SCIENCE
BACHELOR OF ARTS

DAISY DANIEL BACON.....	Clintonville
MARY BERRY	Peebles
MARION LOUISE NICHOLS BIRNIE.....	Chillicothe

EARLE ADELBERT BIXLER	Mt. Gilead
SARAH REBECCA BROWN	Columbus
MRS. BIRDIE NORTH BRYANT, B. Sc. (National Normal University)	St. Paris
HAROLD A. BUDD	Perrysville
JOHN T. CLARK	Louisville, Ky.
FREDERICK DIETZ COCKINS	Columbus
LEWIS CLARK COX	Xenia
GRACE ADELE DANN	Columbus
JOSEPH D. DAVIS	Columbus
FRANCIS WILBER DICKEY	Clintonville
HENRY CLAUDE DIETERICH	Piketon
EDWIN ERNEST DOWLER	Washington C. H.
ERNEST HERMAN FLEDDERJOHANN	New Knoxville
CLARA MARIA FOLLETT	Granville
JOHN CECIL FOUTS	West Lafayette
ADA MARIAN FREEMAN	Chillicothe
WILLIAM FRANKLIN GEPHART	Williamsport
FRANK ROSS GUILFORD	Wauseon
RUSSELL INGMAN HARE	Marysville
HARRY FRANKLIN HARRINGTON	Columbus
JOHN MARION HARSH	Cleveland
SANFORD ALPHONSO HEADLEY	Jacksonville
MARY TULLER HOLLISTER	Galion
MABEL STEVENS HOLT	Columbus
MARK CHAPEZE HOUSTON	Urbana
KATHERINE DARLINGTON HUNTINGTON	Columbus
JESSE DORSEY IAMS	Sheridanville, Pa.
OSMER CHARLES INGALLS	Camp Chase
JOSEPH HENRY KINDLE	Centerville
HUGH JACKSON MEANS	Columbus
PAUL DEADY MEEK	Columbus
FLORENCE MAY METCALF	Columbus
WALTER CHARLES METZ	Newark
FRANCES KATHERYN MITZENBERG	Columbus
SAMUEL MORRIS	Bloomington
HERBERT MERTON MYERS	West Alexandria
WILLIAM AUGUSTUS NYE	Zanesville
LLOYD GAMBLE OWEN	Magnetic Springs
ROBERT GILDERSLEEVE PATERSON	Columbus
RAYMOND WOODBURY PENCE	Columbus
NIELS MORTENSEN PETERSON	Columbus
LYDIA PHILLIPS	Columbus
CLARA WILLIAMSON POSTLE	Columbus
KATHERINE MAY POTTER	Columbus
STANLEY FRANK RANKIN	Columbus
STOCKTON RAYMOND	Columbus
HELEN ESTELLE ROBERTS	Columbus
NOBLE WARREN ROCKEY	Dayton
MABEL CATHERINE RODEBAUGH	Columbus
RAYMOND EDGAR RUSK	Columbus
STANLEY THOMSON SCOFIELD	Ironton
WILLIAM ELMER SEALOCK	McConnellsville
ELIZABETH SESSIONS	Columbus
HAROLD KOCH SHAWAN	Columbus

JOHN ALBERT SMITH.....	Arcanum
JOSEPH ALFRED STIVER.....	Germantown
LOIS LEONORE STRICKLER.....	Columbus
OSCAR M. SULLIVAN.....	Columbus
SAMUEL NATHAN SUMMER.....	Shelby
WILLIAM HOWARD TIPTON.....	Caldwell
EMMA ETTA TURNER.....	Columbus
BESSIE LOUISE WAGNER.....	Columbus
HAROLD R. WILLIAMS.....	Urbana
ETHEL WOODBURY	Columbus
CLAUDE BURNETT YOUNG.....	West Rushville

BACHELOR OF SCIENCE

THOMAS HUDSON ARMSTRONG, JR.....	Woodsfield
DAVID BURNS CLARK.....	Shandon
VERNON FREDERICK PAVEY (as of the Class of 1904).....	Leesburg

MASTER OF ARTS

MARY LOUISE ARNOLD, B. A.....	Columbus
JOSEPH FRANKLIN CLEVINGER, B. Sc.....	Urbana
RAY DURAND CROUT, B. A.....	Columbus
BERTHOLD AUGUST EISENLOHR, B. Ph.....	Columbus
WALTER FISCHER, B. Sc.....	Columbus
MELLE WILSON GLASS, B. A.....	Columbus
THOMAS LUTHER HARRIS, B. A. (University of Illinois).....	Modesto, Ill.
WALDO ROY LEBOLD, B. A. (Heidelberg University).....	Attica
VELORUS MARTZ, B. A.....	Columbus
MARY ALOYSIA MOLLOY, B. Ph.....	Sandusky
MAX DELOS MORTON, B. Ph.....	Columbus
FRANK MACY SURFACE, B. A.....	Columbus
HARLAN HARVEY YORK, B. Sc. (DePauw University).....	Plainfield, Ind.

DOCTOR OF PHILOSOPHY

LUMINA COTTON RIDDLE, M. Sc.....	Columbus
----------------------------------	----------

COLLEGE OF ENGINEERING

CIVIL ENGINEER IN ARCHITECTURE

HUGH JACOB BAKER.....	Dayton
-----------------------	--------

CIVIL ENGINEER

CLYDE BLAINE ASHER.....	London
WAKEMAN CLARK BELL.....	Boston, Mass.
EDWIN BERNARD PELUEGER, B. Sc. (Capital University).....	Columbus
CHARLES HENRY BARIENBROCK.....	Columbus
CHARLES ALFRED GUISS.....	New Washington
GUY BURNNETTE BEBOUT.....	Wheeling, W. Va.
EARLE PRICE HAGEMEYER.....	Norwood
FERRAND SEYMOUR MERRILL.....	Cincinnati
MICHAEL FRANCIS CURRAN.....	Corning
CARL HENDERSON HAWTHORNE.....	Cambridge

RICHARD WALTON ROBINSON.....	Galion
JACOB ALBERT JACOBI.....	Greenville
CARLOS LENOX McMASTER.....	Columbus
LEWIS JOSEPH LAKE.....	Richwood
FRED BURGESS NELSON.....	North Olmsted
AUGUST CHARLES SCHULTZ.....	Sandusky
KENNETH BAKER WARD.....	Painesville

ENGINEER OF MINES IN CERAMICS

FRANK EDMUND LAYMAN.....	Youngstown
ELLSWORTH OGDEN.....	Columbus

ENGINEER OF MINES

DEAN WILCOX FLOWERS.....	Columbus
EUGENE EVERETT LANDAHL.....	Plain City
WILLIAM BENJAMIN MARQUARDT.....	Dayton
FREDERICK B. NOLD.....	Columbiana
DOWNS SCHAAF	Columbus
DELBERT BANCROFT SAYERS.....	Marits
JAMES BENTLEY SMALL.....	Columbus
WALTER STREIGHT STEWART.....	Mannington, W. Va.
KARL MARTIN WAY.....	Youngstown

MECHANICAL ENGINEER IN ELECTRICAL ENGINEERING

EVAN PAUL BONE.....	Cincinnati
LOCKE HENRY BURNHAM.....	Mechanicsburg
GEORGE HOADLEY SHAPTER.....	Columbus
LEWIS WARRINGTON CHUBB.....	Monterey, Cal.
HARRY LEROY HOPE.....	Paint
SHELDON DILL COOPER.....	Youngstown
FRANCIS MARION CRAFT.....	Columbus
AUBREY HUGO MELLINGER.....	Arcanum
CLYDE ELLSWORTH HAMMOND.....	Pittsburg, Pa.
ALFRED LEWIS HARRINGTON.....	Xenia
CHARLES RUDOLPH HEPNER.....	Valley Crossing
CALEB HOBBS	Barnesville
JOSEPH N. IANCU.....	Berlad, Roumania
CARL LAFAYETTE KNOPF.....	Columbus
WILLARD HOYT KEMPTON.....	Trimble
ORA FRANKLIN METZ.....	Summerside
TODD ALBERT WINGARD.....	Columbus
FREDERICK COOKMAN NESBITT.....	Columbus
SAMUEL BYRON WILLIAMS, JR.....	Dayton
WILLIAM ROTH WORK, B. A (Wittenberg College).....	Springfield

MECHANICAL ENGINEER

HERMAN WILLIAM CONRAD.....	Troy
DOWNEY RICHARDSON WALKER.....	Hartwell
HERMON GOODWIN WEINLAND.....	Springfield
ROBERT HENRY CUNNINGHAM, JR.....	Columbus
FREDERICK COTTON JEANNOT.....	Youngstown
ERNEST DANIEL WILLIAMS.....	Martins Ferry

WILLIAM WESLEY HACKNEY, JR.....	Dayton
EDWARD HENRY TENNEY, A. B. (Oberlin College).....	Oberlin
GEORGE H. WEAVER.....	St. Louisville
LLOYD CLARK HOPKINS.....	Garrettsville
LOUIS GILMORE ROBINSON.....	Newport, Ky.
GEORGE CARL VENNUM.....	Martins Ferry
OSCAR KUENZEL.....	New Bremen
DAVID THEODORE LAYLIN.....	Norwalk
CARL RIGDON	Columbus
CLAUDE CUSTER ROSE.....	Duval
CARL JOSEPH SMITH.....	Clintonville
ARTHUR CLIFTON WOLFE.....	Mt. Vernon
ARTHUR RAYMOND WYLIE.....	Reynoldsburg

COLLEGE OF LAW

BACHELOR OF LAWS

MATTHEW LEON BIGGER,, B. Sc. (Heidelberg University).....	Columbus
FRANK DELAY	Jackson
EMMITT E. EVERETT, B. P., B. Sc. (Lima College).....	Lima
GEORGE EDWIN HAGENBUCH, B. Ph.....	Urbana
ALVIN COOK BONNET, B. A.....	Columbus
HEATH KIRKE COLE, B. Sc. (Heidelberg University).....	Republic
THOMAS CHARLES DAVIS.....	East Greenville
GEORGE PHILIP HAHN.....	Napoleon
EDMUND RAY HUMMELL.....	Carroll
DANIEL C. JONES, B. Ph.....	Jackson
HUBERT MERLE KLINE, B. A. (Otterbein University).....	Dayton
LEWIS JOHN LEET, B. L. (Hiram College).....	Mantua Station
FRANKLIN EWING MARTIN.....	Columbus
CHARLES EWING OUTHWAITE, B. A. (Princeton University).....	Columbus
ASA EVERETT WARD, B. A. (Marietta College).....	Marietta

MASTER OF LAWS

EDMUND RAY HUMMELL.....	Carroll
-------------------------	---------

COLLEGE OF VETERINARY MEDICINE

DOCTOR OF VETERINARY MEDICINE

JAMES H. BURT.....	Eric, Pa.
ALBERT D. FITZGERALD.....	Old Fort
LEONARD WHITTLESY GOSS.....	Edinburg
ROSS PERRY MARSTELLER.....	Republic
HOWARD M. NEWTON.....	Ashville
ROBERT EVIN OLIVER.....	Chillicothe
HARRY EDGAR PINKERTON.....	Washington C. H.
SCOTT J. RIGDON.....	Columbus
HOWARD ELLENWOOD SMITH.....	Dunham

CERTIFICATES GRANTED

COLLEGE OF AGRICULTURE AND DOMESTIC SCIENCE

SHORT COURSE IN AGRICULTURE

ELMER CHARLES COOK.....	New Vienna
GROVER CLEVELAND LONG.....	Cardington

SHORT COURSE IN DAIRYING

THOMAS LEE BATES.....	Wilmington
WALTER E. CLINE.....	Columbus
FRED PEARL MILLS.....	Marysville
CHARLES HAMILTON PETTIT.....	Reynoldsburg
WILLIAM G. VAN METER.....	Philadelphia, Pa.
MAYNARD WOLCOTT	Lebanon

COLLEGE OF ENGINEERING

SHORT COURSE IN CLAYWORKING

EDWIN WILLIAMS RAYNOLDS.....	Columbus
------------------------------	----------

SHORT COURSE IN INDUSTRIAL ARTS

CLIFFORD HARRY PIDGEON.....	Goshen
RUSSELL M. SELLERS.....	Marshall
FRANK ELLSTON SMITH.....	Bellevue

COLLEGE OF LAW

BURTON P. BENTON.....	Delaware
JOHN VINTON DAGENHARDT.....	Piqua
CHARLES S. DRUGGAN.....	Jacksonville
BERT W. GEARHART.....	Columbus
WILLIAM L. HEITMANN.....	New Bremen
JOHNSON EDGAR DANIEL HARTINGER.....	Middleport
FRANK H. HORNBECK.....	Williamsport
THOMAS S. JONES.....	Yorkville
WILBUR B. LUTTON.....	Ashtabula
WILMER P. NEWTON.....	Lowell
HARRY ROCKEY PARKER.....	Pataskala
ABEL VAIL SHOTWELL.....	Marengo
JESSE ELISHA STRAYER.....	DeGraff
WILLIAM PHILIP VAN NESS.....	Mechanicsburg

COLLEGE OF PHARMACY

SHORT COURSE IN PHARMACY

HERMAN BOLLES	Gallipolis
EDWARD ENGLEKEN	Versailles
FRED J. LAWLER.....	Mt. Vernon
CLARK PATTON	Grand Rapids
EDWARD SPEASE	Dresden

COLLEGE OF VETERINARY MEDICINE

SHORT COURSE IN VETERINARY MEDICINE

ROLLY JAY CARVER.....	Leipsic
VERNON ALVA DENNIS.....	Wauseon
WILLIAM ALBERT GRACE.....	Columbus
WILLIAM MORGAN SMITH.....	Columbus
SAMUEL ELZA SPRINGER.....	Lakefork

[illegible]

his book is under no circumstances to be taken from the Building
